French Post-modern Masculinities-Lawrence R. Schehr 2009 As traditional notions of masculinity have been called into question, representational reactions and articulations have swept postmodern cultures. Certain contemporary French cultural productions illustrate this shift in masculinities and this volume offers up the first comprehensive examination of their development. Acclaimed critic Lawrence R. Schehr analyzes AIDS narratives, mainstream films, popular novels, graphic narratives, and rightist polemics, among other genres, in order to explore the changing meaning of masculinity in French society, making this volume appealing to a broad range of researchers and students in a variety of fields.

Human Diseases from Wildlife-Michael R. Conover 2014-09-18

Human Diseases from Wildlife presents information on the most prevalent and serious zoonotic diseases in the US and Canada, some of which have been national headline news like anthrax, influenza, and West Nile virus. Diseases that are caused by pathogens with the ability to infect both humans and animals are known as zoonotic diseases, which literally means "disease from animals." The issue of human-wildlife disease interactions is a growing concern as humans continue to interface with wildlife. People who handle wildlife including field workers, wildlife professionals, trappers, and hunters want to know about potential diseases, risks, and how to protect themselves from disease. This book was written because many people are uninformed about zoonotic diseases. This lack of information causes some people to have a heightened fear of zoonotic diseases, preventing them from enjoying wildlife or spending time outdoors. Other people needlessly expose themselves to disease by neglecting simple precautions. This book includes information on bacterial, spirochetal, rickettsial, and viral diseases as well as macroparasites and emerging zoonotic diseases. More than two dozen diseases are covered including rabies, tularemia, baylisascariasis, salmonellosis, leprosy, Lyme disease, Rocky Mountain spotted fever, and swimmer's itch. Each chapter contains the history of the disease, symptoms in humans, medical treatment, transmission of pathogens to humans, the role of wildlife as vectors, and methods to minimize risk. The diseases people can contract from wild animals can be both threatening and fascinating, and the book includes interesting information to make it more enjoyable to

read.

Analysing Police Interviews-Elisabeth Carter 2011-12-01 >
Causality in Macroeconomics-Kevin D. Hoover 2001-08-13 These ideas help to clarify philosophical as well as economic issues. The structural approach to causality is then used to evaluate more familiar approaches to causality developed by Granger, by LeRoy, and by Glymour, Spirtes, Scheines, and Kelly, as well as vector autoregressions, the Lucas critique, and the exogeneity concepts of Engle, Hendry, and Richard. A constructive approach to causal inference based on patterns of stability and instability in the face of identified regime changes is developed and illustrated in two empirical case studies of the causal direction between money and prices and between taxes and spending."--Jacket.

Designing Security for a Windows Server 2003 Network-Bill Ferguson 2004 A guide to the 70-298 exam provides coverage of all the exam objectives and key material along with test-taking tips and strategies.

Human Neuroanatomy-J. Edward Bruni 2009 Human Neuroanatomy: A Text, Brain Atlas, and Laboratory Dissection Guide has been substantially changed and updated from a previous edition entitled The Human Brain in Dissection published in 1988 and accordingly has been re-titled. The last 20 years have seen a significant shift in the way anatomy and its sub-disciplines like neuroanatomy are taught in both undergraduate and graduate neuroscience courses; not only has the time allocated for these courses been reduced, but the teaching methodologies have become more focused and specific due to time constraints. As reported by Drake et. al., "Medical education in the anatomical sciences: the winds of change continue to blow" (Anat. Sci. Educ., 2: 253-259, 2009), we have seen an overall drop in the total number of lecture hours and laboratory hours since the last survey done of medical curricula in 2002. Human Neuroanatomy has been reconstructed to appeal to just these changes: courses with a lab/dissection component as well as those without will find this guide the perfect teaching tool to understand human neuroanatomy. With these limitations in mind and to better meet current requirements the authors have expanded the textural content in this new edition and separated it entirely from the dissection instructions which have

