Curbside Consultation of the Liver-Mitchell L. Shiffman 2008 Are you looking for concise, practical answers to questions that are often left unanswered by traditional liver references? Are you seeking brief, evidence-based advice for complicated cases or complications? Curbside Consultation of the Liver: 49 Clinical Questions provides quick and direct answers to the thorny questions commonly posed during a "curbside consultation" between colleagues. Dr. Mitchell Shiffman has designed this unique reference, which offers expert advice, preferences, and opinions on tough clinical questions commonly associated with the liver. The unique Q&A format provides quick access to current information related to the liver with the simplicity of a conversation between two colleagues. Numerous images, diagrams, and references are included to enhance the text and to illustrate the treatment of the liver. Curbside Consultation of the Liver: 49 Clinical Questions provides information basic enough for residents while also incorporating expert advice that even high-volume clinicians will appreciate. Gastroenterologists, fellows, residents in training, and medical students will benefit from the user-friendly and casual format and the expert advice contained within. Some of the questions that are answered: • How often should I follow a patient who had chronic hepatitis C after they achieved a sustained virologic response? • Should I stop the HIV medications in a patient who has developed an elevation in serum liver transaminases? • What should I tell my patient who is a carrier for alpha-1-antitrypsin deficiency? • Which patients with fatty liver disease on an ultrasound examination require a liver biopsy? • Which patients with chronic liver disease should I screen for hepatocellular carcinoma? • How much ascites is safe to remove at any time?

Interventional Procedures in Hepatobiliary Diseases, An Issue of Clinics in Liver Disease,-Andres Cardenas 2015-06-03 The field of hepatobiliary diseases has advanced enormously in the past 3 decades. The incorporation of new diagnostic and therapeutic interventions in clinical hepatology as well as liver transplantation has exponentially grown and specialty fields have emerged within the liver disease arena. Interventional procedures play a critical role in the management of patients with hepatobiliary diseases as they offer diagnostic and definite treatment options for an array of conditions. Interventions include those that directly measure portal pressure, perform transjugular liver biopsy and place transjugular intrahepatic portosystemic shunts as therapy for complications of portal hypertension. Other commonly performed intervention is digestive and hepatobiliary endoscopy which offers not only diagnostic but also therapeutic choices in various areas such as portal hypertension and hepatobiliary disease. Endoscopy plays a fundamental role in the management of patients with almost all types of liver disease. Additionally, both the fields of hepatology and endoscopy have become very specialized and thus a thorough knowledge of the indications, findings, therapeutic possibilities and complications that arise from endoscopic interventions is a must for the practicing clinician. The rising incidence of liver cancer has also placed radiofrequency ablation and chemoembolization of liver lesions at the forefront of interventional therapies for hepatocellular carcinoma. Finally the management of acute liver failure has certainly evolved with new therapeutic options such as liver assist devices that can help manage these patients in the intensive care unit. This issue of Clinics in Liver Disease devoted to Interventional Hepatology is a timely and unique one. The Guest Editors have assembled an outstanding group of experts in several fields that can provide practitioners with state of the art and evidence based articles that help manage patients with hepatobiliary disease.

Psychiatric Consultation in Long-Term Care-Abhilash K. Desai 2013-02-08 Studies show that residents of nursing homes and assisted living facilities are at a substantial risk of having psychiatric disorders. This practical volume provides much-needed clinical guidance for the prevention and appropriate treatment of mental illness in long-term care settings. Abhilash K. Desai and George T. Grossberg offer a basic framework for a humanistic, team-based approach to meeting the needs of elder persons with mental disorders in long-term care facilities. Early chapters cover the demographics of residents, the epidemiology of their psychiatric symptoms, and the assessment process. Subsequent chapters focus on major disorders, including dementia, delirium, depression, psychosis, and anxiety. The authors discuss end-of-life issues and treatments and offer suggestions for improving care. Throughout, they highlight the importance of the relationship between staff and residents. Emphasizing creative engagement and hands-on care and featuring clinical vignettes and practical tips, this optimistic volume reinforces the potential for nursing homes and assisted living facilities to be communities where residents thrive.

Consultations in Dermatology-Walter B. Shelley 2006-02-13 This is a handbook on dermatologic differential diagnosis and clinical management, focusing on sixty-two challenging and vexing clinical cases that the Shelleys have encountered in over fifty years of patient practice in dermatology. The management problems of these extremely perplexing cases go far beyond evidence-based medicine. Each case is presented as a well-written vignette, told in a case-study tone. The authors first present the background of each case in a concise, thorough, manner including all the important clinical details, including tests and results. The authors then reveal the process involved in the diagnosis and the therapy involved. Finally, they include a section called 'Questions for the Doctor', which suggests relevant questions that the doctor should be pondering in each case. This is the perfect book for residents preparing for their boards.

Ethics Consultation-Mark P. Aulisio 2003-05-08 In the clinical setting, questions of medical ethics raise a host of perplexing problems, often complicated by conflicting perspectives and the need to make immediate decisions. In this volume, bioethicists and physicians provide a nuanced, in-depth approach to the difficult issues involved in bioethics consultation. Addressing the needs of researchers, clinicians, and other health professionals on the front lines of bioethics practice, the contributors focus primarily on practical concerns—whether ethics consultation is best done by individuals, teams, or committees; how an ethics consult service should be structured; the need for institutional support; and techniques and programs for educating and training staff—without neglecting more theoretical considerations, such as the importance of character or the viability of organizational ethics.
