Gothicka-Victoria Nelson 2012-05-08 The Gothic, Romanticism's gritty older sibling, has flourished in myriad permutations since the eighteenth century. In Gothicka, Victoria Nelson identifies the revolutionary turn it has taken in the twenty-first. Today's Gothic has fashioned its monsters into heroes and its devils into angels. It is actively reviving supernaturalism in popular culture, not as an evil dimension divorced from ordinary human existence but as part of our daily lives. To explain this millennial shift away from the traditionally dark Protestant post-Enlightenment Gothic, Nelson studies the complex arena of contemporary Gothic subgenres that take the form of novels, films, and graphic novels. She considers the work of Dan Brown and Stephenie Meyer, graphic novelists Mike Mignola and Garth Ennis, Christian writer William P. Young (author of *The Shack*), and filmmaker Guillermo del Toro. She considers twentieth-century Gothic masters H. P. Lovecraft, Anne Rice, and Stephen King in light of both their immediate ancestors in the eighteenth century and the original Gothic—the late medieval period from which Horace Walpole and his successors drew their inspiration. Fictions such as the *Twilight* and *Left Behind* series do more than follow the conventions of the classic Gothic novel. They are radically reviving and reinventing the transcendental worldview that informed the West's premodern era. As Jesus becomes mortal in *The Da Vinci Code* and the child Ofelia becomes a goddess in *Pan's Labyrinth*, Nelson argues that this unprecedented mainstreaming of a spiritually driven supernaturalism is a harbinger of what a post-Christian religion in America might look like.

Not Enough-Samuel Moyn 2018-04-10 The age of human rights has been kindest to the rich. Even as state violations of political rights garnered unprecedented attention due to human rights campaigns, a commitment to material equality disappeared. In its place, market fundamentalism has emerged as the dominant force in national and global economies. In this provocative book, Samuel Moyn analyzes how and why we chose to make human rights our highest ideals while simultaneously neglecting the demands of a broader social and economic justice. In a pioneering history of rights stretching back to the Bible, *Not Enough* charts how twentieth-century welfare states, concerned about both abject poverty and soaring wealth, resolved to fulfill their citizens' most basic needs without forgetting to contain how much the rich could tower over the rest. In the wake of two world wars and the collapse of empires, new states tried to take welfare beyond its original European and American homelands and went so far as to challenge inequality on a global scale. But their plans were foiled as a neoliberal faith in markets triumphed instead. Moyn places the career of the human rights movement in relation to this disturbing shift from the egalitarian politics of yesterday to the neoliberal globalization of today. Exploring why the rise of human rights has occurred alongside enduring and exploding inequality, and why activists came to seek remedies for indigence without challenging wealth, *Not Enough* calls for more ambitious ideals and movements to achieve a humane and equitable world.

Bored, Lonely, Angry, Stupid-Luke Fernandez 2020-07-07 Facebook makes us lonely. Selfies breed narcissism. On Twitter, hostility reigns. Pundits and psychologists warn that digital technologies substantially alter our emotional states. But Luke Fernandez and Susan Matt show that technology doesn't just affect how we feel from moment to moment—it changes profoundly the underlying emotions themselves.

Architecture and Modern Literature-David Spurr 2012-04-10 Exploring the related cultural forms of architecture and literature in the modern era

Inside the White Cube-Brian O'Doherty 1999 These essays explicitly confront a particular crisis in postwar art, seeking to examine the assumptions on which the modern commercial and museum gallery was based.

All that is Solid Melts Into Air-Marshall Berman 1983 The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

Beyond Modern Sculpture-Jack Burnham 1968-06 Examines the materialistic and psychological factors responsible for dominant trends in twentieth-century sculpture

The Scandal of the Evangelical Mind-Mark A. Noll 1994 Mark Noll has written a major indictment of American evangelicalism. Reading this book, one wonders if the evangelical movement has pandered so much to American culture and tried to be so popular only to lose not only its mind but its soul as well. For evangelical pastors and parishoners alike, this is a must read! --Robert Wuthnow.

Nothing Less Than Literal-Mark Linder 2007-02-23 How minimalist art was infiltrated by architecture in the 1960s: a history of the exchanges of formalist concepts and techniques that resulted in a reconfiguration of two disciplines.

