Public places and spaces include a sweeping array of settings, including urban streets, plazas and squares, malls, parks, and other locales, and natural settings such as aquatic environments, national parks and forests, and wilderness areas. The importance of public settings is highlighted by difficult questions of access, control, and management; unique needs and problems of different users (including women, the handicapped, and various ethnic groups); and the dramatic reshaping of our public environments that has occurred and will continue to occur in the foreseeable future. The wide-ranging scope of the topic of public places and spaces demands the attention of many disciplines and researchers, designers, managers, and policymakers. As in previous volumes in the series, the authors in the present volume come from a variety of disciplinary backgrounds, research and design orientations, and affiliations. They have backgrounds in or are affiliated with such fields as architecture, geography, landscape architecture, natural resources, psychology, sociology, and urban design. Many more disciplines obviously contribute to our understanding and design of public places and spaces, so that the contributors to this volume reflect only a sample of the possibilities and present state of knowledge about public settings.</div> <div>Internal Combustion Engine Fundamentals-John Heywood 1988 This text, by a leading authority in the field, presents a fundamental and factual development of the science and engineering underlying the design of combustion engines and turbines. An extensive illustration program supports the concepts and theories discussed.</div> <div>Automotive Engine Valve Recession-Roger Lewis 2002-01-21 An "Engineering Research Series" title. Valve wear and its effect upon engine performance still presents a major challenge to the tribologist. Although new valve materials and production techniques are constantly being developed, these advances have been outpaced by demands for increased engine performance. The drive for reduced oil consumption and exhaust emissions, use of lead-replacement and low-sulphur fuels, and the introduction of alternative fuels such as gas all have implications for valve and seat insert wear. Automotive Engine Valve Recession aims to provide the reader with a complete understanding of valve recession. The fundamental nature of contact and wear between valves and valve seats is considered, followed by an outline of the essential features of valve operation and the potentially serious problems associated with wear and valve recession in automobile engines. An overview is then given of an experimental study of valve wear and the development of special apparatus for the simulation of engine operating conditions carried out in the School of Mechanical Engineering, University of Sheffield, UK. CONTENTS INCLUDE: Introduction Valve operation and design Valve failure Analysis of failed components Valve and seat wear testing apparatus Experimental studies on valve wear and solving valve failure problems.</div> <div>Insulation Handbook-Richard T. Bynum 2000-11-30 Plan, implement, and troubleshoot any type of insulation application Invaluable to anyone who wants an in-depth understanding of thermal insulation. Insulation Handbook, by Richard T. Bynum and Daniel L. Rubino, is a thorough guide to all the important methods, materials, and concepts associated with it, along with sound problem-solving advice. You'll slash construction time and costs while maximizing energy efficiency with this "A-Z" overview of residential installation. The authors, experts with hands-on construction and design experience, provide the rock-solid help you need to: Evaluate the pros and cons of today's most commonly used materials -- including loose fill, batts, blankets, spray-on, and boards -- as well as cutting-edge technologies still under development Decide upon the best insulation strategy Work within the framework of codes, standards, and regulations Achieve optimum thermal comfort in any home Understand innovative insulation systems such as ICFs (insulated concrete formwork), SIPs (structured insulated panels) and drainable-type EIFs Prevent damages caused by moisture accumulation Solve the problems presented by asbestos and other dangerous materials Obtain information from manufacturers and suppliers More!</div> <div>The Complete Chile Pepper Book-Dave DeWitt 2009 Chile peppers are hot--they add culinary fire to dishes from a variety of cuisines and inspire near-fanatical devotion in vegetable gardeners and collectors. The Complete Chile Pepper Book, by world-renowned chile experts Dave DeWitt and Paul W. Bosland, shares detailed profiles of the one hundred most popular chile varieties and include information on how to grow and cultivate them successfully, along with tips on planning, garden design, growing in containers, dealing with pests and disease, and breeding and hybridizing. Techniques for processing and preserving include canning, pickling, drying, and smoking. Eighty-five mouth-watering recipes show how to use the characteristic heat of chile peppers in beverages, sauces, appetizers, salads, soups, entrees, and desserts. This gorgeously illustrated, must-have reference for pepper-obsessed gardeners and cooks.</div> <div>Red 4WD Tractors-Lee Kiancher 2017 The story of the four-wheel-drive tractors built by Steiger, International Harvester, Case, and Case IH is told in dramatic fashion in this authoritative guide. Starting with the development of early four-wheel-drive systems at International Harvester, the book traces the evolution and design some of the most powerful and capable tractors of the twentieth century. With fresh detail on the 4300, 4100, Steiger-built IH tractors, and the 2+2 tractors including the Super 70 series, the book offers prototype drawings of several models--including the complete story of the never-before-published Magnum 2+2-- as well as inside stories and backroom drama that is a must for any enthusiast for farm history or tractors. Learn the complete story of Steiger tractors, which were originally designed and built in the barn of John, Douglass, and Maurice Steiger located near Red Lake Falls, Minnesota. Containing interviews with more than 50 of the people who built Steiger from its humble origin to a world leader, the book traces the evolution of the lime green Steigers in engrossing detail. The book also covers the J.I. Case 4WD line in great detail. In addition, the book tells the story of how each of these significant players in the industry combined under one banner and--together--created one of the current industry-leading technologies, the Quadtrac. The modern evolution of the Steigers and the introduction of the STX Series (and more) also receive in-depth coverage. The same team that created the award-winning books Red Tractors 1958-2013 and Red Combines 1915-2015 created this book, and notable new contributors include Sherry Schaefer (editor of Heritage Iron magazine) and noted historian Jim Allen. Contributors include Sherry Schaefer, Oscar H. Will III, Jim Allen, Kenneth Updike, Todd Markle, Gregg Montgomery, Guy Fay, Martin Rickatson, Sarah Tomac, Matthias Buschmann, Jean Cointe, Michael Osweiler, and Johann Dittmer.