Quarterly Review of Higher Education Among Negroes- 1939

The Quarterly Review of Higher Education Among Negroes- 1939

Drive-Daniel H. Pink 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction-at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose-and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Mosby's Comprehensive Review of Radiography-William Joseph Callaway 1998 This outstanding text offers a comprehensive review, in outline form, of all major subject areas covered on the American Registry of Radiologic Technology (ARRT) exam in radiography. It provides review information, question and answer sections, a mock registry exam, information on preparing resumes, interviewing and career planning all in one comprehensive resource. The disk includes two 200-question mock exams. 119 illus.

Raising Black Students' Achievement Through Culturally Responsive Teaching-Johnnie McKinley 2011-03-30 In this book, Johnnie McKinley presents the results of her in-depth study of a group of teachers in grades 3 thru 8 who managed to radically narrow the achievement gap between their black and white students by using a set of culturally responsive strategies in their classrooms. McKinley uses the educators' own words and illustrative "virtual walkthroughs" of lessons in action to examine these strategies in detail. In addition, the book includes * An overview of the research literature on effective responses to the achievement gap; * Instructions for conducting classroom walkthroughs, including a series of feedback forms that teachers can use to conduct walkthroughs in their schools; and * A comprehensive guide to the author's Teaming for Culturally Responsive Classrooms (TCRC) model—an innovative multistep framework for assessing the cultural responsiveness of teaching strategies in schools. Educators have been struggling for decades to remedy the disparity in academic outcomes between black and white students. This book shows how one remarkable group of teachers harnessed the power of culturally responsive teaching to do just that. By following the path outlined in Raising Black Students' Achievement Through Culturally Responsive Teaching, you too can help your black students to become engaged, self-confident, and successful learners.

Educational Evaluation: Classic Works of Ralph W. Tyler-George F. Madaus 2012-12-06 I personally learned to know Ralph Tyler rather late in his career when, in the 1960s, I spent a year as a Fellow at the Center for Advanced Study in the Behavioral Sciences at Stanford. His term of office as Director of the Center was then approaching its end. This would seem to disqualify me thoroughly from preparing a Foreword to this "Classic Works. " Many of his colleagues and, not least, of his students at his dear Alma Mater, the University of Chicago, are certainly better prepared than I to put his role in American education in proper perspective. The reason for inviting me is, I assume, to bring out the influence that Tyler has had on the international educational scene. I am writing this Foreword on a personal note. Ralph Tyler's accomplishments in his roles as a scholar, policy maker, educational leader, and statesman have been amply put on record in this book, not least in the editors' Preface. My reflections are those of an observer from abroad but who, over the last 25 years, has been close enough to overcome the aloofness of the foreigner. Tyler has over many years been criss-crossing the North American con tinent generously giving advice to agencies at the federal, state, and local levels, lecturing, and serving on many committees and task forces that have been instrumental in shaping American education.

Closing the Poverty and Culture Gap-Donna Walker Tileston 2009-03-31 Use instructional practices that lead students of poverty and diverse cultures to success! Donna Walker Tileston and Sandra K. Darling provide instructional strategies to help teachers improve learning in students of diverse cultures and poverty. This research-based book presents a six-part framework that builds on students' assets and strengths. The authors discuss: Why some cultures are “turned off” by typical motivational approaches and what educators can do to reach students What research says about the brain's desire to learn How teachers can build on students' prior knowledge The importance of resiliency Teaching procedural and declarative knowledge and preparing students for tests