been retained. The "Laboratory Exercise" as it is now designated stands alone in a highlighted box in each chapter. It outlines what is to be accomplished during a given session using pre-dissected specimens and/or appropriate models or by exposing them in a dissection. Clear step by step procedural instructions are provided and important structures to be seen are highlighted. The dissection sequence laid out in the chapters is a progressive one requiring only a single wet specimen and ideally completed in two hour periods. Students who do not have the opportunity to dissect, however may simply skip these paragraphs. In this 3rd edition of the book many new illustrations have been added to better depict the salient features of the brain at various stages of dissection and to facilitate understanding the subject matter. Labeling of some illustrations has changed and others have been replaced. All are amply referenced to the text and to the laboratory exercises and are intended to assist with or be used in lieu of dissection. New also in this edition is a section of clinically-relevant notes as well as USMLE type multiple-choice questions added in separate sections at the end of each chapter. These quiz type questions provide students with a means of assessing their understanding of the subject matter in each chapter and an indication of how their knowledge might be tested. And finally, an atlas of 62 labelled brain sections in four different planes, at the end of the book, has been retained. CT scans and M.R. images that correspond as closely as possible to the anatomic section are included. Comprehensive and concise Human Neuroanatomy: A Text, Brain Atlas, and Laboratory Dissection Guide is an invaluable guide to assist medical, dental and allied health science students understand nervous system structure, function and disease.

Introduction to Electrical Power Systems-Dr. Mohamed E. El-Hawary 2008-11-19 Adapted from an updated version of the author's classic Electric Power System Design and Analysis, with new material designed for the undergraduate student and professionals new to Power Engineering. The growing importance of renewable energy sources, control methods and mechanisms, and system restoration has created a need for a concise, comprehensive text that covers the concepts associated with electric power and energy systems. Introduction to Electric Power Systems fills that

need, providing an up-to-date introduction to this dynamic field. The author begins with a discussion of the modern electric power system, centering on the technical aspects of power generation, transmission, distribution, and utilization. After providing an overview of electric power and machine theory fundamentals, he offers a practical treatment-focused on applications-of the major topics required for a solid background in the field, including synchronous machines, transformers, and electric motors. He also furnishes a unique look at activities related to power systems, such as power flow and control, stability, state estimation, and security assessment. A discussion of present and future directions of the electrical energy field rounds out the text. With its broad, up-to-date coverage, emphasis on applications, and integrated MATLAB scripts, Introduction to Electric Power Systems provides an ideal, practical introduction to the field-perfect for self-study or short-course work for professionals in related disciplines.

Fischer-Tropsch Refining-Arno de Klerk 2012-12-21 The Fischer-Tropsch process is gaining recognition again due to the world-wide increase in energy needs and decrease in oil availability. The increasing interest in utilizing biomass as a potential renewable feedstock in energy generation is further supporting this development. The book covers the production and refining of Fischer-Tropsch syncrude to fuels and chemicals systematically and comprehensively, presenting a wealth of new knowledge and material. As such, it deals extensively with aspects of engineering, chemistry and catalysis. This handbook and ready reference adopts a fundamental approach, looking at the molecules and their transformation from feed to product. Numerous examples illustrate the possibilities and limitations of Fischer-Tropsch syncrude as feedstock. Of great interest to everyone interested in refining - not just Fischer-Tropsch specialists. From the Contents: Fischer-Tropsch Facilities and Refineries at a Glance Production of Fischer-Tropsch Syncrude Industrial Fischer-Tropsch Facilities Synthetic Transportation Fuels Refining Technology Refinery Design

EPC and 4G Packet Networks-Magnus Olsson 2012 Future mobile access networks will require upgraded telecommunications networks; 3G LTE/ SAE is the next step, allowing data rates above 100 Mbps. Telecommunications engineers will need to understand

the new SAE/ EPC architecture and its tendency towards automatic configuration, but the complexity, length and dryness of the standards documents make it difficult for them to find the information they need and work out how to apply it to their daily product and network development. This book - a new edition of SAE and the Evolved Packet Core - provides clear, concise and comprehensive coverage of the entire SAE/ EPC architecture, explaining concepts and standards and how they are used in commercial service settings. More than just a précis of the standards, it gives real insight into their development and the real-world scenarios in which they have been used since the publication of the first edition. This second edition places more emphasis on key aspects such as mobile systems and protocols (Diameter, GTP, S1-AP), and includes new coverage of femtocells, SIPTO, LIPA, LTE relay and LTE Advanced. Up-to-date coverage of SAE including the latest standards development Easily accessible overview of the architecture and concepts defined by SAE Thorough description of the Evolved Packet Core for LTE, fixed and other wireless accesses Comprehensive explanation of SAE key concepts, security and Quality-of-Service Covers potential service and operator scenarios including interworking with existing 3GPP and 3GPP2 systems Detailed walkthrough of network entities, protocols and procedures Written by established experts in the SAE standardization process, all of whom have extensive experience and understanding of its goals, history and vision

