Rome and The Guidebook Tradition-Anna Blennow 2019-04-01 To this day, no comprehensive academic study of the development of guidebooks to Rome over time has been performed. This book treats the history of guidebooks to Rome from the Middle Ages up to the early twentieth century. It is based on the results of the interdisciplinary research project Topos and Topography, led by Anna Blennow and Stefano Fogelberg Rota. From the case studies performed within the project, it becomes evident that the guidebook as a phenomenon was formed in Rome during the later Middle Ages and early Renaissance. The elements and rhetorical strategies of guidebooks over time have shown to be surprisingly uniform, with three important points of development: a turn towards a more user-friendly structure from the seventeenth century and onward; the so-called ‘Baedeker effect’ in the mid-nineteenth century; and the introduction of a personalized guiding voice in the first half of the twentieth century. Thus, the ‘guidebook tradition’ is an unusually consistent literary oeuvre, which also forms a warranty for the authority of every new guidebook. In this respect, the guidebook tradition is intimately associated with the city of Rome, with which it shares a constantly renovating yet eternally fixed nature.

The Two Faces of Islam-Stephen Schwartz 2003-09-09 Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa’uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America’s Islamic community and about U.S. oil companies sanitizing Saudi Arabia’s image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

The Light of Nature-J.D. North 2012-12-06 This volume of essays is meant as a tribute to Alistair Crombie by some of those who have studied with him. The occasion of its publication is his seven tieth birthday - 4 November 1985. Its contents are a reflection - or so it is hoped - of his own interests, and they indicate at the same time his influence on subjects he has pursued for some forty years. Born in Brisbane, Australia, Alistair Cameron Crombie took a first degree in zoology at the University of Melbourne in 1938, after which he moved to Je sus College, Cambridge. There he took a doctorate in the same subject (with a dissertation on population dynamics - foreshadowing a later interest in the history of Darwinism) in 1942. By this time he had taken up a research position with the Ministry of Agriculture and Fisheries in the Cambridge Zoological La boratory, a position he left in 1946, when he moved to a lectureship in the his tory and philosophy of science at University College, London. H. G. Andrew ka and L. C. Birch, in a survey of the history of insect ecology (R. F. Smith, et al., History of Entomology, 1973), recognise the importance of the works of Crombie (with which they couple the earlier work of Gause) as the principal sti mulus for the great interest taken in interspecific competition in the mid 1940s.

Feminism and the Politics of Travel After the Enlightenment-Yaël Rachel Schlick 2012-01 Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, Feminism and the Politics of Travel After the Enlightenment explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel’s utopian dimension and feminism’s utopian ideals have intermittently fed off each other in productive ways. Travel’s gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert George Sand, Robyn Davidson, and Sara Wheeler.

Historical Seismology-Julien Fréchet 2008-08-22 Modern seismology has faced new challenges in the study of earthquakes and their physical characteristics. This volume is dedicated to the use of new approaches and presents a state-of-the-art in historical seismology. Selected historical and recent earthquakes are chosen to document and constrain related seismic parameters using updated methodologies in the macroseismic analysis, field observations of damage distribution and tectonic effects, and modelling of seismic waveforms.

Discourse on the State of the Jews-Simone Luzzatto 2019-07-08 In 1638, a small book of no more than 92 pages in octavo was published “apresso Gioanne Calleoni” under the title “Discourse on the State of the Jews and in particular those dwelling in the illustrious city of Venice.” It was dedicated to the Doge of Venice and his counsellors, who are labelled “lovers of Truth.” The author of the book was a certain Simone (Simba) Luzzatto, a native of Venice, where he lived and died, serving as rabbi for over fifty years during the course of the seventeenth century. Luzzatto’s political thesis is simple and, at the same time, temerarious, if not revolutionary: Venice can put an end to its political decline, he argues, by offering the Jews a monopoly on overseas commercial activity. This plan is highly recommendable because the Jews are “wellsuited for trade,” much more so than others (such as “foreigners,” for example). The rabbi opens his argument by recalling that trade and usury are the only occupations permitted to Jews. Within the confines of their historical situation, the Venetian Jews became particularly skilled at trade with partners from the Eastern Mediterranean countries. Luzzatto’s argument is that this talent could be put at the service of the Venetian government in order to maintain – or, more accurately, recover – its political importance as an intermediary between East and West. He was the first to define the role of the Jews on the basis of their economic and social functions, disregarding the classic categorisation of Judaism’s alleged privileged religious status in world history. Nonetheless, going beyond the socio-economic arguments of the book, it is essential to point out Luzzatto’s resort to sceptical strategies in order to plead in defence of the Venetian Jews. It is precisely his philosophical and political scepticism that makes Luzzatto’s texts so unique. This edition aims to grant access to his works and thought to English-speaking readers and scholars. By approaching his texts from this point of view, the editors hope to open a new path in research into Jewish culture and philosophy that will enable other scholars to develop new directions and new perspectives, stressing the interpenetration between Jews and the surrounding Christian and secular cultures.

