Nonprofit Organizations, Cases and Materials-James Fishman 2015-07-28 The Fifth Edition of this pioneering casebook includes the usual rich mix of materials and is adaptable to a survey course, a policy-oriented seminar, or a more specialized J.D. or LL.M tax class. Every major topic is accompanied by a skillfully developed set of problems and includes lively notes, questions, and bibliographic references. Highlights of the Fifth Edition include: Coverage of all important developments since the last edition, including new state legislation and case law on nonprofit formation, governance, and donor standing; IRS scrutiny of colleges and universities, nonprofit executive compensation, and commercial activities; final tax regulations on the public charity support tests and supporting organizations; proposed regulations on the exemption requirements for hospitals and program-related investments; and recent antitrust litigation and other lawsuits challenging the NCAA's regulation of college athletes. Reorganized and updated coverage of the limitations on lobbying and political campaign activities of § 501(c)(3) charities; the use and abuse of noncharitable exempt organizations for political activities; and the implications of the Supreme Court's Citizens United decision on the nonprofit sector. Expanded discussion of the emerging forms of hybrid entities used for social enterprises that combine a public benefit mission with the pursuit of profit. A new and more contemporary introductory problem on the choices facing the founders of a nonprofit organization and revised problems on the state law duties of loyalty and care and the federal tax exemption standards for hospitals. A survey of proposed tax reform legislation affecting exempt organizations and the charitable deduction. Pruning of dated materials, minutia, and more tightly-edited cases, notes, and problems.

Nonprofit Organizations-James J. Fishman 2006

Nonprofit Organizations, Cases and Materials 2008-James J. Fishman 2008 This is the 2008 supplement to Fishman and Schwarz' Nonprofit Organizations Cases and Materials, 3d law school casebook. It includes expertly edited cases issued since release of the casebook, class notes, and problems for class discussion.

Taxation of Nonprofit Organizations-James J. Fishman 2003 This casebook provides detailed information on nonprofit organizations. The casebook provides the tools for fast, easy, on-point research. Part of the University Casebook Series®, it includes selected cases designed to illustrate the development of a body of law on a particular subject. Text and explanatory materials designed for law study accompany the cases.

Taxation of Nonprofit Organizations, Cases and Materials-James J. Fishman 2015-07-14 This casebook has been adapted from the authors' pioneering and widely used casebook, Nonprofit Organizations: Cases and Materials. Topics covered include organizational and operational requirements for tax-exempt status for charitable and mutual benefit organizations, private foundations, the unrelated business income tax, and the charitable contributions deduction. An introductory chapter provides valuable perspective and a concise overview of the nontax considerations affecting choice of legal form for a nonprofit organization. The Fourth Edition incorporates all important new legislative, judicial and administrative developments, including final regulations on the public charity support tests and supporting organizations; proposed regulations on the heightened exemption requirements for nonprofit hospitals and program-related investments; and the ongoing controversy over the use of nonprofit organizations for political campaign activity. Perfect for instructors seeking more intensive tax-focused coverage, this spin-off edition has been carefully customized for use in 2 or 3-unit J.D. and LL.M courses on taxation of the nonprofit sector. Each chapter contains a rich but manageable mix of materials, including well-edited cases, major rulings, policy excerpts, lively notes and questions, skillfully designed problems that raise policy, technical and planning issues, and bibliographic references.

Understanding Nonprofit and Tax Exempt Organizations-Nicholas P. Cafardi 2012-03-27 Understanding Nonprofit and Tax Exempt Organizations is a guide for the law student or practitioner who is looking to understand the law governing the nonprofit, tax exempt sector. This text deals with the many types of tax exempt organizations; the rules, regulations and limitations imposed on tax exempt organizations by the courts, the Internal Revenue Code (IRS) and the Treasury Regulations (the Regulations); the charitable contribution and fundraising issues affecting tax exempt organizations; the unrelated business income tax, excise taxes and intermediate sanctions imposed on tax exempt organizations; and the rules regarding private foundations. This new Second Edition reflects recent changes in the law made by the Pension Protection Act of 2006 and the Patient Protection and Affordable Care Act of 2010. The Second Edition of Understanding Nonprofit and Tax Exempt Organizations begins with an introduction to nonprofit organizations by discussing the relevant law in general, as nonprofits are governed by state law. Next, tax exempt organizations are discussed, by first giving the reader the background on where such organizations fit in the nonprofit sector; why the organizations are given preferential tax treatment; what form these organizations take; and how such organizations are governed and dissolved. The Second Edition also provides detailed explanations of the various rules, regulations and tests they must follow in order to obtain or retain their tax exempt status as well as the consequences for failure to comply.

