A Patriot's History of the United States-Larry Schweikart 2004-12-29 For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

Into the Cool-Eric D. Schneider 2005-06 Demonstrates how the second law of thermodynamics--which refers to energy's tendency to change from being concentrated in one place to being spread out over time--is behind evolution, ecology, economics, and even the origins of life itself in this scientific tour de force that explores how complex systems emerge, enlarge, and reproduce in a chaotic world.

Captivity & Sentiment-Michelle Burnham 2000-10-03 In a radically new interpretation and synthesis of highly popular 18th- and 19th-century genres, Michelle Burnham examines the literature of captivity, and, using Homi Bhabha's concept of interstitiality as a base, provides a valuable redescription of the ambivalent origins of the US national narrative. Stories of colonial captives, sentimental heroines, or fugitive slaves embody a "binary division between captive and captor that is based on cultural, national, or racial difference," but they also transcend these pre-existing antagonistic dichotomies by creating a new social space, and herein lies their emotional power. Beginning from a simple question on why captivity, particularly that of women, so often inspires a sentimental response, Burnham examines how these narratives elicit both sympathy and pleasure. The texts carry such great emotional impact precisely because they "traverse those very cultural, national, and racial boundaries that they seem so indelibly to inscribe. Captivity literature, like its heroines, constantly negotiates zones of contact," and crossing those borders reveals new cultural paradigms to the captive and, ultimately, the reader.

Excellence in Teacher Education-Linda Darling-Hammond 1992 This monograph examines issues that will shape teacher education programs in the future. Following a foreword by Robert M. McClure, the monograph is organized into three chapters. The first, "Perestroika and Professionalism: The Case for Restructuring Teacher Preparation" (Linda Darling-Hammond), focuses on changes wrought by school restructuring, i.e., the creation of learner-centered schools, and implications for changes in the teacher's role and consequently for teacher education. The second, "Learning from the 'New' Schools: Lessons for Teacher Education" (Gary A. Griffin), discusses school-level issues in restructuring, rethinking, and re-enacting teacher education. The final chapter, "The Case for Restructuring Teacher Preparation" (Arthur E. Wise), espouses seven propositions to promote education reform: (1) intensive teacher education; (2) rigorous teacher certification and licensing standards; (3) increased teacher involvement in decision-making processes that affect how they teach; (4) teacher unions with a better balance between inherent responsibilities to protect members and long-term responsibility for advancing the profession; (5) teacher professionalism that demands an accountability system; (6) improved teachers' salaries and working conditions; and (7) more attention to the less fortunate of teachers' clientele. Students at the Center-Bena Kallick 2017-01-27 Educators' most important work is to help students develop the intellectual and social strength of character necessary to live well in the world. The way to do this, argue authors Bena Kallick and Allison Zmuda, is to increase the say students have in their own learning and prepare them to navigate complexities they face both inside and beyond school. This means rethinking traditional teacher and student roles and re-examining goal setting, lesson planning, assessment, and feedback practices. It means establishing classrooms that prioritize ■ Voice—Involving students in "the what" and "the how" of learning and equipping them to be stewards of their own education. ■ Co-creation—Guiding students to identify the challenges and concepts they want to explore and outline the actions they will take. ■ Social construction—Having students work with others to theorize, pursue common goals, build products, and generate performances. ■ Self-discovery—Teaching students to reflect on their own developing skills and knowledge so that they will acquire new understandings of themselves and how they learn. Based on their exciting work in the field, Kallick and Zmuda map out a transformative model of personalization that puts students at the center and asks them to employ the set of dispositions for engagement and learning known as the Habits of Mind. They share the perspectives of educators engaged in this work; highlight the habits that empower students to pursue aspirations, investigate problems, design solutions, chase curiosities, and create performances; and provide tools and recommendations for adjusting classroom practices to facilitate learning that is self-directed, dynamic, sometimes messy, and always meaningful.

