The Mathematics of Love-Hannah Fry 2015-02-03 In this must-have for anyone who wants to better understand their love life, a mathematician pulls back the curtain and reveals the hidden patterns—from dating sites to divorce, sex to marriage—behind the rituals of love. The roller coaster of romance is hard to quantify; defining how lovers might feel from a set of simple equations is impossible. But that doesn't mean that mathematics isn't a crucial tool for understanding love. Love, like most things in life, is full of patterns. And mathematics is ultimately the study of patterns—from predicting the weather to the fluctuations of the stock market, the movement of planets or the growth of cities. These patterns twist and turn and warp and evolve just as the rituals of love do. In The Mathematics of Love, Dr. Hannah Fry takes the reader on a fascinating journey through the patterns that define our love lives, applying mathematical formulas to the most common yet complex questions pertaining to love: What's the chance of finding love? What's the probability that it will last? How do online dating algorithms work, exactly? Can game theory help us decide who to approach in a bar? At what point in your dating life should you settle down? From evaluating the best strategies for online dating to defining the nebulous concept of beauty, Dr. Fry proves—with great insight, wit, and fun—that math is a surprisingly useful tool to negotiate the complicated, often baffling, sometimes infuriating, always interesting, mysteries of love.

Development and Sustainable Growth of Mauritius-Vanessa T. Tang 2018-11-27 This edited volume analyzes the Mauritius economy and highlights what conditions and policies have contributed to the development of the country. The project gives a historical and economic analysis of Mauritius and provides comparative approaches looking at other developing states in Africa and Asia. This book is intended for a broad audience, consisting of not only economists with quantitative expertise but also other social scientists, policymakers and scholars interested in the intellectually fascinating exploration of Mauritius's rapid rise and sustained growth performance.

Mauritius: Challenges of Sustained Growth-Emilio Sacerdoti 2005-03-10 Mauritius has achieved remarkable success since its independence in 1968. It has one of the highest per capita GDPs in Africa, the economy has diversified from complete dependence on the sugar crop, into textiles, then tourism, and recently information and communication services. This paper examines the factors that have contributed to this impressive growth, including macroeconomic stability, a solid institutional framework, political stability, an efficient administration, a favorable regulatory framework, and a well-developed financial system, and outlines the challenges that remain to ensure continued sustainable growth in Mauritius.

Language Teaching in the Indian Ocean-Edmun B. Richmond 1983 The findings of a study of language and language education policy in each of the three independent nations of Comoros, Mauritius, and the Seychelles are reported in this book. Each country is discussed separately, focusing on the linguistic and educational history, the existing educational system, and current language policies and programs. Program types covered include elementary and secondary instruction, teacher education programs, adult functional literacy courses, and language instruction by radio. A concluding chapter analyzes the programs in terms of their pedagogical development and usefulness and examines the areas of language education that still need to be addressed. (MSE)

Africa's Future, Africa's Challenge-Marito H. Garcia 2008-01-18 Early childhood, from birth through school entry, was largely invisible worldwide as a policy concern for much of the twentieth century. Children, in the eyes of most countries, were 'appendages' of their parents or simply embedded in the larger family structure. The child did not emerge as a separate social entity until school age (typically six or seven). 'Africa's Future, Africa's Challenge: Early Childhood Care and Development in Sub-Saharan Africa' focuses on the 130 million children south of the Sahel in this 0-6 age group. This book, the first of its kind, presents a balanced collection of articles written by African and non-African authors ranging from field practitioners to academicians and from members of government organizations to those of nongovernmental and local organizations. 'Africa's Future, Africa's Challenge' compiles the latest data and viewpoints on the state of Sub-Saharan Africa's children. Topics covered include the rationale for investing in young children, policy trends in early childhood development (ECD), historical perspectives of ECD in Sub-Saharan Africa including indigenous approaches, new threats from HIV/AIDS, and the importance of fathers in children's lives. The book also addresses policy development and ECD implementation issues; presents the ECD programming experience in several countries, highlighting best practices and challenges; and evaluates the impact of ECD programs in a number of countries.