Who Benefits from the Nonprofit Sector?-Charles T. Clotfelter 1992 This accessible study examines all the major elements of the nonprofit sector of the economy of the United States —health services, educational and research institutions, religious organizations, social services, arts and cultural organizations, and foundations—describing the institutions and their functions, and then exploring how their benefits are distributed across various economic classes. The book's findings indicate that while few institutions serve primarily the poor, there is no evidence of a gross distribution of benefits upward toward the more affluent. The analysis of this data makes for a book with profound implications for future social and tax policy.

The Charitable Tax Exemption-John D Colombo 2019-07-11 The tradition of tax-exempt status for nonprofit "charitable" organizations is well established, and few would argue with the principle. But the tax-exempt sector of the economy is vast and rapidly growing, resulting in the loss of billions of dollars of tax revenue. At the same time, we have no consensus on what purpose the charitable tax exemption serves, let alone agreement on what constitutes a charity. In this important addition to the theory of tax law, Colombo and Hall develop an original "donative" theory that links the charitable tax exemption to the ability of an organization to derive donative support from the community. Their theory not only makes intuitive sense but also receives support from economic, political, and moral theory. Its implications would rationalize the charitable tax exemption, comport with legal precedent, and simplify the administration of the law. The Charitable Tax Exemption is a major contribution to the theory of tax law and should be essential reading for a wide range of lawyers dealing with taxes. It will also be enlightening for anyone involved in the operation of a nonprofit organization

Comparative Corporate Governance of Non-Profit Organizations-Klaus J. Hopt 2010-04-22 The economic importance of the non-profit sector is growing rapidly in the USA and Europe. However, the law has not kept abreast with its development. The European Court of Justice has extended certain freedoms of the EC Treaty to non-profit organisations, and more case law is expected to follow in the near future, but the observations, theories, solutions and legal and non-legal rules in this field are manifold. The chances of harmonising the law on a European level are slim. Despite these differences, a common core of international corporate governance problems and regulatory solutions can be seen. This volume of essays brings together a variety of international experts from both corporate governance and governance of non-profit organisations to compare the two areas and explore the lessons that can be learned regarding comparative corporate governance for non-profit organisations.

Governing Nonprofit Organizations-Marion R. Fremont-Smith 2009-06-30 The nonprofit sector is a vital component of our society and is allowed the greatest freedom to operate. The public understandably assumes that since nonprofit organizations are established to do good, the people who run nonprofits are altruistic, and the laws governing nonprofits have reflected this assumption. But as Marion Fremont-Smith argues, the rules that govern how nonprofits operate are inadequate, and the regulatory mechanisms designed to enforce the rules need improvement. Despite repeated instances of negligent management, self-interest at the expense of the charity, and outright fraud, nonprofits continue to receive minimal government regulation. In this time of increased demand for corporate accountability, the need to strengthen regulation of nonprofits is obvious. Fremont-Smith addresses this need from a historical, legal, and

organizational perspective. She combines summaries and analysis of the substantive legal rules governing the behavior of charitable officers, directors, and trustees with descriptions of the federal and state regulatory schemes designed to enforce these rules. Her unique and exhaustive historical survey of the law of nonprofit organizations provides a foundation for her analysis of the effectiveness of current law and proposals for its improvement.

The eBook versions of this title feature links to Lexis Advance for further legal research options.

The Cash Flow Management Book for Nonprofits-Murray Dropkin 2001-10-22 The first and only guide of its kind to offer nonprofit executives help with the vital task of cash flow management! Murray Dropkin--an expert in the field of nonprofit accounting and author of The Budget-Building Book for Nonprofits--reveals how to create an effective plan for cash flow management. This unprecedented guide offers you nuts-and-bolts suggestions for using this plan to develop successful strategies for the day-to-day and long-term financial planning of any nonprofit organization. Filled with to-do lists, sample forms, worksheets, schedules, policies and procedures, and checklists, The Cash Flow Management Book for Nonprofits is a fundamental financial management toolkit for nonprofit managers and board members.

Accounting for Governmental and Nonprofit Organizations-Terry Patton 2018-03-12

A Dictionary of Nonprofit Terms and Concepts-David Horton Smith 2006-11-08 This reference work defines more than 1,200 terms and concepts that have been found useful in past research and theory on the nonprofit sector. The entries reflect the importance of associations, citizen participation, philanthropy, voluntary action, nonprofit management, volunteer administration, leisure, and political activities of nonprofits. They also reflect a concern for the wider range of useful general concepts in theory and research that bear on the nonprofit sector and its manifestations in the United States and elsewhere. This dictionary supplies some of the necessary foundational work on the road toward a general theory of the nonprofit sector.

