Transforming Acquisitions and Collection Services-Michelle Flinchbaugh 2019-09-15 This book explores ways in which libraries can reach new levels of service, quality, and efficiency while minimizing cost by collaborating in acquisitions. In consortial acquisitions, a number of libraries work together, usually in an existing library consortia, to leverage size to support acquisitions in each individual library. In cross-functional acquisitions, acquisitions collaborates to support other library functions. For the library acquisitions manager, technical services manager, or the library director, awareness of different options for effective consortial and cross-functional acquisitions allows for the optimization of staff and resources to reach goals. This work presents those options in the form of case studies as well as useful analysis of the benefits and challenges of each. By supporting each other's acquisitions services in a consortium, libraries leverage size to get better prices, and share systems and expertise to maximize resources while minimizing costs. Within libraries, the acquisitions function can be combined with other library functions in a unit with more than one purpose, or acquisitions can develop a close working relationship with another unit to support their work. This book surveys practice at different libraries and at different library consortia, and presents a detailed description and analysis of a variety of practices for how acquisitions units support each other within a consortium, and how they work with other library units, specifically collection management, cataloging, interlibrary loan, and the digital repository, in the form of case studies. A final section of the book covers fundamentals of collaboration.

Copies in Seconds-David Owen 2008-06-30 The first plain-paper office copier -- which was introduced in 1960 and has been called the most successful product ever marketed in America -- is unusual among major high-technology inventions -- in that its central process was conceived by a single person. David Owen's fascinating narrative tells the story of the machine nobody thought we needed but now we can't live without. Chester Carlson grew up in unspeakable poverty, worked his way through junior college and the California Institute of Technology, and made his discovery in solitude in the depths of the Great Depression. He offered his big idea to two dozen major corporations -- among them IBM, RCA, and General Electric -- all of which turned him down. So persistent was this failure of capitalist vision that by the time the Xerox 914 was manufactured by an obscure photographic-supply company in Rochester, New York, Carlson's original patent had expired. Xerography was so unusual and nonintuitive that it conceivably could have been overlooked entirely. Scientists who visited the drafty warehouses where the first machines were built sometimes doubted that Carlson's invention was even theoretically feasible. Drawing on interviews, Xerox company archives, and the private papers of the Carlson family, David Owen has woven together a fascinating and instructive story about persistence, courage, and technological innovation -- a story that has never before been fully told.

Advance with Hope- 2011-06-01 Description Three years ago a handful of people with mental health problems took part in a creative writing course facilitated by poet Elspeth Murray. They, and other people supported by the national mental health provider Advance Support, have since produced an outpouring of creative writing to express their hopes, moods, fears and fantasies about recovering from their condition - which we have gathered together for the first time in this anthology. Feeling good, feeling down, feeling contempt for professionals - all user and survivor states are captured here. About the Author Advance is a national charitable organisation. We provide places for people with learning disabilities or mental health problems to live. We also provide support for them to live their lives the way they want, and advice for people seeking work or returning to work. Advance began as a not-for-profit organisation in 1974, working with a local Health Authority in Leicestershire to identify accommodation for patients as part of a large-scale discharge from a local hospital. Today Advance supports, houses and advises more than 3000 people in 33 counties across Central and Southern England.

PostScript & Acrobat/PDF-Thomas Merz 2018-03-22 Originally entitled the "PostScript and Acrobat Bible" in German, this handbook achieves the seemingly impossible: it covers this tricky and technical field in an entertaining manner without getting bogged down in PostScript programming. It explains how several components work together and how to deal with real-world application and operating-system problems. The author genuinely wants to assist in overcoming cross-platform barriers using MS-DOS, Windows, Macintosh or UNIX and, accordingly, neither the book nor the tools are limited to one particular platform or operating system. The 9 chapters and 3 appendixes run the entire gamut, from the very basics right up to Ghostscript and the whole is creatively designed, making use of comical illustrations. In short, essential reading for all technically minded users of PostScript and Acrobat/PDF - from PC owners wanting to get the most out of their laser printers to graphic artists with Macs to system administrators and online publishers.

