Death and Dying, Life and Living-Charles A. Corr 1994 This unique book discusses the challenging issues in life, death, and dying as it applies to everyone: people who are facing death, those who are coping with dying or with bereavement, those struggling with decisions about euthanasia or who are contemplating suicide, and those who wish to teach children about the place of death in life. The book provides a solid foundation readers can use as they pursue their own insights, emphases, and special interests in this field. The authors illustrate that while we cannot make death disappear from our lives, we can learn from each other, talk about death together, and determine how to live more productive lives in the face of death.

Speaking for the Dying-Susan P. Shapiro 2019-06-12 Seven in ten Americans over the age of age of sixty who require medical decisions in the final days of their life lack the capacity to make them. For many of us, our biggest, life-and-death decisions—literally—will therefore be made by someone else. They will decide whether we live or die; between long life and quality of life; whether we receive heroic interventions in our final hours; and whether we die in a hospital or at home. They will determine whether our wishes are honored and choose between fidelity to our interests and what is best for themselves or others. Yet despite their critical role, we know remarkably little about how our loved ones decide for us. Speaking for the Dying tells their story, drawing on daily observations over more than two years in two intensive care units in a diverse urban hospital. From bedsides, hallways, and conference rooms, you will hear, in their own words, how physicians really talk to families and how they respond. You will see how decision makers are selected, the interventions they weigh in on, the information they seek and evaluate, the values and memories they draw on, the criteria they weigh, the outcomes they choose, the conflicts they become embroiled in, and the challenges they face. Observations also provide insight into why some decision makers authorize one aggressive intervention after the next while others do

not—even on behalf of patients with similar problems and prospects. And they expose the limited role of advance directives in structuring the process decision makers follow or the outcomes that result. Research has consistently found that choosing life or death for another is one of the most difficult decisions anyone can face, sometimes haunting families for decades. This book shines a bright light on a role few of us will escape and offers steps that patients and loved ones, health care providers, lawyers, and policymakers could undertake before it is too late.

Life Lessons-Elisabeth Kübler-Ross 2012-01-24 Is this really how I want to live my life? Each one of us at some point asks this question. The tragedy is not that life is short but that we often see only in hindsight what really matters. In this, her first book on life and living, Elisabeth Kubler-Ross joins with David Kessler to guide us through the practical and spiritual lessons we need to learn so that we can live life to its fullest in every moment. Many years of working with the dying have shown the authors that certain lessons come up over and over again. Some of these lessons are enormously difficult to master, but even the attempts to understand them can be deeply rewarding. Here, in fourteen accessible chapters, from the Lesson of Love to the Lesson of Happiness, the authors reveal the truth about our fears, our hopes, our relationships, and, above all, about the grandness of who we really are.

Living Is Dying-Dzongsar Jamyang Khyentse 2020-03-31 An insightful collection of teachings about death and dying to help face life's greatest mystery calmly and with equanimity. Lifetimes of effort go into organizing, designing, and structuring every aspect of our lives, but how many people are willing to contemplate the inevitability of death? Although dying is an essential part of life, it is an uncomfortable topic that most people avoid. With no idea what will happen when we die and a strong desire to sidestep the conversation, we make all kinds of assumptions. Living Is Dying collects teachings about death and the bardos that have been passed down through a long lineage of brilliant Buddhist masters, each of whom went to great lengths to examine the process in minute detail. Renowned author and teacher Dzongsar Jamyang Khyentse responds to the most common questions he's been asked about death and dying--exploring how one prepares for death, what to say to a loved one who is dying, and prayers and practices to use as a handhold when approaching the unknown territory of death. Whether you are facing death today or decades from now, preparing for it can help to allay your worst fears and help you appreciate what it means to be truly alive.

From the beginning we understood that what we were about to face was not just for us but for the benefit of others. And so I share the hardest, most blessed nine months of our lives with the prayer that it will bless and encourage you.

Death, Dying and the Ending of Life, Volumes I and II-Leslie P. Francis 2019-01-15 The two volumes of Death, Dying, and the Ending of Life present the core of recent philosophical work on end-of-life issues. Volume I examines issues in death and consent: the nature of death, brain death and the uses of the dead and decision-making at the end of life, including the use of advance directives and decision-making about the continuation, discontinuation, or futility of treatment for competent and incompetent patients and children. Volume II, on justice and hastening death, examines whether there is a difference between killing and letting die, issues about physician-assisted suicide and euthanasia and questions about distributive justice and decisions about life and death.

The American Book of Living and Dying-Richard F. Groves 2015-12-16 For most people, the thought of dying or caring for a terminally ill friend or family member raises fears and questions as old as humanity: What is a "good death"? What appropriate preparations should be made? How do we best support our loved ones as life draws to its close? In this nondenominational handbook, Richard F. Groves and Henriette Anne Klauser provide comfort, direction, and hope to the dying and their caregivers through nine archetypal stories that illustrate the most common end-of-life concerns. Drawing from personal experiences, the authors offer invaluable guidance on easing emotional pain and navigating this difficult final passage. With a compelling new preface, this edition also features an overview of the hospice movement; a survey of Celtic, Tibetan, Egyptian, and other historic perspectives on the sacred art of dying; as well as various therapies, techniques, and rituals to alleviate suffering, stimulate reflection, and strengthen interpersonal bonds. The American Book of Living and Dying gives us courage to trust our deepest instincts, and reminds us that by telling the stories of those who have passed, we remember, honor, and continue to learn from them.

