Advanced Studies in Multi-Criteria Decision Making-Sarah Ben Amor 2020-01-14 With contributions from some of the top academics and scientists in the field, Advanced Studies in Multi-Criteria Decision Making presents an updated view of the landscape of Decision Sciences, current research topics, the interaction with other sciences and fields, as well as the prospects and challenges at an international level. Given that Decision Sciences are recognized today as indispensable for confronting the major societal challenges in science and technology, this book would be of interest to decision-makers, managers, and researchers from academia, and industrial/services companies that would like a fresh insight into MCDM. Features Integrates a wide range of scientific fields with a general reader approach, including applied researchers from the social, business, enterprise sciences Suitable for academics and professionals Presents a broad coverage of MCDM tools either in industry or in services companies and systems Provides a fresh overview on MCDM studies promoted by prestigious R&D institutions

Advanced Strategies in Financial Risk Management-Robert J. Schwartz 1993 Advanced Strategies in Financial Risk Management brings together - from Wall Street, corporate finance, and the academic community - over 40 leading authorities with intimate knowledge of sophisticated, new financial risk management instruments and techniques. Each of the book's eight sections focuses on a specific financial topic, providing practical advice and useful tools to help analyze the myriad potential alternatives to manage risks. Readers will learn how to evaluate interest rate and currency risks; gain insight into futures, forwards, swaps and options; and see how to better manage assets and liabilities. Expert guidance is provided on how to employ swaps and hybrid investments to manage corporate liabilities and protect against default risk. There is also a thorough analysis of innovative applications of financial engineering to new products and advanced techniques to hedge business cycle risk. This one-of-a-kind reference offers practical advice and strategies to prevent tax and accounting problems, plus a detailed examination of the evolving legal standards for hybrid securities and the impact of key regulations on new financial products. The reader will discover how to use different models to more effectively analyze interest rate risk, bond options, the pricing of options on caps and floors and options on the average foreign exchange rate over a period of time. Fully illustrated pricing models, detailed formulas, and tables presenting easy-to-follow comparisons of different methods make this new book indispensable to anyone involved in today's highly volatile financial markets.

Advanced Methodologies and Technologies in Artificial Intelligence, Computer Simulation, and Human-Computer Interaction-Khosrow-Pour, D.B.A., Mehdi 2018-09-28 As modern technologies continue to develop and evolve, the ability of users to adapt with new systems becomes a paramount concern. Research into new ways for humans to make use of advanced computers and other such technologies through artificial intelligence and computer simulation is necessary to fully realize the potential of tools in the 21st century. Advanced Methodologies and Technologies in Artificial Intelligence, Computer Simulation, and Human-Computer Interaction provides emerging research in advanced trends in robotics, AI, simulation, and human-computer interaction. Readers will learn about the positive applications of artificial intelligence and human-computer interaction in various disciplines such as business and medicine. This book is a valuable resource for IT professionals, researchers, computer scientists, and researchers invested in assistive technologies, artificial intelligence, robotics, and computer simulation.

Advanced Information Systems Engineering-Oscar Pastor 2005-06 This book constitutes the refereed proceedings of the 17th International Conference on Advanced Information Systems Engineering, CAISE 2005, held in Porto, Portugal in June 2005. The 39 revised full papers presented were carefully reviewed and selected from 282 submissions. The papers are organized in topical sections on conceptual modeling, metamodeling, databases, query processing, process modeling and workflow systems, requirements engineering, model transformation, knowledge management and verification, Web services, Web engineering, software testing, and software quality.

Sustainable Futures for Higher Education-Jaan Valsiner 2018-09-26 This volume addresses the current situation in higher education and what creative action needs to be taken for the future development of the various systems of higher education. Higher education in the 21st centuries is under immense pressure from various sides. First, there is dramatic limitation of funding from public sources and limited and selective funding support from private sources that is reconstructing the landscape of higher education in most societies around the World. Secondly there is the continuous stream of administrative re-organization efforts of political origins (e.g. "the Bologna process") that guide the advancement of higher education in our present time. Increasing privatization of all forms of higher education—from bachelor to doctoral levels—and its corresponding focus on the advancement of the kind of knowledge that has immediate applicability in various spheres of societies leads to the question- what kind of creativity is expected from the new cohorts of students—future makers of knowledge—once the current social re-organization of higher education systems becomes fully established. To address these questions the international, interdisciplinary cast of authors in this volume provides a multitude of possible scenarios for future development of the systems of higher education. This book on "Sustainable Futures of Higher Education" captures the current trends and perspectives of the Knowledge Makers from various nations of the world on meeting and greeting the challenges of globalization and the pressures of the knowledge economy. It makes a strong case for universities of tomorrow sustaining their autonomous thinking and yet nurturing an environment of collaborative partnership with society, corporate and industry to fuel innovations in plenty and continuous supply of new science and technologies. Higher Education has been and shall remain a powerful vehicle of national and global transformation. I see a great value of the publication in impacting the minds of the leaders in higher education around the globe for revitalizing the universities. Professor P. B Sharma, President of Association of Indian Universities, AIU How should the higher education system be in the globalization era? In this book Jaan Valsiner and his colleagues analyze, criticize the existing and propose a new higher education system. When we say "higher education", three different layers are supposed to be there-- the lower, the middle and the higher. The latter has the function of production of new knowledges. Without new knowledge, our societies are never improving. Authors warn commercialized systems such as the "Bologna system" overestimate the homogeneity of education. "Universities without Borders" would guarantee both diversity and innovation in the higher education systems. Professor Tatsuya Sato, Dean of Research,

