Higher Expectations-Derek Bok 2020-08-25 How our colleges and universities can respond to the changing hopes and needs of society In recent decades, cognitive psychologists have cast new light on human development and given colleges new possibilities for helping students acquire skills and qualities that will enhance their lives and increase their contributions to society. In this landmark book, Derek Bok explores how colleges can reap the benefits of these discoveries and create a more robust undergraduate curriculum for the twenty-first century. Prior to this century, most psychologists thought that creativity, empathy, resilience, conscientiousness, and most personality traits were largely fixed by early childhood. What researchers have now discovered is that virtually all of these qualities continue to change through early adulthood and often well beyond. Such findings suggest that educators may be able to do much more than was previously thought possible to teach students to develop these important characteristics and thereby enable them to flourish in later life. How prepared are educators to cultivate these qualities of mind and behavior? What do they need to learn to capitalize on the possibilities? Will college faculties embrace these opportunities and make the necessary changes in their curricula and teaching methods? What can be done to hasten the process of innovation and application? In providing answers to these questions, Bok identifies the hurdles to institutional change, proposes sensible reforms, and demonstrates how our colleges can help students lead more successful, productive, and meaningful lives.

Make Your Kid A Money Genius (Even If You're Not)-Beth Kobliner 2017-02-07 The New York Times bestseller that is a must-read for any parent! From Beth Kobliner, the author of the bestselling personal finance bible Get a Financial Life—a new, must-have guide showing parents how to teach their children (from toddlers to young adults) to manage money in a smart way. Many of us think we can have the “money talk” when our kids are old enough to get it...which won't be for years, right? But get this: Research shows that even preschoolers can understand basic money concepts, and a study from Cambridge University confirmed that basic money habits are formed by the age of seven. Oh, and research shows the number one influence on kids' financial behaviors is mom and dad. Clearly, we can't afford to wait. Make Your Kid a Money Genius (Even If You're Not) is a jargon-free, step-by-step guide to help parents of all income levels teach their kids—from ages three to twenty-three—about money. It turns out the key to raising a money genius isn't to teach that four quarters equal a dollar or how to pick a stock. Instead, it's about instilling values that have been proven to make people successful—not just financially, but in life: delaying gratification, working hard, living within your means, getting a good education, and acting generously toward others. More specifically, you'll learn why allowance isn't the Holy Grail when teaching your kid to handle money, and why after-school jobs aren't always the answer either. You'll discover the right age to give your kid a credit card, and learn why doling out a wad of cash can actually be a good parenting move. You don't need to be a money genius to make your kid a money genius. Regardless of your comfort level with finance—or your family's income—this charming and fun book is an essential guide for passing along enduring financial principles, making your kids wise beyond their years—and peers—when it comes to money.