Universal Empire-Peter Fibiger Bang 2012-08-16 The claim by certain rulers to universal empire has a long history stretching as far back as the Assyrian and Achaemenid Empires. This book traces its various manifestations in classical antiquity, the Islamic world, Asia and Central America as well as considering seventeenth- and eighteenth-century European discussions of international order. As such it is an exercise in comparative world history combining a multiplicity of approaches, from ancient history, to literary and philosophical studies, to the history of art and international relations and historical sociology. The notion of universal, imperial rule is presented as an elusive and much coveted prize among monarchs in history, around which developed forms of kingship and political culture. Different facets of the phenomenon are explored under three, broadly conceived, headings: symbolism, ceremony and diplomatic relations; universal or cosmopolitan literary high-cultures; and, finally, the inclination to present universal imperial rule as an expression of cosmic order.

Weight Loss Cooking-Don Orwell 2015-04-21 How Can You Go Wrong With Superfoods-Only Diet? FACT Way too many of us live in a state of poor health, lethargy and moderate obesity. We live with headaches, back pain, inflammation, arthritis, high blood pressure, high cholesterol, diabetes, skin problems, insomnia and cancer - they're all the byproducts of modern western diet, based on processed food. Superfoods are foods and the medicine and they can help

with all these symptoms!! Superfoods are NOT only exotic berries like Acai, Goji or Noni! Acai, Goji or Noni berries are great, they're full of antioxidants, but you can't live on them. Superfoods covered in this book are regular, everyday Superfoods, like spinach, broccoli, quinoa, olive oil, garlic, kale, salmon, ginger, avocado, berries, flax seeds; basically nutritionally dense foods that are widely available and which offer tremendous dietary and healing potential. After eating these superior sources of anti-oxidants and essential nutrients for only a week or two you will: - Start losing weight and boost energy - Get rid of sugar or junk food cravings - Lower your blood sugar and stabilize your insulin level - Detox your body from years of eating processed foods - Lower your blood pressure and your cholesterol - Fix your hormone imbalance and boost immunity - Increase your stamina and libido - Get rid of inflammations in your body "Our Food Should Be Our Medicine And Our Medicine Should Be Our Food." - Hippocrates 460 - 370 BC Weight Loss Cooking book has the best weight loss recipes that I gathered over the years. The best thing about Superfoods Diet is that it will keep your appetite and cravings under control and it will balance your hormones. It's nearly impossible to lose fat if your hormones are out of balance. Superfoods Diet works because it's return to the type of food your body naturally craves and was designed for. Whole foods Superfoods is the food humans consumed for literally millions of years. Superfoods diet forbids processed foods, hybridized foods, gluten foods and high glycemic foods. There is nothing super in today's hybridized wheat, corn, soy or potatoes. Processed food is the main reason why people suffer from inflammations and why their hormones are out of balance. Business Model Generation-Alexander Osterwalder 2013-02-01 Business Model Generation is a handbook for visionaries, game changers, and challengers striving to defy outmoded business models and design tomorrow's enterprises. If your organization needs to adapt to harsh new realities, but you don't yet have a strategy that will get you out in front of your competitors, you need Business Model Generation. Co-created by 470 "Business Model Canvas" practitioners from 45 countries, the book features a beautiful, highly visual, 4-color design that takes powerful strategic ideas and tools, and makes them easy to implement in your organization. It explains the most common Business Model patterns, based on concepts from leading business thinkers, and helps you reinterpret them for your own context. You will learn how to systematically understand, design, and implement a game-changing business model--or analyze and renovate an old one. Along the way, you'll understand at a much deeper level your customers, distribution channels, partners, revenue streams, costs, and your core value proposition. Business Model Generation features practical innovation techniques used today by leading consultants and companies worldwide, including 3M, Ericsson, Capgemini, Deloitte, and others. Designed for doers, it is for those ready to abandon outmoded thinking and embrace new models of value creation: for executives, consultants, entrepreneurs, and leaders of all organizations. If you're ready to change the rules, you belong to "the business model generation!" PC Magazine- 1999

Counterfeit Deterrent Features for the Next-Generation Currency Design-National Research Council 1993-02-01 Traditionally, counterfeit deterrent features restricted counterfeiting to only the dedicated craftsman. With the advent of highly sophisticated reprographic systems, this is no longer true. Redesign of U.S. banknotes is necessary in order to incorporate additional features aimed at discouraging counterfeiting using advanced copiers-scanners-printers. This volume evaluates a large number of such features while recommending a comprehensive national strategy for anticipating and responding to counterfeiting threats.