Cases and Materials on Fundamentals of Partnership Taxation-Stephen A. Lind 1992

Nonprofit Management Education-Michael O'Neill 1998 Charts the growth and examines the issues and controversies in the rapidly expanding field of nonprofit management education.

Handbook of Research on Nonprofit Economics and Management-Bruce Alan Seaman 2010 Nonprofit organizations are arguably the fastest growing and most dynamic part of modern market economies in democratic countries. This book explores the frontiers of knowledge at the intersection of economics and the management of these entities. The authors review the role, structure and behavior of private, nonprofit organizations as economic units and their participation in markets and systems of public service delivery, assess the implications of this knowledge for the efficient management of nonprofit organizations and the formulation of effective public policy, and identify cutting-edge questions for future research. Chapters address five broad categories of scholarship: development and management of the diverse economic resources supporting nonprofit organizations; market behavior of nonprofits; strategic economic decision-making; evaluation and performance of them; and impacts and implications of public policies affecting nonprofit organizations. Topics include: income diversification and crowd-out among income sources, paid and volunteer labor markets, competition and collaboration among nonprofits and for-profits, pricing and diversification of nonprofit products and services, performance measurement and regulation, contracting, franchising and federation practices, and government taxation and funding. The book will help nonprofit scholars identify new areas of productive research, help practicing managers understand the underlying economics of their decision-making, and offer teachers and students a concise and penetrating view of key economic dimensions to managing nonprofit organizations.

Humboldt County Land Group-Caitlin Sloat Dyckman 2001

Taxation of International Transactions-Charles H. Gustafson 2001

Symposium- 2009

The Law of Tax-Exempt Organizations, 2017 Cumulative Supplement-Bruce R. Hopkins 2017-03-10 The gold-standard guide to nonprofit law, updated for 2017 The Law of Tax-Exempt Organizations + Website is the definitive reference for leaders and lawyers of tax-exempt organizations. Written by the field's most respected authority, this book provides comprehensive coverage of all currently relevant regulations to help you make informed decisions about the future of your organization. This new 2017 cumulative supplement includes important updates and revisions with respect to tax regulations and court opinions, including expanded discussion on the private benefit doctrine and unrelated business activity, governance, donor-advised funds, and supporting organizations. Accessible language and extensive tabular information allow for easy navigation and quick reference, while the companion website features additional resources that provide additional depth on specific topics. Tax laws are continuously evolving, and the statutes and regulations for tax-exempt organizations change more quickly than most. This book compiles all of the latest pertinent statutes, regulations, rulings, and court opinions into a single reference that no nonprofit should be without. Get up to date on the latest changes to tax regulations for exempt organizations Learn the new and expanded rules for supporting organizations Review recent IRS rulings, Treasury Department regulations, and court opinions Find answers to the emerging issues surrounding the commerciality doctrine governance, unrelated business, constitutional law issues, and much more Failure to keep pace with changing tax law can easily result in costly penalties; in the non-profit world, each and every dollar is precious--by staying up to date on tax-exempt regulations, you not only avoid penalties, but you may discover new developments that actually benefit your bottom line. The Law of Tax-Exempt Organizations + Website provides the information you need, and the expert guidance to help you take advantage of every opportunity.

Education for Life and Work-National Research Council 2013-01-18 Americans have long recognized that investments in public education contribute to the common good, enhancing national prosperity and supporting stable families, neighborhoods, and communities. Education is even more critical today, in the face of economic, environmental, and social challenges. Today's children can meet future challenges if their schooling and informal learning activities prepare them for adult roles as citizens, employees, managers, parents, volunteers, and entrepreneurs. To achieve their full potential as adults, young people need to develop a range of skills and knowledge that facilitate mastery and application of English, mathematics, and other school subjects. At the same time, business and political leaders are increasingly asking schools to develop skills such as problem solving, critical thinking, communication, collaboration, and self-management - often referred to as "21st century skills." Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century describes this important set of key skills that increase deeper learning, college and career readiness, student-centered learning, and higher order thinking. These labels include both cognitive and non-cognitive skills- such as critical thinking, problem solving, collaboration, effective communication, motivation, persistence, and learning to learn. 21st century skills also include creativity, innovation, and ethics that are important to later success and may be developed in formal or informal learning environments. This report also describes how these skills relate to each other and to more traditional academic skills and content in the key disciplines of reading, mathematics, and science. Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century summarizes the findings of the research that investigates the importance of such skills to success in education, work, and other areas of adult responsibility and that demonstrates the importance of developing these skills in K-16 education. In this report, features related to learning these skills are identified, which include teacher professional development, curriculum, assessment, after-school and out-of-school programs, and informal learning centers such as exhibits and museums.