A History of Architectural Conservation-Jukka Jokilehto 2017-10-20 The first book to provide a full history of the development of architectural conservation, A History of Architectural Conservation is considered a landmark publication by architectural conservation students and professionals the world over. Twenty years after its first publication, this new edition of Jukka Jokilehto’s groundbreaking book continues the story to bring the history of architectural conservation right up to the modern day. Jokilehto draws on his distinguished career of over 40 years at ICCROM (International Centre for the Study of the Preservation and Restoration of Cultural Property, founded by UNESCO) to provide studies from Europe, the Middle East, the USA, Japan, India, China, Australia and South America. This accessible and well-written introduction to the history and theory of architectural conservation is richly illustrated in full colour and will be an essential go-to guide for students and practitioners worldwide.

Wingfield College and Its Patrons-Peter Bloore 2015 The 650th anniversary of the foundation of Wingfield College was the occasion for a special two-day symposium marking the culmination of a three-year UEA-funded research project into the college and castle. The building projects of the late medieval aristocracy focused on their homes and the monasteries, churches or chantry foundations under their patronage where their family were buried and commemorated. This commemoration allowed a visual celebration of their achievements, status and lineage, the scale and prestige of which reflected on the fortunes of the family as a whole. Wingfield is explored in the context of both the actual building of the castle, chantry chapel and the college, and that of the symbolic function of these as a demonstration ion of aristocratic status. The contributions to this book examine many topics which have hitherto been neglected, such as the archaeology of the castle, which had never been excavated, the complexity history of the college’s architecture, and the detailed study of the monuments in the church. The latest techniques are used to reconstruct the college and castle, with a DVD to demonstrate these. And the context of the family and its fortunes are explored in chapters on the place of the de la Pole in fifteenth century history, as soldiers, administrators and potential claimants to the throne.

Social Robotics-Haizhou Li 2010-11-05 The papers in this volume were the fruitful scientific results of the Second International Conference on Social Robotics (ICSR), held during November 23–24, 2010 in Singapore, which was jointly organized by the Social Robotics Laboratory (SRL), Interactive Digital Media Institute (IDMI), the National University of Singapore and 2 Human Language Technology Department, the Institute for Infocomm Research (I R), A*STAR, Singapore. These papers address a range of topics in social robotics and its applications. We received paper submissions from America, Asia, and Europe. All the papers were reviewed by at least three referees from the 32-member Program Committee who were assembled from the global community of social robotics researchers. This v- ume contains the 42 papers that were selected to report on the latest developments and studies of social robotics in the areas of human–robot interaction; affective and cognitive sciences for interactive robots; design philosophies and software archit- tures for robots; learning, adaptation and evolution of robotic intelligence; and mec- tronics and intelligent control.

The Enjoyment of Music-Joseph Machlis 2007-05-03 Used by more than 3.5 million students, The Enjoyment of Music has been the most trusted introduction to music for over five decades. The Tenth Edition reaffirms this status in a thoughtful revision offering a more diverse repertory and a stronger emphasis on the cultural significance of musical styles and periods. Responding directly to the needs of today’s students, Professor Forney has completely rewritten the chapters on musical elements for accessibility and integrated the textbook material with powerful new multimedia learning tools. These resources—the Student Resource DVD, StudySpace, and the Online Listening Lab—reinforce important concepts from the text through interactive, hands-on learning.

Writing Beloveds-Aileen A. Feng 2016-12-09 “This study considers the way in which a poetic convention, the beloved to whom Renaissance amatory poetry was addressed, becomes influential political rhetoric, an instrument that both men and women used to shape and justify their claims to power. The author argues that Petrarchan poetic conventions were part of a social discourse that signaled anxiety concerning the rising place of women as intellectual interlocators, public figures, and patrons of the arts.”--

Jacopo Strada and Cultural Patronage at the Imperial Court-Dirk Jacob Jansen 2019-03-14 Dirk Jacob Jansen provides an overview of the life and career of the sixteenth-century cosmopolitan courtier, architect and antiquary Jacopo Strada.

Aspects of the Performative in Medieval Culture-Manuele Gragnolati 2010 The volume assesses performative structures within a variety of medieval forms of textuality, from vernacular literature to records of parliamentary proceedings, from prayer books to musical composition. Three issues are central to the volume: the role of ritual speech acts; the way in which authorship can be seen as created within medieval texts rather than as a given category; finally, phenomena of help, created and situated between citation and repetition, especially in forms which appropriate and transform literary tradition. The volume encompasses articles by historians and musicologists as well as literary scholars, It spans European literature from the West (French, German, Italian) to the East (Church Slavonic), vernacular and Latin; it contrasts modes of liturgical meditation in the Western and Eastern Church with secular plays and song, and it brings together studies on the character of ‘voice’ in major medieval authors such as Dante with examples of Dante-reception in the early twentieth century.

