By Bike Around Bando and Chichibu-Mr Tony Gibb 2013-05-10 By Bike around Bando and Chichibu records the progress of a trip along the Bando and Chichibu Buddhist pilgrim trails on a folding bike. The trip was the fourth of such travels with journeys along the O-Shikoku, the Saigoku and the Chugoku pilgrim paths preceding it. The Bando pilgrimage starts in Kamakura and traverses around and through Tokyo, past Mt Tsukuba and ending up on the Boso Peninsula east of Tokyo Bay. The Chichibu is a compact pilgrim path through Saitama Prefecture. Both routes pass through areas of rural Japan where non-Japanese tourists rarely penetrate. The text is supported by many colour photos of the route and maps showing the locations passed.

A Stargazing Program for Beginners-Jamie Carter 2015-11-20 Sets out a simple month-by-month program to reveal all of the night sky's biggest and most beautiful secrets in just one year – and with only a few hours of stargazing each month By investing just an hour a week and $50 in binoculars, it's possible to learn a few simple techniques and quickly gain a real insight into the night sky's ever-changing patterns – and what they tell us about Earth, the seasons and ourselves. Searching more for a learned appreciation of nature and our exact place within the cosmos than academic scientific knowledge, science and travel writer Jamie Carter takes the reader on a 12 month tour of the night sky's incredible annual rhythms that say so much about Earth. During the journey he learns about the celestial mechanics at work in the skies above that are – to the beginner – almost beyond belief. As well as the vital constellations and clusters, and the weird and wonderful nebulas, he searches out "dark sky destinations" across the globe that help increase knowledge and give a new perspective on familiar night sky sights. On the journey he witnesses a solar eclipse and grapples with star-charts, binoculars, smartphone apps, telescopes, spots satellites and attempts basic astro-photography. By year's end, the reader will be able to glance at the night sky from anywhere on the planet and tell what direction he or she is facing, what time it is, where all the planets are and even where the Galactic Center Point is.

Biometric Security and Privacy-Richard Jiang 2016-12-21 This book highlights recent research advances on biometrics using new methods such as deep learning, nonlinear graph embedding, fuzzy approaches, and ensemble learning. To the Scaffold-Carolly Erickson 2004-07-01 One of history's most misunderstood figures, Marie Antoinette represents the extravagance and the decadence of pre-Revolution France. Yet there was an innocence about Antoinette, thrust as a child into the chillingly formal French court. Married to the maladroit, ill-mannered Dauphin, Antoinette found pleasure in costly entertainments and garments. She spent lavishly while her overtaxed and increasingly hostile subjects blamed her for France's plight. In time Antoinette matured into a courageous Queen, and when their enemies finally closed in, Antoinette followed her inept husband to the guillotine in one last act of bravery. In To the Scaffold, Carolly Erickson provides an estimation of a lost Queen that is psychologically acute, richly detailed, and deeply moving.

Loose Leaf for Environmental Science-William P Cunningham, Prof. 2017-01-03 Environmental Science: A Global Concern is a comprehensive presentation of environmental science for non-science majors which emphasizes critical thinking, environmental responsibility, and global awareness. This book is intended for use in a one or two-semester course in environmental science, human ecology, or environmental studies at the college or advanced placement high school level. As practicing scientists and educators, the Cunningham author team brings decades of experience in the classroom, in the practice of science, and in civic engagement. This experience helps give students a clear sense of what environmental science is and why it matters in this exciting, new 13th edition. Environmental Science: A Global Concern provides readers with an up-to-date, introductory global view of essential themes in environmental science. The authors balance evidence of serious environmental challenges with ideas about what we can do to overcome them. An entire chapter focuses on ecological restoration; one of the most important aspects of ecology today. Case studies in most chapters show examples of real progress, and "What Can You Do?" lists give students ideas for contributing to solutions.

Rapid Bioassessment Protocols for Use in Streams and Wadeable Rivers-U. S. Environmental Agency 2015-06-12 In December 1986, U.S. EPA's Assistant Administrator for Water initiated a major study of the Agency's surface water monitoring activities. The resulting report, entitled "Surface Water Monitoring: A Framework for Change", emphasizes the restructuring of existing monitoring programs to better address the Agency's current priorities, e.g., toxics, nonpoint source impacts, and documentation of "environmental results." The study also provides specific recommendations on effecting the necessary changes. Principal among these are: 1. To issue guidance on cost-effective approaches to problem identification and trend assessment. 2. To accelerate the development and application of promising biological monitoring techniques. In response to these recommendations, the Assessment and Watershed Protection Division developed the rapid bioassessment protocols (RBPs) designed to provide basic aquatic life data for water quality management purposes such as problem screening, site ranking, and trend monitoring, and produced a document in 1989. Although none of the protocols were meant to provide the rigor of fully comprehensive studies, each was designed to supply pertinent, cost-effective information when applied in the appropriate context. As the technical guidance for biocriteria has been developed by EPA, states have found these protocols useful as a framework for their monitoring programs. This document was meant to have a selfcorrective process as the science advances; the implementation by state water resource agencies has contributed to refinement of the original RBPs for regional specificity. This revision reflects the advancement in bioassessment methods since 1989 and provides an updated compilation of the most cost-effective and scientifically valid approaches. The primary purpose of this document is to describe a practical technical reference for conducting cost-effective biological assessments of lotic systems. The protocols presented are not necessarily intended to replace those already in use for bioassessment nor is it intended to be used as a rigid protocol without regional modifications. Instead, they provide options for agencies or groups that wish to implement rapid biological assessment and monitoring techniques. This guidance, therefore, is intended to provide basic, cost-effective biological methods for states, tribes, and local agencies that (1) have no established bioassessment procedures, (2) are looking for alternative methodologies, or (3) may need to supplement their existing programs (not supersede other bioassessment approaches that have already been successfully implemented).

A Birder's Guide to Michigan-Allen T. Chartier 2004 Many birders come to Michigan with the intention of adding Kirtland's Warbler to their life lists - but the state should by no means be dismissed as a one-species wonder. Surrounded by four Great Lakes, Michigan boasts 3,000 miles of shoreline. Add the additional habitat afforded by 11,000 interior lakes, 36,000 miles of rivers and streams, and the largest state forest system in the nation and it's not surprising that Michigan's official bird list now stands at 421 species. A Birder's Guide to Michigan describes over 200 sites, with details on each site's birds, best seasons, and driving directions, accompanied by 200-plus maps. Thoroughly researched bar graphs describe the seasonal status and abundance of the state's regularly occurring species, and an annotated list of specialties will guide birders to some of North America's most sought-after species. A bonus is an appendix listing the state's amphibians and reptiles, butterflies and dragonflies, mammals, and orchids.

This new edition of Wainwright's Walking Guide to the Lake District Fells has been comprehensively revised.

Paths, maps, diagrams and route descriptions have been checked and corrected throughout. These revisions have been undertaken by writer and designer Clive Hutchby, author of The Wainwright Companion.
