Political Justice and Religious Values-Charles Andrain 2009-06-02 Why do individuals and groups hold distinctive theological views? Why do these beliefs change? In what ways do theological interpretations influence concepts of spiritual and political justice? How and why do these concepts of justice affect policy preferences held by religious liberals and conservatives? Much has recently been written about the relationship between power, conservative politics, and evangelical religious groups, but very little attention has been paid to so-called "progressive" religious groups among Protestants, Catholics, and Jews and their relationship to political thought and action. This wide-ranging and interdisciplinary work, ideal for use in college courses on religion and social issues, explores the impact of theological interpretations about God, the individual, society, church, and government on attitudes toward procedural and distributive justice. Major issues revolve around civil liberties, sexual choice, gender equality, world

Urban Spaces and Gender in Asia-Divya Upadhyaya Joshi 2020-06-03 Exploring the relationship between place and identity, this book gathers 30 papers that highlight experiences from throughout the Asia-Pacific region. The countries profiled include China, India, Japan, Indonesia, and Thailand. Readers will gain a better understanding of how urbanization is affecting gender equity in Asian-Pacific cities in the 21st century. The contributing authors examine the practical implications of urban development and link them with the broader perspective of urban ecology. They consider how visceral experiences connect with structural and discursive spheres. Further, they investigate how multiple, interconnected relations of power shape gender (in)equity in urban ecologies, and address such issues as construction of Kawaii as an idealized femininity, diversity among homosexuals in urban India, and single women and rental housing. In turn, the authors present hitherto unexplored sub-themes from historiography and existentialist literary perspectives, and share a vast range of multi-disciplinary views on issues concerning gendered dispossession due to the impact of urban policy and governance. The topics covered include socio-spatial and ethnic segregation in urban spaces; intersections of gender, race, ethnicity, nationality, religion, and caste in urban spaces; and identity-based marginalization, including that of LGBT groups. Overall, the book brings together perspectives from the humanities and the social sciences, and represents a valuable contribution to the vital theoretical and practical debates on urbanism and gender equity.

Essential Software Architecture-Ian Gorton 2011-04-27 Job titles like “Technical Architect” and “Chief Architect” nowadays abound in software industry, yet many people suspect that “architecture” is one of the most overused and least understood terms in professional software development. Gorton’s book tries to resolve this dilemma. It concisely describes the essential elements of knowledge and key skills required

to be a software architect. The explanations encompass the essentials of architecture thinking, practices, and supporting technologies. They range from a general understanding of structure and quality attributes through technical issues like middleware components and service-oriented architectures to recent technologies like model-driven architecture, software product lines, aspect-oriented design, and the Semantic Web, which will presumably influence future software systems. This second edition contains new material covering enterprise architecture, agile development, enterprise service bus technologies, RESTful Web services, and a case study on how to use the MeDICi integration framework. All approaches are illustrated by an ongoing real-world example. So if you work as an architect or senior designer (or want to someday), or if you are a student in software engineering, here is a valuable and yet approachable knowledge source for you.

Not in His Image-John Lash 2006 Basing much of Not in His Image on the Nag Hammadi and other Gnostic writings, John Lamb Lash explains how a little-known messianic sect propelled itself into a dominant world power, systematically wiping out the great Gnostic spiritual teachers, the Druid priests, and the shamanistic healers of Europe and North Africa. They burned libraries and destroyed temples in an attempt to silence the ancient truth-tellers and keep their own secrets. But as Lash reveals, when the truth is the planet Earth it cannot be hidden or destroyed. Not in His Image delves deeply into the shadows of ancient Gnostic writings to reconstruct the story early Christians tried to scrub from the pages of history, exploring the richness of the ancient European Pagan spirituality--the Pagan Mysteries, the Great Goddess, Gnosis, the myths of Sophia and Gaia--and chronicles the annihilation of this Pagan European culture at the hands of Christianity. Long before the birth of Christianity, monotheism was an anomaly; Europe and the Near East flourished under the divine guidance of Sophia, the ancient goddess of wisdom. The Earth was the embodiment of Sophia and thus sacred to the people who sought fulfillment in her presence. This ancient philosophy was threatening to the emerging salvation-based creed of Christianity that was based on patriarchal dominion over the Earth and lauded personal suffering as a path to the afterlife. As Derrick Jensen points out in the afterword, in Lash's hands Jesus Christ emerges as the agent provocateur of the ruling classes.

A Contemporary Nursing Process-Dr. Rozzano C. Locsin, RN, PhD, FAAN 2009-04-10 "[This book] speaks against thinking [that] we can only understand nursing from a traditional, logical, empirical approach, suggesting we need a contemporary process for exploring nursing. I can't agree more." --Journal of Christian Nursing "Nurse scholars from across the globe contribute essays to this unique philosophical exploration of today's nursing. This book presents an emerging view that requires nursing to look at its work through a broader and less structured lens. Challenging the structure of the traditional nursing process, the book considers nursing as reflective and thoughtful." --Doody's A Contemporary Nursing Process re-envision the practice of nursing by configuring caring in terms of the person the nurse cares for. Locsin and Purnell stress the importance of knowing the patient, and differentiating the person from the disease. This text addresses this highly relevant issue, and provides a wealth of insight on how to care for the patient on a personal level, while still professionally administering clinical treatment. Chapters discuss: How to appreciate persons as participants in their care, rather than as objects of care The ideal of care versus the practical demands of care Technological advancements shaping human life and nursing The consequences of "not knowing" the patient on a personal level