University Trends-Jonathan Coulson 2014-09-15 A university campus is a place with special resonance: conjuring images of cloistered quadrangles and wood-panelled libraries, often echoing centuries of scholarly tradition. And yet it is also a place of cutting-edge science, interactive learning, youth, vibrancy, and energy. It is this dual nature which makes the physical environment of a university so dynamic as well as a highly challenging landscape to design and manage successfully. Today, the scale of the pressures and the rate of change facing higher education institutions are greater than ever. Squeezed public spending, rising tuition fees and the growing education ambitions of developing nations are set against a backdrop of rapid technological progress and changing pedagogies. What are the repercussions for the physical realities of university planning and architecture? And how are university campuses adapting to contend with these pressures? University Trends introduces the most significant, widespread and thought-provoking trends in campus design today. Part 1 identifies current trends such as starchitecture, large-scale campus extensions, adaptive re-use, and international branch campuses. Part 2 profiles each trend via highly-illustrated, global case studies of well-publicised as well as lesser-known projects. The essential guide to current and future trends in campus design.

Preserving New York-Anthony Wood 2013-10-28 Preserving New York is the largely unknown inspiring story of the origins of New York City’s nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York’s history to future generations tasked with protecting the city’s landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

The Elusive Case of Lingua Franca-Joanna Nolan 2019-12-31 This book explores many of the unanswered questions surrounding the original and eponymous Lingua Franca, a language spoken by peoples across the Mediterranean and North Africa for nearly three centuries. Allowing people from different countries, classes and cultures to interact with one another for the purposes of trade, piracy, slavery and diplomacy - among many other domains - Lingua Franca was lexified by Romance languages, including Italian and its dialects, Spanish, French and Portuguese, with possible Turkish and Arabic influences as well. The potential unreliability of source accounts, the blurring of fact and fiction across documentary and dramatic sources, and the linguistic biases and plurilingual repertoire of many of Lingua Franca’s speakers all combine to make Lingua Franca an elusive topic for examination. The author draws upon previously unexplored documentary evidence, including correspondence from the era found in The National Archives at Kew, to shed light on the multilingual and plurilingual landscape that fostered Lingua Franca’s development and spread, and its influence on the written domain. This book will be of interest to students and scholars of colonial history, linguistic anthropology, sociolinguistics and language contact.

The Complete Idiot’s Guide to Computer Basics, 5th Edition-Joe Kraynak 2009-02-03 The fifth edition of The Complete Idiot’s Guide to Computer Basics places the reader in charge of the computer, rather than the other way round, and places the focus on software troubleshooting rather than hardware techno-babble. The reader wants to do something practical with his or her computer - this book shows them how. It covers basic office programs and how to manage photo, video and music files. It offers advice on safe web-surfing, including coverage of newsgroups, message boards and mailing lists. There are new green computing initiatives that help protect the environment. It includes maintenance and upgrading information.

Virtual Crowds-Mubbashir Kapadia 2015-11-01 This volume presents novel computational models for representing digital humans and their interactions with other virtual characters and meaningful environments. In this context, we describe efficient algorithms to animate, control, and author human-like agents having their own set of unique capabilities, personalities, and desires. We begin with the lowest level of footstep determination to steer agents in collision-free paths. Steering choices are controlled by navigation in complex environments, including multi-domain planning with dynamically changing situations. Virtual agents are given perceptual capabilities analogous to those of real people, including sound perception, multi-sense attention, and understanding of environment semantics which affect their behavior choices. The roles and impacts of individual attributes, such as memory and personality are explored. The animation challenges of integrating a number of simultaneous behavior and movement demands on an agent are addressed through an open source software system. Finally, the creation of stories and narratives with groups of agents subject to planning and environmental constraints culminates the presentation.

