Insurance of Crops in Developing Countries-Richard A. J. Roberts 2005 "This publication is primarily concerned with risks to arable and horticultural crops, and the applicability of insurance to managing these risks. Its purpose is to provide an introductory overview of crop and forestry insurance. It begins by defining the boundaries for these types of insurance products in order to assist those interested in exploring and exploiting this financial mechanism. It then outlines how to proceed with planning for crop insurance within the established boundaries. While recognizing that classic, damage-based and yield-based insurance products account for the bulk of all crop insurance written globally, the booklet also points out the dynamism of research and development into new insurance mechanisms. It presents two fairly new insurance products: the first based on insuring a level of crop revenue, and the second where insurable damage is determined on the basis of an index derived from data external to the insured farm. While some of the example material is taken from agriculture and forestry in developed countries, the basic target group of readers is expected to be those concerned with crop and forest risk management in developing parts of the world. This publication will be of interest to farmer unions, producer/commodity groups, processors, marketing firms and others contracting with farmer producers, officials of Ministries of Agriculture, Planning and Commerce, and bankers and insurers with farming and forestry clients."

Government Support to Agricultural Insurance-Olivier Mahul 2010-03-08 Governments in developing countries have been increasingly involved in the support of agricultural (crop and livestock) insurance programs in recent years. In their attempts to design and implement agricultural insurance, they have sought technical and financial assistance from the international community and particularly from the World Bank. One of the recurrent requests from governments regards international experience with agricultural insurance, not only in developed countries, where in some cases agricultural insurance has been offered for more than a century, but also in middleand low-income countries. Governments are particularly interested in the technical, operational, financial, and institutional aspects of public support to agricultural insurance. 'Government Support to Agricultural Insurance' informs public and private decision makers involved in agricultural insurance about recent developments, with a particular focus on middle- and low-income countries. It presents an updated picture of the spectrum of institutional frameworks and experiences with agricultural insurance, ranging from countries in which the public sector provides no support to those in which governments heavily subsidize agricultural insurance. This analysis is based on a survey conducted by the World Bank s agricultural insurance team in 2008 in 65 developed and developing countries. Drawing on the survey results, the book identifies some key roles governments can play to support the development of sustainable, affordable, and cost-effective agricultural insurance programs.

Agricultural Insurance Legislation-Beatriz Benilde Galán 1981

Risk Modeling for Appraising Named Peril Index Insurance Products-Shadreck Mapfumo 2017-04-13 Named peril index insurance has great potential to address unmet risk management needs for agricultural insurance in developing economies, potentially contributing to increased agricultural sustainability and improved food security. However, the development and appraisal of index insurance business lines is not without challenges. Insurers must rigorously evaluate the quality of the products they offer and take care to ensure that distributors and policyholders understand the benefits and limits of the purchased coverage. Without these important steps to ensure responsible insurance practices, insurers can damage the implementation and potential of index insurance in the market. Risk Modeling for Appraising Named Peril Index Insurance Products: A Guide for Practitioners helps stakeholders in the named peril index insurance industry appraise new and existing products. Part 1 of the guide provides a summary of the insights and decisions required for the insurer to make an informed decision to launch and expand an index insurance business line. Insurance managers are the primary audience for part 1. Part 2 provides a step-by-step guide to calculating the decision metrics used by the insurance manager in part 1. These metrics are calculated using probabilistic modeling that provides insights into risks related to the index insurance product. Actuarial analysts are the primary audience for part 2. In an increasingly competitive insurance market, creative product development and imaginative business strategies are becoming the norm. This guide will help emerging market insurers who seek to stay on the cutting edge to successfully and sustainably penetrate new market segments.

