Concrete Pavement Repair Manuals of Practice- 1993 This publication includes two pavement maintenance manuals intended for use by highway maintenance agencies and contracted maintenance firms in the field and in the office. Each is a compendium of good practices for Portland cement concrete joint resealing and partial-depth spall repair, respectively, and stem from two Strategic Highway Research Program studies. The first manual covers the need for joint resealing, the planning and design, construction, and evaluation of joint seal performance. The second manual gives a description of procedures and materials recommended for partial-depth spall repair in jointed Portland cement concrete pavements. The manual covers the details of planning and design, construction, and evaluation of performance.

Manual of Spine Surgery-Uwe Vieweg 2012-10-23 The success of any spinal operation depends on good definition of the indications, consideration of the contraindications, technical and organizational factors, good operating technique and correct preoperative preparation and positioning of the patient. These points are presented in this book as clearly as possible and are illustrated with detailed high quality artwork.
Radiology in Forensic Medicine-Giuseppe Lo Re 2019-09-26 This book offers a comprehensive overview of the forensic and radiological aspects of pathological findings, focusing on the most relevant medico-legal issues, such as virtual autopsy (virtopsy), anthropometric identification, post-mortem decomposition features and the latest radiological applications used in forensic investigations. Forensic medicine and radiology are becoming increasingly relevant in the international medical and legal field as they offer essential techniques for determining cause of death and for anthropometric identification. This is highly topical in light of public safety and economic concerns arising as a result of mass migration and international tensions. The book discusses the latest technologies applied in the forensic field, in particular computed tomography and magnetic resonance, which are continuously being updated. Radiological techniques are fundamental in rapidly providing a full description of the damage inflicted to add to witness and medical testimonies, and forensic/radiological anthropology supplies valuable evidence in cases of violence and abuse. Written by international experts, it is of interest to students and residents in forensic medicine and radiology. It also presents a new approach to forensic investigation for lawyers and police special corps as well as law enforcement agencies.

The Tankship Tromedy-Jack Devanney 2006-01-01 Critique of current tankship regulatory system and call for fundamental changes in tanker design.
Neuromarketing-Leon Zurawicki 2010-09-02 Over the last 10 years advances in the new field of neuromarketing have yielded a host of findings which defy common stereotypes about consumer behavior. Reason and emotions do not necessarily appear as opposing forces. Rather, they complement one another. Hence, it reveals that consumers utilize mental accounting processes different from those assumed in marketers' logical inferences when it comes to time, problems with rating and choosing, and in post-purchase evaluation. People are often guided by illusions not only when they perceive the outside world but also when planning their actions - and consumer behavior is no exception. Strengthening the control over their own desires and the ability to navigate the maze of data are crucial skills consumers can gain to benefit themselves, marketers and the public. Understanding the mind of the consumer is the hardest task faced by business researchers. This book presents the first analytical perspective on the brain - and biometric studies which open a new frontier in market research.

Surrealism and Architecture-Thomas Mical 2005 This is a historically informed examination of architecture's perceived absence in surrealist thought, surrealist tendencies in the theories and projects of modern architecture, and the place of surrealist thought in contemporary design. This book represents current insights into surrealism in the thought and practice of modern architecture. In these essays, the role of the subconscious, the techniques of defamiliarization, aesthetic and social forces affecting the objects, interiors, cities and landscapes of the twentieth century are revealed. The book contains a diversity of voices from across modern art and architecture to bring into focus what is often overlooked in the histories of the modernist avant-garde. This collection examines the practices of writers, artists, architects, and urbanists with emphasis on a critique of the everyday world-view, offering alternative models of subjectivity, artistic effect, and the production of meanings in the built world.
Growth and International Trade-Karl Farmer 2013-02-01 This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored . The first part starts from the "old" growth theory and bridges to the "new" growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.
Mine/Countermine Operations-Department of the Army 2013-06-08 The guidance provided focuses on individual skills of emplacing and removing mines, team and squad tasks, platoon and company organization and panning, and battalion/task force organization and coordination for successful obstacle reduction and breaching operations.
Martial's Epigrams-Garry Wills 2008-10-30 One of literature's greatest satirists, Martial earned his livelihood by excoriating the follies and vices of Roman society and its emperors, and set a pattern that satirists have admired across the ages. For the first time, readers can enjoy an English translation of these rhymes that does not sacrifice the cleverly constructed effects of Martial's short and shapely thrusts. Martial's Epigrams "speaks a great scholar at play" (The New York Times Book Review), makes for addictive reading, and is a perfect, if naughty, gift.