Sustainable Directions in Tourism-Tomás F. Espino-Rodríguez 2019-11-21 Within the framework of tourism companies and tourist destinations, the question of sustainability is gaining importance. Tourists are increasingly aware of the importance of sustainability criteria, awarding greater value to sustainable destinations. Sustainability refers to a wide range of aspects related to climate change, the economic organization of tourism, social values or questions, job creation, and the necessary protection of the culture of destinations and the environment. Therefore, there is a need for studies that consider these aspects in order to achieve the sustainable development of tourist destinations. Fundamental to this is discovering to what degree tourism companies and destinations approach these questions in the strategies they use to deal with problems stemming from their attempts to be more sustainable. Conceptual papers and empirical research on the economic, social, cultural, and environmental aspects related to tourism companies and destinations are welcome. Studies that analyze how these questions and the concept of sustainability are included in tourism companies and destinations are necessary in these modern times. This book was established for these reasons, dedicated to examining sustainability in tourism. The papers included in this Special Issue can help us to determine the new directions being addressed in the research on sustainability tourism.

Vietnam 2035-World Bank Group,Ministry of Planning and Investment of Vietnam 2016-11-07 Thirty years of  $\text{Á}\text{đ}\text{à}\text{»}\text{i}\text{ M}\text{à}\text{»}\text{i}$  (economic renovation) reforms have catapulted Vietnam from the ranks of the world's poorest countries to one of its great development success stories. Critical ingredients have been visionary leaders, a sense of shared societal purpose, and a focus on the future. Starting in the late 1980s, these elements were successfully fused with the embrace of markets and the global economy. Economic growth since then has been rapid, stable, and inclusive, translating into strong welfare gains for the vast majority of the population. But three decades of shared reforms raises expectations for the future, as aptly captured in the Vietnamese constitution, which sets the goal of "a prosperous people and a strong, democratic, equitable, and civilized country.?" There is a firm aspiration that by 2035, Vietnam will be a modern and industrialized nation moving toward becoming a prosperous, creative, equitable, and democratic society. The Vietnam 2035 report, a joint undertaking of the Government of Vietnam and the World Bank Group, seeks to better comprehend the challenges and opportunities that lie ahead. It shows that the country's aspirations and the supporting policy and institutional agenda stand on three pillars: balancing economic prosperity with environmental sustainability; promoting equity and social inclusion to develop a harmonious middle- class society; and enhancing the capacity and accountability of the state to establish a rule of law state and a democratic society. Vietnam 2035 further argues that the rapid growth needed to achieve the bold aspirations will be sustained only if it stands on faster productivity growth and reflects the costs of environmental degradation. Productivity growth, in turn, will benefit from measures to enhance the competitiveness of domestic enterprises, scale up the benefits of urban agglomeration, and build national technological and innovative capacity. Maintaining the record on equity and social inclusion will require lifting marginalized groups and delivering services to an aging and urbanizing middle-class society. And to fulfill the country's aspirations, the institutions of governance will need to become modern, transparent, and fully rooted in the rule of law.

Controlling Disease Due to Helminth Infections-Montresor A. 2003 Helminth infections are caused by parasitic worms (including tapeworms and roundworms). These diseases are associated with poverty, and in school-age populations in developing countries, intestinal helminth infections rank first among the causes of all communicable and noncommunicable diseases. This book is based on papers presented at an OECD conference, held in Bali, Indonesia in February 2000, which sought to review activities for the control of diseases due to soil-transmitted helminth infections in Indonesia and neighbouring countries.

