Bilingualism and Bilingual Education: Politics, Policies and Practices in a Globalized Society-B. Gloria Guzmán Johannessen 2019-01-14 This volume presents a multinational perspective on the juxtaposition of language and politics. Bringing together an international group of authors, it offers theoretical and historical constructs on bilingualism and bilingual education. It highlights the sociocultural complexities of bilingualism in societies where indigenous and other languages coexist with colonial dominant and other prestigious immigrant languages. It underlines the linguistic diaspora and expansion of English as the world's lingua franca and their impact on indigenous and other minority languages. Finally, it features models of language teaching and teacher education. This book challenges the existent global conditions of non-dominant languages and furthers the discourse on language politics and policies. It does so by pointing out the need to change the bilingual/multilingual educational paradigm across nations and all levels of educational systems.

Profiles of Dual Language Education in the 21st Century-Prof. M. Beatriz Arias 2018-09-14 In the last 20 years dual language education programs have increased in number and expanded in range. Whereas once they were predominantly focused at the elementary level, they now span from pre-K through to high school. This book examines the key attributes of successful dual language programs, as well as the challenges and opportunities involved in extending the dual language instructional model to pre-K and secondary settings. Chapter authors, who are themselves both researchers and practitioners, explore the latest research and policy implications for implementation of dual language in three different contexts; within a school, a dual language school and a dual language district. This book will be of interest to teachers, teacher educators, professional development specialists, policymakers, administrators, and researchers.

Multiliteracies Pedagogy and Language Learning-Gabriela C. Zapata 2017-09-01 This book is the first volume to be devoted to the examination of the application of the multiliteracies pedagogical framework to the teaching of Spanish to heritage language learners in higher education institutions in the United States. The Hispanic population is a growing minority, and the presence of heritage speakers can be observed in second language Spanish classes in all levels of education, which presents unique challenges for practitioners. This collection focuses on differing populations of learners in educational settings in a variety of geographical areas, such as Arizona, California, Maryland, Massachusetts, Ohio, Tennessee, and Texas. The studies included in the volume offer invaluable data and methodological insights into the instructional advantages of multiliteracies pedagogies in heritage language classrooms, and they will appeal to Spanish practitioners and researchers, as well as those interested in the education and practice of heritage languages.

Language Proficiency-L.A. Arena 2013-06-29 Louis A. Arena University of Delaware Newark, DE This monograph contains select, revised, and invited papers which deal with the topic, Language Proficiency: Defining, Teaching, and Testing. This topic was the theme of the eighth annual symposium held at the University of Delaware. The papers contained in this volume are invited papers or were originally scheduled for presentation and/or presented at the eighth annual Delaware Symposium on Language Studies. The papers combine research conducted in the areas of teaching, testing, and defining second language proficiency within the profession of applied linguistics. They are divided into three principal sections: "Applied Linguistics and Language Proficiency", "Language Proficiency in Reading and Writing", and "Testing for Language Proficiency". In Part I, Paul Angelis' "Applied Linguistics: Realities and Projections re the Teaching Profession"; sketches a historical portrait of Applied Linguistics, its definition, presence, and role in the profession that teaches second language proficiency. Angelis concludes that Applied Linguistics is still a young discipline in terms of substance, organization, and strategy, and that these three components will determine the prospects for the future of applied linguistics re the teaching profession. The next six papers address the issue of second language proficiency from various points of view. Kensaku Yoshida's essay "Knowing vs Believing vs Feeling: Studies on Japanese Bilinguals" concludes that some Japanese bilinguals are actually not necessarily bilingual because they very often face problems requiring other kinds of proficiency, i. e.

Test Policy and Test Performance: Education, Language, and Culture-Bernard R. Gifford 2012-12-06 Bernard R. Gifford In the United States, the standardized test has become one of the major sources of information for reducing uncertainty in the determination of individual merit and in the allocation of merit-based educational, training, and employment opportunities. Most major institutions of higher education require applicants to supplement their records of academic achievements with scores on standardized tests. Similarly, in the workplace, as a condition of employment or assignment to training programs, more and more employers are requiring prospective employees to sit for standardized tests. In short, with increasing frequency and intensity, individual members of the political economy are required to transmit to the opportunity marketplace scores on standardized examinations that purport to be objective measures of their abilities, talents, and potential. In many instances, these test scores are the only signals about their skills that job applicants are permitted to send to prospective employers. THE NATIONAL COMMISSION ON TESTING AND PUBLIC POLICY In view of the importance of these issues to our current national agenda, it was proposed that the Human Rights and Governance and the Education and Culture Programs of the Ford Foundation support the establishment of a "blue ribbon" National Commission on Testing and Public Policy to investigate some of the major problems, as well as the untapped opportunities, created by recent trends in the use of standardized tests, particularly in the workplace and in schools.

Promoting the Educational Success of Children and Youth Learning English-National Academies of Sciences, Engineering, and Medicine 2017-08-25 Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs "who account for more than 9 percent of enrollment in grades K-12 in U.S. schools" are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

Principles and Practice in Second Language Acquisition-Stephen D. Krashen 1982 The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

Language Testing Reconsidered-Janna D. Fox 2007-06-01 Language Testing Reconsidered provides a critical update on major issues that have engaged the field of language testing since its inception. Anyone who is working in, studying or teaching language testing should have a copy of this book. The information, discussions, and reflections offered within the volume address major developments within the field over the past decades, enlivened by current "takes" on these issues. The real value of this collection, however, lies in its consideration of the past as a means of defining the future agenda of language testing.

The Relationship Between Various Types of Teachers' Language and Comprehension in the Acquisition of Intermediate Japanese-Hiroshi Matsumoto 1998 The Relationship Between Various Types of Teachers' Language and Comprehension exposes new research on the methods of successfully teaching Japanese as a second language. It breaks down the comprehension process into immediate comprehension, delayed memory of two to three weeks, and perceived comprehension. These different areas of comprehension were measured in response to speech adjustments, extralinguistic information such as contextualized pictures, and the use of the students' first language to explain grammar. Understanding the various phases of language comprehension so that teaching structure and style can be adjusted will assist teachers in reaching maximum efficiency in the classroom. The author specifically details the necessary methods of instruction that most thoroughly enhance every aspect of understanding for students.

Multilingualism and Bilingualism-Sammy Beban Chumbow 2018-05-30 Research in the area of bilingualism and multilingualism invariably produces fascinating insights. In the Europe of yesteryears, the paradigm of one nation one language was dominant and fashionable as a nation-building ideology that multilingualism was considered a curse, a demon that had to be exorcised. Today, the avalanche of empirical evidence of research findings has established multilingualism and pluralism as an ideal for national development. The nine chapters of this book provide further elucidations of the issue of benefits of bilingualism and multilingualism and also provide original research findings on developments in the areas of psychological dimensions of bilingualism and bilingualism in information retrieval systems. The book by its illuminating description and insightful analysis of issues of bilingualism will be of significant interest to scholars, researchers, and all concerned with bilingualism and multilingualism from whatever perspective.
