Erasure-Perceval Everett 2011-10-25 Percival Everett's Erasure is a blistering satire about race and writing Thelonious "Monk" Ellison's writing career has bottomed out: his latest manuscript has been rejected by seventeen publishers, which stings all the more because his previous novels have been "critically acclaimed." He seethes on the sidelines of the literary establishment as he watches the meteoric success of We's Lives in Da Ghetto, a first novel by a woman who once visited "some relatives in Harlem for a couple of days." Meanwhile, Monk struggles with real family tragedies—his aged mother is fast succumbing to Alzheimer's, and he still grapples with the reverberations of his father's suicide seven years before. In his rage and despair, Monk dashes off a novel meant to be an indictment of Juanita Mae Jenkins's bestseller. He doesn't intend for My Pafology to be published, let alone taken seriously, but it is—under the pseudonym Stagg R. Leigh—and soon it becomes the Next Big Thing. How Monk deals with the personal and professional fallout galvanizes this audacious, hysterical, and quietly devastating novel.

The Eloquence of Ghosts-Florian Mussgnug 2010 Giorgio Manganelli (1922-1990), one of Italy's most radical and original writers, went further than most in exploring the creative possibilities of hybrid genres and open forms. Ostentation, theatricality, and a love of drapery and verbal excess are defining features of his body of work, which ranges from prose fiction, literary criticism, and drama to travel writing, treatises, commentaries, and imaginary interviews. This study examines the wealth of Manganelli's imagination - his grotesque animals, speaking corpses, and melancholy spectres - and argues that his spectacular eloquence was shaped by an exceptional awareness of literary and philosophical models. Following Manganelli's lead, the author addresses issues such as the boundaries of meaningful language, the relationship between literary and visual texts, fantasy and realism, and the power of literature to express the apprehensions and intimations of human consciousness.

Dynamic Business Law: The Essentials-Daniel Herron 2015-01-23 Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further.

For Documentary-Dai Vaughan 1999-09-15 "A jewel of a book that is unlike any other in the field of documentary studies. It will bring to a far broader audience a rigorous critical intelligence and sensibility, seasoned by years of experience, imbued with a bracing clarity of thought and expression."—Michael Renov, University of Southern California  
"Vaughan's ruminations on the relationship between documentary, language, and the world, as well as on the implications—at once ethical and epistemological—of the digital revolution, are invariably original and enlightening. I know of no precedent for the manner in which he combines philosophic precision with grounding in actual filmmaking practice. Vaughan is the most singular—and discomfiting—voice that we have had in documentary studies for a long, long time."—Lucien Taylor, coauthor of Cross-Cultural Filmmaking

Metashield-National Aeronautics and Space Administration (NASA) 2018-06 An innovative fuselage design approach that combines many desirable operational features with a simple and efficient structural approach is being developed by NASA. The approach, named METAShield for METallic TransAtmospheric Shield, utilizes lightly loaded, hot aeroshell structures surrounding integral propellant tanks that carry the primary structural loads. The aeroshells are designed to withstand the local pressure loads, transmitting them to the tanks with minimal restraint of thermal growth. No additional thermal protection system protects the METAShield, and a fibrous or multilayer insulation blanket, located in the space between the aeroshell and the tanks, serves as both high temperature and cryogenic insulation for the tanks. The concept is described in detail, and the performance and operational features are highlighted. Initial design results and analyses of the structural, thermal, and thermal-structural performance are described. Computational results evaluating resistance to hypervelocity impact damage, as well as some supporting aerothermal wind tunnel results, are also presented. Future development needs are summarized.Scott, Stephen J. and Poteet, Carl C. and Daryabeigi, Kamran and Nowak, Robert J. and Hsu, Su-Yuen and Schmidt, Irvin H. and Ku, Shih-Huei P.Langley Research CenterAEROSHIELDS; THERMAL PROTECTION; FUSELAGES; IMPACT DAMAGE; MULTILAYER INSULATION; PROPELLANT TANKS; TEMPERATURE EFFECTS; CRYOGENICS