Manual of Digital Earth-Huadong Guo 2020-01-01 This open access book offers a summary of the development of Digital Earth over the past twenty years. By reviewing the initial vision of Digital Earth, the evolution of that vision, the relevant key technologies, and the role of Digital Earth in helping people respond to global challenges, this publication reveals how and why Digital Earth is becoming vital for acquiring, processing, analysing and mining the rapidly growing volume of global data sets about the Earth. The main aspects of Digital Earth covered here include: Digital Earth platforms, remote sensing and navigation satellites, processing and visualizing geospatial information, geospatial information infrastructures, big data and cloud computing, transformation and zooming, artificial intelligence, Internet of Things, and social media. Moreover, the book covers in detail the multi-layered/multi-faceted roles of Digital Earth in response to sustainable development goals, climate changes, and mitigating disasters, the applications of Digital Earth (such as digital city and digital heritage), the citizen science in support of Digital Earth, the economic value of Digital Earth, and so on. This book also reviews the regional and national development of Digital Earth around the world, and discusses the role and effect of education and ethics. Lastly, it concludes with a summary of the challenges and forecasts the future trends of Digital Earth. By sharing case studies and a broad range of general and scientific insights into the science and technology of Digital Earth, this book offers an essential introduction for an ever-growing international audience.

Explorations and Encounters in French-F. Jean Fornasiero 2010 "With a title derived literally from the explorations of the French in the Pacific and metaphorically from classroom encounters with another culture - both of which form important subsections to the volume - Explorations and Encounters in French actively seeks to unite those fields of enquiry sometimes seen as separate, namely, culture and language. The essays selected for inclusion in Explorations and Encounters in French bring together many of the current research strands in French Studies today, tapping into current pedagogical trends, analysing contemporary events in France, examining the Franco-Australian past, while reviewing teaching practice and the culture of teaching. Collectively, the essays reflect the common engagement with language, culture and society that characterizes the community of French teachers and scholars in Australia and abroad."-University of Adelaide Press webpage.

National Democratic Reforms in Africa-Said Adejumoobi 2015-12-27 From putative 'success stories' such as Ghana and Rwanda to failed efforts in Zimbabwe and other countries, this volume brings together seven incisive case studies from diverse contexts including post-war Sierra Leone, Uganda, and the new nation of South Sudan to distil insights into the troubled progress of reform across the African continent.

Managing successful projects with PRINCE2-Office of Government Commerce 2009-06-08 This book provides a universally applicable project management method - the principles, processes and techniques that enable individuals and organisations successfully to deliver their projects within time, cost and quality constraints. This new edition has been designed to place more emphasis on the principles that underpin successful project management and to provide clear guidance on how to apply these principles to the organisational context within which projects are operating.

Giving Kids a Fair Chance-James J. Heckman 2017-08-08 Current social and education policies directed toward children focus on improving cognition, yet success in life requires more than smarts. Heckman calls for a refocus of social policy toward early childhood interventions designed to enhance both cognitive abilities and such non-cognitive skills as confidence and perseverance. This new focus on preschool intervention would emphasize improving the early environments of disadvantaged children and increasing the quality of parenting while respecting the primacy of the family and America's cultural diversity. Heckman shows that acting early has much greater positive economic and social impact than later interventions -- which range from reduced pupil-teacher ratios to adult literacy programs to expenditures on police -- that draw the most attention in the public policy debate. At a time when state and local budgets for early interventions are being cut, Heckman issues an urgent call for action and offers some practical steps for how to design and pay for new programs.

Theories of Educational Leadership and Management-Tony Bush 2020-05-11 This fifth edition of Tony Bush's bestselling text explores the links between educational management theories and the main models of leadership, and their application to policy and practice globally across varied educational contexts. This fully updated new edition is informed by an enhanced global perspective and expanded coverage of important contemporary issues including teacher leadership, professional learning communities, transformational leadership, instructional leadership and a critical assessment of distributed leadership. This is essential reading for all teachers who aspire to management, as well as for experienced leaders on Masters' level courses, and for those studying school management as part of education degrees.

Objective Proficiency Teacher's Book-Annette Capel 2002-05-27 Objective Proficiency contains twenty short units providing a wide range of challenging topics and offering lively yet systematic preparation for the Proficiency exam. Ten lessons focus on the Paper 3 summary task, building up appropriate skills gradually. Authentic language examples taken from the Cambridge International Corpus illustrate a wide range of real English usage. The course is written by experienced examiners who have an in-depth knowledge of the Proficiency exam, and contains material informed by the Cambridge Learner Corpus which shows typical mistakes and areas of difficulty for candidates at Proficiency level.

