Turbulent Waters-Betty J. Vaughn 2013-12 Love is personal, war is not, especially in North Carolina, 1865-1867, during the reconstruction. With a love they are certain will transcend all else, southern belle Penny Kennedy marries Union Officer and attorney, Ryan Madison, despite the condemnation of those around them. The initial days of wedded bliss end abruptly when Marcus, the man who courted Penny for years in anticipation that she would marry him, is arrested for murder, and Ryan is assigned to prosecute him. As hard as this development is to tolerate for Penny, she will discover worse things await her before Ryan and she can attain the life they desire. Praise, "BJ Vaughn has introduced the human side to often forgotten North Carolina Civil War History... This is history that has finally been told in a very human and quite enjoyable study... Her passion for detail, historic accuracy and flair for the conflicts of the people involved is captivating." -- David Waller, lecture and historian "As a follow on to Muddy Waters, Turbulent Waters is a wonderfully woven story of life, passion, peril, and overcoming hardship in the reconstruction period in North Carolina. Most intriguing are the carefully woven historically accurate events that impact the lives and decisions of the characters. When you start reading, be prepared to be loath to put Turbulent Waters down. The characters are real and become friends that you don't want to leave at the end. When will the next volume be available? I can't wait to read it!" --Leesa K.C. Payne "I really enjoyed Muddy Waters. Besides the story line of Penny and Ryan and their families, I was really taken in by the descriptions of their living conditions and the thought process that they had to go through to live back then during the war. You did a great job of describing their homes and I could really picture how they looked and what comforts they did (or didn't) have." --Chris Peck

A Middle Eastern Affair-Ellis Douek 2012-04-19 "wherever I have found myself has seemed the proper place for me to be. I have never been an exile." When Ellis Douek was nine years old, his mother insisted that he take up embroidery - in case he decided to be a surgeon when he grew up. Of course she was right, as she always was, for he became Consultant ENT Surgeon at Guy's Hospital in London. The Douek parents had the unerring quality of belonging in whichever country they lived and yet they never stayed long in one place -Egypt, the Sudan, Columbia and, finally, England, moving either out of political necessity or out of impetuosity. In 1940 they took the extraordinary decision, for a Jewish family, to cross the Atlantic from Columbia to Italy, on their way back to Egypt. Ellis Douek describes this work as strands of memory. These strands weave between remembrance of the dawn across the Nile and the silence of the feloukas, summers in Alexandria by the beach, and the seeming security and hedonism of it all -between Nasser and the Suez War which disrupted their lives and uprooted them and Bradford in Yorkshire in the 1950s where Ellis finished his schooling, an austere place after the prosperity and warmth of their life in Egypt. Ellis, his sister Claudia who would become Claudia Roden the cookery writer, and their younger brother Zaki all spent time together in Paris, largely unsupervised by adults. Ellis began his medical training there and tried to live the life of a left-wing intellectual, which was perhaps what led his mother to arrange for him to begin medicine all over again, this time in London, during a time of smog, digs and landladies, fish and chips, and the start of the Campaign for Nuclear Disarmament. It was also the time of conscription and Ellis became an army medic with the Black Watch in Scotland, during the final days of National Service. Marvelling at the way his life turned out he says, 'wherever I have found myself has seemed the proper place for me to be. I have never been an exile.'

DNS on Windows Server 2003-Cricket Liu 2003-12-17 While computers and other devices identify each other on networks or the Internet by using unique addresses made up of numbers, humans rely on the Domain Name System (DNS), the distributed database that allows us to identify machines by name. DNS does the work of translating domain names into numerical IP addresses, routing mail to its proper destination, and many other services, so that users require little or no knowledge of the system. If you're a network or system administrator, however, configuring, implementing, and maintaining DNS zones can be a formidable challenge. And now, with Windows Server 2003, an understanding of the workings of DNS is even more critical. DNS on Windows Server 2003 is a special Windows-oriented edition of the classic DNS and BIND, updated to document the many changes to DNS, large and small, found in Windows Server 2003. Veteran O'Reilly authors, Cricket Liu, Matt Larson, and Robbie Allen explain the whole system in terms of the new Windows Server 2003, from starting and stopping a DNS service to establishing an organization's namespace in the global hierarchy. Besides covering general issues like installing, setting up, and maintaining the server, DNS on Windows Server 2003 tackles the many issues specific to the new Windows environment, including the use of the dnscmd program to manage the Microsoft DNS Server from the command line and development using the WMI DNS provider to manage the name server programmatically. The book also documents new features of the Microsoft DNS Server in Windows Server 2003, including conditional forwarding and zone storage in Active Directory (AD) application partitions. DNS on Windows Server 2003 provides grounding in: Security issues System tuning Caching Zone change notification Troubleshooting Planning for growth If you're a Windows administrator, DNS on Windows Server 2003 is the operations manual you need for working with DNS every day. If you're a Windows user who simply wants to take the mystery out of the Internet, this book is a readable introduction to the Internet's architecture and inner workings.
