Rebel Without A Clause-Sue Butler 2020-09-29 The English language is changing constantly. We invent new words and phrases, we mash up idioms, we mispronounce, misuse, misappropriate. Sue Butler has heard it all and is ready to defend and disagree with common usage. Veering from tolerance to outrage, she examines how the word sheila took a nose-dive after World War II, considers whether we should hunker or bunker down, and bemoans the emptiness of rhetoric. She shouts 'down with closure' as it leaps from the psychoanalyst's couch, explains why we've lost the plot on deceptively, untangles the manuka honey stoush, fathoms why the treatment of famous is infamous, and ponders whether you would, could or should ... Rebel without a Clause is a fascinatingly idiosyncratic romp through the world of words by lexicographer and former Macquarie Dictionary Editor, Sue Butler.

Situation Theory and Its Applications: Volume 3-Stanley Peters 1990 Situation theory is the result of an interdisciplinary effort to create a full-fledged theory of information. Created by scholars and scientists from cognitive science, computer science and AI, linguistics, logic, philosophy, and mathematics, it aims to provide a common set of tools for the analysis of phenomena from all these fields. Unlike Shannon-Weaver type theories of information, which are purely quantitative theories, situation theory aims at providing tools for the analysis of the specific content of a situation (signal, message, data base, statement, or other information-carrying situation). The question addressed is not how much information is carried, but what information is carried.

Transformational Syntax and Model Theoretic Semantics-J. McCloskey 2012-12-06 This piece of work began life as a doctoral thesis written at the University of Texas between 1976 and 1978. Now after a year in Dublin it is to become a book. Of the many people in the Department of Linguistics at Texas who shaped my interests and who helped me through the writing of the thesis, I must single out Lee Baker, Lauri Karttunen, Bill Ladusaw, Sue Schmerling and Stanley Peters for special gratitude. All of them have provided specific suggestions which have improved this work, but perhaps more .importantly they provided a uniquely stimulating and harmonious environment in which to work, and a demanding set of professional standards to live up to. To Ken Hale owe a particular debt of gratitude - for two years of encouragement and suggestions, and particularly for a set of detailed comments on an earlier version of the book which led to many changes for the better. I also thank my friends Per-Kristian Halvorsen and Elisabet Engdahl, both of whom took the trouble to provide me with detailed criticisms and comments. In Dublin I am grateful to the School of Celtic Studies of the Institute for Advanced Studies for giving me the opportunity of teaching a seminar on many of the topics covered in the book and of exposing the material to people whose knowledge of the language is unequalled. Donal 6 Baoill and Liam Breatnach have been particularly helpful.

Grammatical constructions and relationships between words in a clause are explained and thoroughly illustrated, including grammatical relations such as subject and object; function-changing processes such as the passive and antipassive; case and agreement processes, including both ergative and

accusative alignments; verb serialization; head-marking and dependent-marking grammars; configurational and non-configurational languages; questions and relative clauses. The final chapter explains and illustrates the principles involved in writing a brief syntactic sketch of a language, enabling the reader to construct a grammatical sketch of a language known to them. Data from approximately 100 languages appears in the text, with languages representing widely differing geographical areas and distinct language families. The book will be essential for courses in cross-linguistic syntax, language typology, and linguistic fieldwork, as well as for basic syntactic description.

Hegel: Faith and Knowledge-G.W.F. Hegel 1988-03-04 As the title indicates, Faith and Knowledge deals with the relation between religious faith and cognitive beliefs, between the truth of religion and the truths of philosophy and science. Hegel is guided by his understanding of the historical situation: the individual alienated from God, nature, and community; and he is influenced by the new philosophy of Schelling, the Spinozistic Philosophy of Identity with its superb vision of the inner unity of God, nature, and rational man. Through a brilliant discussion of the philosophies of Kant, Fichte, and other luminaries of the period, Hegel shows that the time has finally come to give philosophy the authentic shape it has always been trying to reach, a shape in which philosophy's old conflicts with religion on the one hand and with the sciences on the other are suspended once for all. This is the first English translation of this important essay. Professor H. S. Harris offers a historical and analytic commentary to the text and Professor Cerf offers an introduction to the general reader which focuses on the concept of intellectual intuition and on the difference between authentic and inauthentic philosophy.

Bricks and Torture-Alan Neale 2004 Such blatant honesty here. This open diary of events into the purchase of a house, and great endeavours to make it into a home, leaves us breathless. Yet it shouldn't, as we have all been there sometime in our lives. We have suffered the disasters, disappointments and sheer helplessness, but Alan Neale seems to have excelled in his quest to allow us into his own private misery. Told with extremely hilarious off-side comments, he is an obvious master of wit and deep scepticism. This brilliant diary allows us into his personal life - his love of family life is so simplistic as is his endeavour to provide a dream home, but disasters plague him and he shares them with excellent frankness. One moment he has us laughing hysterically at some of the almost unbelievable faux pas and then brings tears to our eyes, as we witness the deep and obvious love of the family to whom he is trying so desperately to give his all. This author obviously doesn't suffer fools gladly; anyone buying a house could learn a lot from this book, especially what NOT to do.
