As recognized, adventure as without difficulty as experience roughly lesson, amusement, as without difficulty as pact can be gotten by just checking out a ebook **90 posti concorso aifa gu 12 gennaio 2018 n 4 quiz commentati di cultura generale per la preparazione alla prova preselettiva di tutti i profili con software di simulazione** in addition to it is not directly done, you could admit even more nearly this life, something like the world.

We come up with the money for you this proper as competently as simple way to get those all. We allow 90 posti concorso aifa gu 12 gennaio 2018 n 4 quiz commentati di cultura generale per la preparazione alla prova preselettiva di tutti i profili con software di simulazione and numerous ebook collections from fictions to scientific research in any way. along with them is this 90 posti concorso aifa gu 12 gennaio 2018 n 4 quiz commentati di cultura generale per la preparazione alla prova preselettiva di tutti i profili con software di simulazione that can be your partner.

Gazzetta ufficiale della repubblica Italiana-Italy 1919
A Man’s Blessing-Leonardo Sciascia 1968 A novel set in Sicily. The anonymous letter arrived in the afternoon mail. The message, spelled out in words that had been cut from a newspaper, read: “This letter is your death sentence. To avenge what you have done, you will die.”
Hodson and Geddes’ Cystic Fibrosis, Fourth Edition-Andrew Bush 2015-07-02
Hodson and Geddes’ Cystic Fibrosis provides everything the respiratory clinician, pulmonologist or health professional treating patients needs in a single manageable volume. This international and authoritative work brings together current knowledge and has become established in previous editions as a leading reference in the field. This fourth edition includes a wealth of new information, figures, useful videos, and a companion eBook. The basic science that underlies the disease and its progression is outlined in detail and put into a clinical context. Diagnostic and clinical aspects are covered in depth, as well as promising advances such as gene therapies and other novel molecular based treatments. Patient monitoring and the importance of multidisciplinary care are also emphasized. This edition: Features accessible sections reflecting the multidisciplinary nature of the cystic fibrosis care team
Contains a chapter written by patients and families about their experiences with the disease
Includes expanded coverage of clinical areas, including chapters covering sleep, lung mechanics and the work of breathing, upper airway disease, insulin deficiency and diabetes, bone disease, and sexual and reproductive issues
Discusses management both in the hospital and at home
Includes a new section on monitoring and discusses the use of databases to improve patient care
Covers monitoring in different age groups, exercise testing and the outcomes of clinical trials in these areas
Includes chapters devoted to nursing, physiotherapy, psychology, and palliative and spiritual care
Throughout, the emphasis is on providing an up-to-date and balanced review of both the clinical and basic science aspects of the subject and reflecting the multidisciplinary nature of the cystic fibrosis care team.
Hospital-Based Health Technology Assessment-Laura Sampietro-Colom 2017-01-23
A timely work describing how localized hospital-based health technology assessment (HB-HTA) complements general, ‘arms-length’ HTA agency efforts, and what has been the collective global impact of HB-HTA across the globe. While HB-HTA has gained significant momentum over the past few years, expertise in the field, and information on the operation and organization of HB-HTA, has been scattered. This book serves to bring this information together to inform those who are currently working in the field of HTA at the hospital, regional, national or global level. In addition, this book is intended for decision-makers and policy-makers with a stake in determining the uptake and decommissioning of new and established technologies in the hospital setting. HTA has traditionally been performed at the National/Regional level by HTA Agencies, typically linked to governments. Yet hospitals are the main entry door for most health technologies (HTs). Hospital decision-makers must undertake multiple high stakes investments and disinvestment decisions annually for innovative HTs, usually without adequate information. Despite the existence of arms-length HTA Agencies, inadequate information is available to hospital decision-makers either because relevant HTA reports are not yet released at the time of entry of new technologies to the field, or because even when the report exists, the information contained is insufficient to clarify the contextualized informational needs of hospital decision makers. Therefore, there has recently been a rising trend toward hospital-based HTA units and programs. These units/programs complement the work of National/Regional HTA Agencies by providing the key and relevant evidence needed by hospital decision makers in their specific hospital context, and within required decision-making timelines. The emergence of HB-HTA is creating a comprehensive HTA ecosystem across health care levels, which creates better bridges for knowledge translation through relevance and timeliness.
