Loose Leaf for Business Law-L. Thomas Bowers 2018-01-29 This is the 17th UCC Edition (and the twenty-second overall edition) of a business law text that first appeared in 1935. Throughout its 80 years of existence, this book has been a leader and an innovator in the fields of business law and the legal environment of business. One reason for the book's success is its clear and comprehensive treatment of the standard topics that form the traditional business law curriculum. Another reason is its responsiveness to changes in these traditional subjects and to new views about that curriculum. In 1976, this textbook was the first to inject regulatory materials into a business law textbook, defining the "legal environment" approach to business law. Over the years, this textbook has also pioneered by introducing materials on business ethics, corporate social responsibility, global legal issues, and e-commerce law. The 17th Edition continues to emphasize change by integrating these four areas into its pedagogy.

Genetic Algorithms + Data Structures = Evolution Programs-Zbigniew Michalewicz 2013-03-09 Genetic algorithms are founded upon the principle of evolution, i.e., survival of the fittest. Hence evolution programming techniques, based on genetic algorithms, are applicable to many hard optimization problems, such as optimization of functions with linear and nonlinear constraints, the traveling salesman problem, and problems of scheduling, partitioning, and control. The importance of these techniques is still growing, since evolution programs are parallel in nature, and parallelism is one of the most promising directions in computer science. The book is self-contained and the only prerequisite is basic undergraduate mathematics. This third edition has been substantially revised and extended by three new chapters and by additional appendices containing working material to cover recent developments and a change in the perception of evolutionary computation.

Teaching Ethics Across the Management Curriculum, Volume II-Kemi Ogunyemi 2016-08-10 Of those in management education who debates whether business ethics should be taught as a stand-alone course or in an embedded manner, most recommend combining both approaches for optimal results. This book provides unique insights into the experience of seasoned academics who embed business ethics in teaching management theory and practice. Its multidisciplinary approach enriches its content, since the insights of our colleagues from within their fields are invaluable. It therefore complements other business textbooks. After general themes (curriculum integration, adult learning, learner commitment, and generation Y classrooms), this volume covers ethics and responsibility in people management, team building, change management; operations management, business law, and digital marketing communications. The book provides a platform to share experiences of teaching ethical profitability. It contributes to resolving concerns experienced when faculty wish to incorporate ethics into their teaching but feel they lack preparation or ideas on how to do it. The chapters describe each discipline briefly, raise the typical ethical issues therein, and suggest teaching strategies and exercises or projects. The 'developing versus developed country perspectives' sections may interest schools with high student diversity. The book also meets in-company training needs for attaining and sustaining an ethical culture.

Dynamic Business Law: The Essentials-Daniel Herron 2015-01-23 Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further.