The Handbook of Pairs Trading-Douglas S. Ehrman 2006-01-24 Learn both the theory and practice of pairs trading, why it is consistently profitable, and how you can apply the strategies in your own trading with this valuable guide. Author Douglas Ehrman covers pairs trading involving stocks, options on stocks, and futures contracts, and explains how this type of trading allows you to profit from the changing price relationship of securities. In addition to a comprehensive discussion of the theories involved, he also includes practical examples that will help you put what you've learned into practice. Douglas S. Ehrman is a hedge fund manager and a leading authority on pairs trading. He is one of the founders and the Chief Executive Officer of Alpha America Asset Management LLC in Chicago. He also served as the chief executive officer of Alpha America Financial, Inc., the company that operated PairsTrading.com prior to its merger with PairTrader.com.

ADVANCED TECHNOLOGY BITS PERFORMANCE SPEAKS FOR ITSELF-

Antarctic Futures-Tina Tin 2013-10-04 At the beginning of the 21st century, Antarctica is poised at the edge of a warmer and busier world. Leading Antarctic researchers examine the needs and challenges of Antarctic environmental management today and tomorrow. Through: (i) investigating the impacts of human activities on specific ecosystems and species, (ii) examining existing environmental management and monitoring practices in place in various regions and (iii) interrogating stakeholders, they address the following questions: What future will Business-As-Usual bring to the Antarctic environment? Will a Business-As-Usual future be compatible with the objectives set out under the Antarctic Treaty, especially its Protocol on Environmental Protection? What actions are necessary to bring about alternative futures for the next 50 years? This volume is an outcome of the International Polar Year (2007-2009) Oslo Science Conference (8-12, June, 2010).

The Knowledge Base of Futures Studies 2020-Richard Slaughter 2020-07-02 The Knowledge Base of Futures Studies 2020 updates previous efforts that brought together representative collections of the best work of futures studies and foresight. The works of leading practitioners and emerging voices are woven together to create a picture of how the landscape of futures thinking has evolved since the last edition in 2005. The thirty-one essays follow a reader-friendly house style aimed at practitioners and students.

The DARPA Model for Transformative Technologies: Perspectives on the U.S. Defense Advanced Research Projects Agency-William Boone Bonvillian 2020-01-09

The authors have done a masterful job of charting the important story of DARPA, one of the key catalysts of technological innovation in US recent history. By plotting the development, achievements and structure of the leading world agency of this kind, this book stimulates new thinking in the field of technological innovation with bearing on how to respond to climate change, pandemics, cyber security and other global problems of our time. The DARPA Model provides a useful guide for governmental agency and policy leaders, and for anybody interested in the role of governments in technological innovation. —Dr. Kent Hughes, Woodrow Wilson International Center for Scholars This volume contains a remarkable collection of extremely insightful articles on the world's most successful advanced technology agency. Drafted by the leading US experts on DARPA, it provides a variety of perspectives that in turn benefit from being presented together in a comprehensive volume. It reviews DARPA's unique role in the U.S. innovation system, as well as the challenges DARPA and its clones face today. As the American model is being considered for adoption by a number of countries worldwide, this book makes a welcome and timely contribution to the policy dialogue on the role played by governments in stimulating technological innovation. — Prof. Charles Wessner, Georgetown University The U.S. Defense Advanced Research Projects Agency (DARPA) has played a remarkable role in the creation new transformative technologies, revolutionizing defense with drones and precision-guided munitions, and transforming civilian life with portable GPS receivers, voice-recognition software, self-driving cars, unmanned aerial vehicles, and, most famously, the ARPANET and its successor, the Internet. Other parts of the U.S. Government and some foreign governments have tried to apply the 'DARPA model' to help develop valuable new technologies. But how and why has DARPA succeeded? Which features of its operation and environment contribute to this success? And what lessons does its experience offer for other U.S. agencies and other governments that want to develop and demonstrate their own 'transformative technologies'? This book is a remarkable collection of leading academic research on DARPA from a wide range of perspectives, combining to chart an important story from the Agency's founding in the wake of Sputnik, to the current attempts to adapt it to use by other federal agencies. Informative and insightful, this guide is essential reading for political and policy leaders, as well as researchers and students interested in understanding the success of this agency and the lessons it offers to others.

Contemporary Strategic Management-Robert M. Grant 2013-08-01 Never interrupt your enemy when he is making a mistake -Napoleon Bonaparte Most of my success has come down to basic concepts and good preparation -Mark Bouris If you don't have a competitive advantage, don't compete -Jack Welch The 2nd edition of CSM: Aus Perspective takes Robert Grant's razor sharp focus on competitive advantage and applies it in a concise, engaging and accessible format for students in Australia, New Zealand and our neighbouring region. By eschewing excessive theoretical models, the adapting author team have refined the 2nd edition to present clear, comprehensive coverage of core topics and concepts in business strategy. With a focus on globalisation, ethics, sustainability and the rise of social media, the 2nd edition contests real world examples and insightful grounding theory with equal aplomb. The diversity of the new accompanying cases attests to the philosophy of the Australasian edition. From the evolution of Facebook to the grounding of Qantas; the ferocity of Australian supermarket wars to controversial Chinese bids for NBN contracts, students will relish the opportunity to analyse all types of organisations 7F 13 including the public sector 7F 13 with a view to strategically defining their own professional futures.