Treatment of Dystonia-Dirk Dressler 2018-05-31
Comprehensive reference for neurologists, neurosurgeons and physical therapists on the treatment of all dystonias in children and adults.
The Emerging Science of Homeopathy-Paolo Bellavite 2002
In this updated reissue of their 1995 classic ‘Homeopathy - a frontier in Medical Science’, Italian physicians Paolo Bellavite and Andrea Signorini thoroughly examine previous and current literature on the science of homeopathy in order to discover answers to he elemental questions - does it work? And if so, how does it work? Tackling the problem of the nanopharmacological doses of homeopathy (high potencies, in homeopathic parlance), Bellavite and Signorini engage in a fascinating discussion of the biophysics of water, biological effects of electromagnetic fields, chaos theory, and fractals. They construct a plausible model of homeopathy’s mechanism of action and offer up a compelling argument for the inclusion of homeopathy in the world of mainstream medicine and science.
Handbook of Atopic Eczema-Thomas Ruzicka 2013-03-09
State-of-the-art review on atopic eczema, one of the most common skin diseases today. This multi-authored handbook covers all aspects relevant for physicians from various disciplines.
The Culture of Death: The Assault on Medical Ethics in America (Large Print 16pt)-Wesley J. Smith 2010-10-06
When his teenaged son Christopher, brain-damaged in an auto accident, developed a 106-degree fever following weeks of unconsciousness, John Campbell asked the attending physician for help. The doctor refused. Why bother? The boy’s life was effectively over. Campbell refused to accept this verdict. He demanded treatment and threatened legal action. The doctor finally relented. With treatment, Christopher’s temperature subsided almost immediately. Soon afterwards he regained consciousness and today he is learning to walk again. This story is one of many Wesley Smith recounts in his groundbreaking new book, The Culture of Death. Smith believes that American medicine “is changing from a system based on the sanctity of human life into a starkly utilitarian model in which the medically defenseless are seen as having not just a ‘right’ but a ‘duty’ to die.” Going behind the current scenes of our health care system, he shows how doctors withdraw desired care based on Futile Care Theory rather than provide it as required by the Hippocratic Oath. And how “bioethicists” influence policy by considering questions such as whether organs may be harvested from the terminally ill and disabled. This is a passionate, yet coolly reasoned book about the current crisis in medical ethics by an author who has made “the new thanatology” his consuming interest. Robbins and Cotran Atlas of Pathology E-Book-Edward C. Klatt 2015-02-25
Designed to complement Robbins and Cotran Pathologic Basis of Disease, 9th Edition and Robbins Basic Pathology, 9th Edition, the full-color Robbins and Cotran Atlas of Pathology offers more than 1,500 outstanding illustrations that vividly depict the most common diseases covered in pathology courses and USMLE exams. It’s a quick visual reference or review for students and professionals alike. Quickly compare gross, microscopic, and radiologic images with examples of normal organs and tissues. Review just the key information you need to know with help from extensive legends that provide convenient summarizations. Understand the correlation between pathology and clinical history, physical exam findings, and clinical laboratory tests. Visualize key pathologic findings with crystal clarity through over 400 new or updated images. Study effectively with this unique companion product! All chapters have been reviewed and revised to reflect the new content found in Robbins and Cotran Pathologic Basis of Disease, 9th Edition (ISBN: 978-1-4557-2613-4).
Echocardiography for Intensivists-Armando Sarti 2012-12-18
This book contains all the information that readers will require in order to perform echocardiography and to interpret the findings correctly. After an introductory chapter on the essential physics of ultrasonography, standard echocardiographic examination via both the transthoracic and the transesophageal approach is described. In the third section, the functional anatomy of all normal and pathologic thoracic structures as observed on echocardiography is presented in detail. A wide range of basic and advanced applications of echocardiography in the emergency and intensive care setting are then described. A final supplementary section considers further applications of ultrasound in the intensive care unit. This superbly illustrated book has been specifically designed to meet the needs of all intensivists, emergency physicians, and anesthesiologists who intend to use ultrasound extensively to guide optimal management of the critically ill.
