Childbirth in Republican China-Tina Phillips Johnson 2011-09-16 "Childbirth is a window into the shifting cultural and political landscape of a particular place and time. Much can be learned about a culture by examining its treatment of women and children. More importantly, reproduction encompasses both a moral and a social imperative; the continuation of a society rests on childbirth. In imperial China, securing the continuation of the family line was the utmost fillal act, with the family as the basic organizing unit of society and the state. Yi-li Wu noted that "childbirth was the warp on which the fabric of society was woven" in imperial China. I argue that childbirth remains so, and alterations in how childbirth is viewed and conducted merely point to larger ideological visions of social and political structures. Li Xiaojiang asserted in the preface to her anthropological study of modernization and traditional childbirth customs in rural China in the 1990s that "because of its close relationship with levels of health and disease, birth is one of the keys to understanding and constructing women's lives, but our field of vision has been blind to it." Opening one's eyes to the rich material surrounding childbirth, the researcher is made aware that legislation regarding reproduction and birth, maternal and child health, and the general treatment of women and children illuminate the relative value or disregard a people carry for those women and children."--Publisher's description.

Birthing Models on the Human Rights Frontier-Betty-Anne Daviss 2020-12-29 This book addresses the politics of global health and social justice issues around birth, focusing on dynamic communities that have chosen to speak truth to power by reforming dysfunctional health care systems or creating new ones outside the box. The chapters present models of childbirth at extreme ends of a spectrum—from the conflict zones and disaster areas of Afghanistan, Israel, Palestine, and Indonesia, to high-risk tertiary care settings in China, Canada, Australia, and Turkey. Debunking notions about best care, the volume illustrates how human rights in health care are on a collision course with global capitalism and offers a number of specific solutions to this ever-increasing problem. This volume will be a valuable resource for scholars and students in anthropology, sociology, health, and midwifery, as well as for practitioners, policy makers, and organizations focused on birth or on social activism in any arena.

Ten Lessons in Modern Chinese History-Zheng Yangwen 2018-04-25 This book is a timely and solid portrait of modern China from the First Opium War to the Xi Jinping era. Unlike the handful of existing textbooks that only provide narratives, this textbook fashions a new and practical way to study modern China. Written exclusively for university students, A-level or high school teachers and students, it uses primary sources to tell the story of China and introduces them to existing scholarship and academic debate so they can conduct independent research for their essays and dissertations. This book will be required reading for students who embark on the study of Chinese history, politics, economics, diaspora, sociology, literature, cultural, urban and women's studies. It would be essential reading to journalists, NGO workers, diplomats, government officials, businessmen and travellers.

The People's Health-Xun Zhou 2020-08-20 In 1949, the Communist Party of China pledged that its approach to health care would differ markedly from that of the former Nationalist government and the "imperialist" West. For the next thirty years, under Mao's leadership, the People's Republic of China made improving the health of the entire population a central pillar of its policy. International health stakeholders came to view it as a statistical outlier in its ability to achieve better health outcomes with limited resources. The People's Health is the first systematic study of health care and medicine in Maoist China. Drawing on hundreds of files from rarely seen party archives and oral testimonies from experts, local cadres, and villagers across China, Zhou Xun shifts her historian's gaze away from official statistics towards the records of local institutions and personal memories that reflect and give voice to lived experiences. Through the everyday interactions of policy makers, national and local administration, and communities, Zhou illustrates the dynamic relationship between politics and health, and between individual lives and the political system. Presenting case studies of internationally acclaimed public health initiatives in the PRC - the anti-schistosomiasis campaign and the Barefoot Doctor program - this book offers the first thorough, politically neutral analysis of their background, execution, and national and international repercussions. Opening a unique window into the lives - and health care - of individuals living under communism, The People's Health examines the links between local interest, cultural sensibilities, resources, and abilities, exploring the often unforeseeable consequences of political planning and social engineering.

