Concise European Data Protection, E-Commerce and IT Law-Serge Gijrath 2018-11-23 Since the second edition (2010) of this invaluable book – primary texts with expert article-by-article commentary on European data protection, e-commerce and information technology (IT) regulation, including analysis of case law – there has been a marked shift in regulatory focus. It can be said that, without knowing it, EU citizens have migrated from an information society to a digital single market to a data-driven economy. This thoroughly revised and updated third edition pinpoints, in a crystal-clear format, the meaning and application of currently relevant provisions enacted at the European and Member State levels, allowing practitioners and other interested parties to grasp the exact status of such laws, whether in force, under construction, controversial or proposed. Material has been rearranged and brought into line with the vibrant and constantly shifting elements in this field, with detailed attention to developments (most new to this edition) in such issues as the following: · cybersecurity; · privacy rights; · supply of digital content; · consumer rights in electronic commerce; · Geo-blocking; · open Internet; · contractual rules for online sale of (tangible) goods; · competition law in the IT sectors; · consumer online dispute resolution; · electronic signatures; and · reuse of public sector information. There is a completely new section on electronic identification, trust and security regulation, defining the trend towards an effective e-commerce framework protecting consumers and businesses accessing content or buying goods and services online. The contributors offer a very useful and practical review and analysis of the instruments, taking into account the fluidity and the transiency of the regulation of these very dynamic phenomena. This book will be quickly taken up by the myriad professionals – lawyers, officials and academics – engaged with data protection, e-commerce and IT on a daily basis.

Communication and Technology-Lorenzo Cantoni 2015-08-31 The primary goal of the Communication and Technology volume (5th within the series "Handbooks of Communication Science") is to provide the reader with a comprehensive compilation of key scholarly literature, identifying theoretical issues, emerging concepts, current research, specialized methods, and directions for future investigations. The internet and web have become the backbone of many new communication technologies, often transforming older communication media, through digitization, to make them compatible with the net. Accordingly, this volume focuses on internet/web technologies. The essays cover various infrastructure technologies, ranging from different kinds of hard-wired elements to a range of wireless technologies such as WiFi, mobile telephony, and satellite technologies. Audio/visual communication is discussed with reference to large-format motion pictures, medium-sized television and video formats, and the small-screen mobile smartphone. There is also coverage of audio-only media, such as radio, music, and voice telephony; text media, in such venues as online newspapers, blogs, discussion forums and mobile texting; and multi-media technologies, such as games and virtual reality.

Electronic Commerce 2018-Efraim Turban 2017-10-12 This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook , LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

Practical E-Manufacturing and Supply Chain Management-Gerhard Greeff 2004-08-11 New technologies are revolutionising the way manufacturing and supply chain management are implemented. These changes are delivering manufacturing firms the competitive advantage of a highly flexible and responsive supply chain and manufacturing system to ensure that they meet the high expectations of their customers, who, in today's economy, demand absolutely the best service, price, delivery time and product quality. To make e-manufacturing and supply chain technologies effective, integration is needed between various, often disparate systems. To understand why this is such an issue, one needs to understand what the different systems or system components do, their objectives, their specific focus areas and how they interact with other systems. It is also required to understand how these systems evolved to their current state, as the concepts used during the early development of systems and technology tend to remain in place throughout the life-cycle of the systems/technology. This book explores various standards, concepts and techniques used over the years to model systems and hierarchies in order to understand where they fit into the organization and supply chain. It looks at the specific system components and the ways in which they can be designed and graphically depicted for easy understanding by both information technology (IT) and non-IT personnel. Without a good implementation philosophy, very few systems add any real benefit to an organization, and for this reason the ways in which systems are implemented and installation projects managed are also explored and recommendations are made as to possible methods that have proven successful in the past. The human factor and how that impacts on system success are also addressed, as is the motivation for system investment and subsequent benefit measurement processes. Finally, the vendor/user supply/demand within the e-manufacturing domain is explored and a method is put forward that enables the reduction of vendor bias during the vendor selection process. The objective of this book is to provide the reader with a good understanding regarding the four critical factors (business/physical processes, systems supporting the processes, company personnel and company/personal performance measures) that influence the success of any e-manufacturing implementation, and the synchronization required between these factors. · Discover how to implement the flexible and responsive supply chain and manufacturing execution systems required for competitive and customer-focused manufacturing · Build a working knowledge of the latest plant automation, manufacturing execution systems (MES) and supply chain management (SCM) design techniques · Gain a fuller understanding of the four critical factors (business and physical processes, systems supporting the processes, company personnel, performance measurement) that influence the success of any e-manufacturing implementation, and how to evaluate and optimize all four factors

Business Law-Jane P. Mallor 2004 Mallor, Barnes, Bowers and Langvardt's, Business Law: The Ethical, Global, and E-Commerce Environment, 12th Edition, is appropriate for the two-term business law course. The cases in the 12th edition are excerpted and edited by the authors. The syntax is not altered, therefore retaining the language of the courts. As in the 11th edition, the 12th edition includes a mix of actual AND hypothetical cases. The title has been changed to reflect a new focus of the book – the global and Internet environment. Business Law: The Ethical, Global, and E-Commerce Environment, 12e includes new pedagogy such as opening vignettes and new-boxed features such as "Ethics in Action" and "Cyberlaw in Action." This combined with case briefs and concept reviews, along with some reorganization of the text results in a more complete, relevant and user-friendly text.

Business-Marianne Jennings 2003 This highly effective text provides superior legal, ethical, and regulatory coverage while fully integrating practical business practices for tomorrow's business managers. Legal topics are explored and explained through real-world business examples (over 300 references to business are made in the text). In addition to a solid foundation in the law, students learn valuable legal and ethical reasoning skills through a variety of critical thinking exercises. Students receive -- and appreciate -- practical advice on when it is necessary to call a lawyer, how best to use legal aid services and how to avoid legal trouble in the first place. This text fulfills current curricular and AACSB accrediting standards.

Free Trade Zone and Port Hinterland Development-United Nations. Economic and Social Commission for Asia and the Pacific 2005 This report looks at examples of Free trade zones (FTZ) from around the world and sees how the concept of logistics centres can be applied in practice. The report concludes that the traditional import/export port needs to move into one of two markets, or a combination of both; these markets are transhipment or logistics centres. The report identifies that an optimum enabling environment needs to be created that is service orientated, largely free of bureaucracy and has excellent connectivity both physically and electronically between all stakeholders. Where the optimum enabling environment cannot be implemented nationwide, the creation of a FTZ is a first step to attracting funds necessary to finance this change. The report concludes with a summary of the key guidelines for policy makers to consider in the transition from a traditional import/export port to a logistics centre port. Publishing Agency: United Nations (UN).
