Gesture-Based Communication in Human-Computer Interaction-Antonio Camurri 2011-04-02 Research on the multifaceted aspects of modeling, analysis, and synthesis of - man gesture is receiving growing interest from both the academic and industrial communities. On one hand, recent scienti?c developments on cognition, on - fect/emotion, on multimodal interfaces, and on multimedia have opened new perspectives on the integration of more sophisticated models of gesture in c- putersystems.Ontheotherhand,theconsolidationofnewtechnologiesenabling "disappearing" computers and (multimodal) interfaces to be integrated into the natural environments of users are making it realistic to consider tackling the complex meaning and subtleties of human gesture in multimedia systems, - abling a deeper, user-centered, enhanced physical participation and experience in the human-machine interaction process. The research programs supported by the European Commission and s- eral national institutions and governments individuated in recent years strategic ?elds strictly concerned with gesture research. For example, the DG Infor- tion Society of the European Commission (www.cordis.lu/ist) supports several initiatives, such as the "Disappearing Computer" and "Presence" EU-IST FET (Future and Emerging Technologies), the IST program "Interfaces & Enhanced Audio-Visual Services" (see for example the project MEGA, Multisensory - pressive Gesture Applications, www.megaproject.org), and the IST strategic - jective "Multimodal Interfaces." Several EC projects and other funded research are represented in the chapters of this book. Kaufman's New Repertoire for Black and White-Larry Kaufmann 2019-10-28 Seven years after his acclaimed and bestselling The Kaufman Repertoire for Black and White, Grandmaster Larry Kaufman is back with his new repertoire book, covering the entire scope of chess openings for both White and Black, in one volume. Two important developments made this book necessary. Larry Kaufman, who himself routinely plays the lines he advocates to others, discovered that after 1.d4 (the recommendation in his previous book) it became nearly impossible to show a consistent advantage for White, especially against Grunfeld and Nimzo/Ragozin defenses. The other factor was that chess engines have become so much stronger. Larry Kaufman presents a completely new White repertoire with 1.e4 aiming for an objective advantage in the simplest practical manner. You are presented with two options, while you don't have to play the sharpest lines. The Black repertoire has been thoroughly revised and updated, and three new chapters have been added.Kaufman's New Repertoire for Black and White is the first opening book that is primarily based on Monte Carlo search. The highly original analysis has resulted in loads of improvements on existing theory. This is a lucidly explained, ready-to-go and easy-to-digest repertoire with sound, practical lines that do not outdate rapidly and are suitable for masters while perfectly accessible for amateurs.

Applied Construction Grammar-Sabine De Knop 2016-04-25 Current research within the framework of Construction Grammar (CxG) has mainly adopted a theoretical or descriptive approach, neglecting the more applied perspective and especially the question of how language acquisition and pedagogy can benefit from a CxG-based approach. The present volume explores various aspects of "Applied Construction Grammar" through a collection of studies that apply CxG and CxG-inspired approaches to relevant issues in L2 acquisition and teaching. Relying on empirical data and covering a wide range of constructions and languages, the chapters show how the cross-fertilization of CxG and L2 acquisition/teaching can improve the description of learners' use of constructions, provide theoretical insights into the processes underlying their acquisition (e.g. with reference to inheritance links or transfer from the L1), or lead to novel teaching practices and resources aimed to help learners make the generalizations that native speakers make naturally from the input they receive.
Greek Medical Papyri-Nicola Reggiani 2019-09-23 The volume collects papers presented at the International Conference "Greek Medical Papyri - Text, Context, Hypertext" held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to "medical texts", contains some new reflections on important sources such as the Anonymus Londinensis and the Hippocratic corpus, as well as on specific themes like the pharmacological vocabulary, the official medical reports, the medical care in the Roman army. The second part collects papers about the "doctors' context", providing highlights from broader viewpoints like the analysis of the writing supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the DIGMEDTEXT project itself: the team members present some relevant key issues raised by the digitisation of the medical papyri.

The Polar Bear System-G. M. Henrik Danielsen 2016-02-09 1.f4 is the Bird opening. It was played by Henry Bird. He wanted to leave the mainstream and create new original positions. He liked a setup with b3 and Bb2. The Polar Bear System (PBS) was played with the same intention. To leave the trodden theory paths and enter new undiscovered terrain. The system starts with a fianchetto of the Kings bishop after 1.f4, d5. PBS players want to enter interesting and original positions where it is difficult for Black to play for a flat equality. The book is for club players but also professionals can get inspiration. The book contains both volume 1 & volume 2. Grandmaster in chess. Henrik Danielsen www.polarbearsystem.com
An Idiot-Proof Chess Opening Repertoire-Graham BURGESS 2020-07-06 Ever wanted a complete chess opening repertoire - for White and Black - whose basics can be learned in a week? A strategic low-maintenance repertoire that does not require memorizing of long variations, and yet can frustrate both stronger and weaker opponents? In this book, award-winning author Graham Burgess has come up with the ultimate simplified repertoire. But it is not based on boring or unambitious openings. The aim is to avoid symmetry and mass exchanges, and reach an unbalanced middlegame. You won't be dumped into do-or-die tactics where the penalty for forgetting a key move is an instant loss. There are plenty of sharp and aggressive ideas within these pages, but the openings chosen provide a firm and sound base for experimentation. If you forget the critical line and have to make something up at the board, then if you have understood the key strategic themes - which are explained with the use of mini-rules and reminders - then you should get a playable game. As Black, we choose the slippery Scandinavian and a carefully crafted hybrid of the Slav and QGA. As White it is the English Opening, often with Botvinnik set-ups that will give our opponents fits! These will become your special lines, where you will know and understand more than most players, even much stronger ones. Graham Burgess has written 28 chess books, including three on opening play for the 'Chess for Kids' series. He is a FIDE Master and a former champion of the Danish region of Funen, and in 1994 set a world record for marathon blitz chess playing.
King's Indian Attack: Move by Move-Neil McDonald 2014-05-31 Neil McDonald examines in depth the many variations of the King's Indian Attack. He outlines White's most promising options and Black's best defences, and provides answers to all the key questions.

Basic and Advanced Vitreous Surgery-G.W. Blankenship 2013-11-11 Vitrectomy techniques and instrumentation have been used successfully to treat a number of conditions in the anterior segment. These include: 1) vitreous in the anterior chamber, 2) inadequate pupillary openings, 3) lens surgery, 4) epithelial downgrowth, 5) hyphemas, and 6) certain glaucomas. These methods offer several advantages to the anterior segment surgeon. The advantages are primarily those of a well-controlled tissue excision system, maintenance of the normal shape of the globe, and ability to control intraocular pressure.
