The Australian Green Consumer Guide-Tanya Ha 2008 There has never been a greater need for an Australian green consumer guide to help people make informed choices about the products they buy. Tanya Ha responds to the shift in public debate about climate change toward actively seeking solutions with a practical guide that encourages consumers to become informed, get involved and to vote with their dollar. Packed with answers—practical tips and advice to help the reader make a real difference in their own lives—The Australian Green Consumer Guide is an essential, non-judgmental guide to making more ecologically sound consumer choices, whether you are shopping for food or fashion, cars or white goods.

Consumer Guide to Home Energy Savings-Jennifer Thorne Amann 2007-01 A new edition of this two hundred thousand-copy bestseller.

Consumer Guide to Home Energy Savings-Jennifer Thorne Amann 2013-10-18 THE MOST COMPLETE AND UP-TO-DATE GUIDE AVAILABLE TO ENERGY SAVINGS IN THE HOME Praise for the Ninth Edition: A Penny-Wise Guide to 'Buttoning Up Your House' -The New York Times ...the most comprehensive resource to home energy savings that I've seen. Every homeowner and environmentally conscious (or utility paying) renter should have a copy. - Green Living The advice here will also save you hundreds of dollars a year in energy costs. -Better Homes and Gardens The Consumer Guide to Home Energy Savings has sold nearly a quarter of a million copies. Completely revised to incorporate the latest developments in green technology, this well-organized and highly readable manual is the definitive reference for consumers who want to better their home's performance while reducing their energy bills. Updated and expanded chapters focus on specific aspects of any home, such as heating and cooling, ventilation, electronics, lighting, cooking and laundry, and provide helpful explanations for each, including: - Energy use characteristics - Comparisons between available technologies - Cost-effective repair and replacement options - Step-by-step guidance for finding the right equipment. This comprehensive resource is packed with tips on improving existing equipment and guidance for when and why to invest in new purchases, as well valuable pointers on locating grants or incentives offered by local governments and utilities. It is a must-read for anyone concerned about reducing both their energy bills and their environmental impact. To help bring you the very best inspiration and information about greener, more sustainable lifestyles, Mother Earth News is recommending select New Society Publishers books to its readers. This book is one of them. Jennifer Thorne Amann is the Buildings Program Director at the American Council for an Energy-Efficient Economy. Alex Wilson is the founder of BuildingGreen, Inc., Executive Editor of Environmental Building News, and author of Green Building Products and Your Green Home. Katie Ackerly holds Masters degrees in Architecture and Building Science from UC Berkeley and works for David Baker + Partners, an architecture firm in San Francisco.

Association Publications in Print, 1984-1985-R. R. Bowker LLC 1984

Energy Technology Perspectives- 2006 How much can technology contribute to securing adequate and affordable energy supplies and lower CO2 emissions? What energy technologies hold the most promise? How long will it take? At their 2005 summit in Gleneagles, G-8 leaders confronted these questions and called upon the International Energy Agency to provide advice on scenarios and strategies for a clean and secure energy future. This publication demonstrates how energy technologies can make a difference in a series of global scenarios to 2050. It reviews in detail the status and prospects of key energy technologies in electricity generation, buildings, industry and transport. It assesses ways the world can enhance energy security and contain growth in CO2 emissions by using a portfolio of current and emerging technologies (major strategic elements of a successful portfolio are energy efficiency, CO2 capture and storage, renewables and nuclear power). It provides technology and policy insights to help policy makers craft sustainable solutions.

Cooperative Living- 2004
