String-Math 2016-Amir-Kian Kashani-Poor 2018-06-06 This volume contains the proceedings of the conference String-Math 2016, which was held from June 27-July 2, 2016, at Collège de France, Paris, France. String-Math is an annual conference covering the most significant progress at the interface of string theory and mathematics. The two fields have had a very fruitful dialogue over the last thirty years, with string theory contributing key ideas which have opened entirely new areas of mathematics and modern mathematics providing powerful concepts and tools to deal with the intricacies of string and quantum field theory. The papers in this volume cover topics ranging from supersymmetric quantum field theories, topological strings, and conformal nets to moduli spaces of curves, representations, instantons, and harmonic maps, with applications to spectral theory and to the geometric Langlands program.

Bondi Badlands-Greg Callaghan 2007-09-01 A thrilling and compelling story of a horrific series of crimes and one man's single-minded resolve to bring the killers to justice. With blood stains on the walkway and screams often heard late at night, the long concrete pathway skirting the cliff face between the beaches of Bondi and Tamarama in Sydney's Eastern suburbs was dubbed the Bondi Badlands - and it was here in the late 1980s that a handful of young men were dragged to their deaths after nightfall. The slow road to an overdue justice began when Detective Sergeant Stephen Page read a series of letters from a distraught mother of one of the victims. Painstakingly piecing together the dark mural of the murders, he revived the police investigation into the deaths, code-named Operation Taradale. Told with all the excitement and pace of a crime thriller, this story of the Bondi Badlands murders is unputdownable.