Nonprofit Compensation, Benefits, and Employment Law-David G. Samuels 1998-01-30 Issues surrounding executive compensation, employee benefits, and employment law are becoming increasingly important to nonprofits. And with the recent passage of intermediate sanctions, the government has signalled that they will be watching compensation and benefits of nonprofits very closely. This timely book fills the growing need by nonprofit executives for an accessible guide to legislation, case law, and IRS regulations.

Identifying and Supporting Productive STEM Programs in Out-of-School Settings-National Research Council 2015-10-26 More and more young people are learning about science, technology, engineering, and mathematics (STEM) in a wide variety of afterschool, summer, and informal programs. At the same time,

there has been increasing awareness of the value of such programs in sparking, sustaining, and extending interest in and understanding of STEM. To help policy makers, funders and education leaders in both school and out-of-school settings make informed decisions about how to best leverage the educational and learning resources in their community, this report identifies features of productive STEM programs in out-of-school settings. Identifying and Supporting Productive STEM Programs in Out-of-School Settings draws from a wide range of research traditions to illustrate that interest in STEM and deep STEM learning develop across time and settings. The report provides guidance on how to evaluate and sustain programs. This report is a resource for local, state, and federal policy makers seeking to broaden access to multiple, high-quality STEM learning opportunities in their community.

Federal Income Taxation-Richard Schmalbeck 2018-08-08 Unique in its structure, Federal Income Taxation, Fifth Edition presents core materials that cover the basics of tax law and then offers supplemental "cells" at the end of the book that are self-contained units with more in-depth discussion of certain topics.

Professors and students will benefit from: A thoroughly updated text that incorporates the extensive changes to the Code enacted by the Tax Cuts and Jobs Act of 2017 New cases reflecting developments since the previous edition. A new cell on the taxation of Bitcoin and other cryptocurrency. Core text (about 500 pages) that covers the leading cases and explains the substantive tax law that is essential to a basic understanding of federal income tax law and principles.

Novel "Cells," self-contained, optional units at the end of the book that supplement the core text by presenting additional material and treating a limited number of topics in greater detail. Notes and questions providing background information and placing the cases and statutes in context. More than 150 problems throughout the core text and cells that challenge students to apply theory to specific situations. An annual "inflation supplement" issued every December that provides updated problems and answers to reflect inflation adjustments for the upcoming year, as well as updated tables where relevant.

Taking Action Against Clinician Burnout-National Academies of Sciences, Engineering, and Medicine 2020-01-02 Patient-centered, high-quality health care relies on the well-being, health, and safety of health care clinicians. However, alarmingly high rates of clinician burnout in the United States are detrimental to the quality of care being provided, harmful to individuals in the workforce, and costly. It is important to take a systemic approach to address burnout that focuses on the structure, organization, and culture of health care. Taking Action Against Clinician Burnout: A Systems Approach to Professional Well-Being builds upon two groundbreaking reports from the past twenty years, To Err Is Human: Building a Safer Health System and Crossing the Quality Chasm: A New Health System for the 21st Century, which both called attention to the issues around patient safety and quality of care. This report explores the extent, consequences, and contributing factors of clinician burnout and provides a framework for a systems approach to clinician burnout and professional well-being, a research agenda to advance clinician well-being, and recommendations for the field.

Ethics and Socratic Dialogue in Civil Society-Patricia Shipley 2004 How can we build unity in an increasingly divided world? Could new forms of dialogue be used as a tool to foster understanding in today's fragmented societies? This volume represents a concerted attempt to think through the difficult and urgent issues facing civil society today. It considers the potential role of dialogue, especially modern Socratic Dialogue, to help answer some of the ethical questions and issues that face us all. Itself a result of international dialogue and collaboration, this book will be of interest to anyone concerned about the role of civil society in today's world.

