London Clubland-A. Milne-Smith 2011-11-15 This work is the first to study the gentlemen's clubs that were an important feature of the Late Victorian landscape, and the first to discover the secret history of clubmen and their world, placing them at centre stage, detailing how clubland dramatically shaped 19th and early 20th-century ideas about gender, power, class, and the city.

The Gentlemen's Clubs of London-Anthony Lejeune 2012-04-20 On its first publication in 1979, Lejeun's The Gentlemen's Clubs of London rapidly established itself as a widely sought-after and

quoted work around the world among those intrigued by and participating in the rarefied world of the famous clubs of London society. This is a new, thoroughly updated edition. This book lays forth the histories of the clubs, why and how each came into being, who belongs and belonged to which, how members are chosen, and how the clubs have changed down the generations - if indeed they have. This work tells of the ambience and grace of the clubs, their privacies and eccentricities, and of the yarns, disputes and scandals to which they have given rise. Here are new and archival photographs of the clubs' interiors, ranging from the elegant to the snug, premises which are sometimes secret and quirky and sometimes grand, each unique and fitting the character and contributing to the needs and lives of its members.

Sociology in Our Times-Diana Kendall 2016-01-01 This best-selling comprehensive book conveys the relevance of sociology by presenting a timely collection of theories, research, and examples -- including its signature first-person accounts that open many chapters. These lived experiences are relevant to students and introduce themes that provide a framework for learning the chapter material. Kendall's vivid and inviting writing style, emphasis on applications, and eye for compelling current examples further highlight sociology's relevance to all students. Now in its eleventh edition, SOCIOLOGY IN OUR TIMES is acclaimed for being the first textbook to integrate race, class, and gender issues, and for its thorough presentation of sociological theory, including contemporary perspectives such as feminism and postmodernism. This edition focuses more on social/global change and on the contemporary world, presenting such current debates as bullying and social media abuse, digital-age methods to increase school attendance, food trucks and the spread of culture, modern slavery, and weight bias. Creek—where moon fever runs high and a savage murderer runs rampant. There's no turning back for Neva Grant. To find a killer, she must seduce the boldest male in the Sinclair pack. Her twin sister lies in a hospital bed, fighting for her life, the fourth and only surviving victim of a vicious attacker. The werewolf rangers suspect the Sinclair pack, and the only way Neva can infiltrate their close-knit ranks is to unleash the wildness within and offer herself to Duncan Sinclair. Duncan's appetite for women is legendary on the reservation. But when this new woman stirs his hunger, he finds his desire for her goes deeper than anything he's ever felt before. When he realizes that she's playing a game and he's taken the bait, he is determined to push her to the breaking point. As Duncan and Neva engage in a dangerous dance, they must somehow find a way to join forces—before a cornered killer bites back. From the Paperback edition.

A Radical History of Development Studies-Uma Kothari 2016-12-15

In this book some of the leading thinkers in development studies trace the history of their multi-disciplinary subject from the late colonial period and its establishment during decolonization all the way through to its contemporary concerns with poverty reduction. They present a critical genealogy of development by looking at the contested evolution and roles of development institutions and exploring changes in development discourses. These recollections, by those who teach, research and practise development, challenge simplistic, unilinear periodizations of the evolution of the discipline, and draw attention to those ongoing critiques of development studies, including Marxism, feminism and postcolonialism, which so often have been marginalized in mainstream development discourse. The contributors combine personal and institutional reflections, with an examination of key themes, including gender and development, NGOs, and natural resource management. The book is radical in that it challenges orthodoxies of development theory and practice and highlights concealed, critical discourses that have been written out of conventional stories of development. The contributors provide different versions of the history of development by inscribing their experiences and interpretations, some from left-inclined intellectual perspectives. Their accounts elucidate a more complex and nuanced understanding of

development studies over time, simultaneously revealing common themes and trends, and they also attempt to reposition Development Studies along a more critical trajectory.. The volume is intended to stimulate new thinking on where the discipline may be moving. It ought also to be of great use to students coming to grips with the historical continuities and divergences in the theory and practice of development.

