NEW! Coverage of application of the nursing process is streamlined to emphasize collaborative problems, goal setting, interventions, and evaluation. Chemotherapy and Biotherapy Guidelines and Recommendations for Practice-Martha Polovich 2014 Order your copy of the fourth edition of the best-selling resource used by more than 101,000 healthcare professionals since 2009 and keep up-to-date on the latest chemotherapy, biotherapy, and targeted agents. This new edition of the Chemotherapy and Biotherapy Guidelines and Recommendations for Practice has been revised and updated to reflect the current procedures and practices in your specialty. You'll find that this latest edition incorporates a number of significant changes. To help you find the content and information that you need quickly and easily, the text has been reorganized and is now divided into 11 chapters ranging from an overview of cancer and cancer treatment and principles of antineoplastic therapy to post-treatment care and competencies in chemotherapy administration. Patient education information has also been expanded in the new edition to emphasize importance of education in patient care. And, finally, look for new information on chemotherapy sequencing and updates on the nursing management of treatment side effects.As with previous editions, the guidelines strives to bring you the latest details on approved drugs, standards of practice, and available evidence. Make sure to update your library with this latest edition of one of the most trusted and widely used resources for practicing oncology nurses. Cancer Therapies-Margaret Barton-Barke 2006 Covers all traditional and cutting-edge therapies used to manage cancer. The book addresses chemotherapy, biotherapy, molecularly targeted therapies, transplants, and therapy in the non-malignant condition. It includes a complete list of chemotherapy agents, listed alphabetically for easy reference, as well as a Standardized Nursing Care Plans section offering practical guidance on patient care planning. Pediatric Hematology-Oncology in Countries with Limited Resources-Daniela Cristina Stefan 2013-11-18 Typically, manuals of pediatric hematology-oncology are written by specialists from high-income countries, and usually target an audience with a sub-specialist level of training, often assisted by cutting-edge diagnostic and treatment facilities. However, approximately 80% of new cases of cancer in children appear in mid- and low-income countries. Almost invariably, general practitioners or general pediatricians without special training in oncology will look after children with malignancies who enter the health care system in these countries. The diagnostic facilities are usually limited, as are the treatment options. The survival figures in these conditions are somewhere below 20%, while in high-income countries they are in the range of 80% for many childhood cancers. Pediatric Hematology-Oncology in Countries with Limited Resources is the only book of its kind to provide specific guidance applicable to limited resource settings and builds up from the foundation of general practitioner or general pediatrician competence. Written and edited by leaders in the field, this manual educates physicians on the essential components of the discipline, filtered through the experience of specialists from developing countries, with immediate applicability in the specific healthcare environment in these countries. Chemotherapy and Immunotherapy Guidelines and Recommendations for Practice-MiKaela M. Olsen 2018-10-15 Chemotherapy and Immunotherapy Guidelines and Recommendations for Practice features 26 chapters examining multiple categories of cancer-care agents, including chemotherapy, immunotherapy, molecularly targeted agents, and hormone therapy. Obstetrics and Gynecology-Michael Belden 2010 Teaching you to think like an experienced clinician, this title features a case-based organization that hones in on essential knowledge in obstetrics and gynecology. Competence Assessment Tools for Health-System Pharmacists-Lee B. Murdaugh 2015-01-01 Since its original publication, Competence Assessment Tools for Health-System Pharmacies has continued to meet the changing needs of pharmacy directors and their staff. Designed as a complete human resource competence assessment program, this benchmark resource ensures pharmacy compliance with the competence assessment standards of The Joint Commission™, other accrediting organizations, and the CMS Conditions of Participation. Newly updated and expanded, Competence Assessment Tools for Health-System Pharmacies provides practical tools to assess and document an employee's ability to perform assigned duties and meet the human resource requirements of CMS, The Joint Commission, and other accrediting organizations. Save time and increase efficiency with this essential tool that supplements and reinforces staff knowledge in key competency areas. New to the Fifth Edition: - Enhanced companion website that allows you to easily assign many of the forms included in the book for your own practice including the job descriptions and orientation record. - Updated resources for customizing job descriptions, including job description, competence assessment summary, and performance evaluation templates for a Pharmacy Purchasing Technician. - Inclusion of a study guide for the emergency management chapter. - New competencies on Medication Dosing in Patients with Hepatic Dysfunction, Pharmacokinetics: Aminoglycosides; Parenteral Anticoagulant Therapy; Oral Anticoagulant Therapy; and Compounding Non-Sterile Preparations - A new set of four competencies specifically devoted to pharmacy technicians. Also included, for the first time, is a crosswalk of all competencies which indicates which competencies are for use only with pharmacists, only with pharmacy technicians, or appropriate for both. - A new chapter on Educating the Pharmacy Staff. - New test questions in many chapters including use of a patient case report format for tests in the clinically-oriented chapters.