Agricultural Index- 1939

Dull Disasters?-Daniel J. Clarke 2016-04-07 This is an open access title available under the terms of a CC BY 3.0 IGO licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. In recent years, typhoons have struck the Philippines and Vanuatu; earthquakes have rocked Haiti, Pakistan, and Nepal; floods have swept through Pakistan and Mozambique; droughts have hit Ethiopia, Kenya, and Somalia; and more. All led to loss of life and loss of livelihoods, and recovery will take years. One of the likely effects of climate change is to increase the likelihood of the type of extreme weather events that seems to cause these disasters. But do extreme events have to turn into disasters with huge loss of life and suffering? Dull Disasters? harnesses lessons from finance, political science, economics, psychology, and the natural sciences to show how countries and their partners can be far better prepared to deal with disasters. The insights can lead to practical ways in which governments, civil society, private firms, and international organizations can work together to reduce the risks to people and economies when a disaster looms. Responses to disasters then become less emotional, less political, less headline-grabbing, and more business as usual and effective. The book takes the reader through a range of solutions that have been implemented around the world to respond to disasters. It gives an overview of the evidence on what works and what doesn't and it examines the crucial issue of disaster risk financing. Building on the latest evidence, it presents a set of lessons and principles to guide future thinking, research, and practice in this area.

Farmers' Elevator Guide- 1915

Autonomous Vehicle Technology-James M. Anderson 2014-01-10 The automotive industry appears close to substantial change engendered by "self-driving" technologies. This technology offers the possibility of significant benefits to social welfare—saving lives; reducing crashes, congestion, fuel consumption, and pollution; increasing mobility for the disabled; and ultimately improving land use. This report is intended as a guide for state and federal policymakers on the many issues that this technology raises.

The Official Guide for GMAT Review-GMAC (Graduate Management Admission Council) 2010-10-28 Jumpstart your GMAT exam preparations with the official study guide, featuring real GMAT questions'and their answers' written by the creators of the test. In addition to more than 900 questions, the 13th Edition features: -A new online study companion with 50 Integrated Reasoning questions and answer explanations* -An Integrated Reasoning chapter with details

about the new GMAT exam section -A 100-question diagnostic exam to help focus your test preparation efforts -Grammar review covering concepts tested on the GMAT Verbal section -Comprehensive math review covering concepts tested on the GMAT Quantitative section -Helpful tips to help you prepare for the GMAT exam Please note: There is no overlap between questions found in The Official Guide for GMAT Review, 13th Edition, The Official Guide for GMAT Quantitative Review, The Official Guide for GMAT Verbal Review, and GMATPrep software. The new practice questions in the 13th Edition replace 155 practice questions from the 12th Edition. The remaining questions overlap. *To use the Integrated Reasoning companion website, you must have one of the following browsers: Safari, Google Chrome, Firefox, or Internet Explorer version 7 or higher.

Climate Smart Agriculture-Leslie Lipper 2017-10-20 This book is open access under a CC BY-NC-SA 3.0 IGO license. The book uses an economic lens to identify the main features of climate-smart agriculture (CSA), its likely impact, and the challenges associated with its implementation. Drawing upon theory and concepts from agricultural development, institutional, and resource economics, this book expands and formalizes the conceptual foundations of CSA. Focusing on the adaptation/resilience dimension of CSA, the text embraces a mixture of conceptual analyses, including theory, empirical and policy analysis, and case studies, to look at adaptation and resilience through three possible avenues: ex-ante reduction of vulnerability, increasing adaptive capacity, and ex-post risk coping. The book is divided into three sections. The first section provides conceptual framing, giving an overview of the CSA concept and grounding it in core economic principles. The second section is devoted to a set of case studies illustrating the economic basis of CSA in terms of reducing vulnerability, increasing adaptive capacity and ex-post risk coping. The final section addresses policy issues related to climate change. Providing information on this new and important field in an approachable way, this book helps make sense of CSA and fills intellectual and policy gaps by defining the concept and placing it within an economic decision-making framework. This book will be of interest to agricultural, environmental, and natural resource economists, development economists, and scholars of development studies, climate change, and agriculture. It will also appeal to policy-makers, development practitioners, and members of governmental and non-governmental organizations interested in agriculture, food security and climate change.