Mispricing of Stocks and Firm Investment in Competitive Industries. How Do They Influence Each Other?-Jonas Junker 2020-05-20
Bachelor Thesis from the year 2017 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: 1.3, University of Münster, language: English, abstract: The existing research focuses on two channels how stock (mis-)pricing influences firm investment. On the one hand, the informational role of prices is examined. The general conclusion shared by many papers is as follows: managers learn from high prices that the aggregated opinion of investors sees promising investment opportunities. Hence, decision makers invest because they either learn from actual new information or they want to cater the investors and keep the stock prices high because of personal incentives. On the other hand, the financing role of equity is investigated. Many papers come to the same conclusion. Mispriced stocks are equal to misvalued eq-uity. Consequently, if stocks are overpriced the cost of financing through issuance of new shares declines. If the cost of financing declines, more in-vestment opportunities seem to be promising. Therefore, the firm’s investment activity increases. Additionally, third parties and potential debt lenders like banks evaluate the firm based on the stock performance amongst other aspects. If the stock price is high banks are more likely to issue credit and reduce their demands concerning the terms of debt (e.g. decrease inter-est rate). This is particularly important for financially constrained firms which are only able to invest in new projects if they are able to raise capital on their own. By following the approach of Polk and Sapiezna (2009, pp. 191-194), my thesis examines if the relation of firm investment to stock mispricing is influenced by market concentration. At first, I regress firm investment on mispricing, investment opportunities and cash flow proxies on my whole sample. Afterwards I build sub samples based on market concentration and conduct the same regression on those sub samples again. Thereby, my re-search adds the dimension of market competition to the existing research. The thesis is organized as follows. In section 2 I briefly sum up the status quo in terms of research on the relation between mispricing and investment behavior. I state and explain my hypotheses in my third chapter. Following the explanations, I describe the data and methodology further in section 4. After evaluating my empirical results and documenting my robustness tests in section 5, I present my conclusions in chapter 6.
Pedagogy and Human Movement-Richard Tinning 2009-09-10
Across the full range of human movement studies and their many sub-disciplines, established institutional practices and forms of pedagogy are used to (re)produce valued knowledge about human movement. Pedagogy and Human Movement explores this pedagogy in detail to reveal its applications and meanings within individual fields. This unique book examines the epistemological assumptions underlying each of these pedagogical systems, and their successes and limitations as ways of (re)producing knowledge related to physical activity, the body, and health. It also considers how the pedagogical discourses and devices employed influence the ways of thinking, practice, dispositions and identities of those who work in the fields of sport, exercise and other human movement fields. With a scope that includes physical education, exercise and sports science, sports sociology and cultural studies, kinesiology, health promotion, human performance and dance, amongst other subjects, Pedagogy and Human Movement is the most comprehensive study of pedagogical cultures in human movement currently available. It is an invaluable resource for anybody with an interest in human movement studies.
Machines-Anne Rockwell 1985-09
Describes the operations of machines and machine parts.
The Sweetness of Life-Eugene D. Genovese 2017-10-05
This book examines the home and leisure life of planters in the antebellum American South. Based on a lifetime of research by the late Eugene Genovese (1930–2012), with an introduction and epilogue by Douglas Ambrose, The Sweetness of Life presents a penetrating study of slaveholders and their families in both intimate and domestic settings: at home; attending the theatre; going on vacations to spas and springs; throwing parties; hunting; gambling; drinking and entertaining guests, completing a comprehensive portrait of the slaveholders and the world that they built with slaves. Genovese subtly but powerfully demonstrates how much politics, economics, and religion shaped, informed, and made possible these leisure activities. A fascinating investigation of a little-studied aspect of planter life, The Sweetness of Life broadens our understanding of the world that the slaveholders and their slaves made; a tragic world of both ‘sweetness’ and slavery.
The Uneasy Balance Potential and Challenges of the West’s Relations with the Gulf States-Riccardo Alcaro 2013
Teaching Patients with Low Literacy Skills-Cecilia Conrath Doak 1996
This practical text guides the reader in developing the necessary tools for teaching those patients with limited literacy skills. Nurses will learn proven strategies for evaluating comprehension and teaching patients using written materials, tapes, video, computer aided instruction, visuals, and graphics. An abundance of case studies helps to demonstrate the application of teaching/learning theory to actual practice. Readers will also explore literacy issues in health care as well as the cultural impact on comprehension.
