Air Mobility-Robert C. Owen 2014-05-14 Global air mobility is an American invention. During the twentieth century, other nations developed capabilities to transport supplies and personnel by air to support deployed military forces. But only the United States mastered the resources and will to create a global transport force and aerial refueling aircraft capable of moving air and ground combat forces of all types to anywhere in the world and supporting them in continuous combat operations. Whether contemplating a bomber campaign or halting another surprise attack, American war planners have depended on transport and tanker aircraft.

The Chinese Air Force-Richard P. Hallion 2012-10-03 Presents revised and edited papers from a October 2010 conference held in Taipei on the Chinese Air Force. The conference was jointly organized by Taiwan's Council for Advanced Policy Studies, the Carnegie Endowment for International Peace, the U.S. National Defense University, and the RAND Corporation. This books offers a complete picture of where the Chinese air force is today, where it has come from, and most importantly, where it is headed.

Air Force Strategy Study 2020-2030-John A. Shaud 2012-08-06 In November 2009, Gen Norton A. Schwartz, the Air Force chief of staff, tasked the Air Force Research Institute (AFRI) to answer the following question: What critical capabilities—implemented by the combatant commanders—will the nation require of the Air Force by 2030? Preparing for the challenges of a geostrategic environment 20 years in the future required a multiphase research plan. First, the AFRI team identified the nation's vital interests: commerce; secure energy supplies; freedom of action at sea, in space, in cyberspace, and in the skies; nuclear deterrence; and regional stability. The team analyzed four future world scenarios—a peer competitor, resurgent power, failed state, and jihadist insurgency—in relation to the nation's vital interests and the 12 Air Force core functions. The resulting analysis led to a synthesis of the core functions into five critical capabilities designed to meet the Air Force's strategic challenges in 2030: power projection; freedom of action in air, space, and cyberspace; global situational awareness; air diplomacy; and military support to civil authorities (MSCA). For several reasons, the service's ability to project power will be severely tested over the next generation. Because many current systems are reaching the end of their service lives, the Air Force must recapitalize these assets to maintain its ability to project power. Domestic and international pressures may dictate that American forces operate from fewer overseas locations—magnifying the importance of power projection. Further, technically advanced adversaries will challenge the United States in space and cyberspace, making power projection a necessity to protect national interests. To be effective in the increased threat environment of 2030, the Air Force must integrate air, space, and cyber capabilities—focusing on strategic effects. Integrating these capabilities across domains will become a key enabler and force multiplier over the coming decades. Domain superiority is not guaranteed in the future. As the technological gap between the United States and other actors narrows, adversaries will contest the Air Force's preeminence in air, space, and cyberspace. Today's freedom of action in space and cyberspace will encounter direct threats. Therefore, to gain superiority in either domain, the Air Force must develop resiliency in both space and cyber systems and thereby create an effective deterrent. Reducing the incentive for attack by negating gain is imperative. Further, creating systems that can continue effective operations following attack will be essential in the increasingly complex battlespace of 2030. Air diplomacy—the employment of power through capabilities such as humanitarian assistance, deterrence, and power projection—takes advantage of airpower's inherent soft-power capabilities. Today the service often conducts these missions through ad hoc means. However, the Air Force must develop a deliberate and comprehensive air diplomacy strategy to improve the effectiveness of these efforts; moreover, it should address specific ends, ways, and means of supporting the combatant commander's theater plan. The service also must commit to organizing, training, and equipping for the air diplomacy mission to meet combatant commanders' requirements. In coming years the nation will look to the Air Force to provide power projection; freedom of action in air, space, and cyber; global situational awareness; air diplomacy; and MSCA to meet the strategic challenges Americans will soon face. Maintaining these capabilities will require continuous attention and investment, or they will erode. The United States is in danger of being overtaken by emerging adversaries in a number of areas the nation has long taken for granted. Focusing on these five capabilities will assure the Air Force contribution to national security as the nation moves toward 2030.