</div> <div>Maintenance Decision Making- 2006</div> <div>Bibliography on Flame Spectroscopy- 1967</div> <div>Census Catalog and Guide-United States. Authors Drew Conway and John Myles White help you understand machine learning and statistics tools through a series of hands-on case studies, instead of a traditional math-heavy presentation. Each chapter focuses on a specific problem in machine learning, such as classification, prediction, optimization, and recommendation. Using the R programming language, you'll learn how to analyze sample datasets and write simple machine learning algorithms. Machine Learning for Hackers is ideal for programmers from any background, including business, government, and academic research. Fath 2020-07-29 Bringing together a wealth of knowledge, Environmental Management Handbook, Second Edition, gives a comprehensive overview of environmental problems, their sources, their assessment, and their solutions. Through in-depth entries and a topical table of contents, readers will quickly find answers to questions about environmental problems and their corresponding management issues. This six-volume set is a reimagining of the award-winning Encyclopedia of Environmental Management, published in 2013, and features insights from more than 400 contributors, all experts in their field. The experience, evidence, methods, and models used in studying environmental management are presented here in six stand-alone volumes, arranged along the major environmental systems. Features The first handbook that demonstrates the key processes and provisions for enhancing environmental management Addresses new and cutting-edge topics on ecosystem services, resilience, sustainability, food-energy-water nexus, socio-ecological systems, and more Provides an excellent basic knowledge on environmental systems, explains how these systems function, and offers strategies on how to best manage them Includes the most important problems and solutions facing environmental management today In this third volume, Managing Soils and Terrestrial Systems, the general concepts and processes of the geosphere with its related soil and terrestrial systems are introduced. It explains how these systems function and provides strategies on how to best manage them. It serves as an excellent resource for finding basic knowledge on the geosphere systems and includes important problems and solutions that environmental managers face today. This book practically demonstrates the key processes, methods, and models used in studying environmental management.</div> <div>Cottage Residences-Henry Winthrop Sargent 2017-05-23 Cottage Residences - Or, A Series of Designs for Rural Cottages and Cottage Villas, and their Gardens and Grounds is an unchanged, high-quality reprint of the original edition of 1873. As a publisher we focus on the preservation of historical literature. Many works of historical writers and scientists are available today as antiques only. Hansebooks newly publishes these books and contributes to the preservation of literature which has become rare and historical knowledge for the future.</div> <div>Steel Barbs. Wild Waters-Jerry Gibbs 1990 SPORTS/RECREATION/OUTDOOR ACTIVITY</div> <div>Affective Health and Masculinities in South Africa-Hans Reihling 2020-04-24 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African "tradition" that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.</div> <div>101 Track Plans for Model Railroaders-Linn Westcott 1956 Includes unique track plans that apply to nearly every scale. Chairs and artificial intelligence; famous chairs on which Freud, Pessoa or Proust sat; chairs as historical, political and societal symbols; chairs for thin or corpulent people; rocking, creative, royal chairs: all these facets of chairs and more are packed into this volume. Bringing together writers, design historians, architecture critics and art curators, Chairpedia is a compilation of anecdotes about the chair--beginning with Mauricio Wiesenthal's Tales to Read Seated, published by Andreu World--and comprises a history of chair design told through 101 examples.</div> <div>25 Freight Car Projects-Tony Koester 2016-06-01 This book contains all-new materials from a star-studded roster of Model Railroader authors. (Tony Koester, Mont Switzer, Cody Grivno, Jeff Willson, James McNabb, Keith Kohlmann) In 25 Freight Car Projects, modelers will find a wide variety of modeling techniques and ideas. With a focus on HO and N scales, this book provides step-by-step photos and instructions to show readers how to model a range of freight cars.</div> <div>The Sobbin' Women-Stephen Vincent Bent 2015-08-28 THEY came over the Pass one day in one big wagon-all ten of them-man and woman and hired girl and seven big boy children, from the nine-year-old who walked by the team to the baby in arms. Or so the story runs-it was in the early days of settlement and the town had never heard of the Sobbin' Women then. But it opened its eyes one day, and there were the Pontipees. They were there but they didn't stay long-just time enough to buy meal and get a new shoe for the lead horse. You couldn't call them unsociable, exactly-they seemed to be sociable enough among themselves. But you could tell, somehow, from the look of them, that they weren't going to settle on ground other people had cleared. They were all high-colored and dark-haired-handsome with a wilderness handsomeness-and when you got them all together, they looked more like a tribe or a nation than an ordinary family. I don't know how they gave folks that feeling, but they did. Yes, even the baby, when the town women tried to handle him. He was a fine, healthy baby, but they said it was like trying to pet a young raccoon. Well, that was all there was to it, at the start. They paid for what they bought in good money and drove on up into Sobbin' Women Valley-only it wasn't called Sobbin' Women Valley then. And pretty soon, there was smoke from a chimney there that hadn't been there before. But you know what town gossip is when it gets started. The Pontipees were willing enough to let other folks alone-in fact, that was what they wanted. But, because it was what they wanted, the town couldn't see why they wanted it. Towns get that way, sometimes.</div> <div>Expendable Americans-Paul Brodeur 1974</div> <div>Pennsylvania Railroad Steel Open Hopper Cars-John Teichmoeller 2000 Subtitled: A Guide for Enthusiasts.