The Birth of Chinese Feminism-Lydia H. Liu 2013-03-26 He-Yin Zhen (ca. 1884-1920?) was a theorist who figured centrally in the birth of Chinese feminism. Unlike her contemporaries, she was concerned less with China's fate as a nation and more with the relationship among patriarchy, imperialism, capitalism, and gender subjugation as global historical problems. This volume, the first translation and study of He-Yin's work in English, critically reconstructs early twentieth-century Chinese feminist thought in a transnational context by juxtaposing He-Yin Zhen's writing against works by two better-known male interlocutors of her time. The editors begin with a detailed analysis of He-Yin Zhen's life and thought. They then present annotated translations of six of her major essays, as well as two foundational tracts by her male contemporaries, Jin Tianhe (1874-1947) and Liang Qichao (1873-1929), to which He-Yin's work responds and with which it engages. Jin, a poet and educator, and Liang, a philosopher and journalist, understood feminism as a paternalistic cause that liberals like themselves should defend. He-Yin presents an alternative conception that draws upon anarchism and other radical trends. Ahead of her time, He-Yin Zhen complicates conventional accounts of feminism and China's history, offering original perspectives on sex, gender, labor, and power that remain relevant today.

Folk Art and Modern Culture in Republican China-Felicity Lufkin 2016-01-21 Folk art is now widely recognized as an integral part of the modern Chinese cultural heritage, but in the early twentieth century, awareness of folk art as a distinct category in the visual arts was new. Internationally, intellectuals in different countries used folk arts to affirm national identity and cultural continuity in the midst of the changes of the modern era. In China, artists, critics and educators likewise saw folk art as a potentially valuable resource: perhaps it could be a fresh source of cultural inspiration and energy, representing the authentic voice of the people in contrast to what could be seen as the limited and elitist classical tradition. At the same time, many Chinese intellectuals also saw folk art as a problem: they believed that folk art, as it was, promoted superstitious and backward ideas that were incompatible with modernization and progress. In either case, folk art was too important to be left in the hands of the folk: educated artists and researchers felt a responsibility intervene, to reform folk art and create new popular art forms that would better serve the needs of the modern nation. In the early 1930s, folk art began to figure in the debates on social role of art and artists that were waged in the pages of the Chinese press, the first major exhibition of folk art was held in Hangzhou, and the new print movement claimed the print as a popular artistic medium while, for the most part, declaring its distance from contemporary folk printmaking practices. During the war against Japan, from 1937 to 1945, educated artists deployed imagery and styles drawn from folk art in morale-boosting propaganda images, but worried that this work fell short of true artistic accomplishment and pandering to outmoded tastes. The questions raised in interaction with folk art during this pivotal period, questions about heritage, about the social position of art, and the exercise of cultural authority continue to resonate into the present day.

Reproducing Women-Yi-Li Wu 2010-08-11 This innovative book uses the lens of cultural history to examine the development of medicine in Qing dynasty China. Focusing on the specialty of "medicine for women"(fuke), Yi-Li Wu explores the material and ideological issues associated with childbearing in the late imperial period. She draws on a rich array of medical writings that circulated in seventeenth- to nineteenth-century China to analyze the points of convergence and contention that shaped people's views of women's reproductive diseases. These points of contention touched on fundamental issues: How different were women's bodies from men's? What drugs were best for promoting conception and preventing miscarriage? Was childbirth inherently dangerous? And who was best qualified to judge? Wu shows that late imperial medicine approached these questions with a new, positive perspective.