Budgeting for the Military Sector in Africa-Wuyi Omitoogun 2006 In this comprehensive study, 15 African experts describe and analyse the military budgetary processes and degree of parliamentary oversight and control in nine countries of Africa, spanning across all the continent's sub-regions. Each case study addresses a wide range of questions, such as the roles of the ministries of finance, budget offices, audit departments and external actors in the military budgetary processes, the extent of compliance with standard public expenditure management procedures, and how well official military expenditure figures reflect the true economic resources devoted to military activities in these countries.

Wings of Hope: The United States Air Force and Humanitarian Airlift Operations- Information on concerns of Vietnam War veterans about the consequences of exposure to Agent Orange.

Internal Security Management in Nigeria-Oshita O. Oshita 2019-07-23 This book explores the disturbing dimensions of the problem of insecurity in Nigeria, such as herdsmen violence, the Boko Haram insurgency, cybercrime, militancy in the Niger Delta, communal conflict and violence, as well as police corruption. It offers a comprehensive discussion of the theoretical foundations of internal security, the threats to internal security, the role of formal and informal agencies in internal security management and the challenges of internal security management.

The New Counterinsurgency Era-David H. Ucko 2009-07-02 Confronting insurgent violence in Iraq and Afghanistan, the U.S. military has recognized the need to “re-learn” counterinsurgency. But how has the Department of Defense with its mixed efforts responded to this new strategic environment? Has it learned anything from past failures? In The New Counterinsurgency Era, David Ucko examines DoD's institutional obstacles and initially slow response to a changing strategic reality. Ucko also suggests how the military can better prepare for the unique challenges of modern warfare, where it is charged with everything from providing security to supporting reconstruction to establishing basic governance—all while stabilizing conquered territory and engaging with local populations. After briefly surveying the history of American counterinsurgency operations, Ucko focuses on measures the military has taken since 2001 to relearn old lessons about counterinsurgency, to improve its ability to conduct stability operations, to change the institutional bias against counterinsurgency, and to account for successes gained from the learning process. Given the effectiveness of insurgent tactics, the frequency of operations aimed at building local capacity, and the danger of ungoverned spaces acting as havens for hostile groups, the military must acquire new skills to confront irregular threats in future wars. Ucko clearly shows that the opportunity to come to grips with counterinsurgency is matched in magnitude only by the cost of failing to do so.

Medical Directory- 1994 A listing of medical practitioners registered with the General Medical Council. Includes England, Scotland, Wales, and Northern Ireland. Data includes name, address, degrees, colleges, appointment, memberships, and publications. Also contains information on United Kingdom hospitals, NHS trusts, and boards of health.

International Cooperation with Partner Air Forces-Jennifer D. P. Moroney 2009 The Air Force faces a challenging environment as it devises an approach to managing security cooperation with partner countries. The important mission of countering terrorist and insurgent groups abroad requires working closely with allies and partner countries to strengthen security. Accordingly, current U.S. defense strategy emphasizes that the U.S. armed forces should do more to work “by, with, and through partners” to accomplish missions.

Who's who in Science and Engineering- 2008

China Military Power-Defense Intelligence Agency 2019-01-16 UNCLASSIFIED REPORT Printed in COLOR. Just Released 15 January 2019 In 2017, the Defense Intelligence Agency began to produce a series of unclassified Defense Intelligence overviews of major foreign military challenges we face. This volume provides details on China's defense and military goals, strategy, plans, and intentions; the organization, structure, and capability of its military supporting those goals; and the enabling infrastructure and industrial base. This product and other reports in the series are intended to inform our public, our leaders, the national security community, and partner nations about the challenges we face in the 21st century. Document includes: Historical Overview Military Doctrine and Strategy Perceptions of Modern Conflict Core Elements of Command and Control Reform Modernizing Joint Command and Control Core Chinese Military Capabilities Power Projection and Expeditionary Operations Nuclear Forces and Weapons Biological and Chemical Warfare Space/Counterspace Cyberspace Denial and Deception Logistics and Defense-Industrial Modernization Underground Facilities Missions Other Than War Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>