Study Guide for the Core Curriculum for Oncology Nursing-Suzanne M. Mahon 2005 Published in collaboration with the ONS, this Study Guide is a must-have for those who are taking the certification exam. The chapters parallel those presented in the Core Curriculum for Oncology Nursing, 4e. The number of questions in each chapter will correspond with the percentage of questions on that particular topic included in the certification exam. Answers and rationales for correct and incorrect responses are listed at the end of each chapter. The book also includes an updated bibliography for each subject. Tele-oncology-Giovanna Gatti 2015-06-09 This book explains how telemedicine can offer solutions capable of improving the care and survival rates of cancer patients and can also help patients to live a normal life in spite of their condition. Different fields of application – community, hospital and home based – are examined, and detailed attention is paid to the use of tele-oncology in rural/extreme rural settings and in developing countries. The impact of new technologies and the opportunities afforded by the social web are both discussed. The concluding chapters consider eLearning in relation to cancer care and assess the scope for education to improve prevention. No medical condition can shatter people's lives as cancer does today and the need to develop strategies to reduce the disease burden and improve quality of life is paramount. Readers will find this new volume in Springer's TELe Health series to be a rich source of information on the important contribution that can be made by telemedicine in achieving these goals.

The Cancer Chemotherapy Handbook-David S. Fischer 2003 The sixth edition of this pocket-sized resource for clinicians contains a new chapter on the safety and prevention of chemotherapy medication errors. Except for pain management and ethics, which are unchanged, the remaining chapters have been revised to reflect current information. Much of the volume features descriptions of chemotherapy medications (100 new ones have been added), with description of their pharmacokinetics, dose, administration, toxicity, storage and stability, preparation, incompatibilities, and selected bibliography. Educating Nurses-Patricia Benner 2009-12-09 Praise for Educating Nurses "This book represents a call to arms, a call for nursing educators and programs to step up in our preparation of nurses. This book will incite controversy, wonderful debate, and dialogue among nurses and others. It is a must-read for every nurse educator and for every nurse that yearns for nursing to acknowledge and reach for the real difference that nursing can make in safety and quality in health care." —Beverly Malone, chief executive officer, National League for Nursing "This book describes specific steps that will enable a new system to improve both nursing formation and patient care. It provides a timely and essential element to health care reform." —David C. Leach, former executive director, Accreditation Council for Graduate Medical Education "The ideas about caregiving developed here make a profoundly philosophical and intellectually innovative contribution to medicine as well as all healing professions, and to anyone concerned with ethics. This groundbreaking work is both paradigm-shifting and delightful to read." —Jodi Halpern, author, From Detached Concern to Empathy: Humanizing Medical Practice "This book is a landmark work in professional education! It is a must-read for all practicing and aspiring nurse educators, administrators, policy makers, and, yes, nursing students." —Christine A. Tanner, senior editor, Journal of Nursing Education "This work has profound implications for nurse executives and frontline managers." —Eloise Balasco Cathcart, coordinator, Graduate Program in Nursing Administration, New York University