Kuhn's Evolutionary Social Epistemology-K. Brad Wray 2011-09-29
Kuhn's Structure of Scientific Revolutions (1962) has been enduringly influential in philosophy of science, challenging many common presuppositions about the nature of science and the growth of scientific knowledge. However, philosophers have misunderstood Kuhn's view, treating him as a relativist or social constructionist. In this book, Brad Wray argues that Kuhn provides a useful framework for developing an epistemology of science that takes account of the constructive role that social factors play in scientific inquiry. He examines the core concepts of Structure and explains the main characteristics of both Kuhn's evolutionary epistemology and his social epistemology, relating Structure to Kuhn's developed view presented in his later writings. The

discussion includes analyses of the Copernican revolution in astronomy and the plate tectonics revolution in geology. The book will be useful for scholars working in science studies, sociologists and historians of science as well as philosophers of science.

Precious Metals Investing For Dummies-Paul Mladjenovic

2011-02-09 In recent years, metals have been among the safest and most lucrative investments around, but they are not entirely risk free. Before you begin investing or trading in metals, you need

Picturing China in the American Press-David D. Perlmutter 2007

Picturing China is the first postDCold War intensive study comparing and contrasting press coverage of an important period in East-West relations to the what we know now of archival history. The book reveals the many instances when the American public and journalists, as well as our government, floundered in their attempt

to understand China and so serves as a cautionary tale for all those who wish to comprehend the complexities of other nations and other peoples via journalism's first draft of history.

Social Health Insurance for Developing Nations-R. Paul Shaw 2007-01-01 Specialist groups have often advised health ministers and other decision makers in developing countries on the use of social health insurance (SHI) as a way of mobilizing revenue for health, reforming health sector performance, and providing universal coverage. This book reviews the specific design and implementation challenges facing SHI in low- and middle-income countries and presents case studies on Ghana, Kenya, Philippines, Colombia, and Thailand.

The Empire of Night-Robert Olen Butler 2014-10-07 In the first two books of his acclaimed Christopher Marlowe Cobb series, *The Hot Country* and *The Star of Istanbul*, Pulitzer Prize winner Robert Olen Butler captured the hearts of historical crime fiction fans with the artfulness of his World War I settings and his charismatic leading man, a Chicago journalist recruited by American intelligence. In *The Empire of Night*, it is 1915, and President Woodrow Wilson is still assessing the war's threat to the United States. After proving himself during the Lusitania mission, Kit is now a full-blown spy, working undercover in a castle on the Kentish coast owned by a suspected British government mole named Sir Albert Stockman. And Kit is again thrown together with a female spy—his own mother, the beautiful and mercurial Isabel Cobb, who also happens to be a world-famous stage actress. Starring in a touring production of *Hamlet*, Isabel's offstage role is to keep tabs on the supposed mole, an ardent fan of hers, while Kit tries to figure out Stockman's secret agenda. Following his mother and her escort from the relative safety of Britain into the lion's den of Berlin, Kit must remain in character, even under the very nose of the Kaiser.

Interlanguage Variation in Theoretical and Pedagogical Perspective-H.D. Adamson 2009-02-15 In this book H.D. Adamson reviews scholarship in sociolinguistics and second language acquisition,

comparing theories of variation in first and second-language speech, with special attention to the psychological underpinnings of variation theory. Interlanguage is what second language learners speak. It contains syntactic, morphological and phonological patterns that are not those of either the first or the second language, and which can be analyzed using the principles and techniques of variation theory. Interlanguage Variation in Theoretical and Pedagogical Perspective: relates the emerging field of variation in second language learners' speech (interlanguage) to the established field of variation in native speakers' speech relates the theory of linguistic variation with psycholinguistic models of language processing relates sociolinguistic variation theory to the theory of Cognitive Grammar suggests teaching applications that follow from the theoretical discussion At the forefront of scholarship in the fields of interlanguage and variation theory scholarship, this book is directed to graduate students and researchers in applied English linguistics and second language acquisition, especially those with a background in sociolinguistics.

Handy Projects for Boys-Popular Mechanics Press 2014-04-15 The projects in Handy Projects for Boys first appeared in a major collection arranged by the editors of Popular Mechanics Press in 1913. During this time period, the methods and techniques used to create these items were just as important to the boys and men building them as the final projects themselves. They took care with their materials; they were precise and they labored over the smallest details. To know something was handcrafted was to know it was a quality piece. Because of the exactitude of the craftsmen's methods in the early 1900s, this historical and practical text features specific step-by-step instructions and includes many detailed illustrations for even the smallest or quickest jobs, including: Eskimo snow houses Box kites Boomerangs Chair sleighs Homemade roller skates Catapults Canoes And more More important than building the projects inside, this book offers fathers and sons, grandfathers and grandsons, and even uncles and nephews an opportunity to spend some time together, learn a bit about history, and produce fully functional pieces.

