The Diversity, Complexity, and Evolution of High Tech Capitalism-Sten A. Thore 1995-10-31 In his book "Jurassic Park" (and in the movie based on the book), Michael Crichton describes a crazed professor who through techniques of genetic engineering manages to recreate the dinosaurs and giant ferns of 65 million years past. Once the giant Tyrannosaurus Rex is brought to life. a powerful dynamics sets in: evolution. The prehistoric world embarks on a collision course with man. Researching his book, Crichton had been reading up on paleontology and on the mathematical theory of evolution, catastrophes, and chaos. Crichton explains some of the twists of nonlinear mathematics that are rewriting not only

thermodynamics, physics, and chemistry (that all grapple with evolving and turbulent processes) but also paleontology, genetics, medicine and even anthropology. Collapse and chaos is not limited to prehistoric animal kingdoms and ancient civilizations. The collapse of the Soviet Union and the political and economic chaos in its aftermath demonstrate that modern civilizations are just as vulnerable. This book aims at reexamining some main portions of the discipline of economics from the point of view of economic change and creativity. There are two aspects to this perspective. First, diversity and complexity. The range of different kinds of high technology products available to consumers and producers increases rapidly. Each product is the result of a long and complex production hierarchy. As these hierarchies grow, they deliver ever more diversified and complex high tech goods. Other hierarchies fall by the wayside.

The Monkey Wrench Gang-Edward Abbey 2011-08-19 A motley crew of saboteurs wreak outrageous havoc on the corporations destroying America's Western wilderness in this classic, comic extravaganza. When George Washington Hayduke III returns home from war in the jungles of Southeast Asia, he finds the unspoiled West he once knew has been transformed. The pristine lands and waterways are being strip mined, dammed up, and paved over by greedy government hacks and their corrupt corporate coconspirators. And the manic, beer-guzzling, rabidly antisocial ex-Green Beret isn't just getting mad. Hayduke plans to get even. Together with a radical feminist from the Bronx; a wealthy, billboard-torching libertarian MD; and a disgraced Mormon polygamist, Hayduke's ready to stick it to the Man in the most creative ways imaginable. By the time they're done, there won't be a bridge left standing, a dam unblown, or a bulldozer unmolested from Arizona to Utah. Edward Abbey's most popular novel, The Monkey Wrench

Gang is an outrageous romp with ultra-serious undertones that is as relevant today as it was in the early days of the environmental movement. The author who Larry McMurtry (Lonesome Dove) once dubbed "The Thoreau of the American West" has written a true comedic classic with brains, heart, and soul that more than justifies the call from the Los Angeles Times Book Review that we should all "praise the earth for Edward Abbey!"

Affective Health and Masculinities in South Africa-Hans Reihling 2020-04-24 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

We Are Dancing for You-Cutchá Risling Baldy 2018-04-06 ♦ I am here. You will never be alone. We are dancing for you. ♦ So begins Cutchá Risling Baldy ♦s deeply personal account of the revitalization of the women ♦s coming-of-age ceremony for the Hoopa Valley Tribe. At the end of the twentieth century, the tribe ♦s Flower Dance had not been fully practiced for decades. The women of the tribe, recognizing the critical importance of the ♦ tradition, undertook its revitalization using the memories of elders and medicine women and details found in museum archives, anthropological records, and oral histories. Deeply rooted in Indigenous knowledge, Risling Baldy brings us the voices of people transformed by ♦ cultural ♦ revitalization, including the accounts of young women who have participated in the Flower Dance. Using a framework of Native feminisms, she locates this revival within a broad context of decolonizing praxis and considers how this renaissance of ♦ women ♦s coming-of-age ♦ ceremonies confounds ethnographic depictions of Native women; challenges anthropological theories about menstruation, gender, and coming-of-age; and addresses gender inequality and gender violence within Native communities.

Green Rage-Christopher Manes 1991-04-02 Radical environmental groups throughout the world, militantly committed to defending the ecology, are growing in size and influence. In this country, activists engage in ecological civil disobedience and "ecotage"-- the sabotaging of equipment to prevent ecological damage-- in the struggle to preserve wilderness lands. These ecoteurs have gone beyond traditional conservation concerns to a new philosophy-- Deep Ecology, or biocentrism-- that calls into question not only the wisdom, but the legitimacy of humanity's domination of nature. In "Green Rage", Christopher Manes has written a brilliant defense of radical environmentalism, challenging the ethics of modern industrial society and asserting the right of the natural world to blossom, evolve, and exist for its own sake.

