<p>Digital Libraries and Multimedia Archives-Maristella Agosti 2017-04-05 This book constitutes the thoroughly refereed proceedings of the 12th Italian Research Conference on Digital Libraries, IRCDL 2016, held in Firenze, Italy, in February 2016. The 15 papers presented were carefully selected from 23 submissions and cover topics such as formal methods, long-term preservation, metadata creation, management and curation, multimedia, ontology and linked data. The papers deal with numerous multidisciplinary aspects ranging from computer science to humanities in the broader sense, including research areas such as archival and library information sciences; information management systems; semantic technologies; information retrieval; new knowledge environments.</p> <p>Systemics of Incompleteness and Quasi-Systems-Gianfranco Minati 2019-06-20 This book contains the proceedings of the Seventh National Conference of the Italian Systems Society. The title, Systemics of Incompleteness and Quasi-Systems, aims to underline the need for Systemics and Systems Science to deal with the concepts of incompleteness and quasiness. Classical models of Systemics are intended to represent comprehensive aspects of phenomena and processes. They consider the phenomena in their temporal and spatial completeness. In these cases, possible incompleteness in the modelling is assumed to have a provisional or practical nature, which is still under study, and because there is no theoretical reason why the modelling cannot be complete. In principle, this is a matter of non-complex phenomena, to be considered using the concepts of the First Systemics. When dealing with emergence, there are phenomena which must be modelled by systems having multiple models, depending on the aspects being taken into consideration. Here, incompleteness in the modelling is intrinsic, theoretically relating changes in properties, structures, and status of system. Rather than consider the same system parametrically changing over time, we consider sequences of systems coherently. We consider contexts and processes for which modelling is incomplete, being related to only some properties, as well as those for which such modelling is theoretically incomplete—as in the case of processes of emergence and for approaches considered by the Second Systemics. In this regard, we consider here the generic concept of quasi explicating such incompleteness. The concept of quasi is used in various disciplines including quasi-crystals, quasi-particles, quasi-electric fields, and quasi-periodicity. In general, the concept of quasiness for systems concerns their continuous structural changes which are always meta-stable, waiting for events to collapse over other configurations and possible forms of stability; whose equivalence depends on the type of phenomenon under study. Interest in the concept of quasiness is not related to its meaning of rough approximation, but because it indicates an incompleteness which is structurally sufficient to accommodate processes of emergence and sustain coherence or generate new, equivalent or non-equivalent, levels. The conference was devoted to identifying, discussing and understanding possible interrelationships of theoretical disciplinary improvements, recognised as having prospective fundamental roles for a new Quasi-Systemics. The latter should be able to deal with problems related to complexity in more general and realistic ways, when a system is not always a system and not always the same system. In this context, the inter-disciplinarity should consist, for instance, of a constructionist, incomplete, non-ideological, multiple, contradiction-tolerant, Systemics, always in progress, and in its turn, emergent.</p> <p>Paideia: The World of the Second Sophistic (Millennium-Studien Zu Kultur und Geschichte Des Ersten Jahrtausends N. Chr-Barbara Borg 2004 In the World of the Second Sophistic, education, paideia, was a crucial factor in the discourse of power. Knowledge in the fields of medicine, history, philosophy, and poetry joined with rhetorical brilliance and a presentable manner became the outward appearance of the elite of the Eastern Roman Empire. This outward appearance guaranteed a high social status as well as political and economical power for the individual and major advantages for their hometowns in interpolis competition. Since paideia was related particularly to Classical Greek antiquity, it was, at the same time, fundamental to the new self-confidence of the Greek East. This book presents, for the first time, studies from a broad range of disciplines on various fields of life and on different media, in which this ideology became manifest. These contributions show that the Sophists and their texts were only the most prominent exponents of a system of thoughts and values structuring the life of the elite in general.</p> <p>Fascist Modernities-Ruth Ben-Ghiat 2004-03 This cultural history of Mussolini's dictatorship discusses the meanings of modernity in interwar Italy. The work argues that fascism appealed to many Italian intellectuals as a new model of modernity that would resolve the European and national crises.</p> <p>Advertising and a Democratic Press-C. Edwin Baker 2014-07-14 In this provocative book, C. Edwin Baker argues that print advertising seriously distorts the flow of news by creating a powerfully corrupting incentive: the more newspapers depend financially on advertising, the more they favor the interests of advertisers over those of readers. Advertising induces newspapers to compete for a maximum audience with blandly "objective" information, resulting in reduced differentiation among papers and the eventual collapse of competition among dailies. Ashrafi and Bilal are orphaned siblings stranded and defined by the troubles in Kashmir. Eighteen-year-old Bilal is the pride of the region, part of a teenage football team set for great heights, and pushed to the limits by the violence around them. Haunted by hope, his sister is caught in the past, and Bilal is torn between escaping the myths of war and the cycles of resistance. Interweaving true stories and testimonies with Islamic storytelling, the play paints a magical portrait of a generation of radicalised kids, and a beautiful landscape lost to conflict.</p> <p>Using Italian-J. J. Kinder 2004-07 Publisher Description</p> <p>Internationalization of Consumer Law-Mateja Durovic 2016-11-11 This book examines the institutions that are producing consumer law at the international level, the substantive issues enshrined in these laws, and the enforcement mechanisms meant to ensure effective protection. The majority of existing research is devoted to the comparative perspective, between countries or between the US and the EU. This book investigates the forceful activities of international and regional organizations, and shifts the focus of research to the internationalization of consumer law, which is largely neglected in particular in the Western-centered political and legal debate. Much of what constitutes consumer law today is focused on banking and finance, and more broadly the financialization and digitalization of the global economy, and society has created a shift in international consumer law production. This book investigates the role that international organizations have on the creation and enforcement of consumer law, and will be of interest to consumer lawyers, practitioners, and officials in organizations such as the United Nations, European Union, and World Bank.</p> <p>The Look-Paul Gorman 2001 A facinating look at the changing fashions that have paralleled every new movement in pop and rock music, from Elvis's suits to today's street fashions.