Development and the Next Generation-Emmanuel Jimenez 2006 The theme of The World Development Report 2007 is youth - young people between the ages of 12 to 24. As this population group seeks identity and independence, they make decisions that affect not only their own well-being, but that of others, and they do this in a rapidly changing demographic and socio-economic environment. Supporting young people's transition to adulthood poses important opportunities and risky challenges for development policy. Are education systems preparing young people to cope with the demands of changing economies? What kind of support do they get as they enter the labor market? Can they move freely to where the jobs are? What can be done to help them avoid serious consequences of risky behavior, such as death from HIV/AIDS and drug abuse? Can their creative energy be directed productively to support development thinking? The report will focus on crucial capabilities and transitions in a young person's life: learning for life and work, staying healthy, working, forming families, and exercising citizenship. For each, there are opportunities and risks; for all, policies and institutions matter.

Reformulation as a Strategy for Developing Healthier Food Products-Vassilios Raikos 2020-10-18 This work introduces the concept of reformulation, a relatively new strategy to develop foods with beneficial properties. Food reformulation by definition is the act of re-designing an existing, often popular, processed food product with the primary objective of making it healthier. In recent years the concept of food reformulation has evolved significantly as additional benefits of re-designing food have become apparent. In addition to targeting specific food ingredients that are considered potentially harmful for human health, food reformulation can also be effectively used as a strategy to make foods more nutritious by introducing essential macro- /micro-nutrients or phytochemicals in the diet. Reformulating foods can also improve sustainability by introducing "waste" (and underutilized) ingredients into the food chain. In light of these developments, reformulating existing foods is now considered a realistic and attractive opportunity to provide healthy, nutritious, and sustainable food choices to the consumers and likewise improve public health. Indeed reformulation has now become essential in many cases for redressing the health properties of foods that are popularly consumed and significantly affecting public health. This edited volume covers aspects of food reformulation from various angles, exploring the role of the food industry, academia, and consumers in developing new products. Some of the major themes contributors address include methods of reformulating food products for health, improving the nutritional composition of foods, and challenges to the food industry, including regulation as well as consumer perception of new products. The book presents several case studies to clarify these objectives and illustrate the difficulties encountered in the process of developing a reformulated product. Chapters from experts in the field identify emerging and future trends in food product development, and highlight ways in which these efforts will help with increasing food security, improving nutrition and health, and promoting sustainable production. The editors have designed the book to be useful for both industry professionals and the research community. This interdisciplinary approach incorporates a wide spectrum of food sciences (including composition, engineering, and chemistry) as well as nutrition and public health. Food and nutrition professionals, policy makers, health care and social scientists, and graduate students will also find the information relevant.

Community, Empire and Migration-Crispin Bates 2016-03-21 South Asians in Diaspora is a collection of essays concerning the history, politics, and anthropology of migration in India, Pakistan, and Sri Lanka, as well as in the numerous overseas locations, such as Fiji, Africa, the Caribbean and USA, where South Asians migrated in the colonial period and after. It addresses the connections between migration, problems of identity and ethnic conflict from a comparative perspective, and highlights the role of shared colonial experiences in providing 'communal' solidarities and discord.

Trade and Employment-Marion Jansen 2014-01-30 Although the effect of trade on employment is a popular point of economic debate, there are very few factual assessments available. This book examines the most recent evidence and provides guidance for the design of tools to assess more accurately the employment impacts of trade. Trade and Employment argues for strengthening the micro-foundations of models used to evaluate the employment effects of trade and for including the informal economy and adjustment processes in modeling efforts. It emphasizes the role of governments in helping firms survive or grow, in providing social protection to protect against external shocks, in addressing gender equity, and in building physical infrastructure and human skills bases that facilitate export diversification. It is a valuable resource for all those interested in the debate on the employment effects of trade: workers and employers, academics and policymakers, and trade and labor specialists.