Seven Pillars of Wisdom (Annotated)-Thomas E. Lawrence 2014-05-20 *Seven Pillars of Wisdom* is the autobiographical account of the experiences of British soldier Thomas E. Lawrence (1888-1935) ("Lawrence of Arabia"), while serving as a liaison officer with rebel forces during the Arab Revolt against the Ottoman Turks of 1916 to 1918. Charles Hill has called the *Seven Pillars* "a novel traveling under the cover of autobiography," capturing Lawrence's highly personal version of the historical events described in the book. Lieutenant Colonel Thomas Edward Lawrence, known professionally as T. E. Lawrence, was a British Army officer renowned especially for his liaison role during the Arab Revolt against Ottoman Turkish rule of 1916-18. The extraordinary breadth and variety of his activities and associations, and his ability to describe them vividly in writing, earned him international fame as Lawrence of Arabia, a title which was used for the 1962 film based on his World War I activities. "The book is very well illustrated."

Looking Closer 5-Michael Bierut 2006 The final installment in this acclaimed series offers astute and controversial discussions on contemporary graphic design from 2001 to 2005. This collection of essays takes stock of the quality and profundity of graphic design writing published in professional and general interest design magazines, as well as on blogs and Internet journals. Prominent contributors include Milton Glaser, Maud Lavin, Ellen Lupton, Victor Margolin, Mr. Keedy, David Jury, Alice Twemlow, Steven Heller, Jessica Helfand, William Drenttel, Michael Bierut, Michael Dooley, Nick Curry, Emily King, and more. Among the important themes discussed: design as popular culture, design as art, politics, aesthetics, social responsibility, typography, the future of design, and more. Students, graphic designers beginning their careers, and veterans seeking fresh perspective will savor this anthology gathered from some of today's top graphic design writers and practitioners, as well as commentators from outside the profession. From the series that helped launch the design criticism movement and was the first to anthologize graphic design criticism from key sources, this volume promises to be the most provocative of all! Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a *New York Times* bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Laws-Plato 2013-02-06 A lively dialogue between a foreign philosopher and a powerful statesman reflects the essence of Platonic reasoning on political theory and practice. It also embodies the philosopher's practical ideas about a utopian republic.

Shaping the City-Rodolphe El-Khoury 2015-06-23 Taking on the key issues in urban design, *Shaping the City* examines the critical ideas that have driven these themes and debates through a study of particular cities at important periods in their development. As well as retaining crucial discussions about cities such as Los Angeles, Atlanta, Chicago, Detroit, Philadelphia, and Brasilia at particular moments in their history that exemplified the problems and themes at hand like the mega-city, the post-colonial city and New Urbanism, in this new edition the editors have introduced new case studies critical to any study of contemporary urbanism - China, Dubai, Tijuana and the wider issues of informal cities in the Global South. The book serves as both a textbook for classes in urban design, planning and theory and is also attractive to the increasing interest in urbanism by scholars in other fields. *Shaping the City* provides an essential overview of

the range and variety of urbanisms and urban issues that are critical to an understanding of contemporary urbanism.

Eichmann in Jerusalem-Hannah Arendt 2006-09-22 The controversial journalistic analysis of the mentality that fostered the Holocaust, from the author of *The Origins of Totalitarianism* Sparking a flurry of heated debate, Hannah Arendt's authoritative and stunning report on the trial of German Nazi leader Adolf Eichmann first appeared as a series of articles in *The New Yorker* in 1963. This revised edition includes material that came to light after the trial, as well as Arendt's postscript directly addressing the controversy that arose over her account. A major journalistic triumph by an intellectual of singular influence, *Eichmann in Jerusalem* is as shocking as it is informative—an unflinching look at one of the most unsettling (and unsettled) issues of the twentieth century.

Women's Experimental Cinema-Robin Blaetz 2007-10-16 This volume offers introductions to the work of fifteen avant-garde American women filmmakers.

Plastic Fantastic-Eugenie Samuel Reich 2009-05-12 Traces the infamous fraudulent discovery of physicist Jan Henrik Schön, a star researcher from Bell Laboratories who claimed to have developed technology that would enable the creation of virtually limitless computer chips, in an account that evaluates the motivations for his scam and how it successfully duped some of the scientific community's most informed minds.

Differences-Ignasi de Solà-Morales 1997 *Differences* brings together ten essays written since the mid-1980s by the Spanish architect and theorist Ignasi de Solà-Morales. Many of the essays have never previously been translated, and the author has provided a new introduction especially for this English edition.