</p> <p>The Myspace.com Handbook-T. Brian Chatfield 2007 MySpace.com is a free social networking Web site that allows you to share with others your photos, weblogs, user profiles, e-mail, web forums, music, video, as well as offers you the opportunity to participate in groups. MySpace.com is the largest online social networking portal on the web; it has 61-plus million registered users with 21-plus million unique visitors. It is the second largest destination on the web by page views. With a MySpace account you can speak with friends online, meet potential friends, connect with friends of other friends, keep up with family, and find lost classmates, friends, or business associates. Many parents however feel they have been left behind on this new technology, and have legitimate concerns about their children s safety. People aren t always who they say they are and recent news stories have alerted parents to the potential problems with predators using MySpace.com. The MySpace.com Handbook provides tips, secrets, and tricks to creating and personalizing a MySpace profile and provides a complete overview of MySpace.com. Learn how to use online social networking Web sites, personalize your account, and add photos and music. Parents who are not Internet savvy will find the book very useful as well as it will assist them in developing discussions with their teens about MySpace, step-by-step instructions detail critical information and safety issues for parents and parental controls are detailed, as well as how to stop contact from strangers, eliminate profile invasion, spyware software threats, avoid online sexual and criminal predators, web monitoring services, cyber bullies, hate groups, phishing and other internet scams, learn how to report inappropriate content, and protect your identity. There is an important chapter for businesses as well others that may want to use the site to market products, music, books, etc. Although this book primarily deals with MySpace a chapter is devoted to other social networking Web sites. Whether you are a potential or current member, or a concerned parent of a MySpace potential or current member, you will find a wealth of helpful advice and useful commentary and tools. "</p> <p>An Introduction to Discourse Analysis and Translation Studies-Michela Canepari 2014-05-15</p> <p>Towards a Post-Bertalanffy Systemics-Gianfranco Minati 2015-12-23 This book contains the proceedings of the Sixth National Conference of the Italian Systems Society. The title, Towards a post-Bertalanffy Systemics, aims to underline the need for Systemics and Systems Science to generalize theoretically concepts related to complexity (the great enemy of Bertalanffy Systemics). Hopefully this goal should be achieved by working in an inter-disciplinary and trans-disciplinary fashion, using systemic concepts arising from various disciplines and from the original, or Bertalanffy Systemics, as well. The interdisciplinary nature of the original Systemics and its power of generalization were given, overall, by the fact that the problems and solutions of one discipline become problems and solutions for another. Today, the modeling and interpretation of multidisciplinary approaches and representations makes easier to recognize these interconnections. The context, however, has changed dramatically. Of course, the challenge is still to find theoretical generalizations and applications, even where we have a lot of specificities, but we know very little on how to combine them. We cannot, however, simply replace the old with the new, but we must introduce strategies to recognize, represent, model and act on new levels, combining multiple representations, functions and emergence. In many disciplines this has been already done, and inevitably well, since targets and projects are well specified and oriented. The challenge is to do it for Systemics, with the vocations of cultural and theoretical generalization. Examples of new issues introduced by such theoretical disciplinary improvements, dealt with by many disciplines, include the study of mesoscopic or middle-way level, of multiple and dynamic coherence, of equivalence/non-equivalence, of fractality, of networks, of non-causality, of non-invasiveness, of non-prescribability, of non-separability, of quasi properties, of symmetry properties, of topological dynamics, as well as of quantum theories and concepts. The conference was devoted to identifying, discussing and understanding possible interrelationships of theoretical disciplinary improvements, recognized as having prospective fundamental roles for a new post-Bertalanffy Systemics. The latter should be able to deal with problems related to complexity in a generalized way. In this context the inter-disciplinarity should consists, for instance, in a disciplinary reformulation of problems, as from algebraic to geometrical, from military to political, from biological to chemical, while the trans-disciplinarity should be related to the study of such reformulations and their properties. The Italian Systems Society (AIRS) was founded in the 1996. The AIRS is a network of academicians, scientists, researchers and professionals involved in Systemics. A partial list of disciplines represented is: Architecture Biology Economics Education Engineering Mathematics Neurosciences Medicine Music Philosophy Psychology Physics. Previous conferences had as open lecturers professors Arecchi, Haken, Klir, and Kauffman. The proceedings have been published as: 1. Lambin's unique approach reflects how marketing operates empirically, as both a business philosophy and an action-oriented process. Motivated by the increased complexity of markets, globalisation, deregulation, and the development of e-commerce, the author challenges the traditional concept of the 4Ps and the functional roles of marketing departments, focusing instead on the concept of market orientation. The book considers all of the key market stakeholders, arguing that developing market relations and enhancing customer value is the responsibility of every member of the organization, and that the development of this customer value is the only way for a firm to achieve profit and growth. New to this edition: - Greater coverage of ethical issues and corporate social responsibility; cultural diversity; value and branding and the economic downturn - Broad international perspective - Thoroughly revised to reflect the latest academic thinking and research With its unique approach, international cases and complementary online resources, this book is ideal for postgraduate and upper level undergraduate students of marketing, and for MBAs and Executive MBAs.</p> <p>Handbook of Industrial Organization- 2003</p> <p>How to Thrive in the Digital Age-Tom Chatfield 2012-05-10 Our world is, increasingly, a digital one. Over half of the planet’s adult population now spend more of their waking hours ‘plugged in’ than not, whether to the internet, mobile telephony, or other digital media. To email, text, tweet and blog our way through our careers, relationships and even our family lives is now the status quo. But what effect is this need for constant connection really having? For the first time, Tom Chatfield examines what our wired life is really doing to our minds and our culture - and offers practical advice on how we can hope to prosper in a digital century. Digital Libraries and Archives-Maristella Agosti 2011-12-07 This book constitutes the thoroughly refereed proceedings of the 7th Italian Research Conference on Digital Libraries held in Pisa, Italy, in January 2011. The 20 revised full papers presented were carefully reviewed and cover topics of interest such as system interoperability and data integration; formal and methodological foundations of digital libraries; semantic web and linked data for digital libraries; multilingual information access; digital library infrastructures; metadata creation and management; search engines for digital library systems; evaluation and log data; handling audio/visual and non-traditional objects; user interfaces and visualization; digital library quality.

