The Economic Development of Latin America in the Twentieth Century-André A. Hofman 2000 Hofman, a researcher with the Chile-based Economic Commission for Latin America and the Caribbean, uses growth accounting methods and previously unavailable long-term series data to assess the economic performance of the region during the century from a comparative and historical perspective. In particular he compares Latin American economies to those of advanced capitalist economies, to newly industrialized economies, and to Spain and Portugal because of the historical ties. He looks at the reasons for the poor or negative growth during the 1980s and the apparent recovery in the 1990s and at such problems as debt, income inequality, high inflation, cyclical instability, and political and policy instability. Heart Escapades-Chriselle. J. Fernandes 2015-06-15 Heart Escapades meanders through the alleys of human relationships with the intensity and the banality of the times the author once thrived in. It seeks to mark the transcending nature of human beings from a stage of innocent glorification of love to succumbing to the tragedy of heartbreak to finally the possibility and the pain of experiencing what everyone un-admittedly does; morbid conventionality and the pretense that comes along with it. Alternatively, it borders on confusion, wonderment and tries to weave in altruistic motives.

The Middle Class and the Development Process-Andrés Solimano 2008 Stable, higher income democracies often gave both a strong middle class and relatively low levels of inequality. Lower and middle income countries with highly unequal patterns of income distribution and stratified social structures often have a weak middle class, more social conflict and a tendency to populist and/or authoritarian politics. This publication investigates, for a sample of more than 120 countries, some empirical correlations between the size of a middle class and the following set of variables: the level (mean) of per capita income and wealth, the degree if inequality (Gini coefficients) of per capita income and wealth, the level and composition of public expenditure, the share of small and medium size enterprises in employment and output and an indicator of democracy.

Doing Business 2007-World Bank 2006-01-01 "Doing Business 2007 focuses on reforms, identifies top reformers in business regulation, and best practices in how to reform. This volume is the fourth in a series of annual reports investigating global regulations that enhance business activity and those that constrain it. Rhythms of the Afro-Atlantic World-Ifeoma C Nwankwo 2010-11-22 "Collecting essays by fourteen expert contributors into a trans-oceanic celebration and critique, Mamadou Diouf and Ifeoma Kiddoe Nwankwo show how music, dance, and popular culture turn ways of remembering Africa into African ways of remembering. With a mix of Nuyorican, Cuban, Haitian, Kenyan, Senegalese, Trinidadonian, and Brazilian beats, Rhythms of the Afro-Atlantic World proves that the pleasures of poly-rhythm belong to the realm of the discursive as well as the sonic and the kinesthetic." ---Joseph Roach, Sterling Professor of Theater, Yale University "As necessary as it is brilliant, Rhythms of the Afro-Atlantic World dances across, beyond, and within the Black Atlantic Diaspora with the aplomb and skill befitting its editors and contributors." ---Mark Anthony Neal, author of Soul Babies: Black Popular Culture and the Post-Soul Aesthetic Along with linked modes of religiosity, music and dance have long occupied a central position in the ways in which Atlantic peoples have enacted, made sense of, and responded to their encounters with each other. This unique collection of essays connects nations from across the Atlantic---Senegal, Kenya, Trinidad, Cuba, Brazil, and the United States, among others---highlighting contemporary popular, folkloric, and religious music and dance. By tracking the continuous reframing, revision, and erasure of aural, oral, and corporeal traces, the contributors to Rhythms of the Afro-Atlantic World collectively argue that music and dance are the living evidence of a constant (re)composition and (re)mixing of local sounds and gestures. Rhythms of the Afro-Atlantic World distinguishes itself as a collection focusing on the circulation of cultural forms across the Atlantic world, tracing the paths trod by a range of music and dance forms within, across, or beyond the variety of locales that constitute the Atlantic world. The editors and contributors do so, however, without assuming that these paths have been either always in line with national, regional, or continental boundaries or always transnational, transgressive, and perfectly hybrid/syncretic. This collection seeks to reorient the discourse on cultural forms moving in the Atlantic world by being attentive to the specifics of the forms---their specific geneses, the specific uses to which they are put by their creators and consumers, and the specific ways in which they travel or churn in place. Mamadou Diouf is Leitner Family Professor of African Studies, Director of the Institute of African Studies, and Professor of History at Columbia University. Ifeoma Kiddoe Nwankwo is Associate Professor of English at Vanderbilt University. Jacket photograph by Elias Irizarry

The Singapore Success Story-Sree Kumar 2010 Singapore has been touted as a success story in development literature. Various theories have been offered to explain how and why the city-state has succeeded, but none of them have received unanimous approval. This report will look at one of the key elements of the Singapore experience: that of a public-business sector alliance and its wider impact on decision-making and policy implementation within the city-state. It begins with a quick review of Singapore's development over the last forty years and then looks at some of the key "first principles" that animate this success. In particular, it focuses on some of the major agencies responsible for charting Singapore's development trajectory and the role that the business sector has played, and continues to play, in the evolution of strategies for growth.

Ship Construction-John Frederick Kemp 1971-01-01

Argentine Convertibility-Alfredo Eric Calcagno 2001 Latin America has had a great deal of experience with anti-inflationary policies based on different types of exchange-rate 'anchors'. However, the Argentine convertibility as well as dollarization in Ecuador go further in this direction, adopting a very strict monetary rule in the first case and giving up the emission of its own currency in the second. This publication identifies the effects that the convertibility system has had on the Argentine economy and on the functioning of the banking system. It also evaluates the extent to which the Argentine experience is relevant to the Ecuadorian dollarization process.

Long Run Economic Development in Latin America in a Comparative Perspective-André A. Hofman 2001 This paper describes trends in economic growth and its causes in several Latin American countries in the 20th century. This paper stresses that the proximate causes of economic growth are not independent of the ultimate causes of growth. Proximate causes of economic growth are those areas of causality where models and quantification is possible. Ultimate causes of economic growth are much more difficult to quantify. The paper concludes with a description of some of the most important characteristics of economic development in the region.