Car-sharing-Adam Millard-Ball 2005

Recovery from Schizophrenia-Richard Warner 2004-01 Recovery from Schizophrenia, from its first publication, was acclaimed as a work of major importance. It demonstrated convincingly, but controversially, how political, economic and labour market forces shape social responses to the mentally ill, mould psychiatric treatment philosophy, and influence the onset and course of one of the most common forms of mental illness. In this revised and updated third edition, Dr Warner analyses the latest research to extend the conclusions of the original work and tells us whether conditions and outcomes for people with schizophrenia are getting better or worse for people in Britain and America in recent years. In addition, he * critiques recent approaches to preventing the occurrence of schizophrenia * suggests innovative strategies for advancing the economic situation of people with mental illness * describes the latest advances in the rehabilitation of people with schizophrenia * provides a guide on how to combat the stigma of mental illness at local and national level. Recovery from Schizophrenia's radical analysis of the factors affecting the outcome of schizophrenia is essential reading for all psychiatrists, mental health professional, mental health advocates, social workers, rehabilitation personnel, and psychologists.

Religious Organizations in the United States-James A. Serritella 2006 This book examines the legal structures within which religious organizations conduct their activities. The legal structures of religious organizations encompass not only their corporate organizations, but the many ways employment, property ownership, decisions regarding forms of ministry, and participation in society define a particular institution. The authors, from a variety of practicing, religious, and scholarly backgrounds, provide a range of perspectives — both practical and theoretical — on these issues. The book fills a void in the current resources, providing a detailed description of policies, identity, and the effect of legal rules on church structures. Contributors include Patricia Carlson, Angela Carmella, Mark Chopko, Carl Esbeck, Patty Gerstenblith, H. Reese Hansen, Donald Hermann, Bernadette Kenny, Douglas Laycock, William Marshall, Martin Marty, John Massad, Patrick Schiltz, Elizabeth Sewell and Rhys Williams.

A Voice for Nonprofits-Jeffrey M. Berry 2003-08-20 Nonprofit organizations are playing an increasingly important role in delivering basic government services. Yet they are discouraged by federal law from participating in legislative lobbying efforts—even on issues that affect their clients directly. Without the involvement of nonprofits in the governmental process, the vulnerable populations they serve are left without effective representation in the political system. A Voice for Nonprofits analyzes the effect of government restrictions on the participation of nonprofits in the policymaking process and suggests ways to address the problems. The relationship between nonprofits and the government is ideal in many respects, according to Jeffrey M. Berry and David F. Arons. By underwriting operating budgets and subcontracting the administration of programs to nonprofits, governments at all levels are able to take advantage of nonprofits' dedication, imagination, and private fund-raising skills. However, as nonprofits assume greater responsibility for delivering services traditionally provided by government, that responsibility is not matched by a congruous increase in policy influence. Berry and Arons believe the lobbying restrictions should be eased so that nonprofits may become more involved in public policymaking. Their recommendations are designed to ensure that nonprofit organizations—and the constituencies they serve—are effectively represented in the American political system.

Nonprofit Organizations, 2001 Case Supplement-James F. Fishman 2001-09

Explaining, Demise Among Nonprofit Organizations-Mark Alan Hager 1999

New York City Law Review- 2005

Pain Management and the Opioid Epidemic-National Academies of Sciences, Engineering, and Medicine 2017-09-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Property-tax Exemption for Charities-Evelyn Brody 2002 Contributors in municipal studies, law, and philanthropic studies discuss property-tax exemption for charities and how public perception on property-owning charities differs from reality. They survey the legal and political landscape of property-tax exemption for nonprofit organizations, examine the development of the current structure of nonprofit property-tax exemption and its legal rationales, and assess mechanisms adopted by local municipalities to offset some of the revenue lost because of exempt properties. Material originated at the December 1997 26th Annual Conference of the Association for Research on Nonprofit Organizations and Voluntary Action. Annotation copyrighted by Book News, Inc., Portland, OR.

Jewish Megatrends-Sid Schwarz 2013 A collection of essays detailing the challenges the American Jewish community faces as it tries to adapt to a new social landscape and a new generation.

The Law of Health Care Organization and Finance-Barry R. Furrow 2004 A spin-off publication of Health Law: Cases, Materials & Problems, 5th Edition, the text begins with an introduction to fundamental concepts affecting law and policy. The next chapter considers quality control in the health care setting. The following four chapters examine issues central to structuring integrated systems and the organization of health care institutions. It also covers the problem of health care access and cost control issues, with particular attention paid to the ongoing policy debate about the proper role of government and the nation's responsibilities to provide health care for indigent citizens. Examines legal oversight of private health financing, and looks at Medicare and Medicaid.

Financial Services Fact Book-Insurance Information Institute 2009
