Geography of the Gaze-Renzo Dubbini 2002-04-15 Geography of the Gaze offers a new history and theory of how the way we look at things influences what we see. Focusing on Western Europe from the seventeenth to nineteenth centuries, Renzo Dubbini shows how developments in science, art, mapping, and visual epistemology affected the ways natural and artificial landscapes were perceived and portrayed. He begins with the idea of the "view," explaining its role in the invention of landscape painting and in the definition of landscape as a cultural space. Among other topics, Dubbini explores how the descriptive and pictorial techniques used in mariners' charts, view-oriented atlases, military cartography, and garden design were linked to the proliferation of highly realistic paintings of landscapes and city scenes; how the "picturesque" system for defining and composing landscapes affected not just art but also archaeology and engineering; and how the ever-changing modern cityscapes inspired new ways of seeing and representing the urban scene in Impressionist painting, photography, and stereoscopy. A marvelous history of viewing, Geography of the Gaze will interest everyone from scientists to artists.

BMW Boxer Twins-Ian Falloon 2004 For nearly 80 years, shaft-drive boxer twins have traditionally formed the backbone of the BMW motorcycle line-up. For many enthusiasts of the Bavarian marque the classic BMW twin was the R90S of 1973-76. Over the decades, successive generations of durable machines - including the R100S, fully-faired R100RS, four-cylinder K-series, high-performance R1100RS and an entire family of touring and sporting models ranging from 850 to 1200cc - would ensure the BMW boxer twins a place in the Haynes "Great Bikes" series. This book covers: historical context, racing, the wartime R75 and R69S; the "75" series which enabled BMW to compete with the high-performance Japanese machines; the R90S, the "76" and Superbike performance; the R100RS, the "77" and the touring R100RT; smaller twins, smaller potential; the R89G/S, including a Paris-Dakar version; rationalization of the boxer range, and the new twins that included four-valve heads and electronic engine management; and technical specifications from 1969 to 2003.