Bend Me Over-Sierra Cartwright 2010-01-31 HAWKEYE TWO:

BEND ME OVER Protecting sexy and uptight professor Aimee takes an interesting turn when Trace Romero discovers she has a secret passion for BDSM. Aimee's not ready to trust a tall, dark, gorgeous stranger with her body "or" her life. She would send him on his way, if her sister weren't so concerned about the break in at her house, and if she hadn't threatened protective custody. But protective custody might have been slightly less overwhelming than Trace demanding her complete capitulation, mind and body, and more -- her total trust. But that trust may be the only thing standing between her and a madman determined to kill her. HAWKEYE THREE: MAKE ME Competent and in control, Ms. Inamorata, Hawkeye's righthand woman, has the perfect relationship with hunky fellow operative Wesley Lowell. Several times a week, she shows up at his house, has fabulous sex, meaningless conversation, and then returns home and to her regular life. Hawkeye operative Wesley Lowell wants sexy, mysterious Ms. Inamorata in his life and his bed. Fed up with Inamorata's "here for the sex and gone in the morning" terms, he bends her over the bed, and takes her the way he wants to: hard, fast, dominating. Against her own wishes, Inamorata responds to his more heated sexual demands. For the first time since they've been together, he makes her beg for an orgasm, and beg she does. This oh-so-sexy man turns her life upside down, until she realizes she needs him not only as a demanding lover, but needs him by her side to solve a case that causes past and present to collide. "Publisher's Note: This book contains explicit sexual content, graphic language, and situations that some readers may find objectionable: BDSM theme and elements."

to accompany her eldest brother to America while her one surviving sister and two brothers remained behind. In this poignant and elegiac memoir, Loung recalls her assimilation into an unfamiliar new culture while struggling to overcome dogged memories of violence and the deep scars of war. In alternating chapters, she gives voice to Chou, the beloved older sister whose life in war-torn Cambodia so easily could have been hers. Highlighting the harsh realities of chance and circumstance in times of war as well as in times of peace, *Lucky Child* is ultimately a testament to the resilience of the human spirit and to the salvaging strength of family bonds.

Critical Human Resource Development-Jim Stewart 2007 Focuses on organisational goals and those of other stakeholders and society at large. This book provides an insight into the potential benefits and pitfalls, expectations and concerns of advancing a critical view of HRD in practice. It is intended for lecturers, students and practitioners who are aching for a critical analysis.

Sociology in Our Times: The Essentials-Diana Kendall 2011-01-01

The latest edition of *SOCIOLOGY IN OUR TIMES: THE ESSENTIALS* builds on the best of this popular text's previous editions while offering new chapter-opening first-person accounts of individuals lived experience and significantly updated coverage, learning tools, and opportunities for students to apply what they learn and make a difference in their own communities. Compelling examples, a vivid writing style, and chapter themes grounded in social issues already familiar to students hold students' interest and engage their sociological imaginations as they learn the concepts, theories, and research that comprise sociology today. A vibrant new interior design and an exciting collection of new videos with assignable activities complement the texts' new coverage of timely topics such as health care legislation, the U.S. and global economies, Barack Obama's presidency, and the BP oil spill in the

Gulf of Mexico. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Members Only-Diana Kendall 2008-06-25 In *Members Only* Diana Kendall shows how the upper classes use exclusive clubs as their private domain for conducting business, fostering social networks, and launching the next generation of elites - all beyond the view of outsiders and the media. In her research, Kendall explains how and why club members routinely engage in exclusionary practices that help them accumulate personal power and social capital that is unavailable to outsiders. *Members Only* addresses how exclusive private clubs maintain and perpetuate class-based privilege and racial/ethnic and religious segregation, and how such patterns of social exclusion heighten social inequality. This book continues Kendall's study of the upper classes, which began with *The Power of Good Deeds*, and *Framing Class*.

The Power of Good Deeds-Diana Kendall 2002-07-01 *The Power of Good Deeds* allows us to see behind the media image of upper-class women and to observe how these women use their social power not only to benefit other, less-fortunate people, but also to benefit themselves and their families. Kendall's ethnographic research yields the personal narratives of elite women as they describe their views on philanthropy, the need for exclusivity in their by-invitation-only volunteer organizations (such as the Junior League and The Links), their childhood experiences and college years in prestigious schools and sororities, and the debutante presentations and other upper-class rituals in which they participate. By participating in meetings and social functions with elite women in several Texas cities, and conducting systematic interviews, the author gained unprecedented access to elite women across racial and ethnic categories. *The Power of Good Deeds* provides new insights and greater depth to our knowledge about the upper classes and how the charitable activities of privileged women contribute to the process of legitimization, maintaining an ideology of class-based and race-based segregation in the United States.