Newton’s Football-Allen St. John 2013-11-19 In the bestselling tradition of Freakonomics and Scorecasting comes a clever and accessible look at the big ideas underlying the science of football. Did you hear the one about the MacArthur genius physicist and the NFL coach? It’s not a joke. It’s actually an innovative way to understand chaos theory, and the remarkable complexity of modern professional football. In Newton’s Football, journalist and New York Times bestselling author Allen St. John and TED Speaker and former Yale professor Ainnisa Ramirez explore the unexpected science behind America’s Game. Whether it’s Jerry Rice finding the common ground between quantum physics and the West Coast offense or an Ivy League biologist explaining—at a granular level—exactly how a Big Mac morphs into an outside linebacker, Newton’s Football illuminates football—and science—through funny, insightful stories told by some of the world’s sharpest minds. With a clear-eyed empirical approach—and an enduring affection for the game—St. John and Ramirez address topics that have long beguiled scientists and football fans alike, including:
• the unlikely evolution of the football (or, as they put it, “The Divinely Random Bounce of the Prolate Spheroid”)
• what Vince Lombardi has in common with Isaac Newton
• how the hardwired behavior of monkeys can explain a head coach’s reluctance to go for it on fourth-down
• why a gruesome elevator accident jump-started the evolution of placekicking
• how Teddy Roosevelt saved football using the same behavioral science concept that Dreamworks would use to save Shrek
• why woodpeckers don’t get concussions
• how better helmets actually made the game more dangerous
Every Sunday the NFL shares a secret with only its savviest fans: The game isn’t just a clash of bodies, it’s a clash of ideas. The greatest minds in football have always possessed an instinctual grasp of science, understanding the big ideas and gritty realities that inform the game’s rich past, as well as its increasingly uncertain future. Blending smart reporting, counterintuitive creativity, and compelling narrative, Newton’s Football takes gridiron analysis to the next level, giving fans a book that entertains, enlightens, and explains the game anew. Praise for Newton’s Football “It was with great interest that I read Newton’s Football. I’m a fan of applying of science to sport and Newton’s Football truly delivers. The stories are as engaging as they are informative. This is a great read for all football fans.”—Mark Cuban “A delightfully improbable book putting science nerds and sports fans on the same page.”—Booklist “This breezily-written but informative book should pique the interest of any serious football fan in the twenty-first century.”—The American Spectator “The authors have done a worthy job of combining popular science and sports into a work that features enough expertise on each topic to satisfy nerds and jocks alike. . . . The writers succeed in their task thanks to in-depth scientific knowledge, a wonderful grasp of football’s past and present, interviews with a wide array of experts, and witty prose. . . . [Newton’s Football is] fun and thought-provoking, proving that football is a mind game as much as it is a ball game.”—Publishers Weekly From the Hardcover edition.

Memoirs of the Dukes of Urbino, illustrating the Arms, Arts, and Literature of Italy, from 1440 to 1630-James Dennistoun 1851

Clapton’s Guitar-Allen St. John 2005-10-12 In 1994, Eric Clapton came across a Wayne Henderson guitar in a recording studio and decided on the spot that he had to have one. Rarer than Stradivarius violins, these musical works of art are built from near-extinct Brazilian Rosewood, Appalachian spruce, black ebony, and fine mother-of-pearl. With Henderson’s keen ear for the vibrations of each piece of wood he uses, each note that comes out of them has the power of a cannon and the sweetness of maple syrup. In Clapton’s Guitar, Allen St. John recounts how a perfect acoustic guitar comes into the world and how an artist gauges perfection. Wayne Henderson, master luthier and genius in blue jeans, will tell you that he simply puts penknife to wood and carves away “everything that isn’t a guitar.” This is the story of a master artist, set deep in the mountains of southwestern Virginia in a brick, one-story guitar shop, as busy and chaotic inside as it is simple outside. The space is well-lighted, cluttered with power tools, air hoses, and guitar bodies in various stages of completion. It is in this modest shop that Wayne Henderson crafts some of the most highly coveted acoustic guitars on earth, including one very special instrument he built for Eric Clapton. Normally, there is a ten-year wait for a Henderson guitar, and St. John finds there are no exceptions even for an iconic figure like Clapton. But seeing it as a shortcut to getting his own guitar done, St. John jump-starts the process, and then takes readers with him on a mesmerizing journey into the heart of high-end instrument making with the man The Washington Post calls the “Mad Scientist of Mountain Music.” Henderson, a small-town wise man, is not only the star of this book as a master guitar maker but also is the star of any stage he sets foot on as a master guitar player, equally at home at Carnegie Hall or the local VFW hall. Around this drolly humorous man circulates a small coterie of colorful characters and inspired musicians, who welcome you for an all-too-brief visit. By book’s end, you too will want to be Wayne Henderson’s friend. In a rich tapestry of folklore and folksiness, St. John tells the story of building the Clapton guitar in loving detail, from the centuries-old forests where great tonewood grows, to the auction floor of Christie’s where one of Clapton’s guitars commands over \$700,000. It’s also a loving look at Wayne’s corner of the world, the Blue Ridge mountain hamlets where American traditional music was born, and of Wayne’s hometown of Rugby, Virginia, population 7, where the winding roads have kept progress at bay. Whether you love old-time music, unplugged rock, traditional American craftsmanship, or simply gifted storytelling, Clapton’s Guitar is an engaging work that you will want to savor and share with friends.
