Magnetic Nanostructures-Kamel A. Abd-Elsalam 2019-05-23

Recently, magnetic nanostructures have gained a remarkable interest for basic research and applied studies. Because of their low cost and ease of manufacture and modification, they have great potential for agricultural and environmental applications. The use of magnetic nanostructures has been proven in a wide range of fields including catalysis, biotechnology, biomedicine, magnetic resonance imaging, agriculture, biosensors, and removal of environmental pollutants, among others. This book includes 16 chapters of collected knowledge, discoveries, and applications in agriculture, soil remediation, and water treatment. It describes the role of nano-agriculture with regard to food security and discusses environmental and agricultural protection concerns. It further offers potential applications of magnetic nanomaterials in the agriculture and food sectors, such as the development of sensors, environment monitoring for wastewater treatment and the remediation of contaminated soils. Increasing crop yield through the use of nanopesticides or nanofertilizers and biosecurity using sensors for detecting pathogens along the entire food chain are discussed as well. This book also brings together various sources of expertise on

different aspects magnetic nanostructure application in the agri-food sector and environment remediation. Magnetic nanostructures also have great potential in biotechnological processes, as they can be utilized as a carrier for enzymes during different biocatalytic transformations. Novel magnetic nanomaterials can be used for detection and separation of pesticides from environmental and biological samples. The excellent adsorption capacity of the modified magnetic nanoadsorbents together with other advantages such as reusability, easy separation, environmentally friendly composition, and freedom of interferences of alkaline earth metal ions make them suitable adsorbents for removal of heavy metal ions from environmental and industrial wastes. One of the most important environmental applications of magnetic nanostructures has been in the treatment of water, whether in the remediation of groundwater or through the magnetic separation and/or sensing of contaminants present in various aqueous systems. The integrated combination of these 16 chapters, written by experts with considerable experience in their area of research, provides a comprehensive overview on the synthesis, characterization, application, environmental processing, and agriculture of engineered magnetic nanostructures. Its comprehensive coverage discusses how nanostructure materials interact in plants as well as their potential and useful applications.

Septic Tank System Effects on Ground Water Quality-Canter
2017-11-01 This valuable reference delineates the ground water quality concerns associated with the planning and usage of septic tank systems. Septic tank systems represent a significant source of ground water pollution in the United States. Since many existing systems are exceeding their design life by several-fold, the usage of synthetic organic chemicals in the household and for system cleaning is increasing, and larger-scale systems are being designed and used.

Applied Metallurgy and Corrosion Control-Amiya Kumar Lahiri

hazards. To achieve this objective proper selection of materials, corrosion control, and good engineering practices must be followed in both the design and the operation of plants. Engineers and professional of different disciplines involved in these activities are required to have some basic understanding of metallurgy and corrosion. This book is written with the objective of serving as a one-stop shop for these engineering professionals. The book first covers different metallic materials and their properties, metal forming processes, welding, and corrosion and corrosion control measures. This is followed by considerations in material selection and corrosion control in three major industrial sectors, oil & gas production, oil refinery, and fertilizers. The importance of pressure vessel codes as well as inspection and maintenance repair practices have also been highlighted. The book will be useful for technicians and entry level engineers in these industrial sectors. Additionally, the book may also be used as primary or secondary reading for graduate and professional coursework.

The Importance of Fathers-Alicia Etchegoyen 2005-10-05 It is widely acknowledged that children need structure, security, stability and attachment to develop and flourish, and that the father is an important part of this. Issues such as high divorce rates, new family structures, increased mobility, women's liberation and contraception are very common in society. This book sets out to explore what has happened to men and to fathers during

changes and transitions. Judith Trowell and Alicia Etchegoyen, along with an array of renowned contributors, consider the importance of fathers in various situations, including: the role of the father at different stage of children's development the missing father loss of a father grandfathers. It is argued that the father is important, not only to support the main carer (usually the mother) but also to provide a caring, thinking, comfortable, confident presence.

Van Gogh's Untold Journey-William J. Havlicek 2010-01-31 William J. Havlicek's new and revealing book is based largely on Vincent van Gogh's astonishing letters of which over 900 exist. This important work—the result of over 15 years of research—provides new insight into the artist's true character nurtured from his abiding faith, the influence of family, and the tender solicitude he felt for mankind. The book also dispels much of the myth that has come to surround Vincent's tumultuous life. In the words of the author, the book illuminates instead "...an unknown, adventurous, deeply compassionate man whose essence seems to have been lost in the dramatic and often apocryphal stories surrounding his illness and early death. My effort is to resurrect an unknown aspect of Vincent—one that is even heroic and certainly praiseworthy...?".