Beyond the Bounds-John Piper 2003-01-30 "Everyone who believes in God at all believes that He knows what you and I are going to do tomorrow." -C. S. Lewis This understanding of God's foreknowledge has united the church for twenty centuries. But advocates of "open theism" are presenting a different vision of God and a different view of the future. The rise of open theism within evangelicalism has raised a host of questions. Was classical theism decisively tainted by Greek philosophy? How should we understand passages that tell us that God repents? Are essentials of biblical Christianity—like the inerrancy of Scripture, the trustworthiness of God, and the Gospel of Christ—at stake in this debate? Where, when, and why should we draw new boundaries—and is open theism beyond them? *Beyond the Bounds* brings together a respected team of scholars to examine the latest literature, address these questions, and give guidance to the church in this time of controversy. Contributors include: John Piper Wayne Grudem Michael S. Horton Bruce A. Ware Mark R. Talbot A. B. Caneday Stephen J. Wellum Justin Taylor Paul Kjoss Helseth Chad Brand William C. Davis Russell Fuller "We have prepared this book to address the issue of boundaries and, we pray, bring some remedy to the present and impending pain of embracing open theism as a legitimate Christian vision of God. . . . As a pastor, who longs to be biblical and God-centered and Christ-exalting and eternally helpful to my people, I see open theism as theologically ruinous, dishonoring to God, belittling to Christ, and pastorally hurtful. My prayer is that Christian leaders will come to see it this way, and thus love the church by counting open theism beyond the bounds of orthodox Christian teaching." -From the Foreword by John Piper

Architecture in Formation-Pablo Lorenzo-Eiroa 2013-10-08 *Architecture in Formation* is the first digital architecture manual that bridges multiple relationships between theory and practice, proposing a vital resource to structure the upcoming second digital revolution. Reading Darwin in Arabic, 1860-1950-Marwa Elshakry 2014-01-06 In *Reading Darwin in Arabic*, Marwa Elshakry questions current ideas about Islam, science, and secularism by exploring the ways in which Darwin was read in Arabic from the late 1860s to the mid-twentieth century. Borrowing from translation and reading studies and weaving together the history of science with intellectual history, she explores Darwin's global appeal from the perspective of several generations of Arabic readers and shows how Darwin's writings helped alter the social and epistemological landscape of the Arab learned classes. Providing a close textual, political, and institutional analysis of the tremendous interest in Darwin's ideas and other works on evolution, Elshakry shows how, in an age of massive regional and international political upheaval, these readings were suffused with the anxieties of empire and civilizational decline. The politics of evolution infiltrated Arabic discussions of pedagogy, progress, and the very sense of history. They also led to a literary and conceptual transformation of notions of science and religion themselves. Darwin thus became a vehicle for discussing scriptural exegesis, the conditions of belief, and cosmological views more broadly. The book also acquaints readers with Muslim and Christian intellectuals, bureaucrats, and theologians, and concludes by exploring Darwin's waning influence on public and intellectual life in the Arab world after World War I. *Reading Darwin in Arabic* is an engaging and powerfully argued reconceptualization of the intellectual and political history of the Middle East.

The Rise of Eurocentrism-Vassilis Lambropoulos 1992-12-14 In the controversy over political correctness, the canon, and the curriculum, the role of Western tradition in a post-modern world is often debated. To clarify what is at stake, Vassilis Lambropoulos traces the ideology of European culture from the Reformation, focusing on a key element of Western tradition: the act of interpretation as a distinct practice of understanding and a civil right. Championed by Protestants insisting on independent interpretation of scripture, this ideal of autonomy ushered in the era of modernity with its essentialist philosophy of universal man and his aesthetic understanding of the world. After explaining the dominance of European culture through the combined archetypes of Hebraism (reason and morality) and Hellenism (spirit and art), Lambropoulos shows how the rule of autonomy has been transformed into the aesthetic, disinterested contemplation of things in themselves. Arguing that it is time to restore the socio-political dimension to the movement of autonomy, he proposes that a genealogy of the Hebraic-Hellenic archetypes can help us evaluate more recent models—like the Afrocentric one—and redefine the controversy surrounding education, Eurocentrism, and cultural politics.

The Power of Tolkien's Prose-S. Walker 2009-11-23 Shortlisted for the 2011 Mythopoeic Scholarship Award for Inklings Studies Tolkien's unparalleled popularity has been largely attributed to his gifts as a storyteller and his thematic currency. But *The Lord of the Rings* may have become a modern classic for a deeper reason than we've noticed: Tolkien is a first-rate stylist. *The Power of Tolkien's Prose* illuminates the multifaceted appeal of Tolkien's prose style in dimensions ranging from his fantastic realism to his revitalizing imagery to his dynamic narrative to his expansive characterization to his engaging language. Viewed through the lens of Steve Walker's stylistic appreciation, Tolkien's fiction emerges as a new dimension of perception.

