What Has Nature Ever Done For Us?-Tony Juniper 2013-01-10 From Indian vultures to Chinese bees, Nature provides the 'natural services' that keep the economy going. From the recycling miracles in the soil; an army of predators ridding us of unwanted pests; an abundance of life creating a genetic codebook that underpins our food, pharmaceutical industries and much more, it has been estimated that these and other services are each year worth about double global GDP. Yet we take most of Nature's services for granted, imagining them free and limitless ... until they suddenly switch off. This is a book full of immediate, impactful stories, containing both warnings (such as in the tale of India's vultures, killed off by drugs given to cattle, leading to an epidemic of rabies) but also the positive (how birds protect fruit harvests, coral reefs protect coasts from storms and how the rainforests absorb billions of tonnes of carbon released from cars and power stations). Tony Juniper's book will change whole way you think about life, the planet and the economy

A Few Kind Words and a Loaded Gun-Razor Smith 2005-04 Brutal and violent, this tell-all is a personal account of the life of Razor Smith and the world in which he lived, where ruthlessness, viciousness, and savagery are prized and admired. In prison more than half of his life for assaults and armed robberies, Smith became confined in a peculiar kind of hell from which his only route of escape was to master the art of writing. His book shows us a face of crime not often encountered in run-of-the-mill true-crime books: a face as tender and intimate as a lover's, yet as frightening as a killer's. Powerfully written from beginning to end, this is an extraordinarily vivid account of how a kid from South London became a career criminal, a blistering indictment of a system that brutalized young offenders, and an unsentimental acknowledgment of the adrenaline-fueled thrills of the criminal life. Shocking, fascinating, and horrifying, it also reveals Smith as one of the most talented writers of his generation.

West of Wawa-Lisa De Nikolits 2011 Emotionally battered and bruised, 29-year-old Australian immigrant Benny is looking for escape, not redemption. Escape from herself and the dismal failures of her life: her first solo art exhibition is panned by critics and her husband left her for an Andy Warhol look-alike. Isolated from her family, her career as an abstract artist in ruins, she comes to Canada and finds solace working eighteen hours a day as a graphic designer in a disreputable agency. Numbing her pain with hard work, she self-medicates with prescription meds, and becomes involved in a series of increasingly dubious relationships with ill-suited unreliable men who lead her into danger. Cutting off all ties with normalized daily routines, Benny leaves her job and sets off on a road trip adventure across Canada, hoping she will discover who she wants to be and where she wants to be it. During the bus trip she discovers junk food, cigarettes, hash and drinks a lot of alcohol. She confuses sexual attraction with love in a series of relationships with loser bad boys and continues to put herself in destructive, potentially dangerous situations. Hardcore, she travels for the most part by Greyhound bus, sinking deeper into the underbelly of a world that offers her the anonymity she seeks. Funny, aggressive, fearless and vulnerable, Benny is a road-warrior with a backpack of opiates, a map and a guileless sense of naiveté. In seventy-two days, she travels nearly ten thousand miles overland and more by flight and train; she's a determined modern-day pioneer. This coming-of-age novel is narrated with wry humour and filled with a cast of engaging characters. A tale of sexual adventure and feminist learning, Benny looks for escape but emerges a heroine instead; with mistakes, epiphanies and friendships helping forge her a home and a sense of identity in the true North.

Cayenne Pepper Cures-Sharon Daniels 2012 If I had the time, I'd drive from house to house, shaking people out of their beds and telling them to wake up to the miracles of cayenne. But I can't, so I've got the next best thing. This report, which I've been compiling for a while, is brimming with the fiery brilliance of cayenne and all that I've found out about it. For example, cayenne has been known to cure 17 big diseases. It has been known to stop a heart attack in a matter of minutes. It can sharpen your vision better than the most powerful contact lenses available. It can expand your arteries like anything, giving the blood room to really flow and travel everywhere, from your arms (giving you strength) to your brain (giving you better brainpower). It can cure arthritis and much, much more. If your heart can't pump enough blood to a certain area, take cayenne pepper. Because if you're on prescription medications, you could take up to a year (or more!) to heal. But if you take cayenne, you could cut it down to a month or two. Did you know that if you take garlic in the right proportions, you can bring your blood pressure back to normal in three months? Well, if you add cayenne, you could cut that down to three days. Cayenne can unclog your kidneys and your sinuses, allow you to breathe freely and restore broken, bleeding gums to normal. Cayenne, in short, is a kitchen miracle. I owe my health to cayenne. I hope that by reading this report, you soon will too.
