Keeping the Republic-Christine Barbour 2018-11-23 Keeping the Republic gives students the power to examine the narrative of what's going on in American politics, distinguish fact from fiction and balance from bias, and influence the message through informed citizenship. Keeping the Republic draws students into the study of American politics, showing them how to think critically about "who gets what, and how" while exploring the twin themes of power and citizenship. Students are pushed to consider how and why institutions and rules determine who wins and who loses in American politics, and to be savvy consumers of political information. The thoroughly updated Eighth Edition considers how a major component of power is who controls the information, how it is assembled into narratives, and whether we come to recognize fact from fiction. Citizens now have unprecedented access to power -- the ability to create and share their own narratives -- while simultaneously being even more vulnerable to those trying to shape their views. The political landscape of today gives us new ways to keep the republic, and some high-tech ways to lose it. Throughout the text and its features, authors Christine Barbour and Gerald Wright show students how to effectively apply the critical thinking skills they develop to the political information they encounter every day. Students are challenged to deconstruct prevailing narratives and effectively harness the political power of the information age for themselves. Up-to-date with 2018 election results and analysis, as well as the impact of recent Supreme Court rulings, shifting demographics, and emerging and continuing social movements, Keeping the Republic, Eighth Edition is a much-needed resource to help students make sense of politics in America today. Litigation Services Handbook, 2015 Cumulative Supplement-Roman L. Weil 2015-04-13 In the last 20 years, the need for a financial expert to act as a witness and consultant to litigating attorneys has grown even more than litigation itself. Twenty years ago, few certified public accountants or economists offered litigation-related services; now, a large number devote much of their practice to this area. To be litigation service practitioners and accountants need to learn or enhance their litigation skills, including the fine points of their roles in trial preparation and testimony presentation, testimony presentation, deposition, direct examination, cross examination, understanding Sarbanes-Oxley rulings, and fraud investigations.