Life and Health Insurance-Dearborn Financial Institute 1997 Licensing exam students will get the best prelicensing preparation from this comprehensive study and reference guide, designed and written specifically to help students pass the Life and Health Insurance state exams. It incorporates the latest information from the 1996 Health Insurance Portability and Accountability Act, the Taxpayer Relief as well as the Balanced Budget Acts of 1997. Other revisions include end-of-chapter questions, an updated glossary, and a new 100-question final exam with answers and explanations.

Business Organizations, Agencies, and Publications Directory-Kenneth Estell 1992

Complete Guide for Growing Plants Hydroponically-J. Benton Jones, Jr. 2014-02-13 With the continued implementation of new equipment and new concepts and methods, such as hydroponics and soilless practices, crop growth has improved and become more efficient. Focusing on the basic principles and practical growth requirements, the Complete Guide for Growing Plants Hydroponically offers valuable information for the commercial grower, the researcher, the hobbyist, and the student interested in hydroponics. It provides details on methods of growing that are applicable to a range of environmental growing systems. The author begins with an introduction that covers the past, present, and future of hydroponics. He also describes the basic concepts behind how plants grow, followed by several chapters that present in-depth practical details for hydroponic growing systems: The essential plant nutrient elements The nutrient solution Rooting media Systems of hydroponic culture Hydroponic application factors These chapters cover the nutritional requirements of plants and how to best prepare and use nutrient solutions to satisfy plant requirements, with different growing systems and rooting media, under a variety of conditions. The book gives many nutrient solution formulas and discusses the advantages and disadvantages of various hydroponic systems. It also contains a chapter that describes a school project, which students can follow to generate nutrient element deficiency symptoms and monitor their effects on plant growth.

Seeing Like a State-James C. Scott 2020-03-17 "One of the most profound and illuminating studies of this century to have been published in recent decades."—John Gray, New York Times Book Review Hailed as "a magisterial critique of top-down social planning" by the New York Times, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. "Beautifully written, this book calls into sharp relief the nature of the world we now inhabit."—New Yorker "A tour de force."— Charles Tilly, Columbia University

Export-import Theory, Practices, and Procedures-Belay Seyoum 2009 Export-Import Theory, Practices, and Procedures is the first book on the market to truly serve the needs of the academic/professional audience, going beyond the usual soft coverage of international trade operations. Discussing theoretical issues in depth, such as the role of exports/imports in the global economy and pertinent regulatory and policy issues, this innovative text offers comprehensive explorations of import processes as well as export activities and incorporates the most relevant and current research information in these areas. New to this edition are important discussions of trends in regional integration agreements, international transfer pricing, terms of sale, US export regulations, export financing programs, and more Expanded coverage in this edition of topics such as taxation of international trade operations, export counseling, export channels of distribution, export sales contracts, transportation, import procedures and techniques and more Other topics include: Exploration of trade agreements such as the GATT/WTO, NAFTA, and the European Economic Community (EEC), and how they affect trade In-depth treatment of investment and intellectual property policies, rules on government procurements, safeguard, and services of NAFTA Documentation, risks, and different forms of insurance, as well as assessing the risks of foreign trade Price setting in international trade, export sales contracts, exchange rates, methods of payment for exporting and importing goods, the benefits and theories of countertrade, the entry process for imports, and import relief to domestic industry Export-Import Theory, Practices, and Procedures, Second Edition combines an innovative conceptual and theoretical approach, a deep and broad analytical treatment, and an engaging and accessible presentation style to offer one of the most useful textbooks on the market for students and practitioners alike. Further instructors' materials can be accessed via www.nova.edu/~seyoum

Social Health Insurance-Charles Normand 1994

Predictive Policing-Walt L. Perry 2013-09-23 Predictive policing is the use of analytical techniques to identify targets for police intervention with the goal of preventing crime, solving past crimes, or identifying potential offenders and victims. These tools are not a substitute for integrated approaches to policing, nor are they a crystal ball. This guide assesses some of the most promising technical tools and tactical approaches for acting on predictions in an effective way.