The Irresistible Blueberry Bakeshop & Cafe-Mary Simses 2013-07-09 "You will devour The Irresistible Blueberry Bakeshop &Cafe. Mary Simses can write evocative detail that puts you right in the scene, with dialogue that always rings true."-James Patterson A high-powered Manhattan attorney finds love, purpose, and the promise of a simpler life in her grandmother's hometown. Ellen Branford is going to fulfill her grandmother's dying wish--to find the hometown boy she once loved, and give him her last letter. Ellen leaves Manhattan and her Kennedy-esque fiance for Beacon, Maine. What should be a one-day trip is quickly complicated when she almost drowns in the chilly bay and is saved by a local carpenter. The rescue turns Ellen into something of a local celebrity, which may or may not help her unravel the past her grandmother labored to keep hidden. As she learns about her grandmother and herself, it becomes clear that a 24-hour visit to Beacon may never be enough. THE IRRESISTIBLE BLUEBERRY BAKESHOP & CAFE is a warm and delicious debut about the power of a simpler life.

How to Be the Perfect Grandma-Bryna Nelson Paston 2010 Becoming a grandma is like getting a subpoena. You don't expect it. You don't know how to respond. You know you must be mature and accept it. Being a grandma, though, is as close as many of us ever get to perfection. Filled with snappy one-liners followed by humorous anecdotes, this is the perfect gift book to keep grandma laughing. As author Bryna Nelson Paston says, "We have a window of opportunity as grandparents, usually five years, or maybe more if you're lucky. So you have to make your move fast and decisively. Your kids and their spouses will intrude, interrupt, and interfere. But persevere. Circumvent them, do exactly what you want, and lie-- with dignity, I might add. Whatever it takes. Promise anything, but get the kid."