Mafia and Antimafia-Umberto Santino 2015-07-23
The mafia is the impenetrable and seemingly infallible embodiment of notoriety and criminality. Umberto Santino, one of Italy’s leading mafia experts, here provides a new perspective on the mafia: as a polymorphic organization which encompasses crime, the accumulation of corruptly acquired wealth and power, the cultural code of omerta and consensus. Exploring the movements which strive to fight against the powers of the mafia, such as the campaigns of civil society organizations like the Centro siciliano di documentazione, the author also provides a fresh look at the mechanisms - and struggles - of the antimafia movement.
Handbook of Headache-Paolo Martelletti 2011-08-14
Headache disorders are among the most common disorders of the nervous system. They are pandemic and, in many cases, they are recurrent and can accompany the patient for the whole life. These disorders impose a substantial burden on headache sufferers, on their families and on society: the individual impact is measured by the frequency and severity of attacks, while the societal burden is measured in terms of loss of activity at work and school as well as of costs for the health system. As a matter of facts, headaches are ranked in the top ten, and maybe the top five, causes of disability worldwide; they are therefore extraordinarily common. Population-based studies have mostly focused on migraine, which, even if it is the most frequently studied headache disorder, is not the most common. Other types of headache, such as the more prevalent TTH and sub-types of the more disabling chronic daily headache, have so far received less attention and need to be better investigated. This book will provide a useful tool to a wide medical population, who is required specific skills to diagnose and manage these frequent and often disabling disorders. Furthermore, it could also represents a compendium for medical students who are usually introduced to this topic through multidisciplinary university programmes.
Pharmacognosy and Phytotherapy-Kendall Jefferson 2019-06-27
The sub-specialty of pharmacy concerned with the study of the medicinal drugs derived from plants and other natural sources is called pharmacognosy. It involves the study of the physical, biological and chemical properties of drugs, as well as the search of new drugs from natural sources. The alternative and pseudoscientific practices of using unrefined plant or animal extracts for the purpose of treatment is called phytotherapy. Herbal medicines are used to treat patients suffering from chronic conditions or diseases like asthma, cancer, diabetes, etc. This book traces the progress of pharmacognosy and phytotherapy, and highlights some of their key concepts and applications. It strives to provide a fair idea about these disciplines and to help develop a better understanding of the latest advances within these fields. This book includes contributions of experts, which will provide innovative insights into these fields.
Assessing the Macroeconomic Impact of Structural Reforms The Case of Italy-Lusine Lusinyan 2013-01-24
Wide-ranging structural reforms are underway in Italy, aimed at addressing key bottlenecks in the product and labor markets. Our analysis, based on the IMF’s Global Integrated Monetary and Fiscal model (GIMF), attempts to quantify the potential gains to the economy from a comprehensive package of structural reforms. We find that these gains can be sizeable. While in most cases, the reforms go in the right direction, their impact would depend on effective and timely implementation. In some areas, especially in the labor market, reforms would benefit from further strengthening. The priorities should be to strengthen competition in the non-tradable sector and make the labor market more efficient and inclusive, supported by growth-friendly fiscal reforms.
The Fourth Revolution-Luciano Floridi 2014-06-26
Who are we, and how do we relate to each other? Luciano Floridi, one of the leading figures in contemporary philosophy, argues that the explosive developments in Information and Communication Technologies (ICTs) is changing the answer to these fundamental human questions. As the boundaries between life online and offline break down, and we become seamlessly connected to each other and surrounded by smart, responsive objects, we are all becoming integrated into an “infosphere”. Personas we adopt in social media, for example, feed into our ‘real’ lives so that we begin to live, as Floridi puts it, “online”. Following those led by Copernicus, Darwin, and Freud, this metaphysical shift represents nothing less than a fourth revolution. “Online” defines more and more of our daily activity - the way we shop, work, learn, care for our health, entertain ourselves, conduct our relationships; the way we interact with the worlds of law, finance, and politics; even the way we conduct war. In every department of life, ICTs have become environmental forces which are creating and transforming our realities. How can we ensure that we shall reap their benefits? What are the implicit risks? Are our technologies going to enable and empower us, or constrain us? Floridi argues that we must expand our ecological and ethical approach to cover both natural and man-made realities, putting the ‘e’ in an environmentalism that can deal successfully with the new challenges posed by our digital technologies and information society.
