Fiscal Administration-John Mikesell 2010-01-19 FISCAL ADMINISTRATION, Eighth Edition, is based on two principles: that students must understand precisely where the money for public budgets comes from; and that, to learn public finance and budgeting, students must run the numbers. John L. Mikesell--an authority on the revenue side of public finance--gives students detailed instruction to equip them to deal with the complex issues and calculations they will encounter in the field. In most chapters, Mikesell includes questions and exercises that require calculations to get specific answers. Also included are Cases for Discussion and Sidebars that supplement the regular text with more in-depth treatment of key topics. This new edition includes the budget information from the Obama administration and the latest federal government fiscal data. Fiscal Administration-John L. Mikesell 2003 FISCAL ADMINISTRATION is based on two principles: that students must clearly understand the details of where the money for public budgets comes from; and that, to learn public finance and budgeting, students must "run the numbers." John Mikesell--an authority on the revenue side of public finance--focuses on his area of specialty, giving students detailed instruction that will equip them to deal with the complex issues and calculations they will encounter in the field. In most chapters, Mikesell includes questions and exercises that require calculations to get specific answers, as well as "Cases for Discussion" and "Sidebars" that supplement the regular text with more in-depth treatment of key topics. This edition also includes the most recent federal budget information, as well as the latest federal government fiscal data.

Fiscal Administration-John Mikesell 2016-12-05 FISCAL ADMINISTRATION, Tenth Edition, is based on two principles: Students must understand precisely where the money for public budgets comes from and where it goes, and students must run the numbers to effectively learn public finance and budgeting and to be immediately useful to prospective employers. Public Administration-Robert P. Watson 2001-10-01 This unique series of role-playing scenarios gives readers a realistic view of what it is like to manage public agencies, programs, and employees, providing readers with a deeper understanding of the field through active learning. The book features contemporary, realistic cases of typical managerial challenges faced by administrators in both the public and non-profit sectors. Compiled and edited by Professor Robert Watson, the 24 cases in this volume have been written by public administration instructors and practitioners from across the country and, as is often the situation in the real world, there are no easy answers to the challenges presented. For those interested in public administration, public personnel management.

Public Administration-R B & J V Denhardt 2009-08-01

Public Administration-Marc Holzer 2015-09-16 Marc Holzer and Richard W. Schweser have written a fresh and highly engaging textbook for the introductory course in Public Administration. Their coverage is both comprehensive and cutting-edge, including not only all the basic topics (OT, budgeting, HRM), but also reflecting new realities in public administration: innovations in e-government, the importance of new technology, changes in intergovernmental relations, especially the emphasis on inter-local and shared regional resources, and public performance and accountability initiatives. Public Administration has been crafted with student appeal in mind. Each of the book's chapters is generously illustrated with cartoons, quotes, and artwork--all reinforcing the book's theme that the field of public administration is rooted in the cultural and political world. Each chapter is also supported with a listing of key terms, exercises, and additional resources. The textbook is supported by one of the most comprehensive and easy-to-use instructors' manuals of any introductory text on the market today. It contains full lesson plans with activities to accommodate a broad range of teaching and learning styles for each chapter, PowerPoint decks for each chapter (with visuals and links embedded), 8 new long-term project / student presentation ideas, an updated 'Quotes and Notables' section with biographical information and media links for each chapter, updated test questions with answer keys, and updated terms and definitions for each chapter.

The Public Administration Workbook-Dennis L. Dresang 2016-08-05 Public administration is a craft that demands real-world application of concepts and theories often learned in a classroom. Yet many students find it difficult to make the leap from theory to practice completely unaided. The Public Administration Workbook, 8e is specifically designed with the theoretically-grounded, practice-minded student in mind. It reviews scholarship in political science, law, industrial psychology, and the sociology of organizations and then allows students to see how these intellectual fields inform the analytical and managerial tasks that comprise public administration. Where standard public administration textbooks examine the nature of public agencies and explain how bureaucracies relate to other institutions, this workbook promotes a more effective way of learning--by doing--and more directly prepares those who will pursue careers in public agencies. Each chapter begins with a discussion of relevant concepts and scholarship before moving into a hands-on exercise analyzing core analytical and management challenges. This edition includes an all-new exercise on contract negotiation, many international examples interwoven throughout the book, and a fully updated HRM section to reflect alternative ranking and compensation systems. Each chapter is further supported by a detailed Instructor's Manual written by the author to guide instructors on solutions, explanations, and ideas for using or modifying the exercises to fit a variety of course needs, as well as downloadable datasets and exercises, providing students with a unique opportunity to apply and test classroom concepts outside of the job.