S. Rainbow 2001-05-25 Forecasting the Environmental Fate and Effects of Chemicals is the first book to address specifically the issue of forecasting in environmental toxicology and chemistry from a methodological, regulatory and practical perspective. It is becoming increasingly important for environmental toxicologists and chemists to be able to forecast the fate and effects of chemicals by using existing information to predict the future. Providing a unique and timely opportunity for active researchers and students to obtain in a single volume the 'state of the art' in this expanding field, this text discusses how forecasts can be made by: * using ecotoxicological endpoints at different levels of biological organisation * measuring and modelling chemical fate in biotic and abiotic environments * adopting difference quantitative frameworks Written by an international team of scientists, this text will be essential reading for postgraduate and advance undergraduate students studying ecotoxicology, toxicology, chemistry and environmental statistics aswell as industrial and academic research scientists in environmental toxicology, environmental chemistry and those involved in risk management.

Framing Class-Diana Kendall 2011-04-16 Framing Class explores how the media, including television, film, and news, depict wealth and poverty in the United States. Fully updated and revised throughout, the second edition of this groundbreaking book now includes discussions of new media, updated media sources, and provocative new examples from movies and television, such as The Real Housewives series and media portrayals of the new poor and corporate executives in the recent recession. The book introduces the concepts of class and media framing to students and analyzes how the media portray various social classes, from the elite to the very poor. Its accessible writing and powerful examples make it an ideal text or supplement for courses in sociology, American studies, and communications.

Elements Of Nuclei-Philip J. Siemens 2018-03-08 In the present volume, Phillip J. Siemens, who has been a seminal contributor to our understanding of the nucleus as a many-body system, and his able collabourator, Aksel S. Jensen, introduce graduate students and colleagues in other fields to the basic concepts of nuclear physics in a way which connects clearly the methods of nuclear

physics with those of condensed matter, atomic, and particle physics. Their book thus provides a lucid introduction to the key facts and concepts of nuclei, including many of the most recent developments, while emphasizing the similarities and the differences between the behaviour of nuclei, atoms, elementary particles, and condensed matter, It should thus prove useful, not only as a text for an introductory graduate course in nuclear physics, but as a reference book for all scientists interested in a unified picture of our understanding of physical phenomena associated with many-body systems.

Leaping Hearts-J.R. Ward 2012-07-03 A.J. Sutherland knows her own mind. She also knows a champion when she sees him...

Everyone thinks A.J. Sutherland is crazy to buy a rogue stallion that no rider or trainer has been able to tame. But if anybody has the hustle to make something out of that hell-raiser, it's her. She can't do it alone, however, and goes after the great Devlin McCloud, an equestrian legend with a bad leg- and a worse attitude. Devlin recognizes a fighter when he sees one- and that horse isn't a wallflower, either. Before he knows it, he's got a wild stallion in his empty stable and a hot-headed, heavenly-bodied rider sleeping on his couch. But can he get all three of them through the championship in one piece? This passion he's found with his rider is compromising training- and at this level of competition, any distraction is not just unprofessional, but downright deadly...

Travels with the Wild Man-Timothy M Nugent 2015-12-27 My wife was a prodigious card giver. I put her many cards to poems for a lasting memory of her. Soon, "Timothy M Nugent: A Collection of Poems," with personal thoughts on life. Everything from my dogs' behavior to personal tragedy. Political mayhem to personal life.