European Drug Policies-Renaud Colson 2017-01-27
The drug control regime established by the international community has not succeeded in curbing either the demand for, or the offer of, narcotics. But, despite a series of developments in the Americas - including the legalisation of cannabis in Uruguay and in several states in the United States of America - there is still little support in Europe for repealing drug-prohibition laws. Nevertheless, a gradual policy convergence reveals the emergence of a European model favouring public-health strategies over a strictly penal approach to combatting drugs, while growing transnational support for legalisation indicates the persistence of an alternative paradigm for drug policy. This book examines the various influences on drug policies in Europe, as grassroots movements, NGO networks, private foundations and academic research centres increasingly confront the prevailing discourses of drug prohibition. Pursuing an interdisciplinary approach and bringing together legal scholars, social scientists and practitioners, it provides a comprehensive and critical assessment of drug policy reform in Europe.
Health 4.0: How Virtualization and Big Data are Revolutionizing Healthcare-Christoph Thuemmler 2017-01-07
This book describes how the creation of new digital services—through vertical and horizontal integration of data coming from sensors on top of existing legacy systems—that has already had a major impact on industry is now extending to healthcare. The book describes the fourth industrial revolution (i.e. Health 4.0), which is based on virtualization and service aggregation. It shows how sensors, embedded systems, and cyber-physical systems are fundamentally changing the way industrial processes work, their business models, and how we consume, while also affecting the health and care domains. Chapters describe the technology behind the shift of point of care to point of need and away from hospitals and institutions; how care will be delivered virtually outside hospitals; that services will be tailored to individuals rather than being designed as statistical averages; that data analytics will be used to help patients to manage their chronic conditions with help of smart devices; and that pharmaceuticals will be interactive to help prevent adverse reactions. The topics presented will have an impact on a variety of healthcare stakeholders in a continuously global and hyper-connected world. · Presents explanations of emerging topics as they relate to e-health, such as Industry 4.0, Precision Medicine, Mobile Health, 5G, Big Data, and Cyber-physical systems; · Provides overviews of technologies in addition to possible application scenarios and market conditions; · Features comprehensive demographic and statistic coverage of Health 4.0 presented in a graphical manner.
Science at the Bar-Sheila JASANOFF 2009-06-30
Introduction to European Union transport law - terza edizione-Margherita Colangelo 2019-10-01
Un manuale per corsi di Diritto dei trasporti dell’Unione Europea, una branca di crescente complessità segnata da una fortissima inter-relazione fra concorrenza, aiuti di Stato, servizi di interesse economico generale, tutela dei consumatori. Il volume, dopo una introduzione sulle principali disposizioni comunitarie, è diviso in cinque moduli: I. Trasporto aereo. II. Trasporto ferroviario. III. Servizi portuali. IV. Trasporto locale e piattaforme digitali. V. Diritti dei passeggeri. Il volume comprende le più importanti decisioni delle Corti UE che hanno aperto e configurato il mercato per servizi di trasporto trans-europei.
Macroeconomic Imbalances-European Commission. Directorate-General for Economic and Financial Affairs 2012
On 14 February 2012, the European Commission presented its first Alert Mechanism Report (AMR) in accordance with the Regulation (EU) No. 1176/2011 on the prevention and correction of macroeconomic imbalances. The AMR serves as an initial screening device to identify Member States that warrant further in depth analysis into whether imbalances exist or risk emerging. According to Article 5 of Regulation No. 1176/2011, these country-specific ?in-depth reviews? should examine the nature, origin and severity of macroeconomic developments in the Member State concerned, which constitute, or could lead to, imbalances. On the basis of this analysis, the Commission concludes whether it considers that an imbalance exists or not, and if so whether it is excessive or not, and what type of follow-up it will recommend to the Council to address to the Member State. This in-depth review concludes that Hungary is experiencing serious macroeconomic imbalances, which are not excessive but need to be addressed. In particular, certain macroeconomic developments such as the highly negative size of the net international investment position and public debt deserve very close attention so as to reduce the important risks of adverse effects on the functioning of the economy.