Under the Banner of Heaven-Jon Krakauer 2004-06-08 This extraordinary work of investigative journalism takes readers inside America's isolated Mormon Fundamentalist communities, where some 40,000 people still practice polygamy. Defying both civil authorities and the Mormon establishment in Salt Lake City, the renegade leaders of these Taliban-like theocracies are zealots who answer only to God. At the core of Krakauer's book are brothers Ron and Dan Lafferty, who insist they received a commandment from God to kill a blameless woman and her baby girl. Beginning with a meticulously researched account of this appalling double murder, Krakauer constructs a multi-layered, bone-chilling narrative of messianic delusion, polygamy, savage violence, and unyielding faith. Along the way he uncovers a shadowy offshoot of America's fastest growing religion, and raises provocative questions about the nature of religious belief.

Bachelors-Rosalind E. Krauss 2000 These essays on nine women artists are framed by the question, born of feminism, "What evaluative criteria can be applied to women's art?" Since the 1970s Rosalind Krauss has been exploring the art of painters, sculptors, and photographers, examining the intersection of these artists concerns with the major currents of postwar visual culture: the question of the commodity, the status of the subject, issues of representation and abstraction, and the viability of individual media. These essays on nine women artists are framed by the question, born of feminism, "What evaluative criteria can be applied to women's art?" In the case of surrealism, in particular, some have claimed that surrealist women artists must either redraw the lines of their practice or participate in the movement's misogyny. Krauss resists that claim, for these "bachelors" are artists whose expressive strategies challenge the very ideals of unity and mastery identified with masculinist aesthetics. Some of this work, such as the "part object" (Louise Bourgeois) or the "formless" (Cindy Sherman) could be said to find its power in strategies associated with such concepts as *écriture féminine*. In the work of Agnes Martin, Eva Hesse, or Sherrie Levine, one can make the case that the power of the work can be revealed only by recourse to another type of logic altogether. *Bachelors* attempts to do justice

to these and other artists (Claude Cahun, Dora Maar, Louise Lawler, Francesca Woodman) in the terms their works demand.

Morals Not Knowledge-John H. Evans 2018-03-27 "Academics have long claimed that the relationship between religion and science concerns knowledge of the physical world, and that conflict ensues because religion has one way of knowing and science another. For example, it is claimed that to find the age of the Earth religious people look to holy scripture and scientists look at the age of rocks. This book shows that this is indeed true among the elites who focus on this debate. However, contrary to the assumptions of elites and public discourse in general, that same relationship and conflict does not exist between religious citizens and science. This book shows that regular religious people in the U.S. are at most in conflict over a few fact claims with science, and that this limited conflict does not lead to conflict with scientific claims writ large. More importantly, American religion has changed since the 1960s, de-emphasizing knowledge claims about the physical world, and becoming more focused on social relationships and thus morality. This book shows that any religion and science debate in the public is not about scientific claims about nature, such as the age of the Earth, but rather about morality - and opposition to the morality implicitly promoted by scientists"--Provided by publisher.

Answering the New Atheists: How Science Points to God and to the Benefits of Christianity-Anthony Walsh 2019-01-30 In the face of increasing attacks on Christianity by militant new atheists, Christians should be able to robustly defend their beliefs in the language spoken by Christianity's detractors—science. Atheists claim that science and religion are incompatible and in constant conflict, but this book argues that this is assuredly not true. In order to rebut the polemic agenda of the new atheists who want God banned from the public square, this book engages with the physical and natural sciences, social science, philosophy, and history. It shows that evidence from these diverse disciplines constitutes clear signposts to God and the benefits of Christianity for societies, families, and individuals. Answering the New Atheists begins by examining what new atheism is, before demolishing its claim that Christianity is harmful by showing the many benefits it has for freedom and democracy, morality, longevity, and physical and mental health. Many historians of science contend that science was given its impetus by the Christian principle that a rational God wants us to discover his fingerprints on nature. Thus, in subsequent chapters, Walsh presents a well-informed and philosophical-based analysis of the Big Bang and cosmic fine-tuning, the unimaginable improbability of factors that make this planet habitable, and the multiverse often called the "last refuge of the desperate atheist." Interdisciplinary in its approach, this book adeptly explores the very problematic issues of the origin and evolution of life that have forced many top-rate scientists including Nobel Prize winners, who have thought deeply about the philosophical meaning of their work, to accept God as the Creator of everything.

Christian Memories of the Maccabean Martyrs-D. Joslyn-Siemiatkoski 2009-08-17 This book examines texts and materials, ranging from the eastern Mediterranean to northwestern Europe, related to the Maccabean martyrs. Joslyn-Siemiatkoski demonstrates that Christian thinkers constructed memories of the Maccabean martyrs that simultaneously appropriated Jewish traditions and obscured the Jewish origins of Christianity.