Hayduke Lives!-Edward Abbey 2011-08-21 "Abbey's latter-day Luddites, introduced in his novel The Monkey Wrench Gang, are back—and not a moment too soon" (The New York Times). George Washington Hayduke III, ex-Green Beret, was last seen clinging to a rock face in the wilds of Utah as an armed posse hunted him down for his eco-radicalist crimes. Now he's back, with a fiery need for vengeance . . . This sequel to Edward Abbey's cult classic brings back the old gang of environmental warriors, as they battle a fundamentalist preacher intent on turning the Grand Canyon into a uranium mine—in "a fine novel, combative and comic, anarchistic and ultimately redemptive" (Albuquerque Journal). "I laughed out loud reading this book." —Los Angeles Times

America and the Robber Barons, 1865 to 1913-Fon Wyman Boardman 1979 Discusses the economic conditions in the United States between 1865 and 1913 and those financiers who prospered during that period.

The Eloquence of Ghosts-Florian Mussgnug 2010 Giorgio Manganelli (1922-1990), one of Italy's most radical and original writers, went further than most in exploring the creative possibilities of hybrid genres

and open forms. Ostentation, theatricality, and a love of drapery and verbal excess are defining features of his body of work, which ranges from prose fiction, literary criticism, and drama to travel writing, treatises, commentaries, and imaginary interviews. This study examines the wealth of Manganelli's imagination - his grotesque animals, speaking corpses, and melancholy spectres - and argues that his spectacular eloquence was shaped by an exceptional awareness of literary and philosophical models. Following Manganelli's lead, the author addresses issues such as the boundaries of meaningful language, the relationship between literary and visual texts, fantasy and realism, and the power of literature to express the apprehensions and intimations of human consciousness.

Rebuilding the State Institutions-Juan Antonio Le Clercq 2019-11-29 Contemporary Mexico faces a complex crisis of violence and insecurity with high levels of impunity and the lack of an effective rule of law. These weaknesses in the rule of law are multidimensional and involve elements of institutional design, the specific content of the laws, particularities of political competition and a culture of legality in a country with severe social inequalities. This book discusses necessary institutional and legal reforms to develop the rule of law in a context of democratic, social and economic transformations. The chapters are organized to address: 1) The concept of the 'rule of law' and its measurement; 2) The fragility of the 'rule of law' in Mexico; 3) Structural reforms and implementation challenges; 4) Social exclusion and the culture of legality. The book addresses decision-makers, civil servants, consultants, scholars, lecturers, and students focusing on public policy, rule of law, sociology of law, legislative studies and practice, impunity, and areas of political philosophy. • The book presents an interdisciplinary and integrated approach for understanding the rule of law in Mexico, taking into account national particularities, the regional context and global comparisons. • Chapters discuss recent institutional reforms in Mexico from a critical point of view and explore possible next steps to achieve effective implementation. • This book addresses the links between a weak rule of law and social phenomena like insecurity, violence, corruption and democratic deficits.

Mastergate-Larry Gelbart 1990 The play is set in the Sherman Adams Room at the John Mitchell Building in Washington, D.C.. The "Select Joint Congressional Committee Investigating Alleged Covert Arms Assistance to Alleged Other Americas" investigates the CIA's attempt to divert arms to Central American guerrillas through a motion picture company's high-budget action film, entitled "Tet." (a reference to the Tet Offensive) Mastergate is a satire on congressional investigative committee hearings that took place during the McCarthy Era, on the Watergate investigation, and on the Iran-Contra affair. In his opening address, the chairman explains that the purpose of the hearings is to find out what the president knew and

if he had any idea of the affair. The satire employs many aspects of rhetoric and word-play, including puns, malapropism, mixed metaphors, tautology and Washington double-speak. The playwright said of his work that it is "First and foremost ... a play about language. It's not for me to discover that politicians are corrupt or full of hot air. It's really about what they and television have done to the way we speak and the way we listen." The play uncovers aspects of the absurd in the working life of government employees; for example, it portrays a non-meeting, a non-discussion, and people being present in the minutes of the meeting despite not attending. It has been argued that several of the characters have real-life counterparts, for example, Major Manley Battle may be based on Oliver North.
