Sentencing and Criminal Justice-Andrew Ashworth 2010-02-04 Andrew Ashworth expertly examines the key issues in English sentencing policy and practice including the mechanisms for producing sentencing guidelines. He considers the most high-profile stages in the criminal justice process such as the Court of Appeal's approach to the custody threshold, the framework for the sentencing of young offenders and the abiding problems of previous convictions in sentencing. Taking into account the Criminal Justice and Immigration Act 2008 and the Coroners and Justice Act 2009, the book's inter-disciplinary approach places the legislation and guidelines on sentencing in the context of criminological research, statistical trends and theories of punishment. By examining the law in relation to elements of the wider criminal justice system, including the prison and probation services, students gain a rounded perspective on the relevant principles and problems of sentencing and criminal justice.

World Report 2002-Human Rights Watch (Organization) 2002 Human Rights Watch is increasingly recognized as the world's leader in building a stronger human rights culture, and their annual World Report-the most probing annual review of human rights developments available anywhere-will now be published by Seven Stories Press and available in the trade for the first time. The backbone of the report consists of a series of concise overviews of the most pressing human rights issues in countries from Afghanistan to Zimbabwe, with particular focus on the role-positive or negative-played in each country by key domestic and international actors. The report is written in straightforward, nontechnical language and prioritizes events in the most affected countries during the year. Release of the report each year in January is a major news event covered heavily by newspapers of record in the United States and around the world. These news stories and mention of the World Report continue throughout the year.

Death Penalty USA, 2001-2002-Michelangelo Delfino 2009-01-01 The taking of a human life is in all circumstances reprehensible and must be punished within the confines of U.S. law. The basic concept underlying the Eighth Amendment is nothing less than the dignity of man. While the State has the power to punish, the Amendment stands to assure that this power be exercised within the limits of civilized standards. (Trop v. Dulles (1958) 356 U.S. 86, 100) This is the third book in a series of books providing a brief history of 21st century capital-punishment executions in the United States. Each volume in the series begins with an overview of capital punishment in the United States and follows with the case histories of two consecutive years of U.S. executions. These books are not intended to be easy reading. The crimes for which the death penalty was imposed are truly horrific and described in graphic detail based on public record. Compilations are taken from and referenced to case citations. Original names and places are retained. Some cases are necessarily more comprehensive than others. High profile murders and those involving multiple victims, difficult conviction, and vigorous defenses have more extensive records than capital crimes involving the murder of a homeless person or a clerk during a convenience store robbery. Cases where the conviction is based on circumstantial evidence tend to be more detailed than those based on voluntary confessions as do cases that take advantage of the appellate process. Each case history is written in a nonsensationalized way that is respectful of all those touched by death. The crimes are written such that each is self-contained and can be read either sequentially or randomly. Supplemental information such as a condemned prisoner's last meal and last words are added when such material is insightful, and the prosecution and the disposition of accomplices is included when known. The names of the executed prisoners are indexed chronologically in the Table of Contents. A reference list and an Index are provided.