"Travelogue 2" came from the many miles we traveled on the Harley. Just out: "The Lonely Biker," a story of a young man struggling to regain his life after a tragedy, death, revenge, and justice put in verse. Also "Understanding," a book of personal thoughts. Hopefully by the beginning of December, a new travelogue, Travels with the Wildman 3. I hope you enjoy all my books. I am looking forward to publishing a new book this year: "Poems of Costa Rica." Until then, pura vida! Timothy M Nugent

Earthrise 2036-Michael J. Lee 2020-01-21 It is one million years ago in the Cradle of Humankind. A small family of hominids is eking out a precarious existence on the sunbaked Southern African savannah when their son falls down a sinkhole during a bush fire and disappears below earth. Will mother, father and son ever be reunited? From this raw, fast-paced prehistoric adventure, Earthrise 2036 invites the reader to go on a journey through evolutionary time to the dawn of nuclear power, vividly depicting the horror of Hiroshima after the world's first atomic bomb was dropped on the city at the end of World War 2. Then, with intense documentary realism, the novel enables the reader to relive the wonders of the first human spaceflight when Yuri Gagarin stunned the world by rocketing into orbit to see the whole earth as one for the first time in mankind's history. Lee takes the reader deeper into the space age with a realistic depiction of the inaugural landing of humans on the Moon in a daring and epic achievement of modern science. The fifth and final section is pure science fiction as the novel explores the solar system with a spaceman who doesn't know if he is dead or alive and whether he's about to discover the greatest secret of the universe, namely, is it possible to travel at the speed of light and, if it is, what world waits beyond on the other side of light? Chakra Healing-Amalmani Taylor 2019-09-02 □ FOR A LIMITED TIME ONLY □ Buy the Paperback and Get the eBook for FREE! Includes 2 Manuscripts Chakra Healing Book: The art of chakra healing has been used for centuries to balance important energy centers in our body called chakras. We can use several different tools, such as stones or meditation during chakra balancing. The result will be a physically healthier body and a happier, more peaceful you. The word chakra comes from a Sanskrit - ancient Indian language - a word which can mean either spinning wheel, circle or vortex. From this word, we intuit that chakras are a spiraling dynamic force. Energy flows through the subtle body and indeed the physical body through nadis or channels. The Sushumna is the central channel which is like the spinal cord of the subtle body, with lesser channels, Ida, and Pingala spiraling around it, and thousands of smaller nadis, extending to all areas of the body. nadis are kind of like the central nervous system of the subtle body. Practical Meditation Book: Meditation is one of the great eastern practices that has started to take hold in western culture. People all over the world are benefiting from it, both in mind and body. So, why isn't everyone meditating? It could be that not everyone knows of all the amazing benefits like increased relaxation and decreased levels of anxiety and depression. This book contains a rundown of only some of the many benefits of meditation and a set of instructions for starting your meditation practice. Some styles of meditations rely on complete silence, some employ the repetition of specific words or "mantras," some offer guided imagery and affirmations, some focus on specific energy centers or "chakras," some utilize specific sounds and music, some have very ancient roots, rituals, and religious traditions. And there are many more varieties and combinations. Some meditations focus primarily on relaxation and the well-documented health benefits associated with this. Other meditations go beyond relaxation to help us reconnect with the deeper clarity, power, peace, and wholeness within us.

Wide-Bandwidth High-Resolution Search for Extraterrestrial Intelligence-National Aeronautics and Space Adm Nasa 2018-10-18 A third antenna was added to the system. It is a terrestrial low-gain feed, to act as a veto for local interference. The 3-chip design for a 4 megapoint complex FFT was reduced to finished working hardware. The 4-Megachannel circuit board contains 36 MByte of DRAM, 5 CPLDs, the three large FFT ASICs, and 74 ICs in all. The Austek FDP-based Spectrometer/Power Accumulator (SPA) has now been implemented as a 4-layer printed circuit. A PC interface board has been designed and together with its associated user interface and control software allows an IBM compatible computer to control the SPA board, and facilitates the transfer of spectra to the PC for

display, processing, and storage. The Feature Recognizer Array cards receive the stream of modulus words from the 4M FFT cards, and forward a greatly thinned set of reports to the PC's in whose backplane they reside. In particular, a powerful ROM-based state-machine architecture has been adopted, and DRAM has been added to permit integration modes when tracking or reobserving source candidates. The general purpose (GP) array consists of twenty '486 PC class computers, each of which receives and processes the data from a feature extractor/correlator board set. The array performs a first analysis on the provided 'features' and then passes this information on to the workstation. The core workstation software is now written. That is, the communication channels between the user interface, the backend monitor program and the PC's have working software. Horowitz, Paul Unspecified Center NAGW-2872...