Financial Strategy for Public Managers-Sharon Kioko 2017-09-07 Financial Strategy for Public Managers is a new generation textbook for financial management in the public sector. It offers a thorough, applied, and concise introduction to the essential financial concepts and analytical tools that today's effective public servants need to know. It starts "at the beginning" and assumes no prior knowledge or experience in financial management. Throughout the text, Kioko and Marlowe emphasize how financial information can and should inform every aspect of public sector strategy, from routine procurement decisions to budget preparation to program design to major new policy initiatives. They draw upon dozens of real-world examples, cases, and applied problems to bring that relationship between information and strategy to life. Unlike other public financial management texts, the authors also integrate foundational principles across the government, non-profit, and "hybrid/for-benefit" sectors. Coverage includes basic principles of accounting and financial reporting, preparing and analyzing financial statements, cost analysis, and the process and politics of budget preparation. The text also includes several large case studies appropriate for class discussion and/or graded assignments.

Financial Management for Public, Health, and Not-for-profit Organizations-Steven A. Finkler 2012-06 One of the few texts that addresses financial and managerial accounting within the three major areas of the public sector. Financial Management for Public, Health, and Not-for-Profit provides the fundamentals of financial management for those pursuing careers within the public, health and not-for-profit fields. With a unique presentation that explains the rules specific to the public sector, this book outlines the framework for students to access and apply financial information more effectively. This edition has added the expertise of new coauthors Bob Purtefl (financial markets and health care financial management), Thad Calabrese (not-for-profit and government financial management) and Dan Smith (government area), and includes a new chapter devoted to case studies.

Applications in Personnel/Human Resource Management-Stella M. Nkomo 1988

State and Local Financial Instruments-Craig L. Johnson 2014-09-26 The ability of a nation to finance its basic infrastructure is essential to its economic well-being in the 21st century. The Road to Results-Linda G. Morra-Imas 2009 'The Road to Results: Designing and Conducting Effective Development Evaluations' presents concepts and procedures for evaluation in a development context. It provides procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations and do social mapping, and how to construct a "rigorous" quasi-experimental design to answer an impact question. The text begins with the context of development evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation, such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations. The topics of implementing 'Results-based Measurement and Evaluation' and constructing a 'Theory of Change' are emphasized throughout the text. Next, the authors take the reader down 'the road to results,' presenting procedures for evaluating projects, programs, and policies by using a 'Design Matrix' to help map the process. This road includes: determining the overall approach, formulating questions, selecting designs, developing data collection instruments, choosing a sampling strategy, and planning data analysis for qualitative, quantitative, and mixed method evaluations. The book also includes discussions on conducting complex evaluations, how to manage evaluations, how to present results, and ethical behavior--including principles, standards, and guidelines. The final chapter discusses the future of development evaluation. This comprehensive text is an essential tool for those involved in development evaluation.

Transformations: Women, Gender and Psychology-Mary Crawford 2006

The Teacher Wars-Dana Goldstein 2015 "A brilliant young scholar's history of 175 years of teaching in America shows that teachers have always borne the brunt of shifting, often impossible expectations. In other nations, public schools are one thread in a quilt that includes free universal child care, health care, and job training. Here, schools are the whole cloth. Today we look around the world at countries like Finland and South Korea, whose students consistently outscore Americans on standardized tests, and wonder what we are doing wrong. Dana Goldstein first asks the often-forgotten question: "How did we get here?" She argues that we must take the historical perspective, understanding the political and cultural baggage that is tied to teaching, if we have any hope of positive change. In her lively, character-driven history of public teaching, Goldstein guides us through American education's many passages, including the feminization of teaching in the 1800s and the fateful growth of unions, and shows that the battles fought over nearly two centuries echo the very dilemmas we cope with today. Goldstein shows that recent innovations like Teach for America, merit pay, and teacher evaluation via student testing are actually as old as public schools themselves. Goldstein argues that long-festering ambivalence about teachers--are they civil servants or academic professionals?--and unrealistic expectations that the schools alone should compensate for poverty's ills have driven the most ambitious people from becoming teachers and sticking with it. In America's past, and in local innovations that promote the professionalization of the teaching corps, Goldstein finds answers to an age-old problem"--