Analytics for Insurance-Tony Boobier 2016-08-01 The business guide to Big Data in insurance, with practical application insight Big Data and Analytics for Insurers is the industry-specific guide to creating operational effectiveness, managing risk, improving financials, and retaining customers. Written from a non-IT perspective, this book focusses less on the architecture and technical details, instead providing practical guidance on translating analytics into target delivery. The discussion examines implementation, interpretation, and application to show you what Big Data can do for your business, with insights and examples targeted specifically to the insurance industry. From fraud analytics in claims management, to customer analytics, to risk analytics in Solvency 2, comprehensive coverage presented in accessible language makes this guide an invaluable resource for any insurance professional. The insurance industry is heavily dependent on data, and the advent of Big Data and analytics represents a major advance with tremendous potential - yet clear, practical advice on the business side of analytics is lacking. This book fills the void with concrete information on using Big Data in the context of day-to-day insurance operations and strategy. Understand what Big Data is and what it can do Delve into Big Data's specific impact on the insurance industry Learn how advanced analytics can revolutionise the industry Bring Big Data out of IT and into strategy, management, marketing, and more Big Data and analytics is changing business - but how? The majority of Big Data guides discuss data collection, database administration, advanced analytics, and the power of Big Data - but what do you actually do with it? Big Data and Analytics for Insurers answers your questions in real, everyday business terms, tailored specifically to the insurance industry's unique needs, challenges, and targets.

Ernst & Young's Personal Financial Planning Guide-Ernst & Young LLP 2004-10-06 If you want to take control of your financial future and unlock the doors to financial success, you must have a plan that will allow you to find good investments, reduce taxes, beat inflation, and properly manage money. Whether you're new to financial planning or a seasoned veteran, this updated edition of Ernst & Young's Personal Financial Planning Guide provides valuable information and techniques you can use to create and implement a consistent personalized financial plan. It also takes into consideration the new tax rules that affect home ownership, saving for college, estate planning, and many other aspects of your financial life. Filled with in-depth insight and financial planning advice, this unique guide can help you: * Set goals * Build wealth * Manage your finances * Protect your assets * Plan your estate and investments It will also show you how to maintain a financial plan in conjunction with life events such as: * Getting married * Raising a family * Starting your own business * Aging parents * Planning for retirement Financial planning is a never-ending process,

and with Ernst & Young's Personal Financial Planning Guide, you'll learn how to tailor a plan to help you improve all aspects of your financial life.

Management Information Guide- 1971

Economics of Agricultural Crop Insurance: Theory and Evidence-Darrell L. Hueth 2012-12-06 Government subsidized crop insurance has been used by a number of developed countries as a mechanism to reduce farm income instability by reducing yield risks. This book provides an in-depth analysis and evaluation of government provided crop insurance in developed countries. The book is organized into three sections: Part one presents background material on crop insurance programs in the U.S., Canada and selected other countries. Part two provides some analytical models of multiple peril crop insurance which suggest the possibility of modification of design which could improve performance and which explores theoretical linkages between crop insurance decisions and other producer decisions previously not analyzed. The main part of the book is Part three, where the results of a series of empirical studies using databases particularly designed to answer crop insurance questions are presented. This part of the book tests a number of the hypotheses which were raised in Parts one and two regarding reasons for the view widely held by economists that crop insurance has not functioned well.

Financial Services Fact Book-Insurance Information Institute 2009

The Intended and Unintended Effects of U.S. Agricultural and Biotechnology Policies-Joshua S. Graff Zivin 2012 Using economic models and empirical analysis, this volume examines a wide range of agricultural and biofuel policy issues and their effects on American agricultural and related agrarian insurance markets. Beginning with a look at the distribution of funds by insurance programs—created to support farmers but often benefiting crop processors instead—the book then examines the demand for biofuel and the effects of biofuel policies on agricultural price uncertainty. Also discussed are genetically engineered crops, which are assuming an increasingly important role in arbitrating tensions between energy production, environmental protection, and the global food supply. Other contributions discuss the major effects of genetic engineering on worldwide food markets. By addressing some of the most challenging topics at the intersection of agriculture and biotechnology, this volume informs crucial debates.