Red Pedagogy-Sandy Grande 2015-09-28 This ground-breaking text explores the intersection between dominant modes of critical educational theory and the socio-political landscape of American Indian education. Grande asserts that, with few exceptions, the matters of Indigenous people and Indian education have been either largely ignored or indiscriminately absorbed within critical theories of education. Furthermore, American Indian scholars and educators have largely resisted engagement with critical educational theory, tending to concentrate instead on the production of historical monographs, ethnographic studies, tribally-centered curricula, and site-based research. Such a focus stems from the fact that most American Indian scholars feel compelled to address the socio-economic urgencies of their own communities, against which engagement in abstract theory appears to be a luxury of the academic elite. While the author acknowledges the dire need for practical-community based research, she maintains that the global encroachment on Indigenous lands, resources, cultures and communities points to the equally urgent need to develop transcendent theories of decolonization and to build broad-based coalitions.

Self-Reliance-Ralph Waldo Emerson 2019-03-08 In Self-Reliance, Emerson expounds on the importance of trusting your soul, as well as divine providence, to carve out a life. A firm believer in nonconformity, Emerson celebrates the individual and stresses the value of listening to the inner voice unique to each of us?even when it defies society's expectations. This new 2019 edition of Self-Reliance from Logos Books includes The American Scholar, a stirring speech of Emerson's, as well as footnotes and images throughout.

The Mismeasure of Desire-David E. Stannard 1993-11-18 For four hundred years--from the first Spanish assaults against the Arawak people of Hispaniola in the 1490s to the U.S. Army's massacre of Sioux Indians at Wounded Knee in the 1890s--the indigenous inhabitants of North and South America endured an unending firestorm of violence. During that time the native population of the Western Hemisphere declined by as many as 100 million people. Indeed, as historian David E. Stannard argues in this stunning new book, the European and white American destruction of the native peoples of the Americas was the most massive act of genocide in the history of the world. Stannard begins with a portrait of the enormous richness and diversity of life in the Americas prior to Columbus's fateful voyage in 1492. He then follows the path of genocide from the Indies to Mexico and Central and South America, then north to Florida, Virginia, and New England, and finally out across the Great Plains and Southwest to California and the North Pacific Coast. Stannard reveals that wherever Europeans or white Americans went, the native people were caught between imported plagues and barbarous atrocities, typically resulting in the annihilation of 95 percent of their populations. What kind of people, he asks, do such horrendous things to others? His highly provocative answer: Christians. Digging deeply into ancient European and Christian attitudes toward sex, race, and war, he finds the cultural ground well prepared by the end of the Middle Ages for the centuries-long genocide campaign that Europeans and their descendants launched--and in places continue to wage--against the New World's original

inhabitants. Advancing a thesis that is sure to create much controversy, Stannard contends that the perpetrators of the American Holocaust drew on the same ideological wellspring as did the later architects of the Nazi Holocaust. It is an ideology that remains dangerously alive today, he adds, and one that in recent years has surfaced in American justifications for large-scale military intervention in Southeast Asia and the Middle East. At once sweeping in scope and meticulously detailed, American Holocaust is a work of impassioned scholarship that is certain to ignite intense historical and moral debate.

A Key Into the Language of America-Roger Williams 1971

I'm Gonna Push Through!-Jasmyn Wright 2020-02-18 Based on the Push Through movement that inspires kids worldwide, this is an empowering, energetic, and all-inclusive picture book that celebrates resilience in the face of adversity. Hold your head high. No matter what stands in the way of your dreams, remember this: YOU can push through anything! If someone tells you it's too hard, don't you ever listen. You tell them, "I'm gonna push through!" Inspired by a mantra written for her third-grade students, Jasmyn Wright's uplifting call to "push through" is an invitation to young readers to announce their own power and to recognize and reaffirm that of others, regardless of setbacks. Her empowering words not only lift children up, but show them how to lift themselves up and seize their potential.

Myth and Geology-Luigi Piccardi 2007 "This book is the first peer-reviewed collection of papers focusing on the potential of myth storylines to yield data and lessons that are of value to the geological sciences. Building on the nascent discipline of geomorphology, scientists and scholars from a variety of disciplines have contributed to this volume. The geological hazards (such as earthquakes, tsunamis, volcanic eruptions and cosmic impacts) that have given rise to myths are considered, as are the sacred and cultural values associated with rocks, fossils, geological formations and landscapes. There are also discussions about the historical and literary perspectives of geomorphology. Regional coverage includes Europe and the Mediterranean, Afghanistan, Cameroon, India, Australia, Japan, Pacific islands, South America and North America. Myth and Geology challenges the widespread notion that myths are fictitious or otherwise lacking in value for the physical sciences." -- BOOK JACKET.

