Cinematography: Theory and Practice-Blain Brown 2016-09-15 The world of cinematography has changed more in the last few years than it has since it has in 1929, when sound recording was introduced. New technology, new tools and new methods have revolutionized the art and craft of telling stories visually. While some aspects of visual language, lighting and color are eternal, shooting methods, workflow and cameras have changed radically. Even experienced film artists have a need to update and review new methods and equipment. These change affect not only the director of photography but also the director, the camera assistants, gaffers, and digital imaging technicians. Cinematography: Theory and Practice covers both the artistry and craftsmanship of cinematography and visual storytelling. Few art forms are as tied to their tools and technology as is cinematography. Take your mastery of these new tools, techniques, and roles to the next level with this cutting-edge roadmap from author and filmmaker Blain Brown. Whether you are a student of filmmaking, just breaking into the business, currently working in the industry and looking to move up to the next level, or an experienced professional who wants to update their knowledge of tools and techniques, this book provides both a basic introduction to these issues as well as more advanced and in-depth coverage of the subject. The companion website features additional material, including lighting demonstrations, basic methods of lighting, using diffusion and other topics. Topics Include: Visual language Visual storytelling Continuity and coverage Cameras and digital sensors Exposure techniques for film and video Color in-depth Understanding digital images Waveform monitors, vectorscopes, and test charts Using linear, gamma, and log encoded video Image control and grading on the set The tools and basics of film lighting ASC-CDL, ACES and other new methods Optics and focus Camera movement Set operations Green screen, high speed and other topics

Elementary Structural Analysis and Design of Buildings-Dominick R. Pilla 2017-09-19 This overview of the analysis and design of buildings runs from basic principles and elementary structural analysis to the selection of structural systems and materials, and on to foundations and retaining structures. It presents a variety of approaches and methodologies while featuring realistic design examples. As a comprehensive guide and desk reference for practicing structural and civil engineers, and for engineering students, it draws on the author's teaching experience at The City College of New York and his work as a design engineer and architect. It is especially useful for those taking the National Council of Examiners for Engineering and Surveying SE exam.

Architecture Oriented Otherwise-David Leatherbarrow 2012-04-17 So much writing about architecture tends to evaluate it on the basis of its intentions: how closely it corresponds to the artistic will of the designer, the technical skills of the builder, or whether it reflects the spirit of the place and time in which it was built, making it not much more than the willful (or even subconscious) assemblage of objects that result from design and construction techniques. Renowned writer and thinker David Leatherbarrow, in this groundbreaking new book, argues for a richer and more profound, but also simpler, way of thinking about architecture, namely on the basis of how it performs. Not simply how it functions, but how it acts, "its manner of existing in the world," including its effects on the observers and inhabitants of a building as well as on the landscape that situates it. In the process, Leatherbarrow transforms our way of discussing buildings from a passive technical or programmatic assessment to a highly active and engaged examination of the lives and performances, intended and otherwise, of buildings.

Motion Picture and Video Lighting-Blain Brown 2012-11-12 Motion Picture and Video Lighting, Second Edition, is your indispensable guide to film and video lighting. Public Policy Making-Larry N. Gerston 2015-05-18 This brief text identifies the issues, resources, actors, and institutions involved in public policy making and traces the dynamics of the policymaking process, including the triggering of issue awareness, the emergence of an issue on the public agenda, the formation of a policy commitment, and the implementation process that translates policy into practice. Throughout the text, which has been revised and updated, Gerston brings his analysis to life with abundant examples from the most recent and emblematic cases of public policy making. At the same time, with well-chosen references, he places policy analysis in the context of political science and deftly orients readers to the classics of public policy studies. Each chapter ends with discussion questions and suggestions for further reading.

Intentionally Inclusive-Marcia Patton 2017 In a society that is increasingly diverse in race and ethnicity, religious background and theological conviction, socioeconomic status and political perspectives, this practical resource explores the broad dimensions of what it means to be a multicultural community of faith and relates the powerful story of how one group chose to pursue intentional inclusion and faithful intercultural ministry through ethnic caucuses and consensus-based decision-making. Grounded in biblical narrative as well as personal experiences, the book offers an authentic and honest look into a real-life experiment in inclusive ministry. Includes questions for personal reflection and ideas for small-group implementation.

The A to Z of Spanish Cinema-Alberto Mira Nouselles 2010 Spanish cinema is emerging as one of the most exciting, fascinating, and special cinemas in the world. Not only are others viewing Spanish films, but they are adopting Spanish producers and Spanish actors as their own. While Spanish cinema has been maturing for a long time and has been producing excellent directors, actors, and films for decades-including during the dark times of the Franco regime-only now is it winning numerous fans not only at home but also abroad. And with directors like Pedro Almodovar, actors and actresses like Javier Bardem and Penelope Cruz, and films such as Abre los ojos and Alatriste to build upon, the outlook for Spanish Cinema appears brighter than ever. The A to Z of Spanish Cinema provides a better understanding of the role Spanish cinema has played in film history through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on producers, directors, film companies, actors, and films."

Data Modeling Master Class Training Manual 6th Edition-Steve Hoberman 2015-09-01 This is the 6th edition of the training manual for the Data Modeling Master Class that Steve Hoberman teaches onsite and through public classes. This text can be purchased prior to attending the Master Class, the latest course schedule and detailed description can be found on Steve Hoberman's website, stevehoberman.com. The Master Class is a complete data modeling course, containing three days of practical techniques for producing conceptual, logical, and physical relational and dimensional and NoSQL data models. After learning the styles and steps in capturing and modeling requirements, you will apply a best practices approach to building and validating data models through the Data Model Scorecard®. You will know not just how to build a data model, but how to build a data model well. Two case studies and many exercises reinforce the material and will enable you to apply these techniques in your current projects. TOP 10 OBJECTIVES: Explain data modeling components and identify them on your projects by following a question-driven approach; Demonstrate reading a data model of any size and complexity with the same confidence as reading a book; Validate any data model with key settings (scope, abstraction, timeframe, function, and format) as well as through the Data Model Scorecard®; Apply requirements elicitation techniques including interviewing, artifact analysis, prototyping, and job shadowing; Build relational and dimensional conceptual and logical data models, and know the tradeoffs on the physical side for both RDBMS and NoSQL solutions; Practice finding structural soundness issues and standards violations; Recognize when to use abstraction and where patterns and industry data models can give us a great head start; Use a series of templates for capturing and validating requirements, and for data profiling; Evaluate definitions for clarity, completeness, and correctness; Leverage the Data Vault and enterprise data model for a successful enterprise architecture.
