Praxis Manned Spaceflight Log 1961-2006-Tim Furniss 2007-02-22 This flagship work charts a complete chronological log of orbital manned spaceflight. Included are the X-15 "astroflights" of the 1960s, and the two 1961 Mercury and Redstone missions which were non-orbital. There is an image depicting each manned spaceflight, and data boxes containing brief biographies of all the space travelers. The main text is a narrative of each mission, its highlights and accomplishments, including the strange facts and humorous stories connected to every mission. The resulting book is a handy reference to all manned spaceflights, the names of astronauts and cosmonauts who flew on each mission, their roles and accomplishments.

Auto Repair For Dummies-Deanna Sclar 2019-01-07 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Structure and Reactivity in Organic Chemistry-Mark G. Moloney 2008

A Danish Jew in West Africa-Winsnes, Selena Axelrod 2014-01-16 Wulff's life history is of considerable interest in itself. In her biographical essay (Part I) Selena Axelrod Winsnes portrays him as a 'marginal man': being a Jew in Denmark at the beginning of the 19th century was to some extent an uphill struggle for those who sought public recognition, and Wulff did not escape discrimination in his administrative career at Christiansborg either, although special circumstances allowed him to hold important positions, and yet, only for the short term. Paradoxically, on his arrival to the Gold Coast Wulff - as a Jew - was placed in a middle position in the racial hierarchy dominating the mind-set of his superiors in Copenhagen ñ between Africans and Europeans. In many respects he shared the fate of Euro-Africans, straddling two worlds and being 'sealed off' from the top echelons of the European establishments on the Coast. This book comprises two parts. The first is a biographical presentation of Wulff Joseph Wulff , a Danish Jew. It is an essay concerning the last six years of his life, spent on the Gold Coast of West Africa, based on letters he wrote to his family in Denmark. Those letters were published in 1917 as Da Guinea var Dansk [When Guinea was Danish], by Carl Behrens, a member of his family in Denmark. The second part of the book is an edited translation of the letters from Danish into English.

Valuation for Arbitration-Mark Kantor 2008-01-01 This book provides a clear understanding of the nuts and bolts of valuation approaches for business investments, including market, income and asset-based methods. It reviews tools that arbitrators may employ to reach their final compensation assessment on a principled basis. The bookand[3]s many practical recommendations explore the decision making processes entailed in three central aspects of the arbitratorand[3]s role: and[3] advance planning to enhance understanding of expert valuation evidence; and[3] identification of and[3]apples-to-orangesand[3] miscomparisons; and and[3] recognition of the true comparability between the business at issue and other examples offered in the expert evidence. The presentation focuses not only on the legal standards applicable to the valuation (full or adequate compensation, reparations, restitution, actual loss, fair market value, fair and reasonably equivalent value, lost profits, etc.), but also on the informed judgment and reasonableness that must enter into the process of weighing the facts of each case and determining its aggregate significance. The book considers common valuation methods like discounted cash flows, adjusted present values, capitalized cash flows, adjusted book values and comparable sales and transactions. Additionally, it addresses means for arbitrators to assess expert valuation evidence in complex business investment disputes. andquot;Best book 2008 of the OCEMID awardsandquot;

The Wheel and I-Jim Washburn 2000 John Crean has excelled at so many things in his life - from mischief to race car driving to mobile home building to television chef to Fortune 500 millionaire. Solid Waste as a Renewable Resource-Jimmy Alexander Faria Albanese 2015-07-24 This title includes a number of Open Access chapters. The twenty-first century world faces several enormous challenges: how to mitigate climate change, meet a growing energy demand without relying on fossil fuels, and manage the escalating quantities of solid waste generated by cities around the world. This compendium volume offers a viable solution to all three: using solid waste as a renewable resource. Intended for a wide audience ranging from engineers and academics to decision-makers in both the public and private sectors, this volume has gathered together research into a range of technologies and methodologies. The editors, two well-published researchers at the top of their field, have selected articles that lay the foundation for this discussion. They have then included chapters for the following waste management scenarios: anaerobic digestion, composting, pyrolysis and chemical upgrading, incineration and carbonization, and gasification. Research has been included from around the world, representing potential international solutions to what are global challenges, as well as crucial implications for ongoing research in this important field of study.

The First Americans-James Adovasio 2009-01-16 J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, The First Americans is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Trace Elements in Obstetrics and Gynecology-Naira Roland Matevosyan, Dr 2013-02-10 A trace element (TE) is a chemical element presented below ~0.1 wt. % and required in minute quantities to maintain proper physical functioning. TE analysis in clinical samples (plasma, urine, cerebro-spinal fluid, full-term placenta, hair, nails, buccal mucosa, semen, biopsy specimens) has received increasing attention. Based on 62 sources, current effort presents comparative knowledge about the attempts to accurately trace TE in clinical samples through Vis/NIR, PIXE, TXRF, GFAAS, ICP-MS. It informs the need for further research adjustments to reveal the reciprocal states of certain TE (Cu/Zn, Ca/Mg, Fe/Pb) in correlation with their real-time counts in both maternal and neonatal umbilical cord plasma, and in relation to augmented oxidative stress. This would help to achieve consistency in interpreting obstetrical complications (preeclampsia, prematurity, or gestational diabetes). Generated hypotheses should target plausible mechanisms behind TE alterations and their stage-sensitive measures in gynecological cancer. New prospects are discussed in management and prognosis of endometriosis and premature ovarian failure (POF).