Emergence in Complex, Cognitive, Social, and Biological Systems-Gianfranco Minati 2012-12-06 The systems movement is made up of many systems societies as well as of disciplinary researchers and researches, explicitly or implicitly focusing on the subject of systemics, officially introduced in the scientific community fifty years ago. Many researches in different fields have been and continue to be sources of new ideas and challenges for the systems community. To this regard, a very important topic is the one of EMERGENCE. Between the goals for the actual and future systems scientists there is certainly the definition of a general theory of emergence and the building of a general model of it. The Italian Systems Society, Associazione Italiana per la Ricerca sui Sistemi (AIRS), decided to devote its Second National Conference to this subject. Because AIRS is organized under the form of a network of researchers, institutions, scholars, professionals, and teachers, its research activity has an impact at different levels and in different ways. Thus the topic of emergence was not only the focus of this conference but it is actually the main subject of many AIRS activities.

The Beatitudes-John Stott 2020-06-02 The beatitudes reveal to us eight qualities that bring God's blessing. As we study these qualities and integrate them into our lives, we will receive the blessing Jesus promised to his followers then and now. In this newly updated Bible study guide you can explore Scripture under John Stott's guidance.

Insights Into Specialized Translation-Maurizio Gotti 2006 This volume focuses on specialist translation - one of the areas of translation in greatest demand in our age of globalization. The 16 chapters deal not only with the classical domains of science and technology, law, socio-politics and medicine but also with lesser researched areas such as archeology, geography, nutrigenomics and others. As a whole, the book achieves a blend of theory and practice. It addresses a variety of issues such as translation strategy based on text type and purpose, intercultural transfer and quality assessment, as well as textual and terminological issues in bilingual and multilingual settings, including international organizations and the European Union. Today translation competence presupposes multidisciplinary skills. Whereas some chapters analyze the linguistic features of special-purpose texts and their function in specialized communication, others show how specialized translation has changed as a result of globalization and how advances in technology have altered terminology research and translation processing.

Outside-In □ Inside-Out-Costantino Maeder 2005-02-28 This fourth volume of the Iconicity series is like its predecessors devoted to the study of iconicity in language and literature in all its forms. Many of the papers turn the notion of iconicity 'inside-out', some suggesting that 'less-is-more'; others focus on the cognitive factors 'inside' the brain that are important for the iconic phenomena that are produced in the 'outside' world. In addition this volume includes a paper related to iconicity in music and its interaction with language. Other papers range from the theoretical issues involved in the evolution of language, to those that offer many 'inside-out' claims, such as claiming that nouns are derived from pronouns, and as such should more properly be called 'pro-pronouns'. Also, this volume includes perhaps the first English-language analysis of the iconic aspects of sound symbolism in a prayer from the Koran. This is a truly interdisciplinary collection that should turn some of the notions of iconicity in language and literature 'outside-in' and 'inside-out'.

Why Has Inflation in the United States Remained So Low? Reassessing the Importance of Labor Costs and the Price of Imports-Jorge A. Chan-Lau 1999-11 1. Since the second half of 1996, consumer price inflation in the United States has slowed noticeably. At the same time, growth in real output has accelerated, and the unemployment rate has declined to historically low levels. The confluence of these developments has raised a number of questions about how strong growth in output and employment can coexist without igniting stronger upward pressure on consumer prices. The purpose of this paper is to identify and quantify the importance of some factors that have played a role in keeping inflation low since 1996, namely, the slowdown in the growth of non-wage labor compensation, the decline in the price of imports, and real marginal labor costs.