God Found the Smartest Men & Made Them Aerospace Engineers-Heavenlyjjoy Xmas Gifts 2019-11-29
Wondering what kind of fun gift to choose for Christma, birthday, mothers day etc, for someone close to you? Try this gift. This is a perfect blank, lined journal for men, women, and children. Great for taking down notes, reminders, and crafting to-do lists. Also a great creativity gift for decoration or for a notebook for school or office! This novelty journal includes Beautiful matte-finished cover Fresh white paper 120 pages 6x9 inch format. We have even more wonderful titles that you'll enjoy! Be sure to click on the author name for other great journal ideas.
Hemocoagulative Problems in the Critically Ill Patient-Giorgio Berlot 2012-04-05
Since the very beginning of critical care medicine, much attention has been paid to the risk of bleeding, but only recently the risk of thrombosis has been recognized in critical patients; in fact, current laboratory investigations aimed to monitor blood coagulation are more focused on the assessment of the hemorrhagic than of the thrombotic risk. Since mid-90s, many studies have detected powerful pro-thrombotic actions of endogenous mediators in sepsis and other inflammatory conditions, including trauma and postoperative status. Unfortunately, the related complication are both hard to detect and extremely harmful. The volume provides a full coverage of the hemocoagulative problems in anesthesia and intensive care, taking into consideration the physiology and monitoring of hemostasis, its relation with sepsis, and the specific aspects of the various critical conditions - from trauma to burns, to heart and transplant surgery or acute renal failure.
Modification of Cell to Cell Signals During Normal and Pathological Aging-Stefano Govoni 2013-06-29
The aging process involves changes in neurotransmission at different levels. The purpose of this book is to help define the state-of-the-art of the field and to give directives for future research on the aging brain. Following topics are presented: the comparison of normal and pathological aging at the anatomical and neurochemical level; the knowledge of the responses of the aging brain to drug treatment or environmental stress; the neuro/immune and neuro/endocrine setting during aging; and the definition of therapeutical approaches in normal aging. This book will interest physicians and pathologists as well as neurophysiologists.
Political Corruption-Michael Johnston 2017-07-12
Corruption is once again high on the international policy agenda as a result of globalization, the spread of democracy, and major scandals and reform initiatives. But the concept itself has been a focus for social scientists for many years, and new findings and data take on richer meanings when viewed in the context of long-term developments and enduring conceptual debates. This compendium, a much-enriched version of a work that has been a standard reference in the field since 1970, offers concepts, cases, and fresh evidence for comparative analysis. Building on a nucleus of classic studies laying out the nature and development of the concept of corruption, the book also incorporates recent work on economic, cultural, and linguistic dimensions of the problem, as well as critical analyses of several approaches to reform. While many authors are political scientists, work by historians, economists, and sociologists are strongly represented. Two-thirds of the nearly fifty articles are based either on studies especially written or translated for this volume, or on selected journal literature published in the 1990s. The tendency to treat corruption as merely a synonym for bribery is illuminated by analyses of the diverse terminology and linguistic techniques that help distinguish corruption problems in the major languages. Recent attempts to measure corruption, and to analyze its causes and effects quantitatively are also critically examined. New contributions emphasize especially: corruption phenomena in Asia and Africa; contrasts among region and regime types; comparing U.S. state corruption incidence; European Party finance and corruption; assessments of international corruption rating project; analyses of international corruption control treaties; unintended consequences of anti-corruption efforts. Cumulatively, the book combines description richness, analytical thrust, conceptual awareness, and contextual articulation.