Eleven Hours-Pamela Erens 2016-05-03 An NPR Best Book of 2016 A New Yorker Book We Loved in 2016 Named to Kirkus Reviews' Best Books of 2016 The Millions Most Anticipated Book of 2016 Flavorwire Most Anticipated Book From the critically acclaimed author of The Virgins, Eleven Hours is an intimate exploration of the physical and mental challenges of childbirth, told with unremitting suspense and astonishing beauty. Lore arrives at the hospital alone—no husband, no partner, no friends. Her birth plan is explicit: she wants no fetal monitor, no IV, no epidural. Franckline, a nurse in the maternity ward—herself on the verge of showing—is patient with the young woman. She knows what it's like to worry that something might go wrong, and she understands the distress when it does. She knows as well as anyone the severe challenge of childbirth, what it does to the mind and the body. Eleven Hours is the story of two soon-to-be mothers who, in the midst of a difficult labor, are forced to reckon with their pasts and re-create their futures. Lore must disentangle herself from a love triangle; Franckline must move beyond past traumas to accept the life that's waiting for her. Pamela Erens moves seamlessly between their bregudging partnership and the memories evoked by so intense an experience: for Lore, of the father of her child and her former best friend; for Franckline, of the family in Haiti from which she's exiled. At turns urgent and lyrical, Erens's novel is a visceral portrait of childbirth, and a vivid rendering of the way we approach motherhood—with fear and joy, anguish and awe.

Intimate Communities-Nicole Elizabeth Barnes 2018-10-09 At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. When China's War of Resistance against Japan began in July 1937, it sparked an immediate health crisis throughout China. In the end, China not only survived the war but emerged from the trauma with a curious strength. Intimate Communities argues that women who worked as military and civilian nurses, doctors, and midwives during this turbulent period built the national community, one relationship at a time. In a country with a majority illiterate, agricultural population that could not relate to urban elites' conceptualization of nationalism, these women used their work of healing to create emotional bonds with soldiers and civilians from across the country that transcended the divides of social class, region, gender, and language. Daily Life for the Common People of China, 1850 to 1950-Ronald Suleski 2018-10-11 In this book Ronald Suleski introduces a new category of source material, chaoben [], for understanding the lives of China's semi-literate masses before 1950. It links the documents now flooding the antiques markets in China, with the hopes and fears of China's people at the end of the pre-modern era.

Mass Vaccination-Mary Augusta Brazelton 2019-10-15 While the eradication of smallpox has long been documented, not many know the Chinese roots of this historic achievement. In this revelatory study, Mary Augusta Brazelton examines the PRC's public health campaigns of the 1950s to explain just how China managed to inoculate almost six hundred million people against this and other deadly diseases. Mass Vaccination tells the story of the people, materials, and systems that built these campaigns, exposing how, by improving the nation's health, the Chinese Communist Party quickly asserted itself in the daily lives of all citizens. This crusade had deep roots in the Republic of China during the Second Sino-Japanese War, when researchers in China's southwest struggled to immunize as many people as possible, both in urban and rural areas. But its legacy was profound, providing a means for the state to develop new forms of control and of engagement. Brazelton considers the implications of vaccination policies for national governance, from rural health care to Cold War-era programs of medical diplomacy. By embedding Chinese medical history within international currents, she highlights how and why China became an exemplar of primary health care at a crucial moment in global health policy.

Ladies Can't Climb Ladders-Jane Robinson 2020-01-23 \_\_\_\_\_ It is a myth that the First World War liberated women. The Sex Disqualification (Removal) Act of 1919 was one of the most significant pieces of legislation in modern Britain. It should have marked a social revolution, opening the doors of the traditional professions to women who had worked so hard during the War, and welcoming them inside as equals. But what really happened? Ladies Can't Climb Ladders focuses on the lives of pioneering women forging careers in the fields of medicine, law, academia, architecture, engineering and the church. In her startling study into the public and private worlds of these unsung heroines, Jane Robinson sheds light on their desires and ambitions, and how family and society responded to this emerging class of working women. This book is written in their honour. Their shared vision, sacrifice and spirited perseverance began a process we have yet to finish. Their experiences raise live questions about equal opportunity, the gender pay gap, the work/life balance - and whether it is possible for women to have it all.

