Called out-Paula Farris 2020-03-31 So often we fall into the trap of confusing what we do with who we are. We see our vocational calling as the most important thing about us, while our faith calling takes a back seat. And that can wreak havoc on our bodies, our souls, and our relationships. Called Out is a deeply personal book from Paula Farris, the beloved on-air reporter for ABC News and former coanchor of Good Morning America Weekend and The View. It shares her journey through conquering the fears that nearly kept her from the high-profile, high-stakes world of broadcast journalism, and then the dangers when that world threatened to consume her. She faced public humiliation, physical breakdowns, and family struggles, while all along the way God gently reminded her of her true purpose in him. Paula discovered how easy it is to lose sight of who we are as people of God. Today she is the host of ABC's highly successful podcast Journeys of Faith, which leans into both her vocational calling and her faith calling. Written with passion and conviction, this book reflects on what it truly means to be called, how to move past the fear holding you back, and how to walk in God's path for you. The Low-FODMAP Recipe Book-Lucy Whigham 2017-06-01 This book demystifies the low-FODMAP diet and provides 125 tasty and delicious recipes for a happy gut. Written by a specialist gut dietician, The Low-FODMAP Recipe Book can help you to take control of Irritable Bowel Syndrome (IBS), functional bowel disorder and digestive distress. Dietary management is key to managing IBS and other gut disorders. The most successful diet for bringing relief for symptoms such as bloating, abdominal distension, excessive wind, diarrhoea and other digestive issues is the low-FODMAP diet, which has been medically proven in rigorous clinical trials to improve symptoms in up to 75 per cent of people with IBS. Because of the diet's success it is quickly becoming an essential treatment for people with a sensitive gut and can help in the management of a wide range of stomach troubles and gastrointestinal discomfort. The low-FODMAP diet will help you to identify food intolerances, including intolerance of lactose and fructose, and may also be used to help those who are suffering from Inflammatory Bowel Disease (IBD), Coeliac Disease and functional symptoms following gastrointestinal surgery. An expert in the low-FODMAP diet and gut disorders, author Lucy Whigham will help you to understand more about the way your gut functions and what is contributing to your symptoms. This book is an easy guide to why and how the low-FODMAP diet can help, and includes tables of what foods need to be avoided for the elimination phase and beyond. FODMAPs (Fermentable Oligosaccharides, Di-saccharides, Mono-saccharides and Polyols) are naturally occurring sugars that are found in a wide range of everyday foods. They are not fully broken down during digestion and therefore cannot be completely absorbed by the body. Instead they travel through the gut where they are fermented by the bacteria that live in our gastrointestinal tract. In susceptible people (those with a sensitive gut) this fermentation can lead to excessive wind, bloating, pain, cramping and stomach gurglings. FODMAPs also draw water into the gut, which can lead to diarrhoea and frequent bowel motions. Cutting out foods that are high in these fermentable carbohydrates and following a low-FODMAP diet can help you to regain control over your digestive symptoms and thereby improve your quality of life. Once your symptoms are under control you can start to re-introduce FODMAPs to help you identify your individual intolerances and threshold levels. In this way you are empowered with the knowledge of exactly which foods cause you problems, putting you in the driving seat and letting you control your symptoms rather than have them control you.