Wildlife Study Design-Michael L. Morrison 2008-05-25 We developed the first edition of this book because we perceived a need for a compilation on study design with application to studies of the ecology, conservation, and management of wildlife. We felt that the need for coverage of study design in one source was strong, and although a few books and monographs existed on some of the topics that we covered, no single work attempted to synthesize the many facets of wildlife study design. We decided to develop this second edition because our original goal - synthesis of study design - remains strong, and because we each gathered a substantial body of new material with which we could update and expand each chapter. Several of us also used the first edition as the basis for workshops and graduate teaching, which provided us with many valuable suggestions from readers on how to improve the text. In particular, Morrison received a detailed review from the graduate students in his "Wildlife Study Design" course at Texas A&M University. We also paid heed to the reviews of the first edition that appeared in the literature.

Mark, Manuscripts, and Monotheism-Dieter Roth 2015-02-26 Mark, Manuscripts, and Monotheism is organized into three parts: Mark's Gospel, Manuscripts and Textual Criticism, and Monotheism and Early Jesus-Devotion. With contributors hailing from several different countries, and including both senior and junior scholars, this volume contains essays penned in honor of Larry W. Hurtado by engaging and focusing upon these three major emphases in his scholarship. The result is not only a fitting tribute to one of the most influential New Testament scholars of present times, but also a welcome survey of current scholarship.

Canadian Pharmacy Exams - Pharmacist Evaluating Exam Practice, Volume 1-Fatima S. Marankan 2011-02-01 Canadian Pharmacy Exams - Pharmacist Evaluating Exam Practice is designed as a self-study tool to help the student seeking pharmacy licensure in Canada test his/her exam readiness, identify areas of strength and weakness to optimize learning. The book is divided according to four key areas listed below and contains over 600 exam-type questions and answers developed to meet the Evaluating Exam learning

objectives. The number of practice questions in each section reflects its relevance (weight) as per the Pharmacy Examining Board of Canada (PEBC(r)): 25% Biomedical Sciences, 35% Pharmaceutical Sciences, 30% Pharmacy Practice and 10% Behavioural, Social and Administrative Pharmacy Sciences. All Canadian content including pharmacy practice laws and regulations. Finally, answers are supplemented by numerous comments and explanations to ensure further understanding and learning of new concepts. Learn more about future publications at www.cpeprep.c

Players of Shakespeare 4-Royal Shakespeare Company 1998-12-10

This is the fourth volume of essays by actors with the Royal Shakespeare Company. Twelve actors including Sir Derek Jacobi, Jane Lapotaire and Julian Glover describe the Shakespearian roles they played in productions between 1992 and 1997. The plays covered include *The Merchant of Venice*, *Love's Labour's Lost*, *The Taming of the Shrew*, *The Winter's Tale*, and *Romeo and Juliet*, among others. The essays divide equally among comedies, histories, and tragedies, with emphasis among the comedies on those notoriously difficult "clown" roles. A brief biographical note is provided for each of the contributors.

The Pleasures of Statistics-Frederick Mosteller 2010-03-10 From his unique perspective, renowned statistician and educator Frederick Mosteller describes many of the projects and events in his long career. From humble beginnings in western Pennsylvania to becoming the founding chairman of Harvard University's Department of Statistics and beyond, he inspired many statisticians, scientists, and students with his unabashed pragmatism, creative thinking, and zest for both learning and teaching. This candid account offers fresh insights into the qualities that made Mosteller a superb teacher, a prolific scholar, a respected leader, and a valued advisor. A special feature of the book is its chapter-length insider accounts of work on the pre-election polls of 1948, statistical aspects of the Kinsey report on sexual behavior in the human male, mathematical learning theory, authorship of the disputed Federalist papers, safety of anesthetics, and a wide-ranging examination of the Coleman report on equality of educational opportunity. This volume is a companion to *Selected Papers of Frederick Mosteller* (Springer,

2006) and *A Statistical Model: Frederick Mosteller's Contributions to Statistics, Science, and Public Policy* (Springer-Verlag, 1990). Frederick Mosteller (1916–2006) was Roger I. Lee Professor of Mathematical Statistics at Harvard University. His manuscript was unfinished at his death and has been updated.