Chemotherapy of Cancer-Stephen K. Carter 1987 Occupational Competency Examination in Dental Assisting-Jack Rudman 1979 Study Guide for the Core Curriculum for Oncology Nursing-ONS 2015-02-25 PART SIX:Á ONCOLOGIC EMERGENCIES -- 40.Á Metabolic Emergencies -- 41.Á Structural Emergencies -- PART SEVEN:Á SURVIVORSHIP -- 42.Á Survivorship -- PART EIGHT:Á PALLIATIVE AND END-OF-LIFE CARE -- 43.Á Palliative and End-of-Life Care -- PART NINE:Á PROFESSIONAL PRACTICE -- 44.Á Evidence-Based Practice and Standards of Oncology Nursing -- 45.Á Education Process -- 46.Á Legal Issues -- 47.Á Ethical Issues -- 48.Á Professional Issues -- Answer Key Delivering High-Quality Cancer Care-Committee on Improving the Quality of Cancer Care: Addressing the Challenges of an Aging Population 2014-01-10 In the United States, approximately 14 million people have had cancer and more than 1.6 million new cases are diagnosed each year. However, more than a decade after the Institute of Medicine (IOM) first studied the quality of cancer care, the barriers to achieving excellent care for all cancer patients remain daunting. Care often is not patient-centered, many patients do not receive palliative care to manage their symptoms and side effects from treatment, and decisions about care often are not based on the latest scientific evidence. The cost of cancer care also is rising faster than many sectors of medicine—having increased to \$125 billion in 2010 from \$72 billion in 2004—and is projected to reach \$173 billion by 2020. Rising costs are making cancer care less affordable for patients and their families and are creating disparities in patients' access to high-quality cancer care. There also are growing shortages of health professionals skilled in providing cancer care, and the number of adults age 65 and older—the group most susceptible to cancer—is expected to double by 2030, contributing to a 45 percent increase in the number of people developing cancer. The current care delivery system is poorly prepared to address the care needs of this population, which are complex due to altered physiology, functional and cognitive impairment, multiple coexisting diseases, increased side effects from treatment, and greater need for social support. Delivering High-Quality Cancer Care: Charting a New Course for a System in Crisis presents a conceptual framework for improving the quality of cancer care. This study proposes improvements to six interconnected components of care: (1) engaged patients; (2) an adequately staffed, trained, and coordinated workforce; (3) evidence-based care; (4) learning health care information technology (IT); (5) translation of evidence into clinical practice, quality measurement and performance improvement; and (6) accessible and affordable care. This report recommends changes across the board in these areas to improve the quality of care. Delivering High-Quality Cancer Care: Charting a New Course for a System in Crisis provides information for cancer care teams, patients and their families, researchers, quality metrics developers, and payers, as well as HHS, other federal agencies, and industry to reevaluate their current roles and responsibilities in cancer care and work together to develop a higher quality care delivery system. By working toward this shared goal, the cancer care community can improve the quality of life and outcomes for people facing a cancer diagnosis.

Competency-Based Assessments in Mental Health Practice-Susan W. Gray 2011-02-25 "Competency-Based Assessments in Mental Health Practice should be required reading for all clinical practitioners and students. Author Susan W. Gray provides a competency-based assessment model that moves away from looking at mental illness as a "disease" to capturing people's strengths and the uniqueness of their experience with mental illness." —Alex Gitterma Zachs Professor and Director of PhD Program "Competency-Based Assessment in Mental Health Practice not only describes the rather cumbersome DSM-IV-TR® in a manner that graduate students and clinicians can easily understand and apply, but it also presents a competency-based type of clinical assessment that most effectively integrates the social work practice orientation that acknowledges, appreciates, and nurtures client strengths, resilience, and client ability for empowerment." —Agathi Glezacos, PhD, LCSW School of Social Work California State University, Long Beach A competency-based assessment model integrating DSM classifications for a complete, strengths-based diagnosis Competency-Based Assessments in Mental Health Practice introduces a unique, competency-based assessment that presents a brief overview of the major mental disorders that practitioners will likely encounter in their work with clients, followed by a series of case studies and practical applications. This book provides valuable guidance for clinicians to make assessments grounded in client strengths and possibilities for a more therapeutically complete picture of every client's "story." Organized around selected diagnostic categories from the DSM-IV-TR, this hands-on guide offers a multidimensional look at the many factors that play a role in a client's life. Its holistic approach to the assessment process considers each client's unique experience with mental illness, through a concurrent evaluation of strengths and pathology, in order to set the stage for realistic optimism about the potential for change.

