Virginia Woolf's Late Cultural Criticism-Alice Wood 2013-08-01 After the Modernist literary experiments of her earlier work, Virginia Woolf became increasingly concerned with overt social and political commentary in her later writings, which are preoccupied with dissecting the links between patriarchy, patriotism, imperialism and war. This book unravels the complex textual histories of *The Years* (1937), *Three Guineas* (1938) and *Between the Acts* (1941) to expose the genesis and evolution of Virginia Woolf's late cultural criticism. Fusing a feminist-historicist approach with the practices and principles of genetic criticism, this innovative study scrutinizes a range of holograph, typescript and proof documents within their historical context to uncover the writing and thinking processes that produced Woolf's cultural analysis during 1931-1941. By demonstrating that Woolf's late cultural criticism developed through her literary experimentalism as well as in response to contemporary social, political and economic upheavals, this book offers a fresh perspective on her emergence as a cultural commentator in her final decade and paves the way for further genetic enquiries in the field.

The Basketball Draft Fact Book-Robert D. Bradley 2013-05-02 The Basketball Draft Fact Book is the first detailed and comprehensive listing of all professional basketball drafts in the history of the sport since the first draft in 1947. Each season's draft is summarized, noting significant events and circumstances pertinent to that year and providing insight into the unique conditions and notable players involved. Following the summary is a complete list of all players drafted that season. Additional sections cover expansion and dispersal drafts, international players selected in the draft, the processes used to determine the order of the drafts, the impact of trades, and more. Containing corrections to hundreds of errors in the draft information currently available, this volume is a valuable resource for basketball fans, historians, writers, and researchers.

The New York City Draft Riots-Iver Bernstein 1991-10-10 For five days in July 1863, at the height of the Civil War, New York City was under siege. Angry rioters burned draft offices, closed factories, destroyed railroad tracks and telegraph lines, and hunted policemen and soldiers. Before long, the rioters turned their murderous wrath against the black community. In the end, at least 105 people were killed, making the draft riots the most violent insurrection in American history. In this vividly written book, Iver Bernstein tells the compelling story of the New York City draft riots. He details how what began as a demonstration

against the first federal draft soon expanded into a sweeping assault against the local institutions and personnel of Abraham Lincoln's Republican Party as well as a grotesque race riot. Bernstein identifies participants, dynamics, causes and consequences, and demonstrates that the "winners" and "losers" of the July 1863 crisis were anything but clear, even after five regiments rushed north from Gettysburg restored order. In a tour de force of historical detection, Bernstein shows that to evaluate the significance of the riots we must enter the minds and experiences of a cast of characters--Irish and German immigrant workers, Wall Street businessmen who frantically debated whether to declare martial law, nervous politicians in Washington and at City Hall. Along the way, he offers new perspectives on a wide range of topics: Civil War society and politics, patterns of race, ethnic and class relations, the rise of organized labor, styles of leadership, philanthropy and reform, strains of individualism, and the rise of machine politics in Boss Tweed's Tammany regime. An in-depth study of one of the most troubling and least understood crises in American history, *The New York City Draft Riots* is the first book to reveal the broader political and historical context--the complex of social, cultural and political relations--that made the bloody events of July 1863 possible.

The national costs to develop TMDLs draft : support document #1 for "The national costs of the total maximum daily load program" draft report- Draft Resource Management Plan and Environmental Impact Statement for the San Juan Resource Area, Moab District, Utah-United States. Bureau of Land Management. San Juan Resource Area 1986

Capturing Carbon and Conserving Biodiversity-Ian R Swingland 2013-06-17 For decades conservation has been based on the donor-driven principle. It hasn't worked. For centuries, environmental pollution or degradation has been addressed by the same attitude: the 'Polluter Pays' principle. That hasn't worked either. The cycle has to stop. But while everyone talks about using a market-driven approach, few know how to do it. Faced with the situation on the ground what do you do? What is happening? How can you engage a system so that it is self-sustaining and the people self-motivated? This study explores how the growing market in carbon can help to conserve carbon-based life forms. It discusses how reducing global warming and saving biodiversity can both be achieved with the right market conditions. The contributors include conservation biologists, ecologists, biologists, economists, lawyers, community and tribal specialists, financial specialists, market makers, environment specialists, climatologists, resource managers, atmospheric scientists, project developers and corporate fund managers.

Draft Environmental Impact Statement-United States. Bureau of Land Management. White River Resource Area 1986

American Samoa 2009 Earthquake and Tsunami-Matt Jadacki 2011-06-01 This report addresses the strengths and weaknesses of the Federal Emergency Management Agency's (FEMA) response to the 2009 earthquake and resultant tsunami in American Samoa. It is based on interviews with employees and officials of relevant agencies and institutions, direct observations, and a review of applicable documents.