The Bretton Woods Debates-Raymond Frech Mikesell 1994

The Economic Analysis of Public Policy-William K. Bellingr 2007-08-07 A critical analysis of public policy decisions requires a far greater depth of knowledge than one receives from news reports and political speeches. Issues such as how best to reduce traffic congestion, reduce acid rain, improve airline safety or develop a parcel of land are better understood by organizing, measuring and weighing the effects of alternative policies. William K. Bellingr's new text book is an ideal introduction to benefit-cost analysis, the economics of efficiency, risk analysis and present value discounting for those with only a modest background in mathematics and economics. Bellingr presents the key concepts for analyzing public policy with frequent problems, discussion questions and case studies throughout the book. Placing a great emphasis on teaching as well as sharing knowledge, this book encourages its readers to both understand and apply each concept and learn to appreciate policy analysis as part of an interdisciplinary, analytical and political process that can lead to better government policy decisions. This book is an ideal teaching tool for undergraduate and Master's students engaged in Public Administration, Public Economics, and Public Policy.

Local Budgeting-Anwar Shah 2007 Local budgeting serves important functions that include setting priorities, planning, financial control over inputs, management of operations and accountability to citizens. These objectives give rise to technical and policy issues that require open discussion and debate. The format of the budget document can facilitate this debate. This book provides a comprehensive treatment of all aspects of local budgeting needed to develop sound fiscal administration at the local level. Topics covered include fiscal administration, forecasting, fiscal discipline, fiscal transparency, integrity of revenue administration, budget formats, and processes including performance budgeting, and capital budgeting.

Covering Oil-Svetlana Tsalik 2005 The Revenue Watch program and the Initiative for Policy Dialogue promote transparency and civic participation in natural resource policymaking. Journalists know how hard it is to report on government management of oil, gas, and other natural resource revenues. Governments and industry are seldom forthcoming. And reporters themselves usually lack the background in economics, engineering, geology, and corporate finance helpful to understanding the energy industry and the effects of resource wealth. This book attempts to redress the balance with practical information in easy to understand language. Chapters include Understanding the Resource Curse, A Primer on Oil, Oil Companies and the International Oil Market, the ABCs of Petroleum Contracts, and the Environmental, Social, and Human Rights Impacts of Oil Development. Tip sheets inform reporters about stories to pursue and questions to ask.

Accounting for Governmental and Nonprofit Entities-Jacqueline Reck 2015

Budget Theory in the Public Sector-Aman Khan 2002 Opens new areas of inquiry into the art and skill of public sector budgeting, and sees it as an institutional process, decision making tool, and--when well done--a reflection of managerial efficiency.

Public Budgeting in African Nations-Peter Fuseini Haruna 2016-04-14 Public Budgeting in African Nations aims to provide usable budgeting and fiscal policy management information to development practitioners interested in improving the performance of governments in the context of good governance. It shares regional and cross-cultural experiences with international audiences and gives reflective attention to comparative budgeting and fiscal policy management. With a promising economic and fiscal forecast, such information is timely for international development practitioners and for scholars and researchers interested in advancing development management. This book adopts an interdisciplinary/pragmatic approach to analyze and present research findings on public budgeting as a sustainable development tool. The central argument is that development practice will benefit from a bottom-up, decentralized approach to budgeting and fiscal policy management, involving national, sub-national, and civil society institutions. From this perspective, a balanced budget should draw from and reflect values and priorities across the full spectrum of social and political life.

Local Public Financial Management-Anwar Shah 2007 Transparent and prudent local financial management has come to be recognized as critical to the integrity of local public sector and to gaining and retaining trust of local residents. Such integrity and trust is sometimes lacking in some local governments in developing countries, especially in the Africa region. This volume attempts to provide practical guidance to local governments interested in establishing sound financial management systems. Leading international experts have contributed to all relevant aspects of local public financial management - cash management, internal controls, accounts, audits, and debt management.

