Awaiting Apocalypse-P. Corcoran 1999-12-03 The current obsession with the 'end of the millennium' illustrates the enduring power of the idea of endings. This fascination cannot be simply dismissed as faulty logic, a form of madness, or a primitive survival of childish thinking. Opening a path of understanding between ancient conceptions of meaning and the sceptical predicates of modern science, Awaiting Apocalypse shows how ordinary and extraordinary endings are inherent in the narrative structure of human experience and the sedimentation of that experience as historical meaning.

Apocalyptic Fever-Richard G. Kyle 2012-08-01 How will the world end? Domsday ideas in Western history have been both persistent and adaptable, peaking at various times, including in modern America. Public opinion polls indicate that a substantial number of Americans look for the return of Christ or some catastrophic event. The views expressed in these polls have been reinforced by the market process. Whether through purchasing paperbacks or watching television programs, millions of Americans have expressed an interest in end-time events. Americans have a tremendous appetite for prophecy, more than nearly any other people in the modern world. Why do Americans love doomsday? In Apocalyptic Fever, Richard Kyle attempts to answer this question, showing how dispensational premillennialism has been the driving force behind doomsday ideas. Yet while several chapters are devoted to this topic, this book covers much more. It surveys end-time views in modern America from a wide range of perspectives--dispensationalism, Catholicism, science, fringe religions, the occult, fiction, the year 2000, Islam, politics, the Mayan calendar, and more.

Englishness-Menno Spiering 1992 Faced with the demise of their country on the world stage, with the Americanization of their society and with the prospect of integration into Europe, many people in postwar-Britain, and in particular in England, began to look more closely at their national identity. Using literature as a source material, this study investigates postwar images of Englishness as they are defined in relation not only to 'Americans' and 'Europeans', but also to other foreigners: the 'Arabs' and the 'Russians.' In the context of the Anglo-American novel particular regard is given to Englishness in Evelyn Waugh's The Loved One and David Lodge's Changing Places. Subsequently the book focuses on that peculiarly English genre 'the invasion story', tales in which Englishness comes under direct attack from evil plotters from abroad. While the history of the genre is discussed at some length, detailed attention is paid to images of Englishness in Angus Wilson's The Old Men at the Zoo (united European forces invade a Euro-recalcitrant Britain), Anthony Burgess' 1985 (Arab infiltrators prepare to Islamize the English) and Kingsley Amis' Russian Hide and Seek (after a period of occupation the Russians attempt to give the English back their Englishness).

Nuclear North Korea-Victor D. Cha 2005-04-26 The regime of Kim Jong-Il has been called "mad," "rogue," even, by the Wall Street Journal, the equivalent of an "unreformed serial killer." Yet, despite the avalanche of television and print coverage of the Pyongyang government's violation of nuclear nonproliferation agreements and existing scholarly literature on North Korean policy and security, this critical issue remains mired in political punditry and often misleading sound bites. Victor Cha and David Kang step back from the daily newspaper coverage and cable news commentary and offer a reasoned, rational, and logical debate on the nature of the North Korean regime. Coming to the issues from different perspectives--Kang believes the threat posed by Pyongyang has been inflated and endorses a more open approach, while Cha is more skeptical and advocates harsher measures--the authors together have written an essential work of clear-eyed reflection and authoritative analysis. They refute a number of misconceptions and challenge much faulty thinking that surrounds the discussion of North Korea, particularly the idea that North Korea is an irrational nation. Cha and Kang contend that however provocative, even deplorable, the Pyongyang government's behavior may at times be, it is not incomprehensible or incoherent. Neither is it "suicidal," they argue, although crisis conditions could escalate to a degree that provokes the North Korean regime to "lash out" as the best and only policy, the unintended consequence of which are suicide and/or collapse. Further, the authors seek to fill the current scholarly and policy gap with a vision for a U.S.-South Korea alliance that is not simply premised on a North Korean threat, not simply derivative of Japan, and not eternally based on an older, "Korean War generation" of supporters. This book uncovers the inherent logic of the politics of the Korean peninsula, presenting an indispensable context for a new policy of engagement. In an intelligent and trenchant debate, the authors look at the implications of a nuclear North Korea for East Asia and U.S. homeland security, rigorously assessing historical and current U.S. policy, and provide a workable framework for constructive policy that should be followed by the United States, Japan, and South Korea if engagement fails to stop North Korean nuclear proliferation.

Power, Politics and Voting Behaviour-Mike Riley 1988

The Dark Side of Europe-Geoff Harris 1990 Fascism cannot be treated as an isolated historical or political phenomenon, relevant only to certain countries at certain times. In the difficult economic and social circumstances of the 1970s and 1980s old ideas have found a new audience, and whilst democracy may not face an immediate challenge, a considered approach to racism and fascism will be needed if the new Europe of the 1990s is not to provide an opportunity for a pan-European extreme right revival. Racism, the rewriting of history, the new right, terrorism and secret service corruption are looked at comparatively. For the first time in English a detailed analysis of the Le Pen phenomenon in France and extreme right terrorism in Italy is offered; the similarities with developments in other European countries are brought out. The author provides detailed inside knowledge of how the European institutions have responded and looks at some of the implications for society and politics of the 1992 project and the continuation of immigration into Western Europe.
