The Colour, Light and Contrast Manual-Keith Bright 2010-01-06 Endorsed by the Society of Light and Lighting, this practical bookoffers comprehensive guidance on how colour, light and contrast canbe incorporated within buildings to enhance their usability. Thebook provides state-of-the-art, clear guidance as well as available information source for busy professionals involved in thedesign or management of new and existing environments. The ways colour, light and contrast are used within builtenvironments are critical in determining how people interact withthe space, and how confident, safe, and secure they will feel whendoing so. They also have a major influence on a person'ssense of well-being and their ability to use the environmentindependently and without undue effort. Understanding how to use colour and contrast and how they areinfluenced by both natural and artificial lighting is vital for allthose involved in the design and management of the environments andspaces we all use. In recent years there has been a considerable amount of workundertaken to further our understanding of how colour, light andcontrast affect emotion and sensory abilities, and how they canassist or hinder people in their everyday lives. Other publications consider these issues individually but TheColour, Light and Contrast Manual: designing and managing inclusivebuilt environments draws knowledge and information together toproduce a unique, comprehensive and informative guide to how thethree elements can work together to improve the design andmanagement of environments for us all. Architectural Colour in the Professional Palette-Fiona McLachlan 2013-08-15 How do architects use color? Do they adopt a different strategy or starting point for every project? Do they gradually cultivate individual color palettes, which develop alongside their body of built work? Do they utilize, or are they aware of, the body of theoretical work that underpins the use of color in the past, and forms the basis of most of the color systems commercially available today? Informed by the author's thirty years in architectural practice and academia, this book investigates, documents and analyzes the work of a number of contemporary architects in order to respond to these questions and provide a clear reference of contemporary color use. The book suggests a holistic approach to the integration of color in architecture; through a series of thematic essays, the text explores and reveals underlying principles in color design and application. Case studies include: AHMM Caruso St John Erich Wiesner and Otto Steidle Gigon/Guyer O'Donnell + Tuomey Sauerbruch Hutton Steven Holl UN Studio. The book provides clear insights into how particular contemporary architects use color confidently and intelligently as an integral part of their design philosophy, in conjunction with their choices of materials and finishes. Offering a stimulating view of the history of color theory, and pragmatic advice to practicing architects, this book will be inspiring to both design professionals and students.
Poultry Industry- 1974

Fire Protection Guide on Hazardous Materials-National Fire Protection Association 1969
The Australian Trade Practices Act 1974-D.K. Round 2013-04-17 This book presents a collection of papers which evaluate the achievements of the Australian Trade Practices Act 1974 in making Australian markets more competitive. The contributors have all played major roles in Australian and New Zealand antitrust actions, either as expert economic witnesses, as antitrust enforcers, as judges or as quasi-judicial administrators. No other publication presents such in-depth economic analysis of the Act and the cases decided under it in its first two decades of its operation. As well as an introductory paper, this collection includes a foreword by the Hon. George Gear, Assistant Treasurer of the Australian Government and Minister responsible for the administration of the Act, plus two broad analytical overviews of the last two decades of Australian antitrust actions by two economists who have continually been at the heart of antitrust proceedings. In addition, papers are provided which give a judicial view of the Act and economic analysis, which compare the Act with its New Zealand counterpart. Other contributions look in detail at those sections of the Act which cover mergers, misuse of market power, price-fixing and vertical practices. The book shows that the Act has had a major impact on Australian market behavior. Judges, lawyers and economists between them have produced a truly Australian approach to antitrust, which has reflected overseas trends in both law and economics, as well as developed a unique Australian flavor. The book will be of interest to academic and practicing lawyers and economists, judges and corporate executives. It will be essential reading for Australian students in undergraduate courses in antitrust law, business regulation, antitrust economics and industrial organization. It provides by far the most comprehensive economic evaluation of Australian antitrust yet published and so will be the definitive source of information on this topic for non-Australians interested in comparative antitrust legislation and enforcement issues.
Current Information in the Construction Industry- 1975
The Rough Guide to Shopping with a Conscience-Duncan Clark 2007 Addresses the impact of shopping habits on the planet, examining the goods that we buy and use everyday in terms of company policies and practices, fair trade, working conditions, and free-market globalization.