Balancing Petroleum Policy-Alexander Huurdeman 2019-05-16 Petroleum discovery in a country presents its policy makers with a challenging and complex task: formulating and agreeing on policies that will shape the country's petroleum sector and guide the translation of the newly discovered resources into equitable and sustainable economic and social growth for the nation over the long term. Balancing Petroleum Policy provides policy makers and other stakeholders with the basic sector-related knowledge they need to embark on this task. It introduces a number of topics: the petroleum value chain and pivotal factors affecting value creation, a consultative process for developing a nation's common vision on key petroleum development objectives, design of a legislative and contractual framework, petroleum fiscal regimes and their administration, prudent fiscal management, transparency and governance, environmental and social safeguards, and economic diversification through industrial linkages. Although much of the material is relevant to designing policies for the development of the petroleum sector in general, the book gives special focus to developing countries, countries in a federal or devolved setting, and countries that have experienced or are still experiencing civil conflict. With this focus in mind, the book examines three questions--ownership, management, and revenue sharing of petroleum resources--that are central to petroleum policy in any federal or devolved state. It also offers important perspectives on how to prevent violent conflicts related to such resources. Petroleum policies tend to vary significantly from country to country, as do the objectives that such policies aim to achieve in the specific context of each particular country. Although there is no one-size-fits-all policy and there are no clear-cut answers to the many potential policy dilemmas associated with the discovery of petroleum resources, this publication may help policy makers find the right balance among the chosen objectives--and the right policy choices to achieve these objectives.

The Philosophy of Public Administration- A Holistic Approach-J. S. H. Gildenhuis 2004-01-01 A user-friendly textbook for students and teachers, The Philosophy of Public Administration covers all aspects of the public administration and management process as an instrument of serving the public. It lays a sound foundation of the basic principles and values, and it facilitates excellence in all the varied circumstances a professional public manager/administrator may encounter in practice. Offers a comprehensive overview of childhood from an anthropological perspective Draws upon a wide range of examples and evidence from different geographical areas and belief systems Synthesizes existing literature on the anthropology of childhood, while providing a fresh perspective Engages students with illustrative ethnographies to illuminate key topics and themes

Third World Political Ecology-Sinead Bailey 2005-08-08 An effective response to contemporary environmental problems demands an approach that integrates political, economic and ecological issues. Third World Political Ecology provides an introduction to an exciting new research field that aims to develop an integrated understanding of the political economy of environmental change in the Third World. The authors review the historical development of the field, explain what is distinctive about Third World political ecology, and suggest areas for future development. Clarifying the essentially politicised condition of environmental change today, the authors explore the role of various actors - states, multilateral institutions, businesses, environmental non-governmental organisations, poverty-stricken farmers, shifting cultivators and other 'grassroots' actors - in the development of the Third World's politicised environment. Third World Political Ecology is the first major attempt to explain the development and characteristics of environmental problems that plague parts of Asia, Africa and Latin America. Drawing on examples from throughout the Third World, the book will be of interest to all those who wish to understand the political and economic bases of the Third World's current predicament.

Public Expenditure Analysis-World Bank 2005 Focuses on the public sector in developing countries. Provides tools of analysis for discovering equity in tax burdens as well as in public spending and judging government performance in its role in safeguarding the interests of the poor and disadvantaged. Outlines a framework for a rights-based approach to citizen empowerment - in other words, creating an institutional design with appropriate rules, restraints, and incentives to make the public sector responsive and accountable to an average voter.

Public Services Delivery-World Bank 2005 This publication sets out a framework for analysing the performance of governments in developing countries, looking at the government as a whole and at local and municipal levels, and focusing on individual sectors that form the core of essential government services, such as health, education, welfare, waste disposal, and infrastructure. It draws lessons from performance measurement systems in a range of industrial countries to identify good practice around the world in improving public sector governance, combating corruption and making services work for poor people.

Engaging Public Sector Clients-John Alford 2009-04-08 Exploring three rich cases across three countries, this book shows how government organizations need their clients to contribute time and effort to co-producing public services, and how organizations can better elicit this work from them, by providing good client service and appealing to their intrinsic needs and social values.

Governing the Metropolis-Eduardo Rojas 2008 This book explores key metropolitan management issues, presents practical principles of good governance as they apply to the metropolis, and unfolds cases of institutional and programmatic arrangements to tackle such issues.