To Live-Yu Hua 2007-12-18 From the author of Brothers and China in Ten Words: this celebrated contemporary classic of Chinese literature was also adapted for film by Zhang Yimou. This searing novel, originally banned in China but later named one of that nation's most influential books, portrays one man's transformation from the spoiled son of a landlord to a kindhearted peasant. After squandering his family's fortune in gambling dens and brothels, the young, deeply repentant Fugui settles down to do the honest work of a farmer. Forced by the Nationalist Army to leave behind his family, he witnesses the horrors and privations of the Civil War, only to return years later to face a string of hardships brought on by the ravages of the Cultural Revolution. Left with an ox as the companion of his final years, Fugui stands as a model of gritty authenticity, buoyed by his appreciation for life in this narrative of humbling power.

Cicero-Antonio Everitt 2001 A lively portrait of the quintessential Roman politician describes the life and times of the ancient statesman, based on the witty and candid letters that Cicero wrote to his friend Atticus in which he described the events and personalities that shaped the final days of Republican Rome. 25,000 first printing. Like a Mother-Angela Garbes 2018-05-29 A candid, feminist, and personal deep dive into the science and culture of pregnancy and motherhood Like most first-time mothers, Angela Garbes was filled with questions when she became pregnant. What exactly is a placenta and how does it function? How does a body go into labor? Why is breast best? Is wine totally off-limits? But as she soon discovered, it's not easy to find satisfying answers. Your obstetrician will cautiously quote statistics; online sources will scare you with conflicting and often inaccurate data; and even the most trusted books will offer information with a heavy dose of judgment. To educate herself, the food and culture writer embarked on an intensive journey of exploration, diving into the scientific mysteries and cultural attitudes that surround motherhood to find answers to questions that had only previously been given in the form of advice about what women ought to do—rather than allowing them the freedom to choose the right path for themselves. In Like a Mother, Garbes offers a rigorously researched and compelling look at the physiology, biology, and psychology of pregnancy and motherhood, informed by in-depth reportage and personal experience. With the curiosity of a journalist, the perspective of a feminist, and the intimacy and urgency of a mother, she explores the emerging science behind the pressing questions women have about everything from miscarriage to complicated labors to postpartum changes. The result is a visceral, full-frontal look at what's really happening during those nine life-altering months, and why women deserve access to better care, support, and information. Infused with humor and born out of awe, appreciation, and understanding of the female body and its strength, Like a Mother debunks common myths and dated assumptions, offering guidance and camaraderie to women navigating one of the biggest and most profound changes in their lives.

Reproduction and Its Discontents in Mexico-Nora E. Jaffary 2016-10-13 In this history of childbirth and contraception in Mexico, Nora E. Jaffary chronicles colonial and nineteenth-century beliefs and practices surrounding conception, pregnancy and its prevention, and birth. Tracking Mexico's transition from colony to nation, Jaffary demonstrates the central role of reproduction in ideas about female sexuality and virtue, the development of modern Mexico, and the growth of modern medicine in the Latin American context. The story encompasses networks of people in all parts of society, from state and medical authorities to mothers and midwives, husbands and lovers, employers and neighbors. Jaffary focuses on key topics including virginity, conception, contraception and abortion, infanticide, "monstrous" births, and obstetrical medicine. Her approach yields surprising insights into the emergence of modernity in Mexico. Over the course of the nineteenth century, for example, expectations of idealized womanhood and female sexual virtue gained rather than lost importance. In addition, rather than being obliterated by European medical practice, features of pre-Columbian obstetrical knowledge, especially of abortifacients, circulated among the Mexican public throughout the period under study. Jaffary details how, across time, localized contexts shaped the changing history of reproduction, contraception, and maternity.