Human personality and its survival of bodily death-Frederic William Henry Myers 1906

Surrealism and Architecture-Thomas Mical 2005 This is a historically informed examination of architecture's perceived absence in surrealist thought, surrealist tendencies in the theories and projects of modern architecture, and the place of surrealist thought in contemporary design. This book represents current insights into surrealism in the thought and practice of modern architecture. In these essays, the role of the subconscious, the techniques of defamiliarization, aesthetic and social forces affecting the objects, interiors, cities and landscapes of the twentieth century are revealed. The book contains a diversity of voices from across modern art and architecture to bring into focus what is often overlooked in the histories of the modernist avant-garde. This collection examines the practices of writers, artists, architects, and urbanists with emphasis on a critique of the everyday world-view, offering alternative models of subjectivity, artistic effect, and the production of meanings in the built world.

The Big Questions: A Short Introduction to Philosophy-Robert C. Solomon 2016-12-05 Solomon and Higgins's engaging text covers philosophy's central ideas in an accessible, approachable manner. Through an exploration of timeless big questions about the self, God, justice, and other meaningful topics, the authors provide students with the context they need for an understanding of the foundational issues, while giving them the impetus and confidence to establish their own informed positions on these big questions. To give you the flexibility to fit the book to your course, the authors have designed each chapter with self-contained discussions, thus making it easy for you to choose your preferred topics and presentation order. Beyond Enlightenment-Richard Cohen 2006-08-21 The vast majority of books on Buddhism describe the Buddha using the word enlightened, rather than awakened. This bias has resulted in Buddhism becoming generally perceived as the eponymous religion of enlightenment. Beyond Enlightenment is a sophisticated study of some of the underlying assumptions involved in the study of Buddhism (especially, but not exclusively, in the West). It investigates the tendency of most scholars to ground their study of Buddhism in these particular assumptions about the Buddha's enlightenment and a particular understanding of religion, which is traced back through Western orientalist to the Enlightenment and the Protestant Reformation. Placing a distinct emphasis on Indian Buddhism, Richard Cohen adeptly creates a work that will appeal to those with an interest in Buddhism and India and also scholars of religion and history.

Conflict, Culture and History-Stephen J. Blank 1991

The Dialectic of Sex-Shulamith Firestone 2003-03-05 "No one can understand how feminism has evolved without reading this radical, inflammatory second-wave landmark." —Naomi Wolf Originally published in 1970, when Shulamith Firestone was just twenty-five years old, and going on to become a bestseller, The Dialectic of Sex was the first book of the women's liberation movement to put forth a feminist theory of politics. Beginning with a look at the radical and grassroots history of the first wave (with its foundation in the abolition movement of the time), Firestone documents its major victory, the granting of the vote to women in 1920, and the fifty years of ridicule that followed. She goes on to deftly synthesize the work of Freud, Marx, de Beauvoir, and Engels to create a cogent argument for feminist revolution. Identifying women as a caste, she declares that they must seize the means of reproduction—for as long as women (and only women) are required to bear and rear children, they will be singled out as inferior. Ultimately she presents feminism as the key radical ideology, the missing link between Marx and Freud, uniting their visions of the political and the personal. In the wake of recent headlines bemoaning women's squandered fertility and the ongoing debate over the appropriate role of genetics in the future of humanity, The Dialectic of Sex is revealed as remarkably relevant to today's society—a testament to Shulamith Firestone's startlingly prescient vision. Firestone died in 2012, but her ideas live on through this extraordinary book.

Robert Maynard Hutchins-Milton Mayer 1993-01-01 "Mayer's memoir is by far the most exciting Hutchins book ever. His style, wit, and passion--and his insight--put it into a class by itself."--Studs Terkel "Mayer's memoir is by far the most exciting Hutchins book ever. Utopia as Method-R. Levitas 2013-07-25 Utopia should be understood as a method rather than a goal. This book rehabilitates utopia as a repressed dimension of the sociological and in the process produces the Imaginary Reconstitution of Society, a provisional, reflexive and dialogic method for exploring alternative possible futures.

Luther, Conflict, and Christendom-Christopher Ocker 2018-08-30 Martin Luther was the subject of a religious controversy that never really came to an end. The Reformation was a controversy about him.

Globalization and National Identities-P. Kennedy 2001-06-05 Drawing on original research from social scientists working on twelve countries this book explores the key issues faced by nations and citizens as they struggle to rediscover, reaffirm or reconstruct their sense of national identities in the face of globalizing forces. Some nations and peoples experience the fragmentation of once certain identities as threatening and likely to generate political and social breakdown. Others encounter globalization as a challenge which brings uncertainties but also opportunities for adaptation, the evolution of hybrid identities or new forms of protest.
