Denver Inside and Out-Michael Childers 2011-08-01 Denver turned 150 just a few years ago--not too shabby for a city so down on its luck in 1868 that Cheyenne boosters deemed it "too dead to bury." Still, most of the city's history is a recent memory: Denver's entire story spans just two human lifetimes. In Denver Inside and Out, eleven authors illustrate how pioneers built enduring educational, medical, and transportation systems; how Denver's social and political climate contributed to the elevation of women; how Denver residents wrestled with-and exploited-the city's natural features; and how diverse cultural groups became an essential part of the city's fabric. By showing how the city rose far above its humble roots, the authors illuminate the many ways that Denver residents have never stopped imagining a great city. Published in time for the opening of the new History Colorado Center in Denver in 2012, Denver Inside and Out hints at some of the social, economic, legal, and environmental issues that Denverites will have to consider over the next 150 years.

The Metropolitan Revolution-Bruce Katz 2013-06-19 Across the US, cities and metropolitan areas are facing huge economic and competitive challenges that Washington won't, or can't, solve. The good news is that networks of metropolitan leaders - mayors, business and labor leaders, educators, and philanthropists - are stepping up and powering the nation forward. These state and local leaders are doing the hard work to grow more jobs and make their communities more prosperous, and they're investing in infrastructure, making manufacturing a priority, and equipping workers with the skills they need. In The Metropolitan Revolution, Bruce Katz and Jennifer Bradley highlight success stories and the people behind them. · New York City: Efforts are under way to diversify the city's vast economy · Portland: Is selling the "sustainability" solutions it has perfected to other cities around the world · Northeast Ohio: Groups are using industrial-age skills to invent new twenty-first-century materials, tools, and processes · Houston: Modern settlement house helps immigrants climb the employment ladder · Miami: Innovators are forging strong ties with Brazil and other nations · Denver and Los Angeles: Leaders are breaking political barriers and building world-class metropolises · Boston and Detroit: Innovation districts are hatching ideas to power these economies for the next century The lessons in this book can help other cities meet their challenges. Change is happening, and every community in the country can benefit. Change happens where we live, and if leaders won't do it, citizens should demand it. The Metropolitan Revolution was the 2013 Foreword Reviews Bronze winner for Political Science.

To Make a Mayor-Deborah L. Tucker 1995 To Make a Mayor chronicles the events that followed a surprising act by two-term Mayor Federico Pena on Wednesday, November 28, 1990. Pena willingly giving up his seat of power would prove to be the first in a series of incredible twists and turns that would make Denver's 1991 mayoral race forever distinctive. What political observers thought would be a lackluster race with front-runner District Attorney Norm Early attaining an easy victory turned into one of the most fascinating municipal stories of all time. Instead of Early, the people chose Wellington Webb, the clear underdog with one-third the campaign funds of his opponent, to succeed Pena. To Make a Mayor is a marvelous study in the fallibility of public opinion polls; a repudiation of the classic role that money and influence play in municipal politics; and a complete disavowal of what conventional politics declare is necessary to be mayor.

Intercultural Urbanism-Dean Saitta 2020-07-23 Cities today are paradoxical. They are engines of innovation and opportunity, but they are also plagued by significant income inequality and segregation by ethnicity, race, and class. These inequalities and segregations are often reinforced by the urban built environment: the planning of space and the design of architecture. This condition threatens attainment of wider social and economic prosperity. In this innovative new study, Dean Saitta explores questions of urban sustainability by taking an intercultural, trans-historical approach to city planning. Saitta uses a largely untapped body of knowledge—the archaeology of cities in the ancient world—to generate ideas about how public space, housing, and civic architecture might be better designed to promote inclusion and community, while also making our cities more environmentally sustainable. By integrating this knowledge with knowledge generated by evolutionary studies and urban ethnography (including a detailed look at Denver, Colorado, one of America's most desirable and fastest growing 'destination cities' but one that is also experiencing significant spatial segregation and gentrification), Saitta's book offers an invaluable new perspective for urban studies scholars and urban planning professionals."