Women in China's Long Twentieth Century-Gail Hershatter 2007-03-29 "An important and much-needed introduction to this rich and fast-growing field. Hershatter has handled a daunting task with aplomb." —Susan L. Glosser, author of Chinese Visions of Family and State, 1915-1953 Women and the Periodical Press in China's Long Twentieth Century-Michel Hockx 2018-05-24 In this major new collection, an international team of scholars examine the relationship between the Chinese women's periodical press and global modernity in the late nineteenth and twentieth centuries. The essays in this richly illustrated volume probe the ramifications for women of two monumental developments in this period: the intensification of China's encounters with foreign powers and a media transformation comparable in its impact to the current internet age. The book offers a distinctive methodology for studying the periodical press, which is supported by the development of a bilingual database of early Chinese periodicals. Throughout the study, essays on China are punctuated by transdisciplinary reflections from scholars working on periodicals outside of the Chinese context, encouraging readers to rethink common stereotypes about lived womanhood in modern China, and to reconsider the nature of Chinese modernity in a global context.

Governing China's Population-Susan Greenhalgh 2005 'Governing China's Population' tells the story of political and cultural shifts, from the perspectives of both regime and society.

The Cost-Maria Bartiromo 2020-10-27 The world needs a strong America, and America needs an economic revival after the Coronavirus season of shutdowns. Can the playbook that resulted in the greatest job market in history put Americans back to work? From the first moments of his presidency, Donald J. Trump put US economic revival at the top of his agenda. Cutting red tape and slashing business tax rates made companies eager to locate in America again. A surge in corporate investment led to record numbers of US job openings. But there was also another force at work at the start of the Trump era, and it's impossible to provide a fair accounting of Trump's governance without noting the unique obstacles he's faced. The President's critics styled themselves "The Resistance," as if they were confronting a tyrant at the head of an invading army rather than their duly elected President. Much of the media establishment regularly—and wrongly—accused him of betraying the country. Most disturbing was the resistance movement inside government, formed even before the 2016 election, which unleashed unprecedented surveillance against Donald Trump. The political and media warfare has never ended. Just as an impeachment case collapsed in the Senate earlier this year, the world was beginning to realize how large a threat the Chinese communist government had become—and what it had been hiding in Wuhan. The destruction caused by the coronavirus is the latest and greatest test for the Trump prosperity agenda. Once again the health and wealth of the world depend on US leadership for economic revival. This is the story of the man US voters chose to lead in 2016 and will soon consider to lead again.

The History of the Decline and Fall of the Roman Empire-Edward Gibbon 1914

Birthing a Slave-Marie Jenkins Schwartz 2006 The deprivations and cruelty of slavery have overshadowed our understanding of the institution's most human dimension: birth. We often don't realize that after the United States stopped importing slaves in 1808, births were more important than ever; slavery and the southern way of life could continue only through babies born in bondage. In the antebellum South, slaveholders' interest in slave women was matched by physicians grappling to assert their own professional authority over childbirth, and the two began to work together to increase the number of infants born in the slave quarter. In unprecedented ways, doctors tried to manage the health of enslaved women from puberty through the reproductive years, attempting to foster pregnancy, cure infertility, and resolve gynecological problems, including cancer. Black women, however, proved an unruly force, distrustful of both the slaveholders and their doctors. With their own healing traditions, emphasizing the power of roots and herbs and the critical roles of family and community, enslaved women struggled to take charge of their own health in a system that did not respect their social circumstances, customs, or values. Birthing a Slave depicts the competing approaches to reproductive health that evolved on plantations, as both black women and white men sought to enhance the health of enslaved mothers—in very different ways and for entirely different reasons. Birthing a Slave is the first book to focus exclusively on the health care of enslaved women, and it argues convincingly for the critical role of reproductive medicine in the slave system of antebellum America.

Social Media in Rural China-Tom McDonald 2016-09-13 China's distinctive social media platforms have gained notable popularity among the nation's vast number of internet users, but has China's countryside been 'left behind' in this communication revolution? Tom McDonald spent 15 months living in a small rural Chinese community researching how the residents use social media in their daily lives. His ethnographic findings suggest that, far from being left behind, many rural Chinese people have already integrated social media into their everyday experience.Throughout his ground-breaking study, McDonald argues that social media allows rural people to extend and transform their social relationships by deepening already existing connections with friends known through their school, work or village, while also experimenting with completely new forms of relationships through online interactions with strangers, particularly when looking for love and romance. By juxtaposing these seemingly opposed relations, rural social media users are able to use these technologies to understand, capitalise on and challenge the notions of morality that underlie rural life.