Establishing Effective Patient Navigation Programs in Oncology-National Academies of Sciences, Engineering, and Medicine 2018-08-13 Delivering high-quality cancer care to all patients presents numerous challenges, including difficulties with care coordination and access. Patient navigation is a community-based service delivery intervention designed to promote access to timely diagnosis and treatment of cancer and other chronic diseases by eliminating barriers to care, and has often been proposed and implemented to address these challenges. However, unresolved questions include where patient navigation programs should be deployed, and which patients should be prioritized to receive navigation services when resources are limited. To address these issues and facilitate discussion on how to improve navigation services for patients with cancer, the National Cancer Policy Forum of the National Academies of Sciences, Engineering, and Medicine held a workshop on November 13 and 14, 2017. At this workshop, a broad range of experts and stakeholders, including clinicians, navigators, researchers, and patients, explored which patients need navigation and who should serve as navigators, and the benefits of navigation and current gaps in the evidence base.

Ovarian Cancers-National Academies of Sciences, Engineering, and Medicine 2016-05-25 In an era of promising advances in cancer research, there are considerable and even alarming gaps in the fundamental knowledge and understanding of ovarian cancer. Researchers now know that ovarian cancer is not a single disease-several distinct subtypes exist with different origins, risk factors, genetic mutations, biological behaviors, and prognoses. However, persistent questions have impeded progress toward improving the prevention, early detection, treatment, and management of ovarian cancers. Failure to significantly improve morbidity and mortality during the past several decades is likely due to several factors, including the lack of research being performed by specific disease subtype, lack of definitive knowledge of the cell of origin and disease progression, and incomplete understanding of genetic and non-genetic risk factors. Ovarian Cancers examines the state of the science in ovarian cancer research, identifies key gaps in the evidence base and the challenges to addressing those gaps, considers opportunities for advancing ovarian cancer research, and examines avenues for translation and dissemination of new findings and communication of new information to patients and others. This study makes recommendations for public- and private-sector efforts that could facilitate progress in reducing the incidence of morbidity and mortality from ovarian cancers.

The Royal Marsden Manual of Clinical Nursing Procedures-Lisa Dougherty 2015-05-06 'A Fantastic Book. Every Nurse should own one.' 'Amazing must have BIBLE for every student nurse and nurse).' 'The best investment I've ever made and will be useful for many, many years.' From Cancer Patient to Cancer Survivor-National Research Council 2005-12-01 With the risk of more than one in three getting cancer during a lifetime, each of us is likely to experience cancer, or know someone who has survived cancer. Although some cancer survivors recover with a renewed sense of life and purpose, what has often been ignored is the toll taken by cancer and its treatmentâ€on health, functioning, sense of security, and well-being. Long lasting effects of treatment may be apparent shortly after its completion or arise years later. The transition from active treatment to post-treatment care is critical to long-term health. From Cancer Patient to Cancer Survivor focuses on survivors of adult cancer during the phase of care that follows primary treatment. The book raises awareness of the medical, functional, and psychosocial consequences of cancer and its treatment. It defines quality health care for cancer survivors and identifies strategies to achieve it. The book also recommends improvements in the quality of life of cancer survivors through policies that ensure their access to psychosocial services, fair employment practices, and health insurance. This book will be of particular interest to cancer patients and their advocates, health care providers and their leadership, health insurers, employers, research sponsors, and the public and their elected representatives.