GCE O Level Examination Past Papers with Answer Guides: English Language India Edition-Cambridge International Examinations
2004-02-06 GCE O Level Examination Past Papers with Answer Guides: Chemistry

EPPP Fundamentals-Anne Klee, PhD 2013-11-04 "I am very pleased to see EPPP Fundamentals, a concise, compact presentation of essential information, that does not overwhelm the reader who is already feeling some anxiety about the upcoming exam. This is an efficient alternative to expensive EPPP preparation courses, and is now at the top of my list of recommendations for our graduates." Richard Tedeschi, PhD, Professor of Psychology, University of North Carolina-Charlotte This authoritative guide to the EPPP provides an affordable, concise, and comprehensive review of core exam content and includes over 300 sample questions. The guide goes beyond merely "teaching the test" through rote memorization. Instead, it covers the eight content domains of the EPPP and their knowledge areas in a step-by-step, narrative, and review format. The book also includes contributions from the directors of top psychology training and internship programs in the United States. The combined approach of providing a comprehensive review from true content experts helps users gain the depth and breadth of knowledge required for passing the exam, and mirrors how doctoral-level courses are commonly taught. The review gives test-takers an orientation to the EPPP by covering the development and format of the exam along with successful test-taking strategies. Chapters covering EPPP content domains each include a comprehensive review of the material, key points to remember, sample questions and answers, and recommended readings for more in-depth study. Reflecting the test's presentation, chapter authors cover each subject domain according to the ASPPB's EPPP Information for Candidates Guide. Chapters are written by clinical supervisors and faculty directly involved in training interns, residents, and fellows in psychology. In addition to sample exam questions with answers in

each chapter, a bonus section of 100 questions gives readers practice in taking this high-stakes test. Key Features: Presents an in-depth, comprehensive content review that goes beyond "teaching the test" Provides an affordable alternative to expensive EPPP preparation courses Written and edited by directors of the foremost training, internship, and postdoctoral fellowship programs Includes key points to remember, sample questions and answers, and recommended readings in each chapter Presents over 300 sample questions and answers

Nanostructured Metal Oxides-Enrico Traversa 2006-01-01 The use of metal oxides in nanostructured form, made possible by recent advances in their synthesis, allow the exploitation of unique physical and chemical properties of materials. This issue presents the latest advances in the controlled synthesis and processing of nanostructured oxides, and the design, fabrication, and performance of devices that utilize them. The emphasis will be on the beneficial effects of using nanostructured materials in environmentally-friendly applications.

Anarchy, Geography, Modernity-Elisée Reclus 2013-11-01 The first comprehensive introduction to the thought of Elisée Reclus, the great anarchist geographer and political theorist, *Anarchy, Geography, Modernity* presents his groundbreaking critique of all forms of domination: not only capitalism, the state, and authoritarian religion, but also patriarchy, racism, technological domination, and the domination of nature. Not only an anarchist, but also a radical feminist, antiracist, ecologist, animal rights advocate, cultural radical, nudist, and vegetarian, Reclus' ideas are presented both through detailed exposition and analysis and in extensive translations of key texts, most appearing in English for the first time. The work elucidates Reclus' greatest achievement, a sweeping historical and theoretical synthesis recounting the story of the earth and humanity as an epochal struggle between freedom and domination, and his crucial insights on the interrelation between personal and small-group transformation, broader cultural change, and large-scale social organization are also explored.

California Surfing and Climbing in the Fifties- 2013-12-31 The story told by the photographs in "California Surfing and Climbing in the Fifties" takes place against the larger backdrop of postwar America:

Truman and Eisenhower, the Korean War, the Cold War and the Red Scare. Young people were embracing new symbols of non-conformity: Elvis Presley, Jack Kerouac, Marlon Brando and James Dean. All along the California coast, surfing became popular as heavy balsawood boards were replaced with lightweight ones crafted from polyurethane foam, fiberglass and resin. Meanwhile, climbers descended on Tahquitz Rock in the south and Yosemite Valley to the north to test handcrafted equipment that would set new standards for safety, technique and performance. The photographs in this volume include images of legendary surfers such as Joe Quigg, Tom Zahn, Dale Velzy and Renny Yater, in locations such as Rincon, Malibu, South Bay, Laguna and San Onofre; and famous climbers such as Warren Harding, Royal Robbins and Wayne Merry among others, photographed mostly in the Yosemite Valley by the likes of Bob Swift, Alan Steck, Jerry Gallwas and Frank Hoover. Soaked in surf, sun and adrenaline, the photographs in "California Surfing and Climbing in the Fifties" depict the birth of an era and an exhilarating moment in Californian history.