Living and Breathing-Keith M. Nightingale 2015-10-10 The basis of this book is my initial introduction into combat in Vietnam as a 1st Lieutenant with the Vietnamese Ranger infantry. I was the Deputy Senior Advisor to the Vietnamese 52d Ranger Battalion located at Xuan Loc, Long Khanh Province, III Corps, South Vietnam. The book is 95 percent fact and 5 percent speculation regarding a major action the battalion fought in June of 1967 near the Dong Ngai River, War Zone D. The action begins with a Viet Cong (VC) soldier surrendering to U.S. elements in Long Khanh. He related that a VC company was building a base camp near the Dong Ngai along a stream named Suoi Long. The intelligence led the commanding general of the 18th ARVN Division to assign the task of finding and destroying the camp to the 52d Rangers. The Rangers deployed in less than 24 hours from initial notification to a Landing Zone approximately 2½ kilometers from the reported base camp. The Rangers were immediately engaged and ambushed by a full strength Main Force VC battalion backed by an entire VC regiment, which quickly engaged the trapped Rangers that night and early morning. No U.S. support was available other than long range artillery. In desperation, the Ranger battalion commander, the following morning at dawn, ordered a covering assault into the attacking VC by one company to be followed by a withdrawal under pressure of the remainder of the battalion aided by more than 72 tactical airstrikes within a 45 minute period. As I regrouped into our new perimeter at around 10 a.m., I counted a total of 32 Rangers left from an original assault force of 450. During the Christmas period in December 1967, a number of Ranger prisoners held by the VC during this action were released back to our control as a good will gesture. During the debrief of the ex-POWs, they independently related that they were told by their captors that the entire action was planned at the highest level in order to trap and destroy a major South Vietnamese unit. We had no reason to doubt the authenticity of the report and this book is based on the supposition that it is true. The character of Hu, the informant, and his actions are real. The death of Gen Do, COSVN commander, and the effect of the B-52 Arc Light strike with subsequent movement into Laos, is as the former POWs related to us. The portrayal of Do and his planning briefings are conjecture. The remainder of the description is as I saw the action, the players, and the effects. For this action, the 52d Ranger Battalion was awarded a second U.S. Presidential Unit Citation, one of the very few Vietnamese units to garner two of the highest awards the U.S. can proffer upon a military unit, U.S. or foreign.

Organization Theory and Design-Jonathan Murphy 2014 Organizing involves continuous challenges in the face of uncertainty and change. How is globalization impacting organizations? How will new strategies for a turbulent world affect organizational design? In this second edition of Organization Theory and Design, developed for students in the UK, Europe, the Middle East and Africa, respected academics Jonathan Murphy and Hugh Willmott continue to add an international perspective to Richard L. Daft's landmark text. Together they tackle these questions in a comprehensive, clear and accessible study of the subject.

Challenges to Security in Space-Defense Intelligence Agency 2019-03-18 Today, space has become a seamless part of many military and civilian activities. The advantages the United States holds in space capabilities will drive some nations to improve their abilities to access and operate in space. Moreover, some actors will seek counterspace capabilities that target the perceived United States and allied reliance on space, including the ability to use secure satellite communications, precision strike capabilities, and ISR assets. As the number of spacefaring nations grows and as some actors integrate space and counterspace capabilities into military operations, these trends will pose a challenge to U.S. space dominance and present new risks for assets on orbit.

Lenin's Last Struggle-Moshe Lewin 2010-05-18 One of the great political strategists of his era, V. I. Lenin continues to attract historical interest, yet his complex personality eludes full understanding. This new edition of Moshe Lewin's classic political biography, including an afterword by the author, suggests new approaches for studying the Marxist visionary and founder of the Soviet state. Lenin's Last Struggle offers invaluable insights into the rise of the Bolshevik party and the Soviet Union, a saga complicated by complex strategic battles among the leaders of Lenin's generation: leaders whose names are universally known, but whose personalities and motivations are even now not sufficiently understood. Moshe Lewin was a collective farm worker in the USSR and a soldier in the Soviet army. He later became director of studies at the Ecole Pratique des Hautes Etudes in Paris, a fellow of the Kennan Institute, a senior fellow of Columbia University's Russian Institute, and is now emeritus professor of history at The University of Pennsylvania.
