Abnormal Psychology-David H. Barlow 2001 Taking into account evidence of the reciprocal influences of biology and behavior and of psychological and social influences on biology, the authors address the major psychological disorders, emphasizing three major areas of each: clinical description, causal factors, and treatment and outcomes. Clinical histories illustrate scientific findings on the causes and treatments of psychopathology and DSM-IV criteria are noted in the text. Abundant, compelling color photographs and illustrations keep the eyes occupied, perhaps at the expense of the text. Annotation copyrighted by Book News, Inc., Portland, OR

Casebook in Abnormal Psychology-Timothy A. Brown 2010-06-25 Using cases from the authors' files or from case files of other working clinicians, CASEBOOK IN ABNORMAL PSYCHOLOGY portrays the rich and arresting nature of disorders manifested in real people. Cases illustrate every major DSM-IV category, followed by a therapy outcome section that tells the rest of the story of what happened to these clients. Using an integrative approach, the authors emphasize the multiple causes of disorders and incorporate developmental and cultural issues in each case. Complex cases are presented without a diagnosis, so students can come up with a diagnosis on their own. This Fourth Edition includes a new case on body dysmorphic disorder as well as two new cases without a diagnosis. Child and Adolescent Mental Health-Martin Henrik Maurer 2017-05-24 In the present volume, we collected state-of-the-art chapters on diagnosis, treatment, and social implications. The first section describes diagnostic processes. It describes a reevaluation of projective techniques, a new clinical tool in psychotraumatology, the foundations of the framing technique, and an overview on integrative approaches. The second section focuses on new developments in the field with special emphasis on culture-specific contexts. From parenting of adolescents in India to the influence of poverty on mental health issues in Mexico, as well as the use of marijuana and Internet addiction, some of the most important fields are highlighted. The third section concentrates on therapy. It shows how to react to bullying and reviews the use of antidepressants in children and adolescents.

Abnormal Psychology and Life: A Dimensional Approach-Chris Kearney 2016-09-28 Chris Kearney and Tim Trull's ABNORMAL PSYCHOLOGY AND LIFE: A DIMENSIONAL APPROACH, 3rd Edition provides students with a concise, contemporary, science-based view of psychopathology that emphasizes the individual first. Through consistent pedagogy featuring clinical cases and real first-person narratives, the text illuminates our understanding that abnormal behavior can be viewed along a continuum. By highlighting this widely accepted dimensional view -- which places the behavior of an individual at the forefront of clinical definition, assessment, and treatment -- the text's goal is to foster personal relevance for students and encourage them to become intelligent consumers of mental health information. The book also gives students a comprehensive understanding of the features and epidemiologies, risk factors and prevention, assessment and treatment, and long-term prognosis and associated stigma of mental disorders. Formulation in Action-David Dawson 2015-01-01 When people seek psychological support, formulation is the theory-driven methodology used by many practitioners to guide identification of the processes, mechanisms, and patterns of behaviour that appear to be contributing to the presenting difficulties. However, the process of formulating - or applying psychological theory to practice - can often seem unclear. In this volume, we present multiple demonstrations of formulation in action - written by applied psychologists embedded in clinical training, research, and practice. The volume covers a range of contemporary approaches to formulation and therapy that have not been considered in extant works, and includes unique sections offering critical counter-perspectives and commentaries on each approach (and its application) by authors working from alternative theoretical positions.

Psychological Criminology-Richard Wortley 2011-04-12 Psychological Criminology addresses the question: what is it about individuals and their experiences that cause them to commit crime and/or to become criminal? This book provides a comprehensive coverage of psychological theories of crime and criminality, exploring theories focusing on factors present at birth (human nature, heredity); theories that focus on factors that influence the offender over the lifespan (learning, development); and theories focusing on factors present at the crime scene. It emphasizes the connections among the different approaches, and demonstrates how, taken together rather than as rival explanations, they provide a more complete picture of crime and criminality than each provides individually. Theories are arranged throughout the book in a temporal sequence, from distal to proximal causes of crime. The analysis spans 100,000 years, from the evolutionary roots of criminal behaviour in the ancestral environments of early humans on the African savana, to the decision to engage in a specific criminal act. Key features of the book include: a focus on theory - 'explaining' crime and criminality, an integrative approach, accessible to readers who do not have a background in psychology. Psychological Criminology highlights the contributions that psychological theory can make to the broader field of criminology; it will be of interest to students, academics, researchers and practitioners in both criminology and forensic psychology.