Jim Grant-Richard Joly 2002 Jim Grant was a visionary leader on a global scale. As Executive Director of UNICEF, the United Nations Children's Fund, from 1980 to 1995, he launched a worldwide child survival and development revolution. The practical result was that by 1995, 25 million children were alive who would otherwise have died. Millions more were living with better health and nutrition. The eight stories in this volume, each one written by a close colleague of Jim Grant, celebrate this achievement. They also draw out the lessons on Grant's vision and leadership - lessons relevant in many other contexts.

Which Country Has the World's Best Health Care?-Ezekiel J Emanuel 2020-06-16 The preeminent doctor and bioethicist Ezekiel Emanuel is repeatedly asked one question: Which country has the best healthcare? He set off to find an answer. The US spends more than any other nation, nearly \$4 trillion, on healthcare. Yet, for all that expense, the US is not ranked #1 -- not even close. In Which Country Has the World's Best Healthcare? Ezekiel Emanuel profiles eleven of the world's healthcare systems in pursuit of the best or at least where excellence can be found. Using a unique comparative structure, the book allows healthcare professionals, patients, and policymakers alike to know which systems perform well, and why, and which face endemic problems. From Taiwan to Germany, Australia to Switzerland, the most inventive healthcare providers tackle a global set of challenges -- in pursuit of the best healthcare in the world.

Contraceptive Research and Development-Institute of Medicine 1996-11-04 The "contraceptive revolution" of the 1960s and 1970s introduced totally new contraceptive options and launched an era of research and product development. Yet by the late 1980s, conditions had changed and improvements in contraceptive products, while very important in relation to improved oral contraceptives, IUDs, implants, and injectables, had become primarily incremental. Is it time for a second contraceptive revolution and how might it happen? Contraceptive Research and Development explores the frontiers of science where the contraceptives of the future are likely to be found and lays out criteria for deciding where to make the next R&D investments. The book comprehensively examines today's contraceptive needs, identifies "niches" in those needs that seem most readily translatable into market terms, and scrutinizes issues that shape the market: method side effects and contraceptive failure, the challenge of HIV/AIDS and other sexually transmitted diseases, and the implications of the "women's agenda." Contraceptive Research and Development analyzes the response of the pharmaceutical industry to current dynamics in regulation, liability, public opinion, and the economics of the health sector and offers an integrated set of recommendations for public- and private-sector action to meet a whole new generation of demand.

Melting Pot or Civil War?-Reihan Salam 2018-09-25 "A clarion call to everyone who cares about the American nation and every person who calls it home." —J.D. VANCE, author of Hillbilly Elegy Why would a son of immigrants call for tighter restrictions on immigration? For too long, liberals have suggested that only cruel, racist, or nativist bigots would want to restrict immigration. Anyone motivated by compassion and egalitarianism would choose open, or nearly-open, borders—or so the argument goes. Now, Reihan Salam, the son of Bangladeshi immigrants, turns this argument on its head. In this deeply researched but also deeply personal book, Salam shows why uncontrolled immigration is bad for everyone, including people like his family. Our current system has intensified the isolation of our native poor, and risks ghettoizing the children of poor immigrants. It ignores the challenges posed by the declining demand for less-skilled labor, even as it exacerbates ethnic inequality and deepens our political divides. If we continue on our current course, in which immigration policy serves wealthy insiders who profit from cheap labor, and cosmopolitan extremists attack the legitimacy of borders, the rise of a new ethnic underclass is inevitable. Even more so than now, class politics will be ethnic politics, and national unity will be impossible. Salam offers a solution, if we have the courage to break with the past and craft an immigration policy that serves our long-term national interests. Rejecting both militant multiculturalism and white identity politics, he argues that limiting total immigration and favoring skilled immigrants will combat rising inequality, balance diversity with assimilation, and foster a new nationalism that puts the interests of all Americans—native-born and foreign-born—first.