Frozen Stiff-Annelise Ryan 2012-08-01 Deputy coroner Mattie Winston knows everyone in the charmingly small town of Sorenson, Wisconsin--except the latest body discovered in a desolate field. If a woman this attractive had moved into town, the news would have surely hit the gossip mill in record time. So who was the murdered femme fatale? Whose knife was left planted in her chest? The mystery deepens when detective Steven Hurley takes one look at the body and turns as white as the newly fallen snow...and excuses himself from the case. It'll take all of Mattie's forensic skills to unravel the increasingly bizarre clues and find the killer. . before she herself becomes just another cold case in a frigid Midwest winter! "Has it all: suspense, laughter, a spicy dash of romance. . ." --Tess Gerritsen "The funniest deputy coroner to cut up a corpse since, well, ever." --Laura Levine "Mattie Winston is a likable, humorous heroine. . .lighthearted and fun." --Romantic Times

Good Derivatives-Richard L Sandor 2012-04-06 Through the eyes of an inventor of new markets, Good Derivatives: A Story of Financial and Environmental Innovation tells the story of how financial innovation - a concept that is misunderstood and under attack - has been a positive force in the last four decades. If properly designed and regulated, these "good derivatives" can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than "command-and-control". Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, Good Derivatives will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

The Rabbit on the Face of the Moon-Alfredo López Austin 1996 The Rabbit on the Face of the Moon is a collection of articles on mythology in the Mesoamerican tradition by Alfredo Lopez Austin, one of the foremost scholars of ancient Mesoamerican thought. Their span is diverse: myths and names, eclipses, stars, left and right, Mexica origins, Aztec incantations, animals, and the incorporation of Christian elements into the living mythologies of Mexico. The title essay relates the Mesoamerican myth explaining why there is a rabbit on the moon's face to a Buddhist image and suggests the importance of the profound mythical concepts presented by each image. The eighteen pieces in this volume are unified by their basis in Mesoamerican tradition and provide a fascinating look into a system of millennia-old legends and beliefs.

The Lies We Are-Ann Eichenmuller 2018-06-15 A dead man's secrets. A girl's forgotten past. The key to both mysteries is buried within three pages torn from a Civil War diary, raising questions that will pit Sandi Beck against a small-town Southern dynasty, a billionaire developer, and her own conflicting desires. As she untangles 150 years of lies, Sandi is faced with a choice - will she pursue the truth at any cost, even if the price is her own life? In a story that could be ripped from today's headlines, this sequel to Kind Lies exposes the dark influence of greed and bitterness on the human heart.

A Thirsty Land-Seamus McGraw 2020-08-11 As a changing climate threatens the whole country with deeper droughts and more furious floods that put ever more people and property at risk, Texas has become a bellwether state for water debates. Will there be enough water for everyone? Is there the will to take the steps necessary to defend ourselves against the sea? Is it in the nature of Americans to adapt to nature in flux? The most comprehensive--and comprehensible--book on contemporary water issues, A Thirsty Land delves deep into the challenges faced not just by Texas but by the nation as a whole, as we struggle to find a way to balance the changing forces of nature with our own ever-expanding needs. Part history, part science, part adventure story, and part travelogue, this book puts a human face on the struggle to master that most precious and capricious of resources, water. Seamus McGraw goes to the taproots, talking to farmers, ranchers, businesspeople, and citizen activists, as well as to politicians and government employees. Their stories provide chilling evidence that Texas--and indeed the nation--is not ready for the next devastating drought, the next catastrophic flood. Ultimately, however, A Thirsty Land delivers hope. This deep dive into one of the most vexing challenges facing Texas and the nation offers glimpses of the way forward in the untapped opportunities that water also presents.

Sonic Wonderland-Trevor Cox 2014 As an acoustic engineer, Trevor Cox has spent his career eradicating unwanted noises - echoes in concert halls, clamour in classrooms. Until the day he heard something so astonishing that he had an epiphany: rather than quashing rare or bizarre sounds, we should be celebrating these sonic treasures. This is the story of his investigation into the mysteries of these Sonic Wonders of the World. In the Mojave Desert he finds sand dunes that sing. In France he discovers an echo that tells jokes. In California he drives down a musical road that plays the William Tell Overture. In Cathedrals across the world he learns how acoustics change the history of the Church. Touching on physics, music, archaeology, neuroscience, biology, and design, Cox explains how sound is made and altered by the environment and how our body reacts to peculiar noises - from the exotic sonic wonders he encounters on his journey, or the equally unique and surprising sounds of our everyday environment. In a world dominated by the visual, Sonic Wonderland encourages us to become better listeners and to open our ears to the glorious cacophony around us. Listen to a selection of astonishing sounds here: <https://soundcloud.com/sonicwonderland>