Approaching Death-Committee on Care at the End of Life 1997-10-30 When the end of life makes its inevitable appearance, people should be able to expect reliable, humane, and effective caregiving. Yet too many dying people suffer unnecessarily. While an "overtreated" dying is feared, untreated pain or emotional abandonment are equally frightening. Approaching Death reflects a wide-ranging effort to understand what we know about care at the end of life, what we have yet to learn, and what we know but do not adequately apply. It seeks to build understanding of what constitutes good care for the dying and offers recommendations to decisionmakers that address specific barriers to achieving good care. This volume offers a profile of when, where, and how Americans die. It examines the dimensions of caring at the end of life: Determining diagnosis and prognosis and communicating these to patient and family. Establishing clinical and personal goals. Matching physical, psychological, spiritual, and practical care strategies to the patient's values and circumstances. Approaching Death considers the dying experience in hospitals, nursing homes, and other settings and the role of interdisciplinary teams and managed care. It offers perspectives on quality measurement and improvement, the role of practice guidelines, cost concerns, and legal issues such as assisted suicide. The book proposes how health professionals can become better prepared to care well for those who are dying and to understand that these are not patients for whom "nothing can be done."

Psychology of Death and Dying-Dr. John C. Morgan 2006-04-01 Sooner or later each one of us faces death, our own or others we care about. And yet, few take time beforehand to think about these endings, and in the process may lose the wisdom of the ages that comes after facing death. Perhaps this explains why when Plato was asked to summarize his philosophy he reportedly said: Practice dying. He understood that dying is what each one of us does throughout our lives, whether it is leaving home the first time to go to school or departing from this planet when our lives end. If we learn how to die--to let go and get our egos out of the way--we will have gained wisdom about how best to live. This brief yet comprehensive book deals not only with the philosophical and psychological meaning of death but its practical implications for our lives. Written by two brothers who have taught philosophy, ethics, psychology, and religion at community colleges and four-year private colleges, this book can be used in many learning situations, whether part of courses in philosophy, ethics, psychology, or counseling; or for short-term workshops or continuing education courses for students in human services, health care, social work, or any of the helping professions.

On Death and Dying-Elisabeth Kübler-Ross 2009 Denial, anger, bargaining, depression and acceptance. The five stages of grief, first formulated in this hugely influential work forty years ago, are now part of our common understanding of bereavement. The five stages were first identified by Elisabeth Kübler-Ross in her work with dying patients at the University of Chicago and were considered phases that all or most people went through, when faced with the prospect of their own death. They are now often accepted as a response to any major life change. However, in spite of these terms being in general use, the subject of death is still surrounded by conventional attitudes and reticence that offer only fragile comfort because they evade the real issues. This groundbreaking book is still relevant "giving a voice to dying people and exploring what impending death means to them, often in their own words. People speak about their experience of dying, their relief in expressing their fear and anger and being able to move forward to a state of acceptance and peace. Ideal for all those with an interest in bereavement or the five stages of grief, this book contains a new extended introduction from Professor Allan Kellehear. This additional chapter re-examines On Death and Dying looking at how it has influenced contemporary thought and practice.

Living Into Death, Dying Into Life-Peter C. Phan 2014-10-20 Peter C. Phan, noted for his theological exploration of the afterlife, presents an easily understood study of what eternal life means from a Catholic/Christian view. In Living Into Death, Dying Into Life: A Christian Theology of Death and Life Eternal Professor Phan elaborates and expands material first presented in twelve lectures. Drawing heavily from the Christian Tradition, Phan identifies sections in the Old Testament and especially the New Testament that are relevant to eschatology, which is the search for an understanding of God's final kingdom. Seen in the preaching of Jesus as presented in the Gospels, the Kingdom of God is both here now and also fulfilled at the end of time. Professor Phan is able to connect Scriptural representations of the afterlife with the ramifications of eternal life in our present everyday life. This book is intended for audiences seeking to understand the death of a loved one, an impending death, or death in general; as well as those who are seeking a general spiritual or theological understanding of eternal life as presented by Jesus Christ.

Dying, Death, & Bereavement in Social Work Practice-Terry A. Wolfer 2008 Practitioners who work with clients at the end of their lives face difficult decisions concerning the client's self-determination, the kind of death he or she will have, and the prolongation of life. They must also remain sensitive to the beliefs and needs of family members and the legal, ethical, and spiritual ramifications of the client's death. Featuring twenty-three decision cases based on interviews with professional social workers, this unique volume allows students to wrestle with the often incomplete and conflicting information, ethical issues, and time constraints of actual cases.