Disease, Colonialism, and the State-Ka-che YIP 2009-01-01 Studying malaria in modern East Asia in the context of the global history of the disease, this book fills an important gap in our understanding of the cultural, social, economic, and political dimensions of the relationship between malaria and human society in a region which has often been neglected by historians of the disease. The authors examine the development and consequences of various anti-malaria strategies in Hong Kong, Okinawa, Taiwan, mainland China, and East Asia as a whole. The British and Japanese colonial models of disease control are explored, as is the later American technological model of DDT residue spraying, promoted by the Rockefeller Foundation which played a significant role in the global anti-malaria campaign and the development of public health in Asia. In the post- World War II period, the use of DDT and international political and economic interests helped to shape anti-malaria policies of the Nationalist government in Taiwan. In mainland China, the Beijing government's mass mobilization and primary health care model of anti-malaria control has given way to new strategies as recent changes in the health care system have affected anti-malaria efforts and public health developments. This book illuminates an important and largely unexplored dimension of the history of malaria: the interplay of the state (colonial or sovereign), international interests, new medical knowledge and technology, changing concepts of health and disease, as well as local society in the formulation and implementation of anti-malaria policies. It will be of interest to historians of colonialism, medicine and public health, Asia, as well as health and social policy planners.

Abuse of Discretion-Clarke D. Forsythe 2013-10-14 Based on 20 years of research, including an examination of the papers of eight of the nine Justices who voted in Roe v. Wade and Doe v. Bolton, Abuse of Discretion is a critical review of the behind-the-scenes deliberations that went into the Supreme Court's abortion decisions and how the mistakes made by the Justices in 1971-1973 have led to the turmoil we see today in legislation, politics, and public health. The first half of the book looks at the mistakes made by the Justices, based on the case files, the oral arguments, and the Justices' papers. The second half of the book critically examines the unintended consequences of the abortion decisions in law, politics, and women's health. Why do the abortion decisions remain so controversial after almost 40 years, despite more than 50,000,000 abortions, numerous presidential elections, and a complete turnover in the Justices? Why did such a sweeping decision—with such important consequences for public health, producing such prolonged political turmoil—come from the Supreme Court in 1973? Answering those questions is the aim of this book. The controversy over the abortion decisions has hardly subsided, and the reasons why are to be found in the Justices' deliberations in 1971-1972 that resulted in the unprecedented decision they issued.

The Red Tent-Anita Diamant 2009-09-18 In The Red Tent Anita Diamant brings the fascinating biblical character of Dinah to vivid life. Her name is Dinah. In the Bible her fate is merely hinted at in a brief and violent detour within the verses of the Book of Genesis that recount the life of Jacob and his infamous dozen sons. Anita Diamant's The Red Tent is an extraordinary and engrossing tale of ancient womanhood and family honour. Told in Dinah's voice, it opens with the story of her mothers - the four wives of Jacob - each of whom embodies unique feminine traits, and concludes with Dinah's own startling and unforgettable story of betrayal, grief and love. Deeply affecting and intimate, The Red Tent combines outstandingly rich storytelling with an original insight into women's society in a fascinating period of early history and such is its warmth and candour, it is guaranteed to win the hearts and minds of women across the world. I genuinely fell into this rich and colourful world and Dinah and Leah have stayed with me as ancestors and sisters growing to life by Anita Diamant's imaginative novel! - Maureen Lipman. Adapted as a TV mini series starring Rebecca Ferguson and Minnie Driver.

Birth Settings in America-National Academies of Sciences, Engineering, and Medicine 2020-05-01 The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends more on childbirth than any other country in the world, yet outcomes are worse than other high-resource countries, and even worse for Black and Native American women. There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. Birth Settings in America: Outcomes, Quality, Access, and Choice reviews and evaluates maternal and newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings research, and access to and choice of birth settings.