Agricultural Policy of the United States-Stephanie A. Mercier 2020-04-01 This book serves as a foundational reference of U.S. land settlement and early agricultural policy, a comprehensive journey through the evolution of 20th century agricultural policy, and a detailed guide to the key agricultural policy issues of the early 21st century. This book integrates the legal, economic and political concepts and ideas that guided U.S. agricultural policy from colonial settlement to the 21st century, and it applies those concepts to the policy issues agriculture will face over the next generation. The book is organized into three sections. Section one introduces the main themes of the book, explores the pre-Columbian period and early European settlement, and traces the first 150 years of U.S. agricultural policy starting with the post revolution period and ending with the "golden age" of agriculture in the early 20th century. Section two outlines that grand bargain of the 1930s that initiated the modern era of government intervention into agricultural markets and traces this policy evolution to the early days of the 21st century. The third section provides an in-depth examination of six policy issues that dominate current policy discussions and will impact policy decisions for the next generation: trade, environment/conservation, commodity checkoff programs, crop insurance, biofuels, and domestic nutrition programs.

Religion and Men's Violence Against Women-Andy J. Johnson 2015-04-14 This reference offers the nuanced understanding and practical guidance needed to address domestic violence, sexual assault, and human trafficking in diverse religious communities. Introductory chapters sort through the complexities, from abusers' distorting of sacred texts to justifying their actions to survivors' conflicting feelings toward their faith. The core of the book surveys findings on gender violence across Christian, Jewish, Islamic, Eastern, and Indigenous traditions--both attitudes that promote abuse and spiritual resources that can be used to promote healing. Best practices are included for appropriate treatment of survivors, their children, and abusers; and for partnering with communities and clergy toward stemming violence against women. Among the topics featured: Ecclesiastical policies vs. lived social relationships: gender parity, attitudes, and ethics. Women's spiritual struggles and resources to cope with intimate partner aggression. Christian stereotypes and violence against North America's native women. Addressing intimate partner violence in rural church communities. Collaboration between community service agencies and faith-based institutions. Providing hope in faith communities: creating a domestic violence policy for families. Religion and Men's Violence against Women will gain a wide audience among psychologists, social workers, marriage and family therapists, and other mental health professionals who treat religious clients or specialize in treating survivors and perpetrators of domestic and intimate partner violence, stalking, sexual assault, rape, or human trafficking.

Bold Plans for School Restructuring-Samuel C. Stringfield 2012-11-12 Two powerful forces are driving American's demands for better schools -- one longstanding force is idealistic and the other is "new" and economic. The current group of young Americans is in danger of being the first full generation to consistently make less money and enjoy fewer worldly rewards than their parents. The intersection of idealistic and pragmatic forces has produced an era of calls for reform in U.S. education that is unparalleled -- calls that have resulted in the creation of the New American Schools Development Corporation (NASDC). The chapters in this book highlight the path traveled by NASDC -- a private, non-profit corporation charged with creating new, "break the mold" school designs for the 21st century -- and describes the first three years' accomplishments of nine NASDC development teams.

Science and the Media-Donald Kennedy 2010 How science and technology are covered by the media is a central factor in scientific illiteracy. Journalists value timeliness, speed, simplicity, and clarity. Yet stories about science and technology may be long-building, complex, and without dramatic, time-pegged events. The need to grab and hold attention, to write tight stories or produce short segments, can come at the cost of context and nuance. One observer, noting journalism's preference for attention-grabbing, conflict-driven events, has joked that reporters two thousand years ago would have covered the heck out of the crucifixion - and missed Christianity. As the world grows more complex, there is an increasing need for citizens to understand the scientific and technological dimensions of daily news events. Journalists play a critical role in helping readers, listeners, and viewers appreciate the science underlying major policy choices. And scientists, in turn, must effectively communicate to the public, especially through the media. We hope that the essays gathered in this volume will generate a broader understanding of the intertwined roles of the media and the scientific and technical community in helping to ensure a well-informed public.
