More and Better Jobs in South Asia-The World Bank 2011-12-20 South Asia has created nearly 800,000 jobs per month during the last decade. Robust economic growth in large parts of the region has created better jobs -- those that pay higher wages for wage workers and reduce poverty for the self-employed, the largest segment of the region's employed. Going forward, South Asia faces the enormous challenge of absorbing 1 to 1.2 million entrants to the labor force every month for the next two decades at rising levels of productivity. This calls for an agenda that cuts across sectors and includes improving the reliability of electricity supply for firms in both urban and rural settings, dealing decisively with issues of governance and corruption, making access to land easier for urban informal firms and strengthening transport links between rural firms and their markets. It requires improving nutrition in early childhood to avoid cognitive impairment, intensifying the focus on quality of learning in education systems, equipping workers with the skills that employers demand, and reorienting labor market regulations and programs to protect workers rather than jobs. The continuance of high economic growth to help improve job quality is not assured. But the region's demography can provide a favorable tailwind. The growth of workers exceeds that of dependents in much of the region. The resources saved from having fewer dependents can be shifted to high-priority investments in physical and human capital accumulation necessary to create productive jobs in countries with an enabling policy framework. But the demographic window of opportunity is open for only the next three decades, a fact which lends urgency to the reform agenda. This book will be of interest to policy makers, their advisers, researchers and students of economics who seek solutions, not only to the challenge of creating more and better jobs in South Asia but globally as well. It is the first title in South Asia Development Matters, a new series that will serve as a vehicle for in-depth synthesis of economic and policy analysis on key development topics for South Asia.

Impact Evaluation in Practice-Paul J. Gertler 2011-06-23 This book offers an accessible introduction to the topic of impact evaluation and its practice in development. While the book is geared principally towards development practitioners and policymakers designing prospective impact evaluations, we trust that it will be a valuable resource for students and others interested in using impact evaluation. Prospective impact evaluations should be used selectively to assess whether or not a program has achieved its intended results, or to test alternatives for achieving those results. We consider that more and better impact evaluation will help strengthen the evidence base for development policies and programs around the world. If governments and development practitioners can make policy decisions based on evidence - including evidence generated through impact evaluation - our hope is that development resources will be spent more effectively, and ultimately have a greater impact on reducing poverty and improving people's lives. The three chapters in this handbook provide a non-technical introduction to impact evaluations, including "Why Evaluate" in Chapter 1, "How to Evaluate" in Chapter 2 and "How to Implement Impact Evaluations" in Chapter 3. These elements are the basic 'tools' needed in order to successfully carry out an impact evaluation. From a methodological standpoint our approach to impact evaluation is largely pragmatic: we think that the most appropriate methods should be identified to fit the operational context, and not the other way around. This is best achieved at the outset of the program, through the design of prospective impact evaluation that can be built into the project's implementation. We argue that gaining consensus between key stakeholders and identifying an evaluation design that fits the political and operational context is as important as the method itself. We also believe strongly that impact evaluations

should be upfront about their limitations and caveats. Finally, we strongly encourage policymakers and program managers to consider impact evaluations in a logical framework that clearly sets out the causal pathways by which the program works to produce outputs and influence final outcomes, and to combine impact evaluations with monitoring and selected complementary evaluation approach to gain a full picture of performance. This book builds on a core set of teaching materials developed for the “Turning Promises to Evidence” workshops organized by the office of the Chief Economist for Human Development (HDNCE) in partnership with regional units and the Development Economics Research Group (DECRG) at the World Bank.

Banking on Freedom-Shennette Garrett-Scott 2019-05-07 Between 1888 and 1930, African Americans opened more than a hundred banks and thousands of other financial institutions. In Banking on Freedom, Shennette Garrett-Scott explores this rich period of black financial innovation and its transformative impact on U.S. capitalism through the story of the St. Luke Bank in Richmond, Virginia: the first and only

bank run by black women. Banking on Freedom offers an unparalleled account of how black women carved out economic, social, and political power in contexts shaped by sexism, white supremacy, and capitalist exploitation. Garrett-Scott chronicles both the bank's success and the challenges this success wrought, including extralegal violence and aggressive oversight from state actors who saw black economic autonomy as a threat to both democratic capitalism and the social order. The teller cage and boardroom became sites of activism and resistance as the leadership of president Maggie Lena Walker and other women board members kept the bank grounded in meeting the needs of working-class black women. The first book to center black women's engagement with the elite sectors of banking, finance, and insurance, Banking on Freedom reveals the ways gender, race, and class shaped the meanings of wealth and risk in U.S. capitalism and society.
