Night-Elie Wiesel 2012-05-03 Born into a Jewish ghetto in Hungary, as a child, Elie Wiesel was sent to the Nazi concentration camps at Auschwitz and Buchenwald. This is his account of that atrocity: the ever-increasing horrors he endured, the loss of his family and his struggle to survive in a world that stripped him of humanity, dignity and faith. Describing in simple terms the tragic murder of a people from a survivor's perspective, Night is among the most personal, intimate and poignant of all accounts of the Holocaust. A compelling consideration of the darkest side of human nature and the enduring power of hope, it remains one of the most important works of the twentieth century. New translation by Marion Wiesel, with a new introduction by Elie Wiesel.

Students at the Center-Bena Kallick 2017-01-27 Educators' most important work is to help students develop the intellectual and social strength of character necessary to live well in the world. The way to do this, argue authors Bena Kallick and Allison Zmuda, is to increase the say students have in their own learning and prepare them to navigate complexities they face both inside and beyond school. This means rethinking traditional teacher and student roles and re-examining goal setting, lesson planning, assessment, and feedback practices. It means establishing classrooms that prioritize ■ Voice—Involving students in "the what" and "the how" of learning and equipping them to be stewards of their own education. ■ Co-creation—Guiding students to identify the challenges and concepts they want to explore

and outline the actions they will take. ■ Social construction—Having students work with others to theorize, pursue common goals, build products, and generate performances. ■ Self-discovery—Teaching students to reflect on their own developing skills and knowledge so that they will acquire new understandings of themselves and how they learn. Based on their exciting work in the field, Kallick and Zmuda map out a transformative model of personalization that puts students at the center and asks them to employ the set of dispositions for engagement and learning known as the Habits of Mind. They share the perspectives of educators engaged in this work; highlight the habits that empower students to pursue aspirations, investigate problems, design solutions, chase curiosities, and create performances; and provide tools and recommendations for adjusting classroom practices to facilitate learning that is self-directed, dynamic, sometimes messy, and always meaningful.

The Parable of the Prodigal Son (Luke 15:11-32) has been preached in every pulpit and is known by many who read and cherish the Bible. It's so special because it presents in clear and inspiring terms our struggle with sin, the need of our hearts to be accepted and pursued, and the Father's inexhaustible mercy and love. But most Christians would say that they've heard every sermon possible from this gem of scripture. That it has lost its luster. In The Tale of Two Sons, one of America's most beloved pastors restores the brilliance of this passage for the layperson, giving engrossing historical background and a surprise ending readers may have never known.

Better Than Carrots or Sticks-Dominique Smith 2015-08-17 Classroom management is traditionally a matter of encouraging good behavior and discouraging bad by doling out rewards and punishments. But studies show that when educators empower students to address and correct misbehavior among themselves, positive results are longer lasting and more wide reaching. In Better Than Carrots or Sticks, longtime educators and best-selling authors Dominique Smith, Douglas Fisher, and Nancy Frey provide a practical blueprint for creating a cooperative and respectful classroom climate in which students and teachers work through behavioral issues together. After a comprehensive overview of the roots of the restorative practices movement in schools, the authors explain how to * Establish procedures and expectations for student behavior that encourage the development of positive interpersonal skills; * Develop a nonconfrontational rapport with even the most challenging students; and * Implement conflict resolution strategies that prioritize relationship building and mutual understanding over finger-pointing and retribution. Rewards and punishments may help to maintain order in the short term, but they're at best superficially effective and at worst counterproductive. This book will prepare teachers at all levels to ensure that their classrooms are welcoming, enriching, and constructive environments built on collective respect and focused on student achievement.