Exploring Ancient Skies-David H. Kelley 2005-12-06 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope. The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean, the Far East, and the New World (particularly Mesoamerica), putting the ancient astronomical materials into their archaeological and cultural contexts. The authors begin with an overview of the field and proceed to essential aspects of naked-eye astronomy, followed by an examination of specific cultures. The book concludes by taking into account the purposes of ancient astronomy: astrology, navigation, calendar regulation, and (not least) the understanding of our place and role in the universe. Skies are recreated to display critical events as they would have appeared to ancient observers - events such as the supernova of 1054, the 'lion horoscope' or the 'Star of Bethlehem.' Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation. It will be useful as a reference for scholars and students in both astronomy and archaeology, and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history.

Good Derivatives-Richard L. Sandor 2012-04-06 Through the eyes of an inventor of new markets, Good Derivatives: A Story of Financial and Environmental Innovation tells the story of how financial innovation - a concept that is misunderstood and under attack - has been a positive force in the last four decades. If properly designed and regulated, these "good derivatives" can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than "command-and-control". Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, Good Derivatives will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

Environmental Engineering Dictionary and Directory-Thomas M. Pankratz 2000-09-22 Like most technical disciplines, environmental science and engineering is becoming increasingly specialized. As industry professionals focus on specific environmental subjects they become less familiar with environmental problems and solutions outside their area of expertise. This situation is compounded by the fact that many environmental science related terms are confusing. Prefixes such as bio-, enviro-, hydra-, and hydro- are used so frequently that it is often hard to tell the words apart. The Environmental Engineering Dictionary and Directory gives you a complete list of brand terms, brand names, and trademarks - right at your fingertips.
Encyclopedia of Ancient Greece-Nigel Wilson 2013-10-31 Examining every aspect of the culture from antiquity to the founding of Constantinople in the early Byzantine era, this thoroughly cross-referenced and fully indexed work is written by an international group of scholars. This Encyclopedia is derived from the more broadly focused Encyclopedia of Greece and the Hellenic Tradition, the highly praised two-volume work. Newly edited by Nigel Wilson, this single-volume reference provides a comprehensive and authoritative guide to the political, cultural, and social life of the people and to the places, ideas, periods, and events that defined ancient Greece.
The Word Within the Word-Michael Thompson 1994-12-01 An exploration of the interior of language.
Ending the Pursuit of Happiness-Barry Magid 2010-10-08 We all have a right to the pursuit of happiness - but could we actually be happier if we gave that whole thing up? This surprising new book from Zen teacher, psychoanalyst, and critical favorite Barry Magid inspires us-in gentle and winking prose-to move on and make peace with the perfection of the way things actually are, including ourselves. Magid invites us to consider that our "pursuit of happiness" may actually be a source of our suffering. He takes an unusual look at our "secret practices" - what we're really doing when we say we're meditating-like trying to feel calmer, or more compassionate, or even "enlightened" (whatever we imagine that means!). He also uncovers our "curative fantasies" about spiritual practice-those ideas that we can somehow fix all the messy human things about ourselves that we imagine are bad or wrong or unacceptable. In doing so, he helps us look squarely at-and avoid-such pitfalls. Along the way, Magid lays out a rich roadmap of the new "psychological-minded Zen" - a Zen that includes our entire life, our entire personality - as pioneered by his teacher, bestselling author Charlotte Joko Beck.

Action Chicks-S. Inness 2004-01-16 Xena, Buffy, Lara Croft. WWF, The Sopranos, Witchblade, La Femme Nikita. The women of pop culture are center stage and as tough as ever. Action Chicks is a groundbreaking collection highlighting the heroines we've grown to worship. What can they tell us about women in the Twent-first-century? What can they tell us about how popular culture depicts women? Do the characters escape traditional gender role expectations? Or do they adhere to sexual, racial, ethnic, and class stereotypes? The essays in Action Chicks provide fans with a new look at their favourite icons and their relationship to the popular media machine. A fascinating collection that's bound to stir up some excitement.