Beyond Networks - Interlocutory Coalitions, the European and Global Legal Orders-Gianluca Sguoe 2016-04-06
This book explores the activism promoted by organised networks of civil society actors in opening up possibilities for more democratic supranational governance. It examines the positive and negative impact that such networks of civil society actors – named “interlocutory coalitions” – may have on the convergence of principles of administrative governance across the European legal system and other supranational legal systems. The book takes two main controversial aspects into account: the first relates to the convergence between administrative rules pertaining to different supranational regulatory systems. Traditionally, the spread of methods of administrative governance has been depicted primarily against the background of the interactions between the domestic and the supranational arena, both from a top-down and bottom-up perspective. However, the exploration of interactions occurring at the supranational level between legal regimes is still not grounded on adequate empirical evidence. The second controversial aspect considered in this book consists of the role of civil society actors operating at the supranational level. In its discussion of the first aspect, the book focuses on the relations between the European administrative law and the administrative principles of law pertaining to other supranational regulatory regimes and regulators, including the World Bank, the International Monetary Fund, the World Trade Organization, the United Nations, the Organization for Economic Cooperation and Development, the Asian Development Bank, and the Council of Europe. The examination of the second aspect involves the exploration of the still little examined, but crucial, role of civil society organised networks in shaping global administrative law. These “interlocutory coalitions” include NGOs, think tanks, foundations, universities, and occasionally activists with no formal connections to civil society organisations. The book describes such interlocutory coalitions as drivers of harmonized principles of participatory democracy at the European and global levels. However, interlocutory coalitions show a number of tensions (e.g. the governability of coalitions, the competition among them) that may hamper the impact they have on the reconfiguration of individuals’ rights, entitlements and responsibilities in the global arena.
Drugs and Narcotics in History-Roy Porter 1995
A collection of essays exploring the complex history of drugs and narcotics throughout historyfrom ancient Greece to the present dayshows that such substances were sought originally as healing agents, both within and without the medical profession. However, the mood- and mind-altering characteristics of some have led to the widespread abuse and legal controls we see today.
Procedura-Salvatore Mannuzzo 1993
When an undistinguished judge is sent to Sardinia to investigate the sudden death of a colleague, he must reconstruct the dead man’s life and determine whether the death was accidental, suicide, or murder.
The Crisis of Capitalist Democracy-Richard A. Posner 2010-03-31
Judge Posner continues to react to the current economic crisis and reflect upon the impact on our views and reliance on capitalism. Posner helps non-technical readers understand business-cycle and financial economics, and financial and governmental institutions, practices, and transactions, while maintaining a neutrality impossible for persons professionally committed to one theory or another.
The Impact of Product Market Reforms on Firm Productivity in Italy-Mr.Sergi Lanau 2016-06-15
This paper examines the role of removing obstacles to competition in product markets in raising growth and productivity. Using firm-level data from Italy during 2003–13 and OECD measures of product market regulation, we estimate the effect of deregulation in network sectors on value added and productivity of firms in these sectors, as well as firms using these intermediates in their production processes. We find evidence of a significant positive impact. These effects are more pronounced in Italian provinces with more efficient public administration, underscoring the complementarities of advancing public administration and product market reforms simultaneously.
Childhood-Armlaug Leira 2008-02-29
Drawing both on micro and macro, national and comparative studies, this volume traces some of the trends and analyzes in comparative perspective how they affect images and practices of childhood and transforms responsibilities for children.
Epstein-Barr Virus and Associated Diseases-Thomas Tursz 1993
Text in English & French. This book gathers together all the most recent world-wide knowledge in the various fields of research into the various fields of research into the Epstein-Barr virus (EBV), from the most fundamental subjects (virology, molecular and cellular biology and immunology) through epidemiology, pathological anatomy, clinical research and therapeutics. Featured in the book are highly original chapters dealing with malignant lymphomas in AIDS patients, detection and prevention in developing countries, formulation of an anti-EBV vaccine. This comprehensive and clearly written book is a valuable and essential tool for all researchers and clinicians.
The Home-Antonio Argandoña
In the first major work to take the home as a center of analysis for global social problems, experts from a variety of fields reveal the multidimensional reality of the home and its role in societies worldwide. This unique book serves as a basis for action by proposing global legislative, political and institutional initiatives with the home in mind.
CLIL with Lapbook. Geography. Quinta. Student’s Kit- 2018
Generic drug entry prior to patent expiration an FTC study-